**Benzophenone** (*diphenyl ketone*),
acylhydrazones†, 6972*fi*, 6978*c*.
anise, as catalyst in reaction of $C_2H_4$ with carboxylic acids, P 670*g*.
cleavage of, with *tert*-BuOK, 1349*b*.
compd. with phenol, infrared and Raman spectra of, 107*b*.
crystn. and nuclei in melt of, 3278*a*.
derivs., 7407*f*.
as insecticides, 7628*f*.
reaction with Grignard reagents, 8369*i*.
in tuberculosis chemotherapy, 8553*f*.
4,4'-dialkyl derivs., 7004*g*.
dielec. loss, microwave absorption and relaxation time in, 6018*h*.
effect of vapors of, on aspergilli, 6277*b*.
formation of, from $Ph_2CHN{:}CHPh$ and $KNH_2$ in liquid $NH_3$, 2981*d*.
in nitration of $Ph_2CH_2$, 4217*b*.
in oxidation of $Ph_2CH_2$, 2194*b*.
in pyrolysis of Ca benzoate, 1318*b*.
from NaOBz distn., 7801*a*.
hydrazone, diazotization of, 5789*f*.
as insecticide, 5894*g*.
*O*-methyloxime, and salts, 7465*a*.
microwave absorption by, 2514*h*, 6019*g*.
in mosquito control, 1144*c*, 8602*g*.
in oxidation-reduction reactions in the presence of Raney Ni, 191*e*.
oxime, Beckmann rearrangement of, in presence of $O^{18}$, 5011*h*.
oxime, sulfonates, prepn. and reactions of, 2593*i*.
peroxide dimer, formation of, 5622*c*.
phenylhydrazone, as polymerization stopping agent, 8727*i*.
phenylhydrazone, reaction with NaOH, 1026*i*.
prepn. of, 565*e*, 1743*b*, 2178*b*.
in racemization of 2-methyl-1-butanol, 4215*c*.
reaction (photochem.) with Et orthoformate, 6515*d*.
reaction with 9,10-dihydroanthracene, 619*g*, 6194*b*.
reaction with Grignard reagents, 1718*h*.
reduction of, P 7509*g*.
solns. in $C_6H_6$ and paraffin oil, dielec. properties of, 6019*b*.
spectrum of, 3715*g*.
system: $C_2H_4$–, 4937*e*.
system: picric acid–, 6060*e*.
**Benzophenone, 4-amino-**, reaction products with maleic anhydride polymers with Me methacrylate, 8202*c*.
——, **2-benzhydryl-**, cyclization of, velocity of, 6194*d*.
——, **benzoyl-**. See *Benzene, dibenzoyl-*.

as curing agent in ethylene glycol-dicarboxylic polyester rubbers, P 432f.
desensitization of, P 1806i, P 1807a.
detn. in oxidized gasoline, 1952g.
effect on bromination of 2- and 3-methylthiophene with *N*-bromosuccinimide, 6612h.
on heat deterioration of GR-S rubber, 8188f.
on oxidation of Na butadiene polymer, 925b.
explosion of, 405f.
in flour, effect on dogs, 2707h.
as imitator of polybutadiene popcorn formation, 1598b.
mixt. with styrene, effect in thermal vulcanization of butadiene-Na rubber, 6858a.
oxidizing action of, 4085i.
as oxidizing agent for heavy alkylated hydrocarbon oils, P 5584c.
as plasticizer in Butyl rubber, P 4046e.
as polymerization inhibitor and initiator in isoprene, 5621f.
purification of, 1570a.
reaction of Cl and O with $CCl_3{:}CCl_3$ in presence of, P 7954d.
reaction of, $SO_2Cl_2$ and 1-octene, 559e.
reactions of, 3394g.
reaction with BzH, 612i.
**Benzoyl sulfide†**, 8353d.
**Benzyl** (*free radical*), electronic structure of, 2512a.
formation in decompn. of benzyl *p*-toluenesulfonate, and its reactivity, 7797h.
formation in reaction of $NH_2$ and toluene, 7797i.
heat of formation of, 6479c.
**Benzyl, α-vinyl-**, 612c.
**Benzyl alcohol**, acetate—see "benzyl ester" under *Acetic acid*.
adsorption by $PhNH_2$, 4641f.
as antioxidant for paraldehyde in motor fuel, P 8130c.
assocn. of, 178h.
assocn. of, and elec. conduction by, 8772c.
azelate, as plasticizer in Butyl rubber, P 5624h.
benzaldehyde detn. in, 8078b
benzoate—see "benzyl ester" under *Benzoic acid*.
in bitter-almond oil, 6789gh
camphor optical activity in, effect of $H_2O$ on, 8813a.
in chloride argentometric detn., 8947f.
*l*-citronellate, 4633g.
crit. mixing temps. in identifying and detg. aliphatic hydrocarbons, 8309a.
derivs., 9070g
and derivs. from nitration of toluene, 4216f
diazo ketone rearrangement in, 4653h.
effect as solvent on insect repellents, 2363d.
effect on syneresis of Na oleate gels, 4080a.
esterification of, 1319f.
formation of, in alk. hydrolysis of $PhCH{:}CHCHO$, 5763c.
formation of, in reduction of BzNEt₃ with $LiAlH_4$, 1312f.
from hydrogenation of benzyl thiolbenzoate, P 3445d.
hydrogenation on Pt, kinetics of, 5657d.
hydrogen (active) detn. in, 3316f.
manuf. of, P 1805i.
manuf. of, from coal, 9413c.
methacrylate, fungistatic activity of, 9334c.
mixts. with AmOH, colored suspensions of inulin in, 8801b.
in narcissus oil, 2372e.
oxidation of, by Br in the presence of $BrO_3^-$, 8350h.
phosphorescence of, 8282c.
phys. consts. of, 2956b.
potassium deriv.—see *Potassium, benzyloxide*.
prepn. of, 2570g.
propionate, phys. properties, soly. and application to flavors and perfumery, 2372g.
reaction with $C_6H_6$ in presence of $AlCl_3$, 5759g.
reaction with Et phenylacetate, kinetics of, 7418f.
reaction with *d*-limonene, 8369b.
spectrum in $CCl_4$, 4573h.
starch ether, resinous products from resins and, P 2466f.
surface tension of aq., 8797f.
system: glycerol-$H_2O$-, P 9081d.

N-phenyl-, 1312f.
deln. of active H in, 3316j.
o-phenyl-, and hydrochloride, 1356a.
o-phenyl-N, N-dipropyl-, and hydrochloride, 1355g.
N, N, N,α-triethyl-, 7921d.
N, N,α-trimethyl-, d(+)-, 2967b.
and picrate, 6177d, 7919i.
**nzylation**, of chrysin, 6381.
of β oxoacrylomtrile acetals and of derivs. of cyanoacetic acid esters, 3356f.
of phenol HCHO resins, P 4717i.
**nzyl benzhydryl phosphate**, $(C_7H_7)_2C_{13}H_{11}PO_4$, 600c.
**nzyl bromide**. See *Toluene, α-bromo-*.
**nzyl cellosolve**. See *Ethanol, 2-(benzyloxy)-*.
**nzylcellulose**. See "benzyl ether" under *Cellulose*.
**nzyl chloride**. See *Toluene, α-chloro-*.
**nzyl chlorophosphate** ($(PhCH_2)_2PO_2Cl$), 599h.
phosphorylation with, 2650a.
**nzyl cyanide**. See *Acetonitrile, phenyl-*.
**nzyl desyl phosphate**, $(C_7H_7)_2(C_{14}H_{11}O)PO_4$, 600c.
**nzyl disulfide**, 1399g, 2187i.
ectane lubricating soins. of, effect on friction and surface damage at high sliding velocities, 1953d.
and compd. with $AgNO_3$, 1325h.
as corrosion inhibitor against $CO_2$ in petroleum wells and processing, P 7221h.
spectrum and structure of, 7410g.
**Benzyl ether**, 6622d.
insectifuge from, P 5153d.
mixt. with $CCl_4$ as solvent for rubber, 3223i.
phys. properties of, 5150e.
prepn. of, 2573c.
as softener in reclaimed rubber, 8191g.
**Benzyl group**, effect on analgesic action, 4245h.
removal of, 2650d.
removal of, from polybenzyl phosphates and pyrophosphates, 2650d.
resonance energy of, 5306e.
**Benzyl hyponitrite**, as catalyst for polymerization, P 5641c.
**Benzylidene chloride**. See *Toluene, α,α-dichloro-*.
**Benzylidenimine**, 2(or 4)-bromo-α,6-diethyl-5-methoxy-, and hydrochloride, 185f.
α-tert-butyl-2,3-dimethoxy-, and hydrochloride, 185f
α-ethyl-2,5(and 2,6)-dimethoxy-, and hydrochlorides, 185d
α-ethyl-o-methoxy-, and hydrochloride, 185d.
α-ethyl-2,3-methylenedioxy-, and hydrochloride, 186b.
N-phenyl- See *Anilsne, N-benzylidene*
**Benzylidyne chloride**. See *Toluene, α,α,α-trichloro-*.
**Benzylidyne fluoride**. See *Toluene, α,α,α-trifluoro-*.
**Benzyl ketone**. See *2-Propanone, 1,3-diphenyl-*.
**Benzyl mercaptan**. See *α-Toluenethiol*.
**Benzyl nitrate**, formation of, from nitration of toluene, 4216f.
**Benzyl nitrile**. See *Acetonitrile, phenyl*
**Benzyl phosphate**, $(PhCH_2)_2HPO_4$, 600b
**Benzyl phosphite**, $(PhCH_2)_2HPO_3$, 599g.
**Benzyl selenide**, as lubricant additive P 6820g.
**Benzyl silicate**, $(PhCH_2)_4SiO_4$, 9028e.
**Benzyl sulfide**, compd. with AuCl, 1313d
reaction with N haloamides, 172d.
spectrum and structure of, 7410d
**Benzyl sulfone**, spectrum and structure of, 7411b.
**Benzyl sulfoxide**, 7410a.
formation of, in reaction of N-haloamides with thio ethers, 172f.
**Benzyl thiophosphate**, $(C_7H_7O)_2PS_2H$, in Mo detection, 7859b.
**Berberine**, in barberry and its pharmacol. action, 9246b.
detection of, 5535d
sulfate, isolation from barberry root, 7194i.
, **dihydroanhydro-***, 6631c.
**Berberis**. See *Barberry*.
**Bergamot oil**. See *Oils*.
**Bergaptene**, 1910e.
**Bergenin**, in Saxifragaceae, 8451a.
**Berger rhythm**. See "potentials of" under *Brain*.
**Bergh, van den**. See *van den Bergh*.
**Berginization**. See *Hydrogenation*.
**Bergius, Friedrich**, biography, 8219e.
**Beriberi**. (See also "B" and "$B_1$" under *Avitaminosis* and *Vitamins*.) 1090e.
**Berlin blue**. See *Prussian blue*.
**Berlin green**. See *Prussian green*.
**Berlinite**, and its piezoelec. uses, 2129d.
transitions of, 1552h.
**Bermuda grass**. See *Grasses*.
**Berries**, compn. and vitamin C in Czechoslovak, 3536f.
Mikrobin in preservation of, 5130a.
mite control on bushes, 1897f.
orange-tortrix control on, 5148e.
seed detn. in, 8572a.
vitamin retention during processing and storage of, 9329a.
**Berseem**, seeds of, analysis of, 5455i.
**Berthierite**, in Canada (western), 8982i.
of Italy, 2128a, 4979b.
**Berthollet**, biography, 1617g, 2049d.
**Berthollides**. See *Alloys; Solutions, solid*.
**Beryl**. (See also *Emeralds*; etc.)
beryllium manuf. from, 1919ghi, 1920ab.
beryllium oxide manuf. from, P 3576c.
compn. of, 1919g.
compression of, 4917b.
elasticity of, 8787c.
in granite pegmatite dikes near Mt. Legnoncino, Italy, 4610a.
of Italy (Tuscany), 2128b.
-mica deposits of Middlesex Co., Conn., and their flotation, 4609b.
in pegmatites of Black Mt., Maine, 4190d.
*in pegmatites* of Custer Co., S. Dak., sampling, analyses and flotation of, 3322g.
of Red Hill, Maine, 8319a.
polishing of, effect on hardness and surface structure, 4071i.
in tantalum-bearing deposits of Pilbara goldfield, W. Australia, 6124e, 6546i.
**Beryllia**. See *Beryllium oxides*.
**Beryllium**, alpha-ray bombardment of, cross section for neutron emission in, 8265e.
atomic wt. of, 2051c.
Australian industry of, 6546g.
casting of, 8996i.
cation-exchanger dynamic ctivity toward, 3268f.
in coal, 1941d, 8639e.
compression of, 4917a.
copper deoxidation with, 6555c.
cross sections for, for nuclear photoeffect, neutron scattering and $n,2n$ process, 6073e.
crystallochem. electronegativity of ion of, 8231a.
as deoxidizer in Cr-Mo alloys, 8336i.
deuteron bombarded, angular distribution of neutrons from, 8866d.
Doppler broadening of γ-ray lines from, 4117c.
γ-rays and neutrons from, 4093g, 4561i.
γ-rays from, 4093g, 8876ab.
$Li^7$ from, 2088g.
diffusion in light alloys and metals, 2559e.
diffusion in steel, 1699g.
discontinuities in at. distances in crystals of, electronic interactions and, 6030k.
disintegration energy of $Be^8$, 4947b.
disintegration of, electro- and photo-, 8265a.
effect on brass, 2915i.
on color reaction of azo dyes with Mg ion, 597h.
on grain growth in Cr steel, 1297b.
on grain size of Al-Cu alloys, 8337f.
on oxidation of Ni, 4619f.
on oxidation resistance of Cr-Ni-Ta alloys, 3332h.
on phosphatase (alk.), 9115dg.
on steel contg. Cr, Al and Si, P 3770h
energy levels, spectrum, ionization potentials and magnetic splitting factors of, 8883f.
in extn. of Mn from Fe, C, etc., P 5727f.
films of, 2481g.
effect of heat on, 2482b.
structure of, 2482d.
gamma-ray bombarded, angular distribution of neutrons from, 8855bc.
$Be^8$ and neutrons from, and theory of this reaction, 4117e.
energy of neutrons from, 6506c.
$Li^8$ and protons from, 4093g.
neutrons from, 7811f.
photo-neutrons from, 4090i.
threshold for reaction in, 4115f.
gamma-ray cross section of, 3283f.
granulomatosis and pneumonitis from, 3118i.
gyromagnetic ratio and magnetic moment of, 4137a, 5303f.
gyromagnetic ratio of, 8865b.
hazards of, 3947i, 5883f, 8577de.
heat of vaporization and vapor pressure of, 2061f.
in interstellar space, 7334e.
isotope of mass 7, decay of, 8866c.
degree of ionization and period of disintegration of, 4555b.
effect of at. electrons on decay const. of, 3283d.
effect of ionization on decay of, 4117d, 8866b.
K-electron capture by, 8872d.
from $Li^7$ by proton action, threshold voltage for, 3283d.
mass value for, 8850d.
metabolism of, 4309f.
isotope of mass 8, from $Li^7$ capture of proton, γ-rays from, 484d.
isotope of mass 10, Al absorption of β-rays from, 4096c.
β-decay of, 4116cd, 8870k.
spin of, 491i.
from lithium by proton action, 4114d.
in magnetic field, ratio of resonance frequency to proton frequency of, 8262g
magnetic moment of, 6918b.
mass defects of, 8271i.
mesotron-bombarded, electrons from 6504g.
minerals, He in, 7875b.

*minerals*, of India, 525*c*.
from Londonderry, Australia, 4185*i*.

of bears (polar and Japanese), 6297*i*.
bile-acid excretion in, in choledochostomy drainage and effect of administration of desiccated bile, 7572*b*.
bilirubin and bromosulfalein in, 1476*a*.
bilirubin conversion in, 3082*b*.
bilirubin extractable with $CHCl_3$ from, physiopathological and clinical significance of, 5853*g*.
bromosulfalein and pigments in, effect of choleretic agents on, 1869*i*.
catalase activity of, 6257*c*.
choleretic effect on compn. of, of dog with permanent biliary fistula, 2318*f*.
cholesterol soln. in, 9210*d*
copper (radioactive) in, 3098*f*
effect on diuresis in rats, 1107*a*.
electrophoresis of bovine gall bladder, 2264*c*.
estrogens in, in pregnancy, 8490*e*.
etiocholanediol-3(α),17(β), pregnanediol-3(α),20(β) and pregnanol-3(α)-one-20 in, in pregnancy, 1824*f*.
in feces, 3918*e*.
flow in hepatitis, 8522*g*.
flow of, effect of secretin, pneumogastric nerve stimulation, etc. on, 304*g*.
hepatic clearance of, 296*e*.
insufficiency, lipide absorption and, 2296*f*.
jaundice-serum phosphatase in, 297*f*.
phosphatase in, in biliary fistula dogs, 4714*c*.
powd. ox, 5907*b*.
pseudomucin from, effect on van den Bergh reaction, 6684*c*.
repellent for grain and seeds from, P 3967*i*.
secretion of, during alloxan diabetes, 4364*f*.
effect of bromotrihydroxyabietic acid on, P 1441*e*.
mechanism of action of plant drugs active on, 5115*d*.
physiology and pharmacology of, 5493*g*.
prothrombin time in aniline poisoning in relation to, 3525*a*.
steatorrhea and, 7105*d*.
steroid-hormone absorption and, 8035*i*.
tocopherol in, in relation to plasma content, 7122*a*.
**Bile acids**. (See also *Cholic acid; Dehydrocholic acid; Desoxycholic acid; Glycocholic acid; Taurocholic acid*.) 1335*b*.
with aromatic ring A, 7494*d*.
biliary excretion of, in choledochostomy drainage, 7572*b*.
configuration of, 1429*c*.
degradation of side chain of, 3430*f*, 6639*e*.
7-dehydrocholesterol as source of, 5848*d*.
effect on *Escherichia coli*, 7077*h*.
formation of, 5848*c*.
11-keto, 4679*d*.
optical rotation of, 4680*e*.
pancreatic lipase and, 6267*d*.
and related compds., 1790*c*.
steroids from, 3433*f*.
**Bile ducts**, book: Diseases of, 4762*g*.
diseases of, heparin in blood in, 3513*h*.
in hypothyroidism, 9233*c*.
sphincter of Oddi, effect of anesthetics on, 5867*fg*.
**Bile pigments**. (See also *Bilirubin; Blood pigments*.) 4257*a*.
in bile and its formation, 3082*c*.
in bile, effect of choleretic agents on, 1869*i*.
in catalase, 5058*g*.
from erythrocytes, 5818*g*.
in liver in infectious hepatitis, 3922*e*.
review on, 704*d*.
**Bile salts**, blood-serum cholinesterase, sympathic-parasympathic equil. and, 2258*g*.
effect of cholesterol and, on aorta as affected by vitamin E, 7097*g*.
effect of secretin and pneumogastric-nerve stimulation on, 304*h*.
effect on adrenaline liberation from adrenal glands, 6738*i*.
on coliform bacilli and rough variants of intestinal pathogens, 4329*a*.
on fibrinogen and its clotting, 9096*b*.
on gram-positive protein complexes, 269*d*.
on intestinal motility, 1865*e*.
on mineral metabolism, 2688*a*.
in emulsification of fats in intestines, 9197*i*.

**---, desoxy-***, amino acid from, detn. of amino N in, 4323*h*.
**Biliary tract**. (See also *Bile duct;* and "biliary" under *Calculi*.)
diseases of, biliary excretion of bile acids after, 7572*b*.
diseases of, effect of liver antitoxic principle on 1860*c*.
fistula and obstruction of, phosphatase in bile and blood serum in, 4714*c*.
Meperidine effect on, 8552*h*.
obstruction of, phosphatase in blood serum after, 4750*h*.
obstruction of, phosphatase in blood serum after nephrectomy and, 4751*a*.
physiol. and pathol. changes in, 304*f*.
xanthomatous cirrhosis of, 3095*f*.
**Bilifuscin**, as blood-pigment decompn. product, 5844*f*.
**Bilin**, in feces of healthy children from countries with indigenous malaria, 3516*c*.
**Bilineurine**. See *Choline*.
**Bilinogen**, in feces and urine of children, 2691*d*.
**Bilipurpurine**, isolation from erythrocytes, 5818*i*.
**Bilirubin**. (See also *Diazo reaction; Fresco bilirubin*.)
in blood, in alcoholism, 2330*d*.
of children, 2691*d*.
combined state of, 8519*d*.
effect of Pb on, 4770*g*.
in leishmaniasis, 2312*d*.
in relation to age and sex, 7567*i*.
in various diseases, 7126*h*.
in blood serum, effect of Na nicotinate on, 9255*i*.
during icterus, 3918*g*.
urine content and, 3913*c*.
in various disorders, 8516*d*.
chloroform-extractable, from bile, physiopathologic and clinical significance of, 5853*g*.
complex with albumin, 8485*a*.
conversion in bile and intestines, 3082*b*.
derivs., 9110*f*.
detn. in blood, 4722*c*, 6683*i*.
in blood, nomograph for, 9135*e*.
in blood serum, 6683*g*.
in urine, 7116, 1452*i*, 7992*g*.
effect of secretin and pneumogastric-nerve stimulation on, 304*h*.
effect on erythrocyte resistance, 9217*i*.
excretion in bile, 1476*a*.
excretion of, effect of choleretic agents on, 1870*a*.
interaction with proteins of blood serum, 5433*f*.
reduction in intestines, 6721*a*, 8497*f*.
stabilization by serum proteins, 4710*i*.
in urine during jaundice, relation to serum content, 3923*a*.
**Bilirubinemia**, after cerebral accidents, 4362*e*.
induced, as liver-function test compared with hydroxyxanthonin excretion, 8537*d*.

during jaundice, 3922*h*.
in leishmaniasis of children and effect of Sb thereon, 2313*f*.
in newborn, 8045*a*.
**Biliselectan.** See *Propionic acid, β-(4-hydroxy-3,5-diiodophenyl)-α-phenyl-*.

**Bismuth.** (See also *Actinium C; Radium C, Radium E; Thorium C.*)
adsorption of ions of, by metals, 5254*g*.
alpha-ray-stopping power of, 4124*i*.
atomic wt. of, 8764*h*.
Australian industry of, 6546*f*.
black, infrared absorption and transmission by, 944*c*.
bombarded with α-rays and deuterons, nuclear reactions of, 4123*g*.
bond and dissocn. energies of, 5240*e*.
in brain, 6719*h*.
catalyst in purification of fuel gas, 3172*i*
as cathode in electrolytic reduction of 2 methyl-3-buten-2-ol and 2-methyl-3-butyn-2-ol, 994*g*.
cathodic polarization and H overvoltage on, 8285*ab*.
coatings with, by vacuum evapn., P 104*d*.
color reaction of ions of, with azo dyes, 597*f*.
in concn. cells, 8287*d*.
copper embrittlement by, 6555*d*.
as corrosion inhibitor in HF-catalyzed alkylation, P 3190*a*.
from decay of radioactive series produced by bombardment of Th with α-rays, 4126*g*.
deuteron-bombarded, 7813*e*.
diffusion const., diffusion current and half wave of reduction of, 5327*b*.
diffusion into Cd-Pb-Sn alloy to form quaternary eutectic, 6136*d*.
disintegration of, by deuterons, 8855*e*.

effect on cathodes for electrolysis of NaCl, 505*d*.
on oxidation of molten Pb, 7881*g*.
on working behavior of Cu, 83*e*.
electrodeposition of, by internal electrolysis, 8285*f*.
electrodes of, 8288*b*.
in pH detn., 8900*ac*.
potentials of, 7350*e*, 7836*h*.
in $Na_2SO_4$ soln., effect of org. compds. on capacity of, 5316*c*.
embrittlement in deoxidized coppers and Cu alloys, elimination by Li, 5718*f*.
etching of, nital-soln. decompn. in, 5593*f*, 7229*e*.
exchange between Bi ion and, 6890*f*.
films of, polonium distribution on, 4093*h*.
as fluorescence activator, 8803*i*.
friction between metals and, 5273*a*.
gamma-ray bombardment of, threshold for reaction in, 4115*h*.
gamma-rays of, energy of, 6075*a*.
heat capacity of, at liquid-H temps., 6069*c*.
hydrogen overvoltage on, in MeOH solns., 4585*c*.
industry in 1946, 2126*i*.
ion and complex ion, $BiO_4^{4+}$, 1669*i*.
magnetic susceptibility at low temps., 8747*h*.
magnetoresistance of, 10*g*, 4066*f*.
native—see *Bismuth ores*.
neutron cross section of, 4558*h*, 6506*h*, 6909*d*.
neutron fission cross section for, 4127*d*.
nuclear inclusion bodies induced by ingestion of, acid-fastness of, 7539*g*.
occurrence and uses of, 3324*f*.
phosphorescent pigments contg., P 7832*d*.
phosphor of CaS and, decay of luminescence of, 5667*f*.
phosphors contg., 8280*g*.
stimulating action of exciting light in, 5668*e*.
temp stability of luminescence of, 3723*e*.
photoelec. effect in, 8257*h*.
poisoning by, BAl in treatment of, 3523*h*.
polarography of, effect of org. compds. on, 5316*a*.
polarography of, in fused salts, 5314*i*.
potential against Ta in electrolytes, 2101*e*.
removal from Cu, 6551*d*.
from Pb, 7388*f*, 8326*g*.
from Po-plated metal, P 8346*d*.
salivary elimination of, 4372*e*.
soly. in Hg, 7880*f*.
spectrum of, 7858*h*.
system: Ba-, heat of formation of, 5275*b*.
system: Cu-Zn, and Ag-Zn-, Parkes process and, 3764*f*.
systems with metals, activities in liquid, 4930*i*.
system: Tl-, electron arrangements in, 15*a*.

viscose formation and, 3611*b*.
from wattle wood, 847*a*.
***of paper pulp***, with Zn dithionite, 400*f*, 6410*g*.
of paper pulps and textiles with alkali or alk. earth chlorites, P 8176*a*.
review on, 6830*i*.
short process for chlorine, 7233*i*.
with sodium chlorite, corrosion resistance of steels in, 854*h*.
of sugar-cane wax, 7730*f*.
of sulfuric acid satd. esters, satd. sulfonic acids or their salts with peroxides or peracid salts, P 7242*b*.
of wool (reduced) by salts of Ce, Th, Sn or Zn, 5955*g*.
**Bleaching agents**. (See also *Bleaching powder; Clays; Decolorizing agents*.)
amino stilbene deriv. condensation products with HCHO as optical, P 7242*h*.
benzimidazole derivs., optical or fluorescent, P 4487*i*, P 4488*a*, P 5217*b*, P 5808*a*, P 6241*bc*.
benzoyl peroxide, for flour and cereals, P 2710*c*.
for carotene, in bacon adipose tissue and hemoglobin solns., 3633*g*.
for cellulosic materials, *o*-alkoxybenzoyl derivs. of 4,4′-diaminostilbene-2,2′-disulfonic acid optical, P 5977*g*.
Chitin montmorillonites as, for kerosene-machine oil mixts., 2899*i*.
chlorine detn. in, 401*f*.
detergent mixts. with imidazole compds., fluorescence-generating optical, P 6429*h*.
earths—see also *Kieselguhr*; etc.
earths, acid-treatment and drying of, P 9300*a*.
fermentation in presence of, P 8094*b*.
methylation of, 7607*e*.
polymerization of dienes by, 109*a*.
for flour, $Bz_2O_2$ and ClO$_2$ for, 1495*d*.
for flour, KBrO$_3$-starch mixts. as, and their explosibility, 7230*e*.
fluorescent dyes and optical, 4015*b*.
fluorescent or optical, 2780*d*, 4471*a*.
halogen (active) compds., P 7517*d*.
laundry, 855*a*, 9493*d*.
for leather, aminocarboxylic acid-methylol melamine condensation products, P 5618*g*.
sulfonated copolymers, P 1592*h*.
sulfonated styrene-maleic anhydride polymers, P 7738*c*
for lubricants, weathered loam, fuller's earth and montmorillonite as, 8320*g*.
montmorillonite clays as, 977*c*.
for oils (vegetable), activated clays, earths and siliceous materials as, 3635*c*.
peroxide, activation by hemoglobin, 854*g*.
sodium chlorite as, 1572*e*, 2780*e*.
sodium hypochlorite, stability of, 9395*c*.
toilet bowl cleaning, 9493*c*.
**Bleaching powder**. (See also *Calcium hypochlorite*.)
in air disinfection, 4797*g*.
bactericidal action against anthrax spores, 7999*h*.
penetrating power and stability of solns. of, effect of surface-active agents on, 7233*i*.
**Blebs**, resorption time of, effect of insulin on, 1106*i*.
**Bleeding**. (See also *Hemorrhage; Hemostatics*.)
blood regeneration after, hematologic and electrophoretic study on, 7112*g*.
cholinesterase in blood after, 299*e*.
enzymic activity of pancreas of dogs killed by, 4746*c*.
**Bleeding number**, measurement and theory of, of petrolatum and similar products, 842*d*.
**Bleininger Memorial Award**, to Tillotson, Edwin Ward, 2825*g*.
**Blende**. See *Sphalerite*.
**Blending**. See *Mixing; Mixing apparatus*.
**Blepharisma**, photooxidation in pigmented, 4779*c*.
**Blissus leucopterus** and(or) **Chinch bug**, control in lawns, 5896*i*.
sorghum injury by, compn. and, 4316*a*.
**Bloat**, clover-juice factor causing paralysis of smooth muscle in relation to, 6306*e*.
muscle-inhibiting compd. in lucerne in relation to, 6315*b*.
pathogenesis of, in sheep, 2694*a*.
**Bloch wave**, in metal, calcn. of energy of, 8784*g*.
**Blocking layer**. See *Cells, photoelectric Rectifiers*.

bromine in, 6684*h*.
bromine in, after elec. shock, 9235*f*.
calcium and Mg in, after rectal administration of Ca and Mg salts, 6733*a*.
calcium and Mg in, during diphtheria intoxication, 1100*d*.
calcium and P in, in parturition and milk fever, 7119*i*.
calcium and K in, effect of vitamin $D_2$ on, 6294*d*, 9181*c*.
during fasting, 8471*c*.
in glaucoma, effect of irritants on, 6310*i*.
during hysteria, 7124*h*.
after sulfonamide administration, 5121*d*.
calcium and proteins in, in Recklinghausen disease, 8523*g*.
calcium in, after Ca chloride injection in sound and meningitic children, 3937*b*.
effect on action of F in predentine and dentine formation, 6716*a*.
elevating prepn. from vitamin $D_2$ for, P 4433*c*.
in epidermal carcinogenesis, 1859*f*.
of mammals, 8510*g*.
after oral and intravenous administration of Ca, 737*i*.
in spasmophilic and normal infants, 5487*a*.
in tetanus, 2311*g*.
in visceral leishmaniasis of children, 2313*e*.
calcium, P and phosphatase in, in rickets with or without tetany, 1854*e*.
calcium-P balance in, ratio in diet and, 6708*g*.
calcium sulfamethazine in, 318*a*.
carbonate metabolism in, 7995*g*.
carbon (active) manuf. from, P 4838*b*.
carbon dioxide absorption in, of *Triton cristatus*, 5123*c*.
carbon dioxide and O in, effect of histamine on, and effect of pretreatment thereon, 9243*h*.
carbon dioxide and O in, in rickets, 5486*e*.
carbonic anhydrase in, 3508*f*.
in dystrophy, 750*a*, 5486*f*.
effect of aminopyrine, ascorbic acid and Na salicylate on, 4773*f*.
effect of high-altitude on, 5475*c*.
effect of sulfamides on, 772*d*.
effect of sympathommetic substances on, 7142*e*.
of normal subjects and pulmonary tuberculosis patients, 1481*f*.
in pneumonia, 4760*e*.
carbon monoxide content and vol. of, of Chinese, 8480*a*.
carotene and vitamin A in, 9285*e*.
catalase in, effect of O on, 4713*d*.
cell-proliferation-accelerating and -inhibiting substances in normal and cancer, 4364*i*.
-cerebrospinal fluid barrier—see *Hematoencephalic barrier*.
chlorine and N in, after renal resection, 3086*f*.
chlorine and K in, in benzene poisoning, and effect of adrenaline thereon, 2316*e*.
chlorine and urea in, on chlorine-free diet, 1471*i*.
chlorine in, blood sugar and, 1114*b*.
chlorine in, in eczema and erythrodermia, 4364*d*.
cholesterol and fat in, in NaOH poisoning, 8549*a*.
cholesterol and glutathione in, in thyroid insufficiency, relation to basal metabolism, 3096*f*.
cholesterol and I in, effect of sulfonamides and methylthiouracil on, 3527*g*.
cholesterol and ketones in, in hypertonic diseases, 7126*c*.
cholesterol in, daily variations in, 9198*e*.
desoxycorticosterone acetate effect on, 7119*a*.
effect of fats and oils on, 8506*f*.
effect of liver antitoxic principle on, 1860*e*.
of horses inoculated with virus of infectious anemia, 2305*f*.
nutrition and, 7115*c*.
sex differences in, 8037*a*.
in thromboangiitis obliterans 289*e*
*cholesterol in*, after treatment with stilbene compds., 1113*f*.
vitamin $B_2$ effect on, 1113*h*.
cholesterol, proteins and nonprotein N in, in Aleutian islanders, 6711*c*.
cholinesterase in, arterial pressure and, 4760*i*.
in disease, 5857*e*.
of healthy children, 738*d*.
in hematologic disease, 4366*g*.
on high mountains, 3504*d*.
of homothermic and poikilothermic animals, temp. and, 3528*h*.
in liver disease, 7126*a*.
properties of, 6679*d*.
in psychiatric cases, 4761*b*.
during recovery from diisopropyl fluophosphate poisoning, 6743*i*.
and its significance, 9108*c*.
after trauma, 299*e*.
circulation of—see *Circulation*.
citric acid in, in rickets, 5464*f*.
coagulated, or fibrin powder, adhesive for leather from $NH_4OH$ and, P 6854*b*.
-coagulating agents from brain, P 1158*b*
coagulation—see also *Thromboplastic substances;* and "K" under *Vitamins*.
-coagulation-accelerating substances, thrombin and agents affecting its action as, 8537*i*.
-coagulation accelerator, P 5909*a*.
coagulation factor (fifth), 2255*c*.
coagulation-inhibiting and -accelerating substances in, 2299*e*, 5543*a*, 7123*a*.
-coagulation-inhibiting substances, 1851*b*, P 3978*g*, 5399*c*, 6365*f*.
derivs. of coumarins, 3414*i*.
detection of, 5443*a*.
dicumarol as, at various prothrombin levels, 761*d*.
dicumarol as, effect of vitamin P compds. on, 3831*d*.
effect of toluidine blue on, 5865*b*.
effect on hyaluronidase and staphylo coagulase, 3855*g*.
effect on thrombus formation, 3095*a*
ethyl bis(4-hydroxycoumarinyl)acetate as, 5870*b*.
4-hydroxycoumarin derivs., P 4702*ab*
lysozyme inhibition by polysulfonate, 3855*f*.
pancreas protein, 708*d*.
Na penicillin as, 4378*f*.
2-sulfoethylcellulose polysulfate Na salt, P 2774*h*.
coagulation in systems of purified components of, 6269*c*.
coagulation or coagulability of, abnormalities of, 9135*f*.
adrenoxyl effect on, 5117*h*.
in alloxan diabetes, 1478*h*.
amino acids in, 3933*h*.
aminophyllin effect on time of, 7613
Ba, Mg and Sr in, 4378*ab*.
blood platelets as foci in, 8512*c*.
Ca and thromboplastin in relation to, 8514*g*.
Ca in, 2664*f*, 4747*b*.
$H_2CO_3$ in, 5842*b*.
in cold in hemolytic disease, 2697*d*
decalcified with Amberlite resin, 7103*i*
digitalis effect on, 8057*f*, 9255*d*.
effect of fertilizin from sea-urchin eggs on, and effect of basic protein and cephalin thereon, 4390*f*.
effect of heparin and sea-urchin fertilizin on, 4391*a*.
effect of N mustard and x-irradiation on, 4764*g*.
effect of protease and trypsin inhibitor on, 5847*c*.
effect of quinones and oxidation products of adrenaline on, and participation of mercapto groups therein, 5435*i*.
effect of urethan and heat on inhibiting action of vitamin systems on, 6679*e*.
histamine effect on, and its relation to stomach function, 3106*i*.
lipides in, 9198*e*.
in liver and bile-duct diseases, heparin and, 3513*h*.
methionine effect on, 4357*e*.
2-methyl-1,4-naphthoquinone effect on, 9247*g*.
oxalic and malonic acids in decreasing time of, in oral surgery, 7140*a*.
penicillin effect on, 4378*h*, 7582*e*, 9244*c*.
plasma-protein effect on, 5811*h*.
after protamine injection, 5494*g*
protein equil. reactions in, 3867*e*
respiration and, 9206*a*

*coagulation or coagulability of*, in scurvy, 3900*b*.
Na pentobarbital effect on, 7144*d*.
surface effect on, 9372*e*.
theophylline effect on, 319*a*.
by thrombokinase, 5819*i*.
time of, in silicone tubes, and effect of dicumarol treatment thereon, 7112*ef*.
cobalt in, of sheep fed Co-contg. feeds, 8071*b*.
cocarboxylase and vitamin $B_1$ in, 1480*d*.
cocarboxylase and vitamin $B_1$ in, in tuberculosis, 8466*b*.
codehydrogenases I and II in, in typhoid fever, 5110*f*.
collections of Swiss Red Cross, 6361*h*.
colloid-osmotic pressure and protein content of, in renal disease and normal subjects, effect of acids or alkalies on, 4762*h*.
colloid-osmotic pressure and protein content of, restoration of, 4310*d*, 6262*h*.
colloid-osmotic pressure of, in forearm exposed to cold, 8039*e*
complement in—see *Complement*.
copper and I in, during sexual stages in *Torpedo marmorata*, 8560*gh*.
copper in, in Grave's disease, 7571*c*.
creatine and creatinine in, in myohemoglobinuria, 300*g*.
of cyclotron workers, 6505*a*.
DDT in, after feeding, 8062*e*.
diastase in, 3505*a*.
effect of pancreatic activity on, 3504*i*.
in typhus, 3515*i*.
diseases or disorders of, electrophoretic analysis of blood serum proteins in, 4758*a*.
Fe in plasma in, 3076*e*
treatment of, 5498*d*.
distribution in large and minute blood vessels in shock, measured by radioactive isotopes, 5854*i*.
drying app. for, P 6014*b*.
effect of cancer and normal, on tyrosinase, 4762*a*.
effect of soybean and butter oils on, of dairy calves, 8473*e*
effect of thouracil and 6-methylthouracil on, 8542*a*.
effect of thouracil and thiourea on, 9263*h*
effect on bacteria presumably killed by antiseptics, 6278*b*.
elec. cond of, in mountain climate, 3504*ef*.
after elec. shock, 4383*a*, 5108*f*.
electrolytes in, during breathing of air rich in $CO_2$, 8541*i*
embryonic, chem. and serological analyses of, 5467*b*.
emetine in, 1862*e*
emotions and, 5846*e*.
in encephalomyelitis (equine), 7122*e*
enzymes (hydrolytic) in, from *Oedemagena tarandi*, 1116*a*.
enzyme studies on 6268*c*.
ergothioneine prepn. from, 9378*e*.
estrogen effect on, in chickens and turkeys, 7561*a*.
ether in, during ether elimination, 2318*a*
Evans-blue disappearance from, plasma protein level and, 3871*d*.
Evans blue in, effect of vitamin D on, 737*c*.
exchange between aqueous humor and, effect of histamine on, 1113*i*.
eye barrier, effect of antihistamines on permeability of capillaries of, 1107*i*
eye barrier, effect of histamine and antihistamines on permeability of capillaries of, 3526*a*.
fat-emulsion injection and, 1487*i*.
fat in, after ligation of thoracic duct, 3081*c*.
fibrinogenic and fibrinolytic factors of, of people who met sudden death, 9210*b*.
fibrinogen in, deficiency in pregnancy, 5110*c*.
effect of cold on, 6715*b*.
effect of parathyroids on, 5471*c*.
in myocardial infarction, 4772*g*.
fibrinolysin from, activation and purification of, 2663*c*.
fibrinolytic activity in, effect of exercise and adrenaline on, 8541*b*.
filtration funnel for, P 267*d*.
fish, fluorescence of, 1120*c*.
flow in circulation—see *Circulation*.
fluidity after death, fibrinolysin and, 4367*b*.
fluorine in, 5885*a*.
folic acid and teropterin in, after teropterin administration, 4340*f*
folic acid-antagonists and, 8556*f*.
folic acid conjugases and free and combined folic acid in, 6714*hi*.
folic acid effect on, during balanced or protein-poor rations, 4352*d*.
formation of—see *Hemopoiesis*.
formic acid in, in MeOH poisoning, 3869*h*.
fumaric acid in, 9127*i*.
gaseous transfer between colon and, effect on percentage gas compn. of intestinal flatus, 2986.
gases in, cerebral constituents in relation to, 5848*f*.
globulin—see *Globulins*.
glucolysis or glycolysis in—see *Glycolysis*.
glutamic acid and glutamine in, after administration, 7666.
glutathione in, in arthritis, peritonitis, tuberculosis and in normal subjects, 3509*g*.
in hyper- and hypothyroidism, 5119*f*, 8059*g*.
in insulin shock therapy, 2330*b*.
in penicillin treatment, 9245*h*
in rheumatic ailments, 3093*h*.
in syphilis, 7569*a*.
glycogen and lactic acid in, in scarlet fever, 2697*g*.
goitrogen retention in, 5502*c*.
-group A substance from gastric mucin as virulence enhancement factor, 8523*e*.
group A substance, isolation from gastric mucin, 4316*e*.
group B substance of, in stomach of cattle, 7118*b*.
groups, immunochem. studies on, 2314*c*.
group substances of, hexosamine components of, 3479*f*.
from intestinal mucosa and gastric mucin, 4315*b*.
in urine, 8412*h*.
guanidine in, in epilepsy, 9238*b*.
in hay fever during acute shock, 7125*f*
Heinz bodies and methemoglobin formation in, by methylene blue and aniline, 8527*e*.
Heinz bodies and methemoglobin formation in, by xylidine, effect of *p*-aminobenzoic acid on, 8527*d*
hemoglobin crystn. from, 6695*i*.
hemoglobin passage from, into eggs of *Daphnia*, 1872*f*.
heparin in, in liver and bile-duct diseases, 3513*h*.
histaminase in, in anaphylactic shock, 1100*e*.
histaminase in, in pregnancy, source of, 2688*f*
histamine effect on, in hemophilia, 5869*b*
histamine in, 4759*d*
in asthma, 5869*g*.
effect of atropine on, 9248*f*.
effect of digitoxin on, 313*i*.
effect of local freezing on, 8484*i*.
effect of sympathol on, 758*h*.
effect of synephrine and adrenaline on, 8545*a*.
in hemorrhage, 3510*a*.
in leukemia and erythremia, 6725*b*
in pulmonary emphysema of horses, 748*i*.
histidine in, after administration to normal and pregnant subjects, 8525*c*
hormone factor A in, pigmentation of rats and, 3074*f*.
hydrogen-ion concn. of, genetic resistance to mouse typhoid and, 9222*b*.
hydrogen-ion concn. of, in marine teleostomes, effect of decrease in salinity on, 5507*c*.
*p*-hydroxy-*m*-aminophenylarsene oxide action and factor in, 8535*c*.
hypertensin in, of animals with renal hypertension, 754*a*.
hypertensinogen in, in hemorrhage hypotension, 6305*f*.
in insulin treatment (Sakel), 3937*c*.
iodine in, in hyperthyroidism, 1477*c*.
post-operative Basedow reaction in relation to, 5852*b*.
thyroid function and, 6300*h*.
in thyrotoxicosis, effect of thiosulfate on, 6312*e*.
iodophthalein in, after administration to icteric and normal subjects, 8521*d*.
iron in, 287*h*.
CO effect on readily dissociable, 318*f*, 5864*c*.
effect of drugs on easily-split, 8051*e*.
after gastric resection for ulcers, 748*d*.
histamine effect on, 6730*g*.
in infections and after resection of stomach, 3893*fg*.
*iron in*, in normal and pathological conditions, 2312*d*.
in pregnancy, 3086*c*.
in progressive paralysis, 2311*i*.
in typhoid fever, 9224*f*.
vitamin $B_2$ effect on, 4738*d*.
isotopes in study of, 9208*i*.
of Japanese-beetle larvae after hemorrhage, 8562*i*.
journal: Acta Haematologica, 5105*c*.
ketones in—see *Ketonemia*; and "acetone bodies" above.
lactic acid exchange between brain and, and effect of O lack thereon, 7111*g*.
lactic acid in, effect of alloxan on, 7564*f*.
effect of liver blood on, and effect of liver passage on adrenaline and insulin actions on, 4360*a*.
during exercise in neurocirculatory asthenia, anxiety neurosis or effort syndrome, 5855*d*.
during work and at rest, 8504*d*.
after work, effect of succinic acid on, 4751*c*.
lactic and pyruvic acids in, after glucose administration and exercise in diabetes, 5111*b*.
lactic and pyruvic acids in, after glucose administration and exercise in thiamine deficiency, 5832*g*.
in lead poisoning, 8549*i*.
lipases in, effect of desoxycorticosterone acetate on, 7136*c*.
effect of thyroxine and desoxycorticosterone acetate on, 7136*c*.
in smallpox, 1099*i*
in tuberculosis and its prognostic value, 9218*h*.
after work, 9224*g*
lipases in fluids and, of inflammatory processes, 2697*i*.
lipide (physiol.) dispersion in, estrogenic compds in, 3083*f*
lipides and P in, in CO poisoning, 5114*a*.
lipides in, 3872*a*.
effect of radiation on mobile visible, 4311*i*.
after nephrectomy, 295*a*
in normal and pathological conditions, 2296*bcd*.
liver, effect on blood sugar and blood lactic acid, 4360*a*.
loading solute in, urinary flow, excretion of solutes and osmosis in relation to, 1858*i*.
Louisiana Expt. Sta. report on, 6775*ab*.
lytic action of, in diseased subjects, 1480*f*
magnesium in, during kala-azar, 3923*d*
magnesium in, temp. and, 9269*f*.
mammary-tumor agent in, 4367*g*.
in metabolic disorders of cows, 4736*h*.
methemoglobin of, 5840*c*.
methemoglobin reduction in, effect of lactic acid on, 309*i*.
nicotine effect on, 757*d*.
nicotine in, smoking and, 3521*h*.
nicotinic acid in, during corn diet, and effect of tryptophan and $N^1$-methylnicotinamide thereon, 3075*g*.
nitrogen and polypeptides in, after renal resection, 3086*d*.
nitrogen fixation in, of infected whale, 9156*e*.
nitrogen in, after central-nervous-system stimulation, 1851*i*.
in nitrotoluene poisoning, 5120*g*.
of nylon workers, 1985*g*.
osmotic pressure of, effect of salyrgan on, 9257*g*.
in osteopetrosis (hereditary), 1482*g*.
oxalacetate decarboxylation by, 3903*e*.
oxalic acid in, 8520*i*.
$\alpha$-oxoglutaric acid in, in dementia praecox, and effect of nicotinic acid and nicotinamide thereon, 2311*h*.
oxyaromatic substances in, in epilepsy, 305*d*
oxygen absorption by, effect of cholesterol on, 9244*i*.
oxygenation of, app. for, 3870*d*, 7070*g*.
oxygen consumption by, 747*f*, 7984*h*.
oxygen consumption by sheep maternal and fetal, 7108*f*.
oxygen in, of brain in relation to arterial $CO_2$ tension, 3088*c*.
capillary permeability in relation to, 7573*b*.
of diseased heart, 7571*i*.
in hemorrhagic erythropoiesis, 307*i*.
particles passing through glomerular membranes in kidney from, size of, 6886*g*.
passage of substances from, to central nervous system and eye, 1847*h*.

penicillin in, effect of benzoic acid and caronamide on, 6318*b*.
effect of caronamide on, 5500*i*.
after procaine-penicillin administration, 8555*b*.
phenols in, uremia and, 749*g*.
phosphatase and phosphates in, during birth, 1474*a*.
phosphatase in, 3804*a*.
in prostatic-cancer diagnosis, 2661*b*.
in rickets, 4737*g*.
phosphate exchange between eye and, 1473*g*.
phosphates in, effect of insulin, adrenaline and glucose on, 1849*g*.
phosphatide and nonphosphatide fat acids in, after exercise, fever and pancreatectomy, 9217*c*.
phosphatides in, effect of vitamins, phosphates and fish oils on, 5403*e*.
in relation to exogenous dietary factors, 5463*h*.
validity of calcns. for, 4355*c*.
phosphorus in, anesthesia effect on fractions of, 4386*c*.
in Freon poisoning, 2711*e*.
growth performance and, in range beef cattle, 6711*d*.
in whooping cough, and effect of vitamin $D_2$ thereon, 1481*i*.
in phosphorus poisoning treated with lipocaic, 5120*f*.
pituitrin-destroying enzyme in, of pregnant women, 1488*d*.
plasmapheresis of—see *Plasmapheresis*
plasminogen, plasmin and antiplasmin in, 2684*c*.
polypeptides in, in cardiopathic patients, 8049*b*.
polypeptides in, in malaria, 2312*c*.
porphyrin in, in disease and after administration of hematoporphyrin and protoporphyrin, 3512*b*.
post-transfusion survival of whole, during depot storage and after transportation by land and air, effect of temp. on, 6691*e*.
potassium in ascitic fluid and, 2312*g*.
potassium in, in benzene poisoning, and effect of adrenaline thereon, 4377*c*.
potassium thiocyanate in, after administration, 2328*d*.
preservation and post-transfusion survival of stored, 6691*c*.
preservation of edible, 5128*c*.
preservation or storage of, 6690*fh*.
erythrocyte changes in, 6690*a*.
P in erythrocytes and plasma during, 1099*a*.
preservation or storage of erythrocytes as whole, posttransfusion survival of, 6691*d*.
pressor substances in—see *Blood pressure*
procaine esterase in, in hepatic disease, 5108*d*.
procaine hydrolysis by, 2318*e*.
product contg. oxidized heme, P 4792*c*.
progesterone transport in, 8488*i*.
prontosil germicidal action and, 1115*b*.
protein in, and sedimentation velocity of, in tuberculosis of children, 2313*a*.
protein pptn. from, 9132*e*.
protein removal from, 7531*d*
proteins and *n* of, in aged, 8483*e*.
proteins, in anaphylactic shock, 8042*e*.
antigenicity of, 6267*i*.
binding of antimalarials by, and their effect on antirespiratory action, 1108*i*.
effect on thiourea action on fungi, 9152*c*.
in epilepsy, 305*d*.
foam from hydrolyzates of, 6*d*
of healthy and sick children, 8050*h*.
on high mountains, 3504*c*.
Fe binding by, 9209*b*.
of normal and diseased patients, 1453*i*
after parathyroid ablation, 295*b*.
in plasmocytoma, 5856*h*.
stability of, in mixing and transfusion, 8499*g*.
in thoracic-duct fistula, 8522*e*.
vitamin $B_2$ effect on, 4738*e*.
prothrombin in—see *Prothrombin*.
pterins related to pteroylglutamic acid and, 8555*e*.
pyruvic acid and reticulocyte content of, in cancerous and normal rats, 6723*e*.
pyruvic acid and thiamine in, of middle aged and old individuals, 8023*f*.
pyruvic acid in, 8500*h*.
pyruvic acid in, in hepatitis, hypertonia and diabetes, 3093*d*.
radioactive bromodimethylethylallenolic acid and radioactive thyroxine in, after administration and their ratio to organ contents, 9214*g*.
radioactive sulfur in, after administration, 4376*a*.
refractive index of, in cancer, 3510*i*.
regeneration of—see *Erythropoiesis; Hemopoiesis*.
relaxin in, of sow, 2299*d*.
review on, and its derivs., 2301*f*.
Rh$^w$ factor, 7571*e*.
Rh factor, antiserum to, 7575*d*.
Rh hapten substance from, 753*h*.
salicylate in, after administration, effect of Na benzoate on, 9242*d*.
after administration, effect of sulfonamides on, 9242*i*.
after Na salicylate treatment of rheumatic endocarditis, 1105*g*.
sedimentation of, comparison with other clinical protein reactions, 7569*h*.
sodium$^{24}$ in, after administration, 9209*a*.
sodium in normal and nephritic, 2263*f*.
sodium nicotinate effect on, 8468*b*.
in soils, effect on auxin content, 3958*f*
solns. isoösmotic with, 5903*f*
sterilization of, 4341*d*.
substance P in, 1071*f*.
succinic acid in, of *Gastrophilus intestinalis* larva, 1872*e*
sugar—see *Blood sugar*.
sulfadiazine and its methylated derivs. in, after administration, 5114*c*.
sulfamerazine and sulfamethazine in, after administration, 7589*h*.
sulfonamide action in fresh and inactivated, 3879*e*
sulfonamides in, 4771*e*.
in infancy, 2323*g*.
during lumbar drainage, 1103*e*.
in prophylactic tests against *Plasmodium gallinaceum*, 9253*f*.
suture from, P 2375*e*
sympathin E in splenic, during hemorrhage and asphyxia, 3519*d*
temp. effect on, of cattle, 9209*g*.
thrombotropin in, effect of dicumarol on, 3106*e*.
tocopherols in sheep, and effect of cod liver oil thereon, 758*f*
tooth compn. and, 2681*e*
transfer of ingested colostrum protein to, 7102*i*.
transfusion of, effect and fate of, 8511*d*
effect on canine hemophilia, 8524*b*
effect on polycythemia production, 5848*i*.
in hemorrhagic shock, 5857*f*.
silicone-treated needles in, 2666*e*.
solid colloid from blood serum for use in, P 7198*b*.
transfusion of heterogeneous, behavior of blood elements after, 3927*g*.
transfusion of incompatible, histamine liberation by tissue during shock from, 3510*e*
uranium ion in, 9119*c*
urea clearance—see *Urea*.
urea in, acid-base balance of blood serum and, 3911*f*.
effect of pyridoxine on, 5498*e*.
in nephrosis in children, 6724*b*.
uric acid in, effect of alloxan and cysteine on, 4378*d*.
effect of temporal application of short waves on, 701*b*.
effect of thymus ext. on, 2323*e*.
effect of uricase on, 7530*d*.
effect of vitamin $B_2$ and insulin on, 1472*d*.
after vaccination against hoof-and-mouth disease, 3512*i*
vasopressor substances —see *Blood vessels*.
viscosity of, 2059*a*.
vitamin A in, leucocyte count and, 3073*c*.
vitamin A in lymph and, 3899*d*.
vitamin A in, of newborn, 4749*c*.
during vitamin A treatment, 3499*b*.
vitamin $B_1$ and its fractions in, in healthy and sick children, 4749*e*.
vitamin $B_1$ in, of mothers and newborn, 8501*c*.
vitamin $B_6$ in, in vitamin $B_6$ deficiency, 3074*g*.
vitamin C in, 5847*a*.
compared with plasma content as criteria of nutritional status, 5460*a*.
effect of Pb on, 1113*b*.
effect of rutin on, 5834*b*.
of hens, 8479*c*.
in infectious diseases, 287*i*.
vitamin E in, age variations in, 4749*g*.
vitamins A and C in, of Amsterdam students, 1850*b*.
vitamins A and C in, of ewes and their lambs, effect of low-carotene ration on, 8467*c*.
vitamins in, in peritonitis, 1096*b*.
vol. of, 710*h*.
as detd. by $Fe^{59}$ and $P^{32}$ labeled red cells, 8037*h*.
detn. of, 3869*i*, 4320*e*, 5819*h*.
in fever in hypertensive persons, 301*h*.
zinc in, 2301*h*.

**Blood, analysis**, ashing for, 8419*d*.
books: Rapid Microchem. Methods for Blood and Cerebrospinal Fluid Examinations, 4312*f*; Grondslage voor de bepaling der bloedsedimentatie bij paard en rund, 9140*g*.

metabolism of, 3903*e*.
methemoglobin reduction and metabolism in, 6732*b*.
methemoglobin reduction in, 3048*f*.
nicotinamide and nicotinic acid utilization by, 746*f*.
nucleic acids in, of birds and humans, 3502*g*.
in osmotic hemolysis, 8497*g*.
osmotic resistance of, 7110*a*.
osmotic resistance of, effect of histamine on, 5121*e*.
oxygen consumption by, hemoglobin concn. and, 9271*e*.
Pasteur effect and, 7567*c*.
Pasteur effect in relation to phosphorylation in, 7063*e*.
pathology of, 748*f*.
peptidase in, 4717*c*.
periodate-treated, properties of, 4758*g*.
permeability of, to cations after treatment with resorcinol, butyl alc., etc., 2064*e*.
effect of *d*- and *l*-isoamidone on, 7583*c*.
glycolysis and, 4764*b*.
to ions, effect of narcotics on, 7143*g*.
to lower satd. monocarboxylic acids, 8502*a*.
to Na and K, 8483*b*.
phosphatase in, 3864*a*.
phosphatase of, in O deficiency, 1849*b*.
phosphorus distribution between blood plasma and, in infantile tetany, 4363*h*.
phosphorus in, and effect of storage thereon, 1099*a*.
phosphorus (radioactive) uptake by, effect of anesthetics on, 3103*g*.
phosphorus renewal in lipides and proteins in, 1099*d*.
physiology of, 4710*d*.
post-transfusion loss of, 7110*a*.
post-transfusion, survival measurement of, 7540*a*.
potassium loss from, 4715*f*.
preservation of, 6690*k*.
preserved, post-transfusion survival of, 6691*d*.
protoporphyrin in, 1474*i*.
protoporphyrin in, in protein-deficient and Fe-deficient swine, 2292*c*.
pyrophosphatase of, inhibition by veronal-acetate buffer, 9109*e*.
receptors in, destruction by receptor-destroying enzyme in prevention of influenza, 3511*e*.
regeneration of—see *Erythropoiesis*.
resistance of, bilirubin effect on, 9217*i*.
resistance of, Pb effect on, 4770*g*.
respiration of dogfish, effect of bacterial toxins on, 9144*e*.
rhodanese in, 4709*b*.
salt effect on, 5811*g*.
sedimentation rate of, in brain concussion, 9229*g*.
effect of dicumarol on, 9258*f*.
in inflammation, 8517*f*.
in insanity, 9232*h*.
Pb in relation to hyaluronidase action on, 6206*h*.
in leukemia, effect of urethan on, 5854*e*.
sideremia and, 9209*c*.
in tuberculosis of children, 2313*a*.
sexual differences in, of newly hatched chicks, 295*a*.
stippling in Pb poisoning, and effect of splenectomy thereon, 4384*g*.
stroma, prepn. contg. penicillin, hemoglobin, electrolyte and, P 8106*f*.
substrate utilization in, 8509*e*.
survival time, in body, 8480*e*.
tannic acid action on membrane of, 3520*e*.
tonicity-vol. relations for, subjected to action of heat, 3087*c*.
tonicity-vol. relations for systems contg., and chlorides of univalent cations, 3087*b*.
after transfusion of heterogeneous blood, 3927*h*.
virus receptors of, 3096*c*.
during vitamin A treatment, 3499*b*.
vitamin $B_2$ in diet and, 265*f*.
vol. of, effect of adrenaline on, 5122*a*.
hyaluronidase effect on, 7529*d*.
measurement of, 3056*hi*.
x-irradiation of, toxins formed in, 8404*h*.
zinc in, 2301*h*.

**Blood corpuscles, white.** See *Leucocytes; Lymphocytes.*

**Blood pigments.** (See also *Bile pigments; Hemoglobin; Oxyhemoglobin; Pentdyopent.*) 3914*e*.
decompn. products of, bilifuscin and mesobilifuscin as, 5844*f*.
in leucocytes of amphibian, 4386*i*.
pathochemistry of, 8519*d*.
review on, 8497*e*.
toxicology of, 8534*e*.
**Blood plasma.** (See also *Blood, analysis; Blood sugar.*)
Ac-globulin in, effect of aminophylline on 5117*f*.
Ac-globulins in stored, stability of, 706*f*.
adrenaline in, under various conditions, 4747*e*.
alkali in, after K salt ingestion by negroes, and effect of desoxycorticosterone thereon, 2687*e*.
alkali reserve of, effect of parathyroid, thyroid, thymus, pituitary and corpora lutea exts. on, 8485*b*.
allantoin and uric acid in, of Dalmatian dog, 5473*h*.
amino acids (conjugated) of, 6741*b*.
amino acids in deproteinized, 8429*c*.
amino acids in, effect of fasting and N deprivation on, 4740*g*
amino acids in, effect of growth and adrenocorticotropic hormones on, 3084*f*.
amino N in, effect of alloxan, pancreatectomy and adrenalectomy on, 752*h*.
after evisceration, relation of temp. and insulin dosage to, 8055*e*.
retention after trauma, 4366*a*.
ammonia in, after operations, 3095*a*.
antifibrinolysin concn. from, 8409*g*
antigenic power of, modification and diminution of, 3511*b*.
antithrombin in, effect on prothrombin time, 5477*h*.
antitryptase and leucylglycinase in, in tourniquet shock, 5857*gh*.
antitryptic activity of, detn. of, 5441*d*.
app. for obtaining dry prepn. of one constituent of, P 2268*d*.
arsenic distribution between erythrocytes and, 4765*i*.
biotin active substance of, 2300*i*, 2651*g*.
calcium and Mg in, of various mammals, 8510*h*.
calcium and P in, of salt-fed cattle, 1501*h*.
calcium, carotene, P and vitamin A in, of heifers, effect of vitamin A on, 2293*h*.
carotene and vitamin A in, of lactating cows, effect of soybeans and soybean meal on, 8479*d*.
cations in, convulsions in normal and desoxycorticosterone-treated animals in relation to, 7146*a*.
of cattle, effect of breed, age and season on, 6711*f*.
cephalin, lecithin and sphingomyelin in, and their metabolic interrelations, 9214*e*.
chloride content and vol. of, in liver disease, 5855*e*.
chloride in corpuscles and, 5470*f*, 5484*h*.
chlorides in aq. humor and, of rabbits, dogs and human beings, 2665*a*.
chlorides, K and Na in, in extracellular electrolyte depletion and its relation to electroshock seizure threshold, 5949*b*.
cholesterol esterase and lecithinase in, 8408*e*.
cholesterol ester formation in, 1849*b*.
cholesterol in, after partial hepatectomy and partial nephrectomy after injection of tris(β-chloroethyl)amine, 7580*f*.
cholinesterase in, 1818*i*.
citric acid in, of tumor-bearing and normal rats, 4761*h*.
coagulation of citrated, by gram-negative organisms, 1830*i*.
coagulation of, effect of dicumarol on, 2686*d*.
effect of sympathicomimetic substances on, 7136*h*.
by heat in cancer, pregnancy, etc., 3515*a*.
silicone surfaces and, 3485*i*.
by staphylocoagulase, 7120*g*.
thrombin formation in, 9200*e*.
**coagulation of mixts. of, from vitamin K-deficient and dicumarol-poisoned chicks, 2681*d*.**
coagulation of oxalated, by toluidine blue, 7109*d*.
colloid osmotic pressure of, in nutritional hypoproteinemia, 3899*g*.
copper and Fe in, in protein-deficient and Fe-deficient swine, 2292*e*.
copper in blood cells and, 1452*f*.
copper in, of pregnant animal and fetus,
creatine, creatinine and guanidoacetic acid in, effect of testosterone and methyltestosterone on, 2301*f*.
creatine in, after methyltestosterone administration, 4373*b*.
cryoglobulin in, in multiple myeloma, 9101*h*.
dried, and plasma fractions, 3054*g*.
effect of normal and immune duck, on chick infectious of *Plasmodium lophurae* induced with parasites in duck erythrocytes, 9216*d*.
effect on 6-acetylmorphine, benzoylcholine and atropine, 702*c*.
effect on methemoglobin formation after hemolysis, 8484*h*.
elec. cond. of, in mountain climate, 3504*ef*.
electrolytes in, electroshock-seizure thresholds after adrenalectomy and, 6304*i*.
electrolytes in, in hypertension from renal compression, 3087*e*.
erythropoietins in, of fetuses, 8504*d*.
esterases of, 6258*b*.
fatty acids in, of allergic and normal subjects after administration of soybean oil, 5107*e*.
fibrinogen in, at high altitudes, 3504*b*.
fibrinolytic enzyme of, 2260*i*.
formol-gel reaction in, 4759*b*.
fractionation of, 8408*b*.
fractionation products of, 7110*i*.
glutamic acid and glutamine in, in malignancy and infectious diseases, 6719*d*.
histamine content and histaminolytic activity of, in pregnancy, 7109*b*.
histamine distribution between lymph and, and its relation to histaminolytic activity of lymph, 7108*h*.
histamine in, correlation with blood pressure after x-ray irradiation, 4308*h*.
histidine, tryptophan and valine in, 4361*d*.
of invertebrates, 4388*e*.
iodide in, as thyroid-function regulator, 8036*g*.
iodine compds. in, 3908*b*.
ion concn. in, renal function and, 7127*i*.
iron in, in blood diseases, 3076*e*.
leucocyte lysis by tuberculoprotein in relation to factor in, 5851*a*, 8044*c*.
lipase in, defense mechanism of organism and, 6722*f*.
lipide-protein complexes in, 9090*g*.
lipides in, and its fractions, effect of partial hepatectomy, thermal injury and β-chloroethyl vesicants on, 4753*d*.
lipides in, in cancer, 9230*b*.
after ingestion of elaidin, 8494*c*.
in primary and secondary hypercholesteremia, 3092*i*.
in lymphoma of fowls, 5109*h*.
magnesium in, in limb ischemia, 9208*a*.
magnesium in, in thyroid disorders, 6299*a*.
mercuhydrin disappearance from, 5861*h*.
metabolites in, in pigment synthesis, 7455*b*.
methylene blue reduction by, 2648*h*.
Millon's reaction in, after tyrosine injection during liver damage, 7129*d*.
nitrogen (nonprotein) in, and its correlation with efficacy of fluid replacement after thermal injury, 7110*d*.
oil from hydrolyzed, in nutrition of mosquito larvae, 2334*c*.
osmolarity of, urinary concn. at zero load in relation to, 6721*h*.
in osmotic diuresis, 298*a*.
oxalated, and its ability to coagulate, 3054*a*.
oxytocinase in, effect of cysteine and glutathione on, 2330*i*.
pentoses in, effect of trauma on, 9229*b*.
phosphatase in, 3864*a*.
in cancer of bones, 1855*f*.
after partial hepatectomy, 3091*f*.
phosphate exchange in, 2661*i*.
phosphates in, hyperventilation and, 1476*d*.
phosphatide turnover in, and choline action therein, 1852*a*.
phosphorus distribution between red blood cells and, in infantile tetany, 4363*h*.
phosphorus in, and effect of storage thereon, 1099*a*.
phosphorus in, effect of growth hormone on, 8489*b*.
potassium in, during preservation, 3047*a*.
potassium in, effect of vivodialysis on, 7117*d*.
progesterone bound in, inactivity of, 5472*c*.
progesterone in, of cocks and nonovulating hens, 5847*f*.
prostigmine in, cholinesterase inhibition in dogs and in myasthenia in relation to, 6733*f*.
proteases of, 9123*a*.
proteases of, differentiation from trypsin, 3915*f*.
protein content and vol. of, in Chinese, 8480*a*.
protein osmotic pressure and d. of, relation between, 7983*i*.
proteins, adrenal cortex hormones and, 3909*g*.
arginine in, 3862*e*.
biophys. studies on, 1855*h*, 5065*a*.
of castrated and testosterone propionate-treated rats, 2303*a*.
in chickens with Rous sarcoma, 752*a*.
conveyance of hormonal I and, 3908*a*
after denaturation by HCHO, viscometric, electrophoretic and immunological study of, 1815*c*.
effect of casein or lactalbumin hydrolyzates on regeneration of, in protein depletion, 8023*b*.
effect of dietary protein on production of, 3500*ce*.
effect of *N*-fluorenylacetamide on, 9216*g*.
effect of hyaluronidase on, 7529*d*.
effect of oral administration of protein on, 1469*c*.
effect on blood coagulation, 5811*h*
electrophoresis in pathophysiology of, 5856*i*.
electrophoresis of, in pneumococcic infections, 2305*g*.
electrophoretic analysis of lamb and sheep, 9204*h*.
equil. factor of, 4303*i*
Evans-blue disappearance from blood stream in relation to, 3871*c*
in fowl and pigeon, 8480*b*
histamine combination with, 7521*b*
in hypothyroidism, 8518*c*.
in hypothyroidism, effect of testosterone propionate on, 5475*a*
interactions with drugs, 5866*g*.
isoelec. points of, in relation to ionic strength, 3860*f*.
liver disturbance and, 9228*h*.
of newborn and premature infants, 3085*i*.
prepn. and properties of, 7466*h*, 5433*c*, 8404*c*.
reaction with thymol, 9093*b*
shift to extravascular space after thermal trauma, 3501*b*
surface areas and heats of absorption of, 2248*b*.
after surgical operations and hemoglobin utilization for their maintenance, 9223*f*.
of swine, 9197*g*
thyroxine attachment to, 2300*a*
in ulcer, 5107*d*
of West Africans, 8039*b*.
proteins in serum and, equil. between, 1813*h*.
proteolytic activity of, in hemophilia, 5106*d*.
proteolytic enzyme in, 708*i*.
proteose from, 2303*i*.
prothrombin in—see *Prothrombin*.
pseudocholinesterase in, thyroid activity and, 7521*i*.
reducing power of, in malignant neoplastic disease, 299*d*.
salicylic acid in, factors affecting, 765*h*, 6311*c*.
sepn. of antibodies, isoagglutinins, prothrombin, plasminogen and β1-lipoprotein into subfractions of, 3925*f*.
sepn. of cholinesterase, mucoprotein and metal-combining protein into subfractions of, 5433*d*.
staphylocoagulation in, of various species, 8001*g*.
sterilization of, 4341*d*.
thromboplastin cofactor in, effect of methylxanthines on prothrombin time and, 9255*e*.
tocopherol in, in pathologic conditions, 7121*i*.
transfusion of, in hemorrhagic shock, 5857*f*.
transfusion of, in nephrogenic hypoproteinemia, 9225*h*.

uranium dioxide or proteinate formation in, 8270*f*.
uric acid in, and its ultrafiltrates, 7111*b*.
vasoactive substances of, 5472*h*.
virus-hemagglutination inhibitor in, 3090*c*.
vitamin A esters in, after intake of vitamin A alc., 289*e*.
vitamin A in human, 9314*c*.
vitamin A in, in relation to clinical and lab. findings, 5458*c*.
vitamin A in, of pigs, carotene and vitamin A of rations in relation to, 9193*b*.
vitamin $B_6$ conjugase in, 7557*d*.
vitamin $B_{12}$ in, effect of estrogens on, 8491*e*.
vitamin C in, compared with blood content as criteria of nutritional status, 5460*a*.
effect of desiccated thyroid and antithyroid agents on, 2317*c*.
nutrition and, 6775*a*.
vitamins A and C in, of ewes and of their lambs, 3496*h*.
vol. of, in circulatory failure of adrenal insufficiency, 5855*g*.
detn. of, 298*f*, 5819*h*.
detn. of changes in, 266*h*.
detn. of purity of Evans Blue in relation to, 8428*d*.
in fever in hypertensive persons, 301*i*.
in shock, measured by radioactive isotopes, 5854*i*.
zinc in, 2301*h*.

**Blood plasma substitutes**, dextran as, 3914*a*, 5502*a*, 8552*f*.

**Blood platelets** (*thrombocytes*). (See also *Thrombopenia*.)
adhesiveness of, in thromboembolism and hemorrhagic disorders, 9227*i*, 9228*b*.
antiserum to, anaphylactoid shock from, 3916*a*.
as blood-coagulation foci, 8512*c*
cobalt effect on, 765*d*
concn. of, heparin and, 1487*e*.
effect of pituitary adrenocorticotropin on, 1474*h*.
effect on Ac-globulin stability in stored plasma, 706*h*.
formation of, 3528*c*.
formation of, effect of digestive juices on, 3085*h*.
in hemorrhagic disease, 5850*h*
prothrombin accelerator and thromboplastin in, 746*c*.
in purpura from estrogens, 1854*e*.
thrombin formation during coagulation of plasma in relation to, 9200*e*.
trypsin effect on, 9242*g*.

**Blood poisoning**. See *Septicemia*

**Blood pressure**. (See also *Blood vessels (circulation.)*
adenosine triphosphate effect on, 2693*e*
in adrenalectomy and splanchnicectomy, 1853*f*.
in adrenal hypertrophy from KCl, 5872*e*
adrenaline effect on, 4374*b*, 6728*f*.
effect of 10 (2-dimethylaminopropyl) phenothiazine on, 320*b*.
after 2-(1-piperidylmethyl)-1,4-benzodioxan administration, effect of work on, 5494*c*.
2-(1-piperidylmethyl)-1,4-benzodioxan effect on dibenamine action on, 5497*g*.
statistical analysis and dosage-response curve in, 5492*f*.
amidine-deriv. effect on, 1868*d*.
ammonia effect on, 1852*d*.
aortic, effect of exercise, drugs and aortic insufficiency on, 4775*h*.
book: and its Disorder, 3926*a*.
cholinesterase in blood in relation to, 1074*a*, 4760*i*.
desoxycorticosterone acetate effect on, 8038*i*.
desoxycorticosterone acetate effect on, of dogs on high NaCl intake, 745*i*.
desoxycorticosterone effect on, urinary output of antidiuretic factor and, 3090*i*.
dihydroergocornine effect on, kidney function and, 3524*f*.
dimethyltubocurarine effect on, 7132*a*.
effect of adrenaline, aludrine and noradrenaline on, 8544*h*.
effect of adrenaline and aludrine on, 4762*i*.
effect of adrenaline and isopropyladrenaline on, effect of ergotamine on, 7576*f*.
effect of adrenaline, arterenol and epinine on, 8542*c*.
effect of adrenaline, dihydroxynorephedrine and noradrenaline on, 5804*h*.
effect of adrenaline, nicotine and adrenergic nervous reflexes on, effect of halogenated ethylamines on, 2320*c*.
effect of adrenolytic drugs on, after administration of sympathomimetic amines, 4769*i*.
effect of basically substituted amides on, 3101*h*.
effect of carbohydrate, protein and salt on, in renal hypertension, 6297*c*.
effect of coramine and metrazole on, 7137*ef*.
effect of intracisternal injection of drugs on, 7130*c*.
effect of methylated nucleosides and purines on, 4635*b*.
effect of 2-methyl 1,4-naphthoquinone and 2-methyl-1,4-naphthohydroquinone and its esters on, with and without vasoconstricting and vasodilating drugs, 9246*h*.
effect of natural and dihydrogenated ergot alkaloids on, 4770*a*.
effect of phenols on, 757*f*.
effect of protocatechualdehyde, protocatechuic acid and vanillin on, 757*h*.
effect of pteroylglutamic acid-displacing agents on, 257*c*.
effect of quinine and quinidine on, in neurogenic hypertension, 2329*h*.
effect of *Serratia marcescens* tumor-necrotizing polysaccharide on, 1866*c*.
effect of tetramethyl- and tetraethylammonium hydroxide on, 6731*c*.
effect of xylocaine homologs and isomers on, 9257*f*.
effect on osmotic pressure of aq. humor, 4750*b*.
in fever in hypertensive patients, 301*h*.
high, from adrenaline, effect of substances which increase capillary resistance on, 4376*b*.
from adrenaline or nicotine, effect of methiodides of homologs of phenylethylmorpholine and phenylethyldiethylamine on, 4376*e*.
from anterior-pituitary prepps., effect of amino acids on, 2685*f*.
antidiuretic hormone in urine in, 8044*b*.
from desoxycorticosterone acetate, effects of adrenalectomy and adrenal cortical ext. on, 7146*d*.
from desoxycorticosterone acetate, kidney in, 5849*e*.
dibenamine effect on, 314*h*.
as disease of adaptation, 6717*a*.
effect of adrenal cortical ext. and desoxycorticosterone on, 8057*d*
effect of rice diet on, 8476*e*
fats in blood serum in, 8522*a*.
hexamethylenetetramine - HCl - vitamine B prepn. for treatment of, P 5157*b*.
of hormonal origin, 6728*c*.
hypertensin in blood of animals with renal, 754*a*.
kidney tubular function in, 9218*e*.
after nephrectomy, 5473*a*.
in nephrosis in children, 6724*b*.
octyl alc. effect on oscillometric values in, 8061*e*.
pentamethonium iodide effect in, 8540*h*.
from pituitary ext., dietary-protein effect on, 8043*e*.
pyruvic acid in blood in, 3093*d*.
and its relation to renal pressor system, 6717*a*.
from renal compression, blood plasma electrolytes in, 3087*e*.
renal, dopa decarboxylase, renin and, 302*b*.
salt-active corticoids in, 8480*g*.
self selection of salt solns. and water in, 5837*h*.
tetraethylammonium compd., cardiovascular effects in, 9266*b*.
thiocyanates and vitamins A and K in treatment of, 8052*b*.
treatment of essential, 6314*h*.
vascular reactivity in, 6320*d*.
histamine effect on, before and after pre treatment with histamine, 9243*e*.
histamine effect on, effect of lergitin on 9258*b*.
-increasing and -lowering agents, antagonism between, in heart, 8056*e*.
-increasing substances—see also *Hypertensin; Pituitary extracts; Pituitrin; Vasopressin*.
-increasing substances, aliphatic amines as, 131*f*.
amino alcs., P 3029*c*.
arterenol and adrenaline as, 1868*b*, 8540*b*.
*N*-benzhydryl-α-(α-methylphenethylamino)acetamide, P 677*f*.
(cyclohexylalkyl)amines, P 1802*d*.
from hemoglobin, 5547*h*.
sulfanilamide salts with amines, P 9389*g*.
of urine, 5840*b*.
in induction of idioventricular rhythms under cyclopropane anesthesia, 1111*e*.
in insanity, 9232*h*.
isopropyl fluophosphate effect on, 4775*c*.
liver-ext. effect on, 5537*b*.
low, cardiovascular effects of certain drugs in, 7147*i*.
-lowering substances, 2-alkyl-1,4-naphthoquinones, P 9085*ef*.
$V^4$-(2-amino-4-hydroxy-6-pteridylmethyl)sulfanilamide, P 8106*b*.
α-(aminomethyl)-*m*-hydroxybenzyl alc., P 5043*d*.
2-aminothiazoles as, 4263*g*.
arterenol derivs., 3388*f*.
(hydroxyphenyl) amino alcs., P 3460*b*.
from *Leonurus tataricus* and *Panzeria lanata*, 5548*g*.
from liver, 2251*h*.
from liver, identity with ferritin, 1855*g*.
long-acting, 6593*h*.
release from plasma globulin by snake venoms and trypsin, 5814*b*.
substance P in blood as, 1071*g*.
in urine, 4754*c*.
vitamin A acetate as, 2293*b*.
low, from hemorrhage, hypertensinogen in blood in, 6305*f*.
morphine effect on, following hemorrhagic hypotension, 7146*f*.
nicotinic acid effect on, 3076*bd*.
nitrite action on, cardio-aortal reflexogenous zone in, 7142*f*.
noradrenaline effect on, 7590*e*.
phenylethylamine *N*-derivs. and, 7585*e*.
regulation of, 2685*a*.
renal venous, effect on renal function, 7115*f*.
retinal, in acetylcholine shock, 6723*a*.
effect of amphetamine, adrenaline and ephedrine on, 6735*a*.
effect of priscol on, 3522*g*
sodium chloride effect on, 2303*f*.
substances affecting, in blood vessels, 4750*c*.
synephrine effect on, after pretreatment with ephedrine, veritol and pervitin, 7137*b*.
tetraethylammonium chloride effect on venous and arterial, in congestive heart failure, 3103*h*.
in thermal injury, 7109*i*.
1,2,6,4*H*-thiadiazine-3,5-diol 1,1-dioxide for control of, P 6674*b*
ustilagin effect on, 9239*g*.
after x-ray irradiation, histamine in blood plasma in relation to, 4308*h*.

**Blood serum**. (See also *Agglutinins; Antibodies; Antitoxins; Blood, analysis; Blood sugar; Complement, Diazo reaction; Flocculation reaction, Hemagglutinins; Hemolysins; Hemolysis; Precipitin reactions; Precipitins, Serological reactions; Serology; Wassermann reaction; Weltmann reaction.*)
acid-base balance of, effect of high blood urea on, 3911*f*.
aging of, ppt. formed during, 8508*d*.
albumin—see *Albumins*.
aldolase in, of tumor-bearing animals, 6724*i*.
in allergy, 9218*i*.
α-amino-*p*-toluenesulfonamide in, after oral and subcutaneous administration, 263*e*.
amylase in, effect of alc. on, 7592*d*.
amylase in, in pancreatic lesion, 8517*h*.
anaphylactic shock from, yohimbine protection against, 300*a*.
anti-blood, cellular reactions in *Haemobartonella* infected rats with anemia produced by, 9221*h*.
antibodies to histoplasmin in, demonstration of, 300*e*.
anticomplementary effect of, Wassermann reaction in atypical pneumonia, liver infections or malaria in relation to, 1856*d*.
anti-conalbumin, and ovalbumin pptn. by, 5857*b*.

antidiphtheria, effect on oxidation of ascorbic acid, 8434*d*.
antidysentery (Shiga), agglutinins in protein fractions of, 7126*e*.
antifibrinolysin concn. from, 8409*g*.
antigonadotropic, 7125*b*.
antigonadotropic, demonstration of antihormonal antibodies in, 304*c*.
antigonococcus factor, and cross absorption experiments therewith, 5083*b*.
antihistamine action of, histamine in, 5495*b*.
antihyaluronidase in, 4310*i*.
anti-influenza, agglutination reactions in detn. of antibody titer of, 7119*g*.
anti-influenza, neutral mixt. with influenza virus, reactivation by virus inactivated by heat, 4757*c*.
antikidney, nephrotoxin of, reaction with kidney, 8524*g*.
anti-Newcastle disease, complement-fixation test applied to, 4760*a*.
antiperfringens, antihyaluronidase in, 7087*a*.
antiphotodynamic action of, effect of vitamins on, 9185*d*.
antiplacenta, kidney damage from, in pregnancy and effect of desoxycorticosterone acetate thereon, 3517*c*.
antiplatelet, anaphylactoid shock from, 3910*a*.
antipoliomyelitis, production of, 4756*b*.
antiprotease of, 6259*g*.
antiproteolytic activity of, 1478*f*.
antiproteolytic reaction of, strain variations in, 7123*g*.
antireticular-cytotoxic, effect in schizophrenia, 8518*e*.
anti Rh, adjuvants in production of, 7575*d*.
anti-Rh, Na azide as preservative for, 270*a*.
antiserums, antibody distribution in, 8515*e*.
to D-glyceraldehyde phosphate dehydrogenase, 1482*e*.
of high potency, P 7576*c*.
radioactive tracers in, 3923*g*.
against receptor-destroying enzyme of *Vibrio cholerae*, 6279*g*.
therapeutic action of, 9237*h*.
antitetanus, tetanus treatment with pentothal Na and, 6729*a*.
arginine in, of various animals, 6720*d*
bactericidal activity of, on Koch's bacillus, effect of vitamin $D_2$ on, 5097*g*
bases in, physiol. variations and normal values of, 7108*c*.
bilirubin in, effect of Na nicotinate on, 9255*i*.
during icterus, 3918*g*.
urine content and, 3913*c*.
book: Repertorium Pharmazeutischer Spezialpräparate, Sera und Impfstoffe, 3570*i*.
butelline esterase and procaine esterase in, 8049*e*.
calcification of cell cultures in presence of, 8409*b*.
calcium and Mg in, of various mammals, 8510*g*, 8511*b*.
calcium and K in, after nicotinamide injection, 1472*b*.
calcium and proteins of, effect on thrombin-fibrinogen reaction, 5472*f*.
calcium in, 8038*b*.
in mammary cancer and osseous metastases, and effect of estrogens and androgens thereon, 8521*g*.
in parathyroid intoxication, 5120*i*.
pptd. by various concns. of $NH_4$ oxalate, significance and clinical application of, 6271*d*.
calcium, Mg and P in, of normal cows and in metabolic disorders, 4737*a*.
calcium, Mg and K in, effect of K administration on, 3496*h*.
calcium, Mg and K in, in diabetic acidosis, 5855*a*.
calcium-K ratio in, diagnostic significance of, 9224*a*.
cell-proliferation accelerating and inhibiting substances in, during pregnancy, 5841*b*.
centrifugation reaction of, compared with other clinical protein reactions, 7569*h*
chloride and Na in, 9199*i*.
cholesterol in, of chickens, 5841*f*.
in hepatitis, 8522*g*.
posterior pituitary lobe and, 4752*g*.
after thyroidectomy, effect of α-naphthylthiourea on, 3931*b*.
in xanthomatous biliary cirrhosis, 3095*f*.
cholesterol partition in, effect of incubation on, 9220*e*.
cholesterol-protein cenapses of, rupture of, 3420*e*.
cholesterol-protein complexes in, 9233*f*.
cholesterol soln. in, 9210*c*.
choline in, seasonal variations in, 5472*d*.
cholinesterase and tributyrinase in, in $CCl_4$ poisoning, 5116*a*.
cholinesterase collapse after bleeding and traumatic shock, 8042*i*.
cholinesterase in, in anaphylactic shock, 4761*b*.
arterial pressure and, 1074*a*.
blood sugar and, 2311*c*.
after chilling, 299*f*.
effect of folic acid on, 3497*a*.
effect of pituitrin on, 1488*c*.
effect of vitamin K, nicotinic acid and bile salts on, 2258*g*.
in hyper- and hypothyroidism and after treatment with thiouracil and derivs., 9245*a*.
in hyperthyroidism, 6722*i*.
insulin hypoglucemia and, 3520*d*.
in kala-azar, 3923*b*.
in labor and childbed in relation to acetylcholine content, and effect of histamine, pituitrin and folliculin thereon, 9201*d*.
in liver damage, 7570*e*.
in normal and adrenalectomized rats, 7102*f*.
in normal and paralytic limbs, 2311*g*.
in pathological conditions, 3092*h*.
in relation to aging and method of preservation, 5435*g*.
in skin diseases, 4362*a*.
in toxemic pregnancy, 3922*g*.
cholinesterase of, structure of, 6678*a*.
chromatography of normal and *Brucella* immune, 9228*i*.
citric acid in, after galactose- and glucose-tolerance tests, 9226*e*.
citric acid in, in Addison's disease, 9226*i*.
clearance of several substances from, simultaneously, 3090*g*.
colloidal state of, effect of vitamin K on, 2294*e*.
colloidal state of, in puerperium and gynecological disturbances, 1102*d*
collod (solid) from, P 7198*a*.
compn. of, during nutritional reconditioning of children, 3498*b*.
congealing of, 6492*a*.
Congo red disappearance from, and action of Periston thereon, 6311*h*.
copper and Fe in, 8520*f*
copper and Fe in, of children, 5475*g*.
copper in, 4309*h*
copper in, in kala azar, 3923*f*.
creatinine in, 7110*g*
in cross fertilization, 776*d*.
despeciated bovine, 5435*e*.
diphenylamine reaction of, 5488*b*.
dry constituent of, app. for obtaining, P 2268*d*.
dry, water sol., as blood substitute, P 1534*d*
eczema treatment with autogenous, protein content and, 3092*d*.
effect on methemoglobin formation after hemolysis, 8484*h*
on proliferation rate of neoplastic cells and bone marrow cells, 262*bc*.
on tuberculostatic compds., 3880*g*.
electrolytes in, removal or replacement of, P 3153*h*.
electrophoresis and ultracentrifugation of lipide-free, 3052*i*.
enzymes in, in perforated peptic ulcer, 8522*b*.
esterase in, in liver disease, 9238*d*.
esterified fatty acids in, 9197*e*.
ether no. of, 3855*f*.
euglobulin and γ-globulin contents of, Ca formol gel reaction and, 4321*a*.
factor inhibiting hemagglutination by influenza virus, and effect of receptor destroying enzyme and influenza virus prepn. on, 7120*i*
fat acids in, in infections, 5857*d*.
in nervous diseases, 5110*f*.
during Vichy cure, 5500*a*.
fat in, in hypertony, 8522*a*.
fibrinolysin of, release by specific antigen, peptone and polysaccharides, 7125*g*.
formol-gel reaction in, 4759*b*.
freezing point of, in normal and undernourished subjects, 3094*a*.
gelatinization of, with fibrinogen, 4760*g*.
globulin—see *Globulins*.
gonadotropin in, inactivation by influenza virus and receptor-destroying enzyme of *Vibrio cholerae*, 1102*b*.
gonadotropin of, enzymic inactivation of, 5060*d*.
hemolytic power of, effect of vitamins on, 6294*c*.
in hemophilia, 4357*a*.
hepatitis, factor agglutinating chicken red cells in old, 8524*c*.
heterologous, effect on fertilized ova, 3086*i*.
hyaluronidase inhibitor in, 4745*i*, 6680*i*, 9151*h*.
of cancer, 3094*g*.
in infectious diseases, 9222*h*.
Mg and, 4711*a*.
mammary cancer and, 2696*i*.
of normal and herpetic rabbit, effect of anaphylaxis on, 3094*i*.
in rheumatic disease, 9234*b*.
hydrochloric acid-collargol reaction of, as specific liver reaction, 8044*h*.
inhibition of influenza hemagglutination by, 1854*g*.
insulin antagonist in, measurement of, 5487*g*.
interfacial tensions of, in relation to flocculation and compn. of lipoprotein complexes, 1823*c*.
iodine in, in psychiatric patients in relation to psychologic tension, 5852*g*
iodine (protein-bound) in, age and, 8511*f*
iodine (protein bound) in, in hyperthyroidism diagnosis, 5854*a*.
iron in, after administration, 6737*i*, 6738*b*.
in allergy process, 5483*h*.
in $CaH_2$ poisoning, 6730*h*
after hypophysectomy, 8032*g*.
in kala-azar, 3923*f*.
during pregnancy, parturition and puerperium, 3913*g*.
in trachea stenoses, 3506*f*.
lability of, in trinitrotoluene poisoning, 6311*d*.
of leprosy and tuberculosis, antibodies pptd. by polysaccharide of tubercle bacillus in, 8515*h*
lipase in, in alloxan diabetes, 9210*a*.
antagonistic action of methylthiouracil to thyroxine action on, 3527*i*
in peritonitis, 8522*h*.
lipide-protein complexes—see also *Lipides*
lipide-protein complexes or lipoproteins, delipidation of, 8420*f*.
in luetic infections, 3920*h*.
ultracentrifugal studies on, 7520*i*.
lipides, 3872*b*.
detn. of I index of, 7539*c*.
effect on psittacosis virus, 717*a*
inhibiting serologic reactions, 4369*e*
in liver disease, 2307*g*.
lysozyme in, in disease, 9217*g*.
magnesium in, temp. and, 9260*f*
mineral constituents of, effect of bile salts on, 2688*b*.
mucoproteins of, hyaluronidase inhibitor and, 9238*c*.
nitrogen and vitamins in, in typhoid fever, 2294*c*.
normal and neoplastic, effect on cell proliferation in bone marrow, 307*a*.
novocaine hydrolysis by, as liver function test in pregnancy, 3922*f*.
oxidation-reduction potential in, 5483*d*
penicillin G in, after administration, 3935*g*.
penicillin in, after administration, 7589*a*
penicillin in, of cattle after administration, 8555*a*.
peptidase in, 4717*b*.
phosphatase in—see *Phosphatases*.
phosphorus in, of children, 4356*e*.
effect of $CaCl_2$ on, 5466*i*.
in osteoporosis, effect of steroid hormones on, 5488*a*.
plasmin and trypsin inhibitor in, 3516*i*
polarimetric changes in, after fractures 5854*b*.
polarographic reactions of, in illness 8042*f*.
polarographic study of, in neoplastic disease, 3514*h*.
polysaccharide and protein content of, in carcinoma sarcoidosis and tuberculosis, 2695*e*.
polysaccharides in, 2685*d*.
in carcinoma and tuberculosis, 1100*a*
in malignancy and other pathological conditions, 9230*c*.
porphyrin in, 6717*f*.
potassium in, effect of diphtheria toxin on, 5484*g*.
potassium in, in diabetic coma, 4369*h*

precipitins in, in histoplasmosis and blastomycosis, 752*c*.
in pregnancy, effect of hypertensin on oxytocin inactivation by, 3482*h*.
effect of hyperthyroidism and hypothyroidism on response to, 8492*b*.
effect on uterus cultures, 3083*d*.
protein fractions of, in inflammations, 8517*e*.
protein fractions of, Wassermann reagin in, 9219*d*.
protein index in, 9216*f*.
proteins, 265*f*, 746*h*, 2071*i*, 6297*f*, 9206*g*.
acetic acid effect on, 6261*h*.
adsorption of thiocyanate on trichloroacetic acid ppts. of, 6682*a*.
antibody distribution among, 3920*a*.
bilirubin stabilization by, 4710*i*.
biuret colorimetry of, 7524*h*.
in blood dyscrasias, 4758*a*.
in cancer, 8047*h*.
during carcinogenesis due to azo dyes, 4370*c*.
in catatonia, 3925*a*.
effect of adrenaline, elec. shock and insulin shock on, in mental disorders, 3924*d*.
effect of ultrasonic waves on, 5433*h*.
electrophoresis of, 2293*g*, 5487*h*, 6691*f*, 8034*e*, 9204*h*.
fixation of Ca and Na fluoresceinates by, 8049*f*.
of fowls, effect of adrenal-cortical ext. on, 5471*d*.
fractionation of, 1855*h*, 3486*a*, 4316*f*, 6602*f*.
gelation of, 3857*f*.
in glomerulonephritis, effect of protein consumption on, 2697*b*.
in gout, 4761*e*.
in hepatitis, 2308*h*, 2696*g*.
hypochlorite effect on, in healthy subjects and in edema, 8408*d*.
in *Leishmania donovani* infection, 4757*b*.
in liver diseases, 3096*a*.
in liver insufficiency, 7125*a*
macromol. chemistry of, 3480*g*
in mothers and young during pregnancy and lactation, 4744*e*.
of normal, tumor bearing and immunized chickens, 1477*d*.
origin of, 8523*a*.
pptn. with Congo blue and Congo violet, 9236*c*.
in pregnancy, 9209*e*
prepn. and properties of, 3925*f*, 5433*f*, 8401*c*.
in protein deficiency, 3076*i*, 7570*e*
in senility, 8513*h*
sulfadiazine binding by, 4308*b*
in sulfonamide distribution in body, 5112*f*.
surface areas and heats of absorption of, 2248*b*.
synthobulin effect on, 7587*h*.
thermal coagulation of, in cancer and effect of iodoacetate thereon 4308*h*.
in typhus fever, 2304*c*, 5857*c*.
proteins in plasma and, equil. between, 1813*h*.
proteolytic enzyme inhibitors of, in health and disease, 6676*c*
prothrombin-conversion accelerator in, 7103*d*.
pseudocholinesterase and tributyrinase in, effect of diisopropyl fluophosphate on, 5116*c*.
pseudocholinesterase in, effect of sulfonamides and *p*-aminobenzoic acid on, 1484*h*.
reducing power of, in malignant neoplastic disease, 299*d*.
reduction by, in malignant disease, 303*c*.
respiration of *Salmonella* in presence of normal and agglutinating, 271*d*.
sepn. from blood, silicone treated test tubes in, 6689*i*.
sickness, 3513*b*.
heterogenetic hapten reacting with hemagglutinins in, 3092*g*.
nicotinamide in therapy of, 1864*a*.
silica in, at various ages, 8514*b*.
sodium in, after cerebral concussion, 5111*g*.
sodium in, significance of, 8481*i*.
streptomycin in, after administration, 7589*e*.
surface tension of, 712*b*.
thrombin inactivation by, effect of heparin and histamine on, 296*g*.
thrombin inactivation by, effect of toluidine blue or thrombokinase on, 3081*b*.
thymol test of Maclagan, 7072*i*.
thyrotropic hormone in, in thyrotoxicosis, malignant exophthalmos and myxedema, 7119*f*.
uranium (quadrivalent) in, 8270*f*.
urea in, after thyroidectomy, 7569*e*.
urea in, protein consumption and, 6710*h*.
after vaccination against hoof-and-mouth disease, 3512*i*.
vasoconstrictor from, 742*h*, 2259*c*.
vasoconstrictor from, enzymic inactivation of, 1075*i*.
vitamin $B_2$ in diet and, 265*f*.
vitamin E in, of mother and fetus, 1851*d*.
x-irradiated, pharmacol. reactions of, 5861*i*.

**Blood substitutes**, dehydrated water-sol. serum, P 1534*d*.
Periston as, 8530*f*.

**Blood sugar**. (See also *Diabetes; D-Glucose; Glycemia; Hypoglycemia;* and "carbohydrate" under *Metabolism, animal*.)
acetoacetate effect on, 3928*a*.
in Addison's disease, 1480*b*.
adrenaline effect on, 6728*f*.
effect of desoxycorticosterone acetate on, 8496*i*.
in liver disease and in normal subjects, 4761*b*.
after adrenaline injection and under low barometric pressure, 2691*c*.
in air-blast injuries, 8521*e*.
in alcoholism, 2330*c*.
in alloxan diabetes, effect of methylene blue on, 5498*h*.
alloxan effect on, 1482*c*.
altitude and, 3503*i*, 8033*a*, 8484*d*.
analysis for—see *Blood, analysis*.
in anoxia, 2302*i*.
in anoxia during acclimatization to high altitudes, 2691*g*
antibody response in diabetes in relation to, 4759*h*.
arterio-venous differences in, 8038*f*.
arterio-venous differences in, effect of insulin and glucose on, 9204*d*
carbonate metabolism between lactate, liver glycogen and, 7995*g*
cerebrospinal glucose and, 7102*d*.
chloremia and, 1111*c*.
cholinesterase in blood serum in relation to, 2311*c*.
copper sulfate effect on, 3523*i*.
of cows, 4737*a*.
after death, 9210*f*.
in diabetic coma, 9224*d*.
diastase content of blood and, 3505*a*
1,4′ - dihydroxydiethylstilbene sulfate effect on, 4378*a*.
effect of adrenaline and insulin on, after splanchnicectomy and adrenalectomy, 1853*f*.
effect of adrenaline, arterenol and epinine on, 8542*c*
effect of alloxan and cysteine on, 4378*d*
effect of liver blood on, and effect of liver passage on adrenaline and insulin action on, 4360*a*.
effect of lymph returning from head after stasis on, 5846*b*.
effect of vitamin $B_1$ and insulin on, 1472*d*
effect on adrenal-cortex secretion, 7117*a*.
on gluconeogenesis by kidney, 6305*a*.
on insulin secretion, 7145*c*.
electroconvulsive treatment and, 3924*g*.
of embryo and mother during normal birth and prolonged parturition, 8030*i*.
ephedrine effect on, in chick embryos, 5868*i*.
in epileptics, 305*c*.
in hay fever during acute shock, 7125*f*
histamine effect on, of sensitized and normal mice, 8518*g*.
hypnotic effect on, 8055*h*.
in kidney diseases, 8517*c*.
-lowering substances—see also *Insulin*
-lowering substances, 8558*h*.
-lowering substances contg. insulin and polyvinylpyrrolidone, P 6791*g*.
in mental disorders, effect of adrenaline, elec. shock, and insulin shock on, 3924*d*.
nicotinamide effect on, 736*b*.
nicotinamide effect on, in diabetic and normal subjects, 4383*g*.
nicotinic acid effect on, during hepatitis, 7126*b*.
nicotinic acid effect on, of diabetic and normal rabbits, 8470*c*.
in osteopetrosis (hereditary), 1482*h*.
pancreatic factor affecting, origin and distribution of, 744*d*.
after pancreatoduodenectomy, 1476*h*.
in paradiabetes, 1856*a*.
in parturition and milk fever, 7119*i*.
regulation of, 2693*c*.
autonomic innervation of heart in, 9199*g*.
central nervous system in, 7115*b*.
in crustaceans, 8560*c*.
environment and, 9201*a*.
after gastric operations, 5108*e*.
glycogen in liver in relation to, 3085*b*.
in hypoproteinemia, 7563*f*.
kidneys in, 1097*hi*, 5470*d*.
saccharin effect on, 315*b*.
in scarlet fever, 2697*g*.
after sense stimulations, 5847*h*.
in skin diseases, 4362*a*.
in suppurative processes, 2312*b*.
after surgery, 6300*f*.
tryptophan effect on, 320*i*, 8063*f*.
in tuberculous meningitis and in normal children in relation to cerebrospinal fluid sugar, 8041*h*.
in typhus fever, effect of glucose and nicotinamide on, 1472*b*.
in typhus fever of children, 2313*d*.
on vitamin $B_1$ deficient diet, 294*a*.
vitamin $B_2$ effect on, 1113*h*.
vitamin K effect on, 8479*g*.

**Blood vessels**. (See also *Arteries; Blood pressure; Capillary vessels; Circulation; Veins*.)
acetylcholine-antagonist effect on, 2704*g*.
acetylcholine effect on, effect of parpanit, atropine and tetraethylammonium on, 7134*a*.
adenosine triphosphate effect on, 2693*c*.
adenosine triphosphate effect on, and effect of acetylcholine thereon, 8482*b*.
adrenaline effect on, potentiation by amidine derivs., 1868*d*.
adrenaline sensitivity of, $CO_2$ and, 9201*g*.
adrenoxyl effect on, 5117*h*.
amine effect on, 5493*c*.
amino-alc. effect on, after pretreatment with ergotamine, 3028*e*.
*Ammi visnaga* action on, 5542*ei*.
anaphylactic hypersensitive lesions of, effect of salicylates and benadryl on, 3523*b*.
antimony-compd. effect on, 2316*g*.
antisclerotic prepn. contg. vitamin $B_1$ and $MgSO_4$ or NaI, 1157*b*.
benzodioxan and, 5864*g*.
bis(2-chloroethyl) sulfide effect on, 5403*i*, 8054*a*.
blood distribution in large and small, in shock, measured by radioactive isotopes, 5854*i*.
book: Peripheral Vascular Diseases, 4371*g*.
brain, contrast media for cerebral angiography in relation to injury to, 8418*g*.
in carbon monoxide poisoning, 5494*h*.
cation effect on tone of, 5115*i*.
cerebral and meningeal, pathological physiology of, 9235*a*.
clots in—see *Embolus*.
cold effect on, 5053*b*.
-constricting and -dilating substances, effect on epileptic convulsions from elec. shock, 2327*g*.
-constricting and -dilating substances, effect on pulmonary circulation, 9247*i*.
-constricting impulses, chem. transmission of, 8538*f*.
-constricting substances—see also *Serotonin*.
-constricting substances, amine salts, P 4429*d*.
α - (1 - aminopropyl)protocatechuyl alc., P 4696*e*.
biphenyl derivs., 1359*g*.
of blood and blood serum, 742*i*.
from blood serum, 2259*c*.
from blood serum, enzymic inactivation of, 1075*i*.
1 - (1 - cyclohexen - 1 - yl) - 2 - oxocyclohexanepropionic acid for manuf. of, P 6230*g*.
disinfectant, P 9388*g*.
hypertensin and, 302*e*.
2 - methyl - 2 - imidazoline derivs., P 2238*f*.
$N^1$ - (5 - methyl - 1,3,4 - thiadiazol-2 - yl)sulfanilamide derivs., P 6661*a*.
penicillin prepn. contg., P 9390*c*.
constriction of, by adrenaline, 1107*b*.
by fuchsin and methyl violet, 1488*f*.
in lungs from $CO_2$, 5113*a*.
in O deficiency, effect of adrenergic blocking agents on, 1109*i*.
*Crataegus*-ext. effect on, 8558*c*.

damage to, in dysentery and its prevention, 6302*d*.
-depressing factors in cirrhosis, 4363*i*.
depressor and pressor substances in, 4750*c*.
-dilating substances, *N*-isopropylnorephedrine as, 7582*c*.
from *Panzeria lanata* and *Leonurus tataricus*, 5548*g*.
3-pyridylmethyl acetate, P 8105*g*.
dilation of, by ephedrine, isoamyl nitrite, $NaNO_2$ and nitroglycerin, 758*i*.
disease of heart and, vitamin E in treatment of, 6296*d*.
diseases of peripheral, radioactive isotopes in study of, 6723*b*.
disturbances of, nucleotide prepn. for use in treatment of, P 6372*b*.
drug effect on, in hypotension, 7147*i*.
effect of adrenaline and noradrenaline on, of lungs, 4375*e*.
effect of aranthol, ephedrine and octin on, 8546*c*.
effect of citral and β-ionone on, 1488*h*.
effect of 2 methyl-1,4-naphthoquinone, 2-methyl - 1,4 - naphthohydroquinone and its esters on, 9246*g*
effect of tetramethyl- and tetraethylammonium hydroxide on, 6731*c*.
-exciting agents from kidneys, 2686*f*
granular-material adsorption by epithelium of, histamine and, 5854*b*.
granulopexy of endothelium of, histamine and, 3916*g*.
-heart reflexes, tetraethylammonium as aid in study of, 6744*e*.
hemostasis in peripheral, 754*i*.
hepatorenal vasotropic factors in cirrhosis, 4363*i*.
in lead poisoning, 9297*f*.
meperidine effect on, 8552*i*.
nicotine effect on, 757*d*, 760*h*.
nicotinic acid effect on, 3076*bd*.
nicotinic acid effect on, sex and, 3496*i*.
phenergan effect on, 7584*d*.
procaine effect on, and on their reaction to anoxemia, 4767*i*.
reactivity of, in normal and hypertensive dogs, 6320*d*.
refractoriness of, produced by benadryl and BAL, 6320*a*.
substances acting on, in blood plasma, 5472*h*.
cancer therapy with, 8059*i*.
pharmacology and chemistry of, 5862*f*.
physiol. action of, 5863*e*.
sympathetic vasomotor innervation of the skin, 8503*i*.
tetraethylammonium compd. effect on, 9266*b*.
thiobarbiturate toxicity to, 4768*f*.
of uterus, effect of ecbolics on, 9264*b*.
Valsalva expt., 6738*c*.

**Blowers**, for decarburization of steel, P 7404*a*.
for rotary-drum vacuum filters, 8213*e*

**Blowflies**. (See also *Calliphora erythrocephala; Lucilia*.)
control with DDT sprays dispersed from aircraft, 3139*d*
tarsal receptors of, stimulation by aldehydes and ketones, 4778*d*.
tarsal-receptor stimulation in, by glycols and their polymers, 2358*c*.

**Blowpipes**, micro-, 5233*f*.

**Blubber**, oils of - see *Oils*.

**Blueberries**. (See also *Vaccinium; Whortleberries*.)
*Lecanium* control on, 1524*h*.
magnesium deficiency of, 9313*c*.
mummy-berry control on, 5143*g*.
soil management under, 1134*c*.

**Blueberry maggot**. See *Rhagoletis pomonella*.

**Blue grass**. See "blue" and "Kentucky blue" under *Grasses*.

**Blue powder**. See *Zinc*.

**Blueprints**. (See also *Diazotype process*.)
guanidine sulfate for use in manuf. of, P 4292*g*.
marking compn. for, P 6099*f*.

**Bluing**, laundry, 411*a*, 9493*d*.
ultramarine-contg soap, P 5614*e*

**Bochvar, A. M.**, obituary, 7761*d*

**Boconize**, for mothproofing, 6356*c*.

**Body, animal**. See *Animal organism*.

**Body, human**. See *Animal organism*

**Body fluids**. (See also *Ascitic fluid; Blood; Urine;* etc.; such headings as *Potassium, analysis;* and "detn." under specific substances such as *Urea*.)
available, in Chinese, 8480*a*.
in circulatory failure of adrenal insufficiency, 5855*g*.
corrosion of metal plates by, 1303*f*.
deuterium oxide and thiocyanate spaces in protein depletion, 7099*b*.
dihydrostreptomycin distribution in, 3519*a*.
in dysentery toxemia, 6302*c*.
exchange of, effect of NaCl intake on, 2303*c*.
extracellular and intracellular, in muscle during starvation and dehydration, 9190*i*.
extracellular and intracellular, in tissue during water diuresis in normal and hypoproteinemic animals, 3919*c*.
extracellular, in nutritional hypoproteinemia, 3890*g*.
filtration and absorption in forearm, effect of local cooling on, 8039*c*.
fluorescein distribution in, after injection, 5858*d*.
formaldehyde and MeOH in, 5468*g*.
hyaluronidase in, of normal and diseased subjects, 1478*d*.
inorg compn. of, of fresh water and terrestrial invertebrates, 4388*d*.
inulin space as measure of extracellular, 7117*a*.
movements of, in liver disease, 5855*e*.
phosphorus uptake from, by nematode parasites, 9269*h*.
potassium and Na transfer between cells and, 8482*i*.
potassium homeostasis in extracellular, during removal by vivodialysis, 6268*a*.
during protein depletion, and effect of choline thereon, 8478*b*.
of serous cavities, chloride and Na in, 9199*i*.
tonicity and vol. of, in salt-depletion shock, 6726*i*
uric acid like chromogen in, 7111*i*
vol. of, detn. of changes in, 266*h*.
vol. of extracellular, 730*h*.
vol. of extracellular, detn. of, 7572*i*.

**Body heat**. See *Body temperature*.

**Body temperature**. (See also *Fever; Heat*.)
adrenaline effect on, skin in, 5480*i*.
cold effect on, of infant rats, 4754*e*
effect of actedron and thyroxine on, 7133*f*.
effect of autolyzed yeast, nucleic acid and related substances on, 5867*b*.
effect of 2,3 dimercapto-1 propanol and its glucoside on, 1377*a*
effect of pethidine HCl, atropine sulfate, benadryl and quinidine-HCl on, before and after adrenalectomy, 1868*i*.
effect of sprinkling on, of cow., 6775*b*
ergotoxine effect on, age and, 2692*h*
ergotoxine effect on, O consumption and, 5871*d*.
hypoxia and O consumption in relation to, 5480*e*
in insanity, 9232*h*.
low, O poisoning and, 5871*e*.
nicotine effect on, 757*d*
regulation of, in hibernating hamsters, 8563*a*.
hormonal factors in, 8507*i*.
by hormones in cold environment, effect of methylthiouracil on, 9244*b*.
in poikilothermic animals, 2333*a*.
vitamin C and, 736*c*.
sympathomimetic amines and, 7141*h*.
threshold for thermal polypnea, effect of 2,4 dinitrophenol on, 2321*a*.

**Body weight**. (See also *Growth*.)
amino acid effect on, during growth, 6295*i*.
*p*-aminobenzoic acid effect on, 7578*i*.
of chicks receiving pteroylglutamic acid, liver wt. in relation to, 2297*e*.
effect of estrogen alone and with testosterone on, 3089*i*.
effect of gluconic acid and vitamin C on, 9182*e*.
effect of hypophyseal growth hormone on, dietary protein effect on, 7561*a*.
effect of intramine, α-naphthylisothiocyanate and rhodanine on, 7136*g*.
effect of testosterone propionate and growth hormone on, 3089*d*.
growth hormone effect on, 8487*b*.
after hypophysectomy, diet and, 8468*h*.
steroid effect on, 3088*g*, 8512*b*.
testosterone propionate effect on, of castrated rats during recovery from fasting, 3090*d*.

**Boehmite**, formation of, 975*h*.
isoelec. point of, 6041*a*
from nepheline pegmatites of Vishnevye Mts., Mid Ural, 2807*c*.
precipitation from $NaAlO_2$ solns., 55*f*.

**Boiler plate**, standards of A.S.T.M. for, 4202*bd*.
tensile-test specifications for, 88*g*.

**Boilers**, cleaning of, 9307*a*.
cleaning of, boiler-water conditioning and, 6766*b*.
coating with asbestos, 7608*a*.
combustion gases from, heat-exchange app. for preheating air with, P 6874*f*.
corrosion in high-pressure, 3546*c*.
corrosion of, 2150*g*, 6138*i*.
effect of Cu and Fe oxide deposits on, 4905*g*.
by inhibited HCl, 1305*h*
prevention of, 3546*b*, 4623*d*.
station design and material compn in, 335*f*.
by $H_2O$ contg. NaCl, 6141*i*.
corrosion of heating surfaces of, 1305*g*, 4622*f*.
defect detection in, 8215*h*.
deposits (fireside) in oil-fired, 8646*e*.
deposits on external heating surfaces and corrosion of, 6808*bs*.
deposits on external heating surfaces of, and coatings for its prevention, 6392*c*, 8584*d*.
drains for, to speed up chem. cleaning, 2345*i*.
firing of—see *Firing*.
foaming in—see *Foaming*.
fuels for —see *Fuels*.
furnace —see *Furnaces*.
glazes for brickwork in, 5561*f*.
lab., 5236*a*.
operation of, with wood waste from pulp and paper industry, 3612*i*.
priming in—see *Foaming*
refractories for, standards for, 1797, 4785*f*.
slag from, uses of, 2911*c*.
for sugar factories, automatic app for, 6845*f*.
waste heat, in gas works, 837*i*.
water treatment for—see *Water, purification of*.

**Boiler scale** (See also *Scale*.)
analysis of, and related compds., spectroscope in, 3309*i*.
analysis of phosphate contg., for Al, Ca, Fe and Mg, 7866*e*.
compn. of, 4401*h*.
mineral compn. and synthesis in, 1605*h*
prevention of —see also *Water, purification of*.
prevention of, 6138*h*.
prevention of, app. for, P 509*g*, P 5140*i*
in waste-heat boiler, 837*c*.

**Boiler tubes**, corrosion by $CO_2$ in condensate in petroleum refineries, 6401*a*
standards of A.S.T.M. for Fe and steel 4202*bc*.

**Boiler water**. See *Water, analysis, Water potable and industrial; Water, purification of*.

**Boiling points**. (See also *Trouton's constant*.)
calcn. of, 8776*e*.
calcn. of, of hydrocarbon mixts., 2758
calcn. of, of liquids, 8775*g*.
chem. constitution and, 9023*b*.
chem constitution and, of alkyl naphthalenes and 1,2,3,4-tetrahydronaphthalenes, 1370*e*.
elevations of sugar solns., relation concn., pressure and per cent purity 5979*c*.
equil. vaporization consts. and, of hydrocarbon oils, 8658*c*.
heat of vaporization and, 3276*b*.
homology and, of esters of hydracryl acid, 4639*h*.
lowering of, by lewisite isomers, 917*a*.
measurement of elevation of, in mol. wt. detns., stabilization in, 1087*c*.
measurement of, of pseudocumidine + FD&C Red No. 1, 7231*b*.
measurement of, of wines, 7188*i*.
nomograph for, of $C_6H_6$-toluene-xylene mixts., 2050*f*.

**Boils**. See *Furunculosis*.

**Boivin, André**, obituary, 6875*c*.

**Boldine**, effect on tropokinesis in ameba meristems, 4346*i*.
mitoclasic action of, 6704*d*.

**Boldyrev, Anatolii Kapitonovich**, obituary, 5649*g*.

**Boletus, *luteus* and *variegatus***, effect of branching of pine rootlets, 3891*a*.

**Boll weevil and(or) Anthonomus grandis**
control of, 2729*h*, 3137*b*, 6775*b*, 7183*d*, 9329*g*, 9330*d*.
diluents in control of, 1142*h*.

**Bollworm**. See *Heliothis armigera*.

**Bolometers**, effect of α-ray bombardment on superconducting, 8851*a*.
effect of current on superconducting, in transition region, 2044*c*.
infrared sensitivity of superconducting, 493*g*.
**Bolts**, standards of A.S.T.M. for steel, 4202*f*.
**Bolus alba**. See *Kaolin*.
**Bombill**, compn. and nutritive value of, 782*c*.
**Bombs**. (See also *Atomic bombs*.)
aerosol, dispersal of triethylene glycol vapor with, 4405*i*.
with dye filler fluorescing when moist, 8139*a*.
incendiary, Napalm for, 8180*a*.
incendiary, powder for extinguishing fires from, P 5594*c*.
**Bombyx mori**. See *Silkworms*.
**Bonderization**, of aluminum, 7237*e*.
**Bonds**. (See also *Chelation; Double bonds; Molecular association; Triple bonds, Valency*.)
addn. to multiple, spatial orientation and, 8824*f*.
in alkali metal and H halides, 8762*i*.
alkali-sensitive, in irradiated cellulose, 6407*i*.
angle—see *Valency*.
in arsenical Ni ores, valency of Ni and nature of, 4167*g*.
bipyramidal pentacovalent, orbitals, 4526*h*.
branching and cross-linking of, in polybutadiene, 8725*c*.
breaking of, by recoil energy of atom in nuclear reactions, 7332*h*.
calcn. of unsatd., in lubricating oils, 2417*e*.
between carbon and other elements, free-radical formation by breaking of, 1230*h*.
carbon$^{-2}$ C$^{12}$ and C$^{12}$-C$^{14}$, rupture of, in decarboxylation of labeled malonic acids, 7333*b*.
carbon C, in benzyl, resonance energy of benzyl radical, 5306*f*
energies of, 453*a*, 5387*e*, 6496*c*.
in ethylbenzene, energy of, 8250*e*.
geometric approach to theory of, 8844*a*.
in glycols, fission of, 7418*h*.
isotope effect on rupture of, 2862*d*, 5299*b*.
rupture of, steric effects and, 6968*f*.
scission of, 7434*c*.
carbon Cl and C-H, in $CH_3Cl$, character of, 8275*f*
carbon-Cu, stability of, 8910*i*.
carbon F, 7851*h*.
carbon F, force const. and spectrum of, 2865*h*.
carbon halogen, velocity of hydrolysis of, 128*i*.
carbon, heat of dissocn. of, 6479*c*.
carbon H, C-N, N-H and N-N in dimethylhydrazines, 1314*c*.
carbon H, dipole moment of, in $C_6H_6$ derivs., 3714*h*.
exchange of H for D in, 5011*d*.
force consts. of, 6895*a*.
force consts. of, relation to HCH angle for CH radical, $C_2H_6$, $C_2H_4$ and $C_2H_2$, 4059*b*.
in hydrocarbons, reaction rates with Cl, 5270*b*.
in $CH_2$ radical, 5241*h*.
oxidation of, in $C_4$ hydrocarbons, 1309*d*.
polarity of, 3252*b*.
carbon-I and C-Mg, strength in reaction MeMgI + $I_2$, 991*g*.
carbon-Hg, in org. compds of Hg, 5004*b*.
carbon monoxide dissocn. and, 2830*i*.
carbon-N, 2679*d*.
in pyridinium compds., 4671*d*.
racemization and, of *N*,2,4-trimethylsuccinanilic acid 6-derivs., 1345*h*.
carbon-O, 6627*a*.
energy of, 6524*g*.
stability of, in photooxides, 5313*a*.
carbon, properties of, 5241*g*.
carbon-Si, 562*g*.
carbon-S, cleavage of, 2178*c*.
in carbonyl group of aldehydes and ketones, 7413*f*.
catalytic transformation of, 7899*b*.
cellulose-lignin, supersonic vibrations in breaking of, P 404*i*.
classification of types of, kinetics of isotopic exchange and, 6894*d*.
in compds. with marcasite and pyrite structures, 2052*c*.
covalent, theory of, 1621*i*.
cross-linkage formation, in animal fibers by 3,4-isopropylidene-1,2,5,6-dianhydromannitol, 8141*i*.
in Buna-S vulcanization, 2009*c*.
in gutta-percha in vulcanization, crystn. reduction by, 7739*c*, 8728*h*.
between macromols. in rubber recovery, 7738*i*.
in nitrile group-contg. rubbers, 2461*f*.
in polybutadiene popcorn formation, 1598*b*.
in polysulfide rubbers, cold flow and changes in relaxation rate by, 2013*b*.
in producing weather-resistant films, 7717*i*.
in rubbers on aging, creep and stress relaxation in relation to, 2013*d*.
in vinyl polymers, 7406*h*.
in viscose rayon finishing with resins, 853*a*.
during vulcanization by S, tensile properties and, 7250*f*.
in wool, 9457*e*.
cross-linked, formation and scission of, in heat-aged GR-S rubber in presence of chemicals, 8188*f*.
cross-linking degree, in rubber vulcanized by azodicarboxylates, tensile strength and elastic properties in relation to, 8730*b*.
crystal structure and, 8231*f*
in cyclic compds., molar sound velocity and molar refraction increments for, 4532*c*.
dissocn. energies in $MX_n$-type mols., 5242*h*.
dissocn. energies of methyl-Cd and $CH_3$-I, 4939*e*.
energy and ionic character of H and alkali metal halide, 8763*a*.
energy, length and order in graphite crystals and crystallites, 2484*bd*.
energy or strength of, adhesion tension and, 7777*b*.
of Al with Al, Al with Ni and Ni with Ni, 6031*b*.
of anions in Co ammines, 2856*b*
of Sb, As, Bi, N and P, 5240*g*.
calcn. of, 8764*b*.
of C, 4527*e*.
of carbonyl compds., 452*h*
of hydrocarbons, 452*f*, 6016*b*, 2052*g*.
of mols. of form $AB_3$, 6895*f*.
of oxygen with Si, 7794*g*.
of phosphates, effect on nucleic acid stability in tumor homogenates, 5856*d*.
in phys. chemistry, definitions of, 10*c*.
in quinonoid compds., 4954*h*.
energy or strength of covalent, of metals, 5242*b*
entropy of, regularities in, 475*i*.
force consts. of $CH_4$ and $CHD_3$ and distortion of bond-forming orbitals and effect on mol. vibrations, 5242*eg*.
force consts. of, of benzene and its deuterium derivs., 5306*a*.
calcn. of, and values for $H_2O$-$D_2O$ and $C_2H_6$-$C_2D_6$, 6478*i*.
of C with Cl, 2478*i*.
of C:O, in MeCOCl and MeCOSH, 8882*e*
in $Me_3SiCl$, 42*h*.
of diat. mols., 2510*b*.
of $CdMe_2$, 8882*h*.
with partial ionic character, effect of solvation on, 6876*i*.
of $P_4O_8$, $P_4O_{10}$ and $P_4O_6S_4$, 6015*h*.
soln. of secular equation of second degree giving, 7820*f*.
in sulfate ion, elec. field and, 5301*i*.
in $C_2Cl_6$, 7342*g*.
in $GeHCl_3$, 5321*f*.
in unsatd. hydrocarbons, 6512*f*.
variation in, 4527*h*.
vibration of long chain of $CH_2$ groups and, 7822*d*.
forces—see *Forces*.
formation of unstable, catalytic activity and, 8251*f*.
free energies in org. compds., 3276*f*.
heat of dissocn. of, 1250*c*.
-hybridization changes from nuclear displacements and interaction terms, 8221*c*.
hybridization of bonding orbitals in octahedral $XY_3$ mols., 5651*b*.
hydrogen, 3071*g*, 8220*h*.
in acetone mixts. with nitro-cellulose, 4928*g*.
*hydrogen*, in adsorption by bauxite, 6497*g*
in aminopyrimidines, 6487*f*.
between $PhNH_2$ or PhNHMe and *p*-dioxane, 7438*e*.
in carboxylic and sulfinic acids, 7454*d*.
in cellulose chains in amorphous regions of rayon, 3202*g*.
in contraction and permanent set of wool, 5955*h*.
in crystals, 8783*c*.
in *o*-derivs. of PhOH, 7300*h*.
dielec. consts. of substances with, 4529*i*.
effect on spectrum of carboxyl group, 3713*h*.
effect on stability of flavanones, 5396*b*.
in Et *p*-cymenecarboxylates, 1351*e*.
formation at peptide links in tanning, modified lignosulfonates in, 7732*h*.
formation between dihydric phenols and collagen, 7736*b*.
formation of, by benzene derivs. adsorbed on vitreous $SiO_2$ gel, 7344*a*.
formation of, effect on spectra of hydroxyl group-contg. quinones, 2094*c*.
formation with OH groups in silicic acid-Celite mixts. in adsorption of centralite and 4-nitrotriphenylamine, 8946*b*.
in 4-glycosidamino derivs. of pyrimidines, 3422*i*.
in hardening of polycondensation resins, 4509*e*.
intermol. reactions and, 1243*a*.
in keratin, 2810*e*.
in methylenediphenols, P 4698*h*.
in methyl salicylate, 2868*f*.
mol. assocn. and, 107*a*.
mol. assocn. and viscosity in relation to, 2059*f*.
mol. interactions in solns. and, 2490*g*.
mol. refraction and, 604*g*.
in *o*-nitrophenol and salicylic acid, 8766*a*.
in org. compds., elec. moments and, 6020*g*.
org.-liquid penetration and solvation of rayon in relation to, 2777*f*.
overpotential and, 48*a*.
of 2,4-pentanedione and its derivs., 7343*c*.
in peonol, 1350*d*.
in $KHF_2$, 8763*d*.
properties of solns. and, 7298*i*.
in quinhydrone, 452*a*.
Raman spectra of higher alcs. and, 7345*f*.
in salicylaldehyde and derivs., 943*d*.
in salicylic acid, 8899*c*.
spectra of mols. assocd. with, 7340*d*.
in 4-substituted cyclohexanols, 6174*b*.
swelling of wood in org. liquids and, 8763*c*
thermodynamics of, 8765*h*.
in $H_2O$, strength of, 4527*c*.
hydrogen (bifurcated) in α-$HIO_3$, 6479*b*.
hydrogen-N, in $NH_3$, dissocn. energy of, 7797*i*.
hydrogen S, in sulfinic acids, 5245*g*.
interat. distances for—see *Crystal structure; Ions, electrolytic; Molecules*.
intercorpuscular, quantum mechanics and, 3072*b*.
intramol., in aromatic mols., 4627*d*.
in ionic crystals, 8762*g*.
in iron silicides and related crystals, 918*i*.
length of—see "distance between atoms in" under *Molecules*.
in manganese dioxide, 4059*f*.
in metalloids, 2051*i*.
moments of, calcn. by quantum mechanics, 5240*h*.
nature of chem., in aromatic compds., review on, 6174*e*.
in N compds., 5013*f*.
nitrogen-O, without mesomerism, 6016*b*.
nitrogen-Si, in silazanes, refraction of, 1316*d*.
nitrogen-S, elec. moment of, 5241*a*.
nomograph for percentage of ionic character of, 5240*b*
order and other criteria of double-bond character, 5240*d*.
order or index, of azulene, 2831*f*, 7340*b*.
for conjugated hydrocarbons contg. a triple bond, 4570*a*.
electron residual affinity and, 6512*c*.
in 4-methylthiazole, 5777*b*.
of N-$C_6H_5$ bond in dimethylaniline derivs., 6919*a*.

*order or index*, in nonbenzenoid hydrocarbons, 5650*i*.
of *p*-quinodimethane, 5759*d*.
in unsatd. mols., 6512*c*.
orders and polarity of, detn. of, 2479*e*.
in oriented overgrowths of org. substances on inorg. carrier lattices, 4918*a*.
overlay integrals and, 7762*f*.
peptide, formation of, 5403*i*.
phenyl-carbon-phenyl angle in 1,1-diphenylcyclopropane, 155*b*.
in phosphorus mol., 7276*f*.
polarizabilities of, and bond refractions in alkanes, 5242*i*.
in polymers, 9455*d*.
properties, 1230*f*.
quantum mechanics of, 8763*i*.
quantum theory and, 5659*c*.
in α-quartz, 6881*b*.
in rare earth hydrides, 2883*a*.
resonating-valence-, theory of metals, 8764*a*.
review on, 3672*g*.
rotation around single, theory of potential barriers hindering, 5240*b*.
in salts, periodic system and, 2829*g*.
sound-velocity increments of, in polymethylsiloxanes, 3256*g*.
sound-velocity (molar) increments of, 6025*b*.
spectra and, of aromatic hydrocarbons, 1359*i*.
splitting of, in cellulose mol., 5587*e*.
splitting velocity of weak, in cellulose, 5587*f*.
sulfur, strength of, 2599*g*.
type and stereochemistry of four-coordinated Cu complexes, 8222*a*.
valence , methods of, use in problems of mol. structure, 6876*g*.
variation of multiple, stereomerism and, 2479*d*.

**Bone ash**, affinity for U, 9240*e*.
calcium utilization from, 8463*b*.
of chick tibiae, seasonal differences in, 2866*b*.
regional variations of steer, age and, 5844*h*.

**Bone black**. See *Charcoal*.

**Bonefish**, food poisoning from raw or cooked, 327*g*.

**Bone marrow**, adrenocorticotropin effect on, 8037*d*.
book: Atlas of, Pathology, 4371*f*.
calcium and P metabolism in, 3856*i*.
carbon disulfide effect on, 7577*f*.
cell proliferation in, effect of blood serum (normal and neoplastic) on, 307*h*.
cells of, effect of 2-chloroethyl vesicants on, 7135*d*.
compn. of, 9197*e*.
copper in, of pregnant animal and fetus, 9208*d*.
copper (radioactive) affinity for, 1445*e*.
curettage, effect of choline chloride on fat emboli produced by, 4768*g*.
effect of 5-alkyl derivs. of 2-thio-6-methyluracil on, 2326*c*.
effect of liver exts. and nicotinamide on, 1853*f*.
effect of thiouracil and thiourea on, 9203*h*.
erythroblastic hyperplasia in, effect of N mustard on, 8556*g*.
erythropoietic effect of exts. of yellow, and its relation to batyl alc., 6737*f*.
fat of—see *Fats*.
fatty acids ($C_{20}$) in horse gelatinous, 6839*d*.
growth of tissue culture of, effect of glutathione on, 296*i*.
hemin synthesis in homogenates of, 5054*a*.
lead effect on cultures of, 1860*h*.
localization of radioisotopes of Y, Zr and Cb in, 5113*e*.
mast cells in, 3528*c*.
metabolism of, effect of pH on, 4752*a*.
oxygen satn. in, in hemorrhagic erythropoiesis, 307*i*.
penicillin effect on activity of, 8548*a*.
proliferation rate of, effect of pteridines and blood serum on, 262*c*.
protein fractions of, effect of As, Fe and x-rays on, 6262*fg*.
proteins in, in various conditions, 4359*h*.
respiration of, 9122*i*.
stippling in erythrocytes and normoblasts of, in Pb poisoning, and effect of splenectomy thereon, 4384*h*.
sulfur (radioactive) concn. in, after administration, 4376*a*.
x-ray effect on compn. of, 9090*c*.

**Bone meal**, calcium utilization in, 3893*b*, 8463*b*.
coarse stock flotation from, and fertilizer manuf. therefrom, P 1124*i*.
feeds from, compn. of, 3538*i*.
mold growth on, effect of water on, 9275*g*.

**Bones**. (See also *Calcification; Cartilage; Myeloma; Osteitis; Rickets; Skeleton;* and the headings beginning with *Osteo-*.)
adrenocorticotropin effect on, 8037*d*.
americium in, 7414*h*.
analytical methods in plant for processing, 6751*e*
ash in—see *Bone ash*.
books: Parathyroid Glands and Metabolic, Disease, 1104*c*; Neoplasms of, and Related Conditions, 4371*f*; Tumors of, 4371*f*.
calcium deposition in, of chick embryos, effect of estradiol benzoate on, 7579*f*.
calcium fixation in, nervous system and, 8485*f*.
calcium in, biol. availability of, 5462*c*.
calcium, Ra and Sr uptake by, 4755*g*.
calcium salt detn. in, 8418*i*.
callus formation on, effect of cancerigenic hydrocarbons on, 9239*f*.
cancer of, Ca and phosphatase in blood serum in, and effect of estrogens and androgens thereon, 8521*g*.
effect of androgens on, 1481*d*.
phosphatase of blood plasma in, 1855*f*.
from plutonium, 2322*h*.
carbon$^{14}$ deposition in, 4373*f*.
carbon disulfide effect on, 7577*f*.
carbon uptake by, 8508*e*.
charcoal from—see *Charcoal*.
citrate and lactate in, during growth, 5841*a*.
collagen in, and its detn., 1825*e*.
decalcification of, 3872*d*.
density of, detn. of, 8419*b*.
dietary P in relation to calcification of, 7562*g*
effect of calciferol and vitamin A on, 7098*a*.
effect of folliculin and histamine on calcification of, in ducks, 5471*ab*
effect of plutonium and radium on, 7135*e*
effect of selenium and thiouracil on jaw, 6735*c*
epiphyses, effect of insulin on, 2328*a*
ext. of, effect on testicles, 8041*b*.
fat from horse, 6839*c*.
fat of— see *Fats*
fish, recovering values from, on fishing ships, P 6437*d*.
flotation of coarse, from bone meal and fertilizer prepn therefrom, P 1124*i*.
fluorosis, 5854*d*, 5884*f*, 8531*b*
formation of, bone ext. in, 7584*c*.
fracture of, hypoproteinemia after, 3511*h*.
nicotinic acid in healing of, 1472*a*.
polarimetric changes in blood serum after, 5854*b*.
vitamins in healing of, 1471*i*.
gallium$^{72}$ deposition in, 7580*i*.
gelatin extn. from finely divided, P 3224*f*.
gelatin manuf. from, 6854*a*.
glue from—see *Glue*
grease from, specifications and analytical methods of Brit. Standards Inst for, 1581*c*.
homogeneous and sphaeritic calcification of, 5844*f*.
in lactoflavin deficiency, 7101*a*.
metabolism of Ca and P in, 3856*i*.
metal plates for, resistance to corrosion by body fluids, 1303*f*.
metaphysis of, during rickets development, 4757*d*.
mineral substance of, constitution of, 6716*e*.
nitrogen in, relation to age and function of regional variations of, 5844*h*.
oxygen consumption by, 747*e*.
phenanthrene effect on regeneration of, 5111*i*.
phosphatase of—see *Phosphatases*.
phosphorus detection in, 713*e*.
plutonium in, 1484*a*.
protein content of diet in relation to, 5097*h*.
radiation dosages in, by Ca$^{45}$, autoradiographs in detn. of, 4951*i*.
in rickets and scurvy, calcification of, 6295*b*.
salts of, compn. of, 5060*c*.
sodium carbonate incorporation in, 7567*e*.
uranium deposition in, 1114*d*, 8481*c*.
uranium in, 3285*h*.

**Bonisol**. See "basic" under *Copper chlorides*.

**Bonito oil**. See *Oils*.

**Booklouse**. See *Liposcelis divinatorius*.

**Books**. (*Specific books announced in* Chemical Abstracts *are entered under the subjects covered, as* Organic chemistry, *as well as in the Author Index. See also* Literature.)
bindings for, resinous product for, P 9525*e*.

**Boöphilus annulatus and(or) Cattle tick**, control of, 8598*i*.

**Booth, James Curtis**, biography, 3251*f*.

**Boots**. See *Shoes*.

**Boranes**. See *Boron hydrides*.

**Borascu**, in weed control, 7624*i*.

**Borates**. (See also *Alkali metal borates, Boric acid; Perborates*.)
adhesion of fused, to Pt and porcelain, 2062*i*.
book: Physicochem. Study of Native [in Russian], 7876*d*.
detection in foods, 9273*h*.
effect on adrenaline and insulin, 742*d*.
effect on storage life of butter, 327*b*.
glass, P 5166*bc*.
isohydric point of, and polyborates in aq soln., 3693*g*
manuf. from $Fe_2B_2$, P 6562*b*.
photographic emulsions contg., 2527*b*.
reaction with polysaccharides, 4315*b*.
review on, 6049*g*.
in stabilization of polythionates and polythionic acids, P 7651*g*.
systems, $Cr^{III}/Cr^{VI}$ indicator in, 5322*h*
in weed control, 7624*i*.

**Borax**. (See also *Kernite; Sodium borates, Tincalconite*.)
adhesive from dextrin and, P 8744*b*.
alkali metal sulfates in vitreous, magnetic susceptibilities of, 2052*i*
analysis and sampling of, 4787*d*.
in black-rot control on sweet potatoes, 7180*f*.
in brines of Calif.-saline lakes, 3571*g*.
burning and spectrochem. flux properties of, 8945*a*.
of California (Kern Co.), 4607*e*.
in celery-cracked-stem control, 1891*g*.
as corrosion inhibitor for pasteurizers, 6062*g*.
in dairy product preservation for phosphatase test, 3942*c*.
detn in fertilizers, 7175*e*.
effect on B content of oranges, 3115*i*
on chestnut tanning liquors, and color and turgidity of leather, 8183*d*
on conservation of latent image in photography of particle trajectories, 7328*e*
on glass disintegration and solns., 6379*i*.
on mold growth on wood, 7623*i*.
on penicillin action, 4330*e*.
on soap formation of permanent suds in hard water, 6435*i*.
in electrode (welding) coatings, 7101*f*
fire-retardant coatings from, and its mixt with boric acid, 4493*a*.
fire retardant compns. from, P 1126*h*
as fungicide for cantaloupe decay, 8133*i*
glasses, transference nos. in, 5656*a*.
gold magnetic susceptibility in vitreous, 2053*b*.
hydrates of, 8933*c*.
insecticide from, P 5899*g*.
magnetic susceptibility of hydrate of, 4528*f*.
manuf of, P 1927*i*.
mixts. with alkali and dextrin, properties of, 9500*b*.
mixt. with $HgCl_2$, carbohydrate oxidation with, 1720*g*.
oxygen-atom recombination on, 1635*e*
photographic plates contg., effect of pH on development of, 7328*d*.
in poison-ivy control, 9313*c*.
quartz crystn. from solns. of, 6026*h*.
reaction with polysaccharides, 6986*c*.
resin soly. in solns. of, 1584*c*.
standards for, 4399*g*.
in sulfur trioxide stabilization against polymerization, P 2745*h*.
system: $Na_2CO_3$–$H_2O$–, 7804*c*.
in termite control in bamboo, 3553*i*.

**Borax substitutes**, for graphite crucible, P 6803*f*.

**Borazene, *B* - dimethyl - *N* - phenyl-***, 5690*e*.

**Borazole***, 3301*h*.
derivs., spectra of, 7818*b*.
——, **hexamethyl-***, and compd. with HCl, 3301*h*.
——, ***B* - trihydroxy - *N* - trimethyl-***, 5690*c*.

——, *B*(and *N*)-trimethyl-*, 5600*a*.
——, *N*-trimethyl-*, 7856*g*.
**Borazyne, *B*-methyl-*N*-phenyl-***, 5690*e*.
**Bordeaux.** See *Dyes*.
**Bordeaux mixture.** (See also *Fungicides; Sprays.*)
in *Alternaria* blight control on petunias, 2725*f*.
in anthracnose control on dwarf beans, 7180*f*.
in apple-scab control, 7630*f*.
in bluestain control on pine, 8597*c*.
in *Cercospora beticola* control, 3134*b*.
in citrus-canker control, 5143*f*.
constitution of, 1138*h*.
in control of potato and tomato late blight, 2725*e*.
in cranberry fruit rot control, 804*e*.
in downy-mildew control on Lima beans, 3959*h*.
effect on DDT toxicity, 2728*e*.
as fungicide, 7177*c*, 8697*b*.
in grape-mildew control, 3950*e*, 8596*i*.
in grease-spot control on passion vine, 7180*a*.
in halo-blight control on beans, 8595*i*.
in mummy-berry control on cultivated blueberries, 5143*g*.
in pecan-scab control, 1139*a*.
in potato-fungus control, 801*g*, 9328*c*.
as potato spray, 4413*h*.
in powdery-mildew control on oranges, 2357*a*.
in powdery-mildew control on oriental magnolias, 7179*g*.
in *Sclerotinia laxa* control on apricots, 7179*g*.
in snail control on citrus, 4414*e*.
in tomato-disease control, 4413*b*.
in tomato fungus control, 9328*d*.
toxicity to bees, 344*c*.
**Bordeaux Red**, effect on benzidine-peroxidase color, 7521*e*.
**Bordet-Gengou reaction.** See *Complement fixation*.
**Bordet-Wassermann reaction.** See *Wassermann reaction*.
**Borers**, marine, 4414*e*.
**Boric acid.** (See also *Metaboric acid, Tetraboric acid; Tungstoboric acid.*)
alkylaryl esters, as antioxidants for lubricants, P 3606*j*.
ammonia absorbed in, in Kjeldahl detn. of N, detn. of, 1280*i*.
anticryptogam, fungicide, insecticide and parasiticide from, P 5530*a*.
catalyst activation by, in hydrogenation of CO, 2399*h*, 2400*a*.
catalyst from Cu, Fe, Mn and, in hydrogenation of CO, alkali and temp. effect on, 2397*h*.
as catalyst in ethanolysis of palm oil, 7723*i*.
as catalyst in reactions of ketene, 5366*k*, P 5795*e*.
catalyst of $AlCl_3$ and, in branched-chain hydrocarbon manuf., P 6217*e*.
catalyst of phosphoric acids and, for dehydration of hydroxylated oils, P 2790*a*.
catalysts of, and its derivs in $\beta$ lactone manuf. from carbonyl compds. and ketenes, P 5414*i*.
catalysts of kieselguhr, $H_3PO_4$ and, in polymerization of olefins, P 3190*c*.
catalysts of oxalic acid and, in polymerization of tung oil, P 0484*e*.
complexes of, absorption spectra of, 2093*d*.
with benzil, 6893*i*.
with carbohydrates and sugar alcs., amine salts derived from, P 1800*d*.
with mannitol, 6894*b*.
with quinone-resorcinol polymers for tanning, P 6452*f*.
compd. with polyvinyl alc. and Br or I, 4542*d*.
demasking reactions by, 4598*e*.
detection of, 4603*a*.
detection of, org. reagents for, 5696*c*.
detn. of, 2893*b*
in electroplating baths, 961*g*.
in tan liquors, 1205*e*.
as disinfectant for potato sets, 343*b*.
effect on alloxan activity, 5851*b*.
on *Candida*, 7087*g*.
on catalyst in hydrogenation of CO, 2397*i*, 2398*d*.
on *Clostridium saccharobutyricum* inhibition by malonate, 716*c*.
on nitrocellulose lacquers, 7718*k*.
on N fixation by *Azotobacter*, 7173*a*, 8591*k*.
on pear set sprays, 9347*i*.
*effect* on reduction of $Na_2WO_4$, 925*h*.
on seedlings of apetalous plants, 6703*i*.
on sol. matter in leather, 6451*d*.
on swarming of *Proteus vulgaris*, 4329*b*.
emulsion thickening with, or derivs., P 4898*h*.
fire-retardant coatings from mixt. of borax and, and from Zn borate, 4493*a*.
fire-retardant compns. from, P 1126*h*.
free energy of ionization of, 2075*c*.
as fungicide and its effect on trichophytin formation, 5084*a*.
glass attack by, 2385*f*.
glass, fabrication of strips of, 1659*c*.
globulin ppts. from blood serum with, effect of gum on d. of, 3874*a*.
heat of formation of, 7805*e*.
in house-borer control, 8598*g*.
hydrated derivs. of, 6049*f*.
identification of, for use in operating room, 3563*c*.
incompatibilities with $NaHCO_3$ and $NaHSO_3$, 817*c*.
insulating compn. from newsprint and, P 5518*g*.
isohydric point of aq., 3693*h*.
manuf. from Mg-contg. borate ore, P 5555*b*.
manuf. from tourmaline, P 7200*f*.
mixts. with alcs., osmosis of, 7300*g*.
mixts. with HF, $HBF_4$ formation in, 2494*b*.
phenylmercury deriv., antibacterial action of, 1456*e*.
in phosphate coating of metals, P 9022*d*
for photographic use, Am. standard specifications for, 6930*b*.
poisoning by, 5869*c*.
procaine salt, monograph for, 8103*c*.
reaction with esters of hydroxy acids, P 6651*i*.
reaction with polysaccharides, 6986*c*.
soil electrodialysis in, 3957*h*.
soly. of, 1241*h*.
in sulfur trioxide polymerization prevention, P 2745*h*.
in termite control in bamboo, 3553*i*.
trialkyl esters, compds with alkali metal alcoholates, reaction with $B_2H_6$, P 4684*i*.
trialkyl esters, compds with alkali metal hydrides, P 4684*e*
Vaughn-Levine medium contg., in examn. of frozen concd. orange juice, 8571*h*.
in wood preservation, 5149*c*.
**Boric acid, ethyl-.** See *Ethaneboronic acid*.
——, **phenyl-.** See *Benzeneboronic acid*.
**Borides**, alloys contg.—see "hard" under *Alloys*.
bonds in, 2052*a*.
review on, 3329*b*.
**Borine**, compd. with $Me_2N$, 7856*g*.
derivs., B detn. in, 5329*e*.
——, **aminodimethyl-**, and dimer, 5690*b*.
——, **anilinodimethyl-**, 5690*e*.
——, **chlorodimethyl-**, P 6220*d*.
compd. with $NH_3$, 5690*c*.
compd. with $MeNH_2$, 3302*g*.
——, **chloro(methylimino)-**, 3301*i*.
——, **chloromethyl(methylamino)-**, 3301*i*.
——, **dichloro(2 - chlorovinyl)-**, reaction with polyvinyl alc., P 2631*c*.
——, **dichloromethyl-**, P 6220*d*.
compd. with $MeNH_2$, 3302*f*.
——, **dimethylamino-**, 7856*g*.
——, **dimethyl(methylamino)-**, 3302*g*.
——, **methyl(phenylimino)-**, 5690*e*.

——, **4-propyl-**, 1354*e*.
**Borocaine**, monographs for, 4809*f*, 8103*c*.
**Borohydrides.** See *Boron compounds*.
**Boron**, absorption by, of neutron resonance activation, 4091*a*.
alfalfa requirements for, 9313*h*.
alpha-ray bombardment of, cross section for neutron emission in, 8265*d*.
alpha-ray bombardment of, emission of protons in, 6909*i*.
anthocyanin formation in *Spirodela oligorrhiza* and, 7550*g*.
from beryllium by deuteron action, 8876*ab*.
bonds with Cl and F, 8231*g*.
bond with C, energy of, 5242*d*.
catalyst activation by, in hydrogenation of CO, 2400*a*.
in coal, 1941*d*, 8639*e*.
-coated ion chambers, prepn. of, 4560*g*.
covalent and packing radii of, relation between, 9*i*.
in crop nutrition and soils of Vt., 3956*a*.
crystallochem. electronegativity of ion of, 8231*b*.
deficiency of, in apples, 2722*g*, 4411*a*, 8591*e*.
in kudzu, 3552*i*.
in peas, 800*i*.
in plants, soil condition and, 7618*i*.
deficiency symptoms and requirements of tobacco plants, 5454*d*.
deficiency symptoms in muscadine grapes, 9173*h*.
deuteron-bombarded, 1260*b*.
deuteron bombardment of, angular distribution of neutrons from, 8866*d*.
effect of manganese and, on growth and Ca uptake by lupine, 731*a*.
effect on Al-Mg alloy castings, P 3771*b*.
on Alyce clover, crimson clover and soybeans, effect of liming on, 8593*c*.
on amino acids in legumes, 342*a*.
on crystn. of steel, 531*h*.
on fruit formation on watermelon, 6286*c*.
on *Fusarium*, 9161*e*.
on grain size of Al-Cu alloys, 8337*f*.
on hardenability of high-purity alloy and com. steel, 3333*a*.
on hardenablility of steel, 2146*c*, 3330*a*.
on Fe, P 1709*d*, 6957*b*.
on nitrates and P in soils, 8081*f*.
on photosynthesis and development of marine algae, 8016*e*.
on plant respiration, 8459*c*.
on Si elec. properties, 9002*d*.
on stainless steel, P 1307*g*, 8332*c*.
on sugar cane, 6705*g*.
on Thermit welding, P 3772*g*.
on vegetables, 1134*e*.
elec. contact potential and photoelec. emission of, 1256*i*.
electrons of *L* shell of, scattering of x-rays by, 4131*a*.
energy levels of, doublet-intervals of, 7336*d*.
energy levels, spectrum, ionization potentials and magnetic splitting factors of, 8883*f*.
in enzyme activity, 1820*b*.
equil. with metals, 4917*e*.
extractive distn. from Fe boride with $BCl_3$, P 5728*f*.
filaments (Mo and W) coated with, 6133*i*.
geochemistry of, 7875*c*.
in graphite (Acheson), 8276*c*.
heat of combustion of, 8835*g*.
in honey, 3538*b*.

isotope of mass 9, mass value for, 8850*d*.
isotope of mass 10, γ-ray lines from excited, 4117*c*.
nuclear spin of, spin-orbit coupling in $Li^7$ and, 3283*g*.
spin of, 491*i*.
isotope of mass 12, β-rays from, 2506*c*,.
isotopes of masses 12 and 13, from C by action of γ-rays and neutrons, 4561*c*.
isotopic ratio in natural, of $B^{11}$ to $B^{10}$, 1261*b*.
in leaves of forest vegetation, 725*f*
in magnetic field, ratio of resonance frequency to proton frequency in, 8262*g*.
magetic moment and gyromagnetic ratio of, 5303*f*.
magnetic moment of, 3290*a*, 8878*i*.
manuf. of, P 5162*d*.
mass defects of, 8271*i*.
metabolism of, 9190*b*.
minerals, at Silver Harbour, Lake Superior, 4606*c*.
minerals, He in, 7875*b*.
in mung beans in disease, 6290*a*.
neutron absorption by, 8854*i*.
neutron bombardment of, γ-rays from, 3283*h*.
neutron cross section of, 6909*d*.
neutron monitoring with photographic emulsions contg., 4095*c*.
in nickel plating, P 2103*e*.
from nitrogen by neutron action, 2088*h*.
nuclear spins and quadrupole moments of $B^{10}$ and $B^{11}$, 491*f*, 8869*g*.
in nutrition of beets and turnips 7174*d*.
in nutrition of plants, 278*f*, 5891*d*, 9325*i*.
in orange peel, effect of borax soln. on, 3115*i*.
in orange (Valencia) leaves, effect of rootstock on, 3491*g*.
oxy and pyro ions of, bond lengths in, 4910*f*.
phosphor activated by fluorescein, duration of metastable state of, 7828*b*.
plant plasma resistance to, 729*c*.
plum requirements for, 9322*c*.
prepn. of pure, 4593*g*.
proton-bombarded, α-rays from, 3284*b*.
proton scattering by, 1259*g*.
in root environment, 1461*e*
in sediments and sea water, 5350*e*.
in sediments from Tyrrhenian Sea, 4610*f*.
sintered articles from, P 3734*f*.
in soil (peat) improvement, 7621*h*.
in soils of India, 9311*h*, 9312*b*.
in soils of West Virginia and their B requirements, 3550*c*.
solid solns. in Fe, 1300*h*.
spectrum of, 7858*h*.
steel contg., effect of N on hardenability and notch toughness of, 8332*d*.
in steel deoxidation, 7397*a*.
in steel hardening, 6958*a*.
in sugar-beet nutrition, 800*a*.
system: Mo–, powder diagrams of δ-phase of, 1261*h*.
system: Zr–, 6898*e*.
thermodynamic equil. in, freezing in of 3708*i*.
in tomato nutrition, 9322*a*.
in tomato nutrition, Ca and, 9313*b*.
in tung-tree nutrition, 1462*g*.
in water for irrigation, 3951*d*.
in waters (mineral spring), of Caucasia, 5519*h*.
in waters (mineral spring), of Japan, 7875*cd*, 7876*a*.
in waters of salt beds of Artemovsk Dist., Don Basin, 7382*a*.
wave functions of, 7336*a*.

**Boron, analysis**, detection and detn., 7858*h*.
detn., 2114*h*, 4596*i*, 6106*f*.
detn. in alloys and metals, 519*g*
in biol. material, 7998*a*.
in borate ores, 964*d*.
in borine compds., 5329*e*.
in Fe ores and assocd. rocks, 5710*b*.
in minerals and ores, solid reagents for, 6935*b*.
in org. substances, 3310*d*.
in plants and soils, 3310*e*.
in plant tissue, 1682*c*.
in presence of other acids, 5696*de*.
in sediments from Tyrrhenian Sea, 4610*g*.
in silicate inclusions in steel, 6110*i*.
in steel, 964*d*, 2546*a*, 8302*f*.
in water, 3951*d*, 7875*c*, 9302*i*.
detn. of available B in soils, 4412*d*.

**Boron acetate**, $B(OAc)_3$, as catalyst in β-lactone manuf. from carbonyl compds and ketenes, P 5415*a*

**Boron acids**. No entries this year. See *Boric acid; Metaboric acid*.

**Boron alkali metal hydrides**, P 4684*ehi*.

**Boron alloys**, beryllium-Cr-Co-Ni-W-, P 5358*c*.
chromium-, $Al_2O_3$ wetting by, 4438*c*.
iron-, B extractive distn. from, with $BCl_3$, P 5728*f*.
silicon-, elec. properties of, 4068*f*.

**Boron aluminate**, as abrasive bond, 6801*i*.

**Boron arsenate**, $BAsO_4$, gels in concd. $H_2SO_4$ and oleum, 3981*f*.

**Boron bromide** ($BBr_3$), and compd. with BOBr, as catalysts in dehydration of glycols, P 3834*d*.
heat capacity of, 1638*d*.
vibration frequencies of, 4571*d*.

**Boron carbides**. (See also "hard" under *Alloys*.)
uniting of, to Cr, Co, Fe or Ni, 9402*b*.

**$B_4C$**, electrons from mesotron-bombarded, 6504*g*.
graphite molds for plates of, P 7658*d*.
properties at high temps. of, and mixt. with SiC, 8627*d*.

**$B_6C$**, heat capacity and content of, 6500*a*.
iron alloy contg., P 8347*g*.
melting point of, 4614*a*.

**Boron chlorides**, in extractive distn. of B, P 5728*f*.

**$BCl_3$**, heat capacity of, 1638*d*.
prepn. of, 4967*f*.
in $SO_3$ stabilization against polymerization, P 2745*g*.
systems: $B_2H_6$–, $B_2H_6$–HCl–, and HCl–, 5247*b*.
vibration frequencies of, 4571*d*.

**Boron compounds**. (See also *Calcium borogluconate; Fluoboric acid*.)
alkyls, bond energies and heats of formation of, 5242*d*.
borine carbonyl, elec. moment and vibrational states of $B^{10}H_3CO$, 7821*f*.
quadrupole couplings of, 8869*g*.
spectra of $B^{10}H_3CO$ and $B^{11}H_3CO$, 491*g*.
spectrum of, 4573*c*.
borohydride, $BNaH_4$, P 2249*b*, 4684*ehi*.
borohydride, $NaBH_4$, acid chloride, aldehyde and ketone reduction by, 2570*d*.
borohydrides of Al, Hf, Th, Ti and Zr, 8937*f*.
from boron trifluoride by addn., 5657*f*.
catalysts of org. acids or anhydrides and oxy-, and polymerization of drying oils, P 9484*d*.
effect on glass melting, 3577*f*.
gluconic acid salts, for injection, 1907*c*.
heat of formation of $LiBH_4$ and $NaBH_4$, 7805*d*.
with hydrogen and $N(B_3N_3H_6)$—see *Triborinetriamine*.
identity of $Na_2(B_2H_6)$ and $NaBH_4$, 8937*i*.
with lithium, $BLiH_4$, P 4684*h*.
metalloorg. complexes, 7448*e*.
org., P 6220*c*.
org., absorption spectra of, 2093*e*.
in photographic elements, P 53*i*.
prepn. of $B_2H_5X$, 3302*h*.
reaction with esters of hydroxy acids, P 6651*g*.
review on, 2105*h*.
spectra of $Al(BH_4)_3$, $Be(BH_4)_2$, $LiBH_4$, and $NaBH_4$, 4573*a*.
as termite repellents, 9341*e*.

**Boron fluoride** ($BF_3$). (See also *Fluoboric acid*.)
addn. compds. of, 5657*e*.
aniline reaction with di-Me acetal of 4-methoxy-2-butanone in presence of, P 1444*e*.
azeotrope with $B_2H_6$, 5247*b*.
book: B and its Derivs., 5692*g*.
as catalyst, 8251*e*.
in acylation of olefins, P 2634*d*.
in addn. of alcs. to $(CH_2{:}CH)_2O$, 2079*d*.
in condensation of cyclohexene and epichlorohydrin with phenols, 6173*g*.
in condensation of phenols with terpenes, P 6237*b*.
in ketone manuf. from olefins and anhydrides or ketenes, P 4686*a*.
in polymerization of 2-methylpropene, 6061*c*, P 8130*e*, 8830*b*.
in polymerization of 2-methylpropene and compd. $BF_3.CH_3COOH$, 8829*g*.
in polymerization of oiticica oil and varnish cooking with ester gum, P 9484*b*.
in polymerization of vinyl isopropyl ether, P 3228*h*
*as catalyst*, in reaction of alkyl halides with $H_2S$, P 6648*f*.
in reaction of alkyl halides with thiols, P 6646*d*.
in reaction of ketenes with carbonyl compds., P 1056*a*.
in reaction of ketenes with esters of oxo acids, P 2635*f*.
in reaction of olefins with $H_2S$, P 664*h*, P 5790*i*.
in reaction of vinyl ether with alcs., 6157*d*.
in succinic acid ester manuf. from β alkoxypropionic acid esters and CO, P 3451*i*.
catalyst of $H_3PO_4$ and, in alkenylation of aromatic hydrocarbons, P 7507*f*.
catalysts contg., in alkylation of thiophene, 1395*e*.
catalysts for $C_2H_2$ reaction with alkylated benzenes, P 4051*d*.
catalysts of, and its complexes in alkylation of 2-methylbutane with $C_2H_4$, 3773*b*.
catalysts of complexes of, acids and a Hg compd. in acetal manuf. from vinyl esters and alcs., P 1433*h*.
in acylation of furan and thiophene, 6204*a*.
in removal of org. F compds. from hydrocarbons, P 6643*c*.
catalysts of drying oils bodied with, in alkylation of phenol with alkyl halides, P 3036*h*.
catalysts of $Et_2O$ and, in acetal formation from butyl vinyl ether and phenols, 3783*e*.
in acylation of furan and thiophene, 214*b*.
for polymerization of 2-vinylfluorene, P 8740*g*
in reactions of ketene, 5366*h*.
catalysts of HF and, in alkylation and isomerization of paraffins, P 5583*g*
in alkylation of isobutane with $C_2H_4$, P 2422*i*.
for hydrocarbon treatment, P 8441
in isomerization of hexane, P 4007*a*
in isomerization of paraffins, P 4006*h*
recovery of, P 3949*b*.
catalysts of Hg compds. and, in $C_2H_2$ reaction with HOAc, P 3839*b*
catalysts of Hg salts and, in halo acetal manuf. from vinyl esters and haloalkanes, P 6649*i*
catalytic activity of and its compds. in alkylation and polymerization, 1711*f*, 8074*d*.
compds. with $HPO_3$ or $H_3PO_4$ as catalyst for polymerization of propylene, 1214*h*
compd. with $Et_2O$, reaction with $B_2H_6$, 3805*b*.
compd. with $H_3PO_4$, as catalyst in alkylation of $C_6H_6$, 4638*b*, 7915*i*.
compd. with $H_3PO_4$, as catalyst in alkylation of benzene with propene, 1732*e*
dihydrate, reaction of chloro olefins with CO in the presence of, P 671*h*
formation from $B_2O_3$ and NaF, 5687*h*.
D-glucose pentaacetate reaction with phenols in presence of, 7922*i*.
heat capacity of, 1638*d*.
in ionization chambers, and prepn. of pure $BF_3$, 2505*g*.
in nitration of aromatic compds., 5013*a*
as promoter with HF catalyst in hydration of olefins, P 3438*f*.
reaction of mandelonitrile with $C_6H_6$ in the presence of, P 6666*b*.
reaction products with fluophosphoric acids as catalysts in alkylation of paraffins, P 5583*c*.
recovery of, P 1159*f*.
spectrum of, 7817*b*.
in sulfur trioxide stabilization against polymerization, P 2745*h*.
symmetry coördinates of, calcn. of, 8846*i*.
toxicology of, 5513*i*.
vibration frequencies of, 4571*d*.

**Boron halides**, reaction with alkyl halides, P 6220*d*.
reduction to B hydrides, 3302*g*.

**Boron hydride-$d_3$**, mass spectrum of, isotopic wt. doublet in, 7333*e*.

**Boron hydrides**. (*For derivs. see under* Borine; Diborane.)
constitution and reaction mechanism of, 4059*g*.
manuf. of, P 6795*e*.
as oxidizers with much energy liberation, 7229*g*.
prepn. by reduction of B halides, 3302*g*
review on, and related compds., 1535*d*

structure of, 959*e*.
**BH**, spectrum of, 7817*b*.
**$B_2H_6$**, azeotropes with $BF_3$ and HCl, and systems: $BCl_3$–, $BCl_3$–HCl–, HBr–, and $C_2H_4$–, 5247*a*.
heat of formation of, 8835*i*.
prepn. of, 4560*h*.
reaction with alkali metal alcoholates, P 4684*h*.
with alkoxyborohydrides, P 4684*e*.
with compds. of trialkyl borates with alkali metal alcoholates, P 4684*i*.
solns. in $NH_3$, 8241*h*.
spectrum of, 4573*a*, 8880*c*.
vapor d. and 2nd virial coeff. of, 4913*h*.
**Boronia oil.** See *Oils*.
**Boronic acids** ($RB(OH)_2$). (*Individual compounds will be found under names derived from the names of the hydrocarbons of which they are derivatives, e.g.*, Benzeneboronic acid *and* Ethyleneboronic acid.)
esters with polyvinyl alc., P 2631*c*.
**Boron iodides**, preparation of $BI_3$ and reduction of $BI_3$ to $B_2I_4$, $B_2I_2$ and $(BI)_x$, 8931*f*.
**Boron ores**, 5708*e*.
boron detn. in, 964*d*.
**Boron oxides.**
**BO**, spectrum of, 7817*b*.
**$B_2O_3$**, electron emission from, bombarded by K ions, 1256*f*.
free energy and heat of formation of, 9006*h*.
in glass manuf., 2747*d*, 5914*e*.
heat of formation of, 8835*g*.
in potassium fluoride-NaF eutectic melts alone and with other oxides, 5687*eg*.
in quartz-coating manuf., P 5919*a*.
reaction with $SOCl_2$, 2886*a*
in sulfur trioxide stabilization against polymerization, P 2745*g*.
system: BaO–, 4438*g*.
systems with alkali metal oxide with or without $SiO_2$, 5322*h*.
transformation range of vitreous, 2383*h*
**Boron phosphate** ($BPO_4$), catalyst for dehydration of hydroxylated oils, P 2790*b*.
gels in concd. $H_2SO_4$ and oleum, 3981*f*
in phosphate coating on metals, P 9022*d*
**Borotungstic acids.** See *Tungstoboric acid*.
**Boroxole, trimethyl-***, 3302*f*, 5690*e*.
**Borrelia**, *anserina*, inhibition and vaccine formation with *p*-hydroxy-*m* amino phenylarsene oxide, 8535*c*.
*gallinarum*—see "*anserina*" above
**Boscia**, oils of—see *Oils*.
**Bose-Einstein condensation**, for charged particles in magnetic field, 8257*a*
for films, 8225*e*.
**Bostrychia scorpioides**, sodium manno glycerate in, 8014*g*
**Botany** (See also *Plants*.)
books: College, 3496*i*, 5457*e*, Introductory, 5095*e*, Allgemeine Botanik, 7096*h*, Grundlagen der Botanik, 7556*i*, General, 8463*a*.
journal: Botanica Oeconomica, 8021*e*
reviews on, 1082*a*, 7092*a*

metabolism of, during autolysis, 2260*f*.
cerebrospinal fluid in, 8503*h*.
in emotional excitement and in sleep, 745*h*.
from various animals, 9208*e*.
mitosis and O consumption in, of embryo chick, effect of acridine compds. on, 7135*g*.
neoplasms of, localization with radio dyes, 1856*f*.
$P^{32}$ uptake by, 7140*h*, 9232*e*.
uricemia in, 704*c*.
neural connections between pituitary and hypothalamus, discharge of adrenocorticotropic hormone in relation to, 8511*i*.
neuraminic acid in, in amaurotic idiocy and Niemann-Pick disease, 4369*e*.
nicotinic acid in, during corn diet, and effect of tryptophan and $N^1$-methylnicotinamide thereon, 3075*g*.
nitrogen metabolism in, in pathol. processes, 7122*b*.
nitrogen, P and S compds. and water of, of newborn and adult mouse, 5476*i*.
nucleic acids in, of chick embryo, 3502*f*.
oxidation in, depression of, 7540*i*.
oxidation of glucose and its metabolites in, effect of snake venoms on, 2260*a*.
oxidation of pyruvate and succinate by, effect of amidone on, and its reversal by yeast ext., 8053*f*.
oxygen consumption by, 747*f*.
effect of Δ and γ benzene hexachloride on, 5113*g*.
effect of Nu-1196 and Nu-1779 on, 2700*h*.
effect of phenobarbital on, 7139*c*.
effect of thyroxine on, 3503*a*.
oxygen in, arteriovenous difference in, in relation to arterial $CO_2$ tension, 3088*c*.
oxygen quotient of rabbit cerebral cortex, effect of diisopropyl fluophosphate on, 1146*b*.
pathology of, after hypoglycemia in Sakel's insulin treatment, 3937*e*.
phosphatase in, in senility, 9211*g*.
phosphatases of, inhibition of, 7060*d*.
phospholipides of, in disseminated sclerosis, 3924*i*, 9232*i*.
phosphorus compds. in normal and polioencephalitic, 749*d*.
phosphorus metabolism of, effect of pituitary on, 8505*b*.
phosphorylation in, effect of pentobarbital on, 9264*c*.
potassium in, in free and bound state, 3087*i*.
potassium leakage from, in O deficiency, 6719*e*.
potential in, in normal and convulsive states, effect of anoxia, asphyxia and $CO_2$ on, 9260*e*.
protease activity of washed, 4706*i*.
pyruvate metabolism by, diphosphopyridine nucleotides in, 4747*h*.
pyruvate oxidase system of, toxicity of vesicants and other compds. to, 7590*c*.
radiography of subarachnoid space of, iodized oils for, 5534*b*.
respiration of, effect of castration and testosterone on, 5468*c*.
effect of diethylstilbestrol and steroids on, 7579*e*.
effect of pH on, 3084*e*.
effect of local anesthetics on, 8056*g*.
effect of $NaN_3$ on, and relation of temp. thereto, 8501*g*.
*respiration of*, inhibition by ethanol at varied temps., 1863*b*.
in running fits of dogs, 8047*f*.
sensitivity to isopropyl fluophosphate, 5122*g*.
sphingomyelin hydrolysis by, 4751*d*.
succinate oxidation in slices and homogenates of, effect of 2,4-dinitrophenol on, 3927*e*.
sulfhydryl compds. and vitamin C in, effect of Pb on, 1113*b*.
sulfur (radioactive) concn. in, after administration, 4376*a*.
temporal and spatial distribution of changes in, during spontaneous seizures, 9238*g*.
thromboplastic activity of, action of dicumarol on, 3519*f*.
trace elements in, 6719*g*.
vitamin $B_1$ distribution in, 9197*c*.
**Brakes**. (See also *Friction materials; Hydraulic systems*.)
corrosion preventive for, P 7896*b*.
flushing fluid for hydraulic, P 6341*a*.
gaskets for vacuum, acrylonitrile-butadiene compns. for, P 7260*d*.
linings for, P 3241*c*, P 6341*c*.
from Cu shot, P 3949*b*.
from furfural-ketone resins, P 3655*c*.
residues from heating drying oils under reduced pressure for, P 3215*f*.
**Bran** (*wheat bran unless otherwise stated*). (See also *Chaff*.)
*Aspergillus niger* and *A. oryzae* incubation on, amylase prepn. by, 1571*h*.
corn, for animal feed, P 2710*f*.
compn. of, 2333*i*.
phytic acid in, 3116*e*.
detn. of cellulose, hemicellulose and lignin in, 3532*f*.
diamine oxidase in, 3070*b*.
2-furaldehyde and pentoses from, 2171*c*.
growth factors in enzyme-free moldy exts. of, 1146*i*.
inorg. constituents of, in streptomycin production, 6369*a*.
maltase in mold, 6361*d*.
mold growth on effect of water on, 9275*g*.
moldy, in fermentation of corn, 5901*b*.
peanut, vitamin A activity of, 5098*h*.
phosphatase from, action on phosphoric esters, 4308*e*.
phosphorus in, 5508*g*.
rice and wheat, as Mn source in poultry feeding stuffs, 6331*c*.
rice, antioxidants from, P 1586*b*, P 2340*a*.
carbohydrates in, 1117*e*.
effect of cleaning rice on compn. of, 5126*g*.
glucoside from, 1117*g*.
utilization of, from French Indo-China 1117*hi*.
sorghum, carotene mixt. with, 3972*f*.
treatment with $ClO_2$, P 8071*g*.
vitamins $B_1$ and $B_2$ in 5508*f*.
yeast production from barley, rice and rye, 778*f*.
**Brandy**. (See also *Kirschwasser*.)
aguardiente, from mamoeira fruit, 8090*g*.
analyses of cognac, 5154*h*.
from bananas, 5153*i*.
copper removal from cognac, 5901*c*.
thermal vol. coeff. for cognac, 1904*h*.
Turkish, 353*f*.
vacuum-distd., 3141*h*.
**Bran oil**. See *Oils*.
**Brasil-**. See *Brasil-*.
**Brass**. (See also *Copper alloys; Zinc alloys*.)
activities in liquid, 4930*i*.
adhesion of Buna S or rubber to, and cleaning of, 5985*e*.
adhesion of lacquers and varnishes to, 8702*c*.
adhesive for, 9521*d*.
alpha, anodic soln. of textured, 5677*c*.
cathodic protection of stress-corrosion cracking of, 6094*b*.
cold working grains of, 6961*g*.
damping capacity of, grain size and, 533*b*.
plastic deformation in 70-30, 2557*g*.
slip in single crystals of, 9003*a*.
alpha-beta equil. in, effect of Fe, Mn and Ni on 3258*g*.
aluminum, 7886*a*.
in ammonia, delayed fracture of, 4048*i*.
analysis of, for Sb, Fe, Pb and Zn, 6539*a*.
for Cu and Pb, 5698*a*.
with general-purpose source unit for spectra, 7857*i*.
Pfeilsticker's intermittent arc in spectral, 8307*d*.
anisotropy in annealed polycryst., 6950*e*.
annealing of, in protective gas, 3757*d*.
annealing twins in, 7887*fg*.
beryllium-Ni, 2915*i*.
beta, crystal structure of, 14*h*.
beta, elastic consts. of, 1621*h*.
brazing of, effect of temp. on, 7890*a*.
calcium detn. in, 2117*e*.
cartridge, intergranular weakness in, 2563*i*.
casting and recrystn. of, 5355*h*.
casting of, P 7892*d*.
casting of, Mercast process for, 3333*e*.
as catalyst for H-atom recombination, 8251*d*.
as catalyst in dehydrogenation of 2,3-butanediol, P 3841*h*.
cathodes, chloropicrin reduction at, 8915*h*.
cathodes, decay curves of counting rate of, 4945*h*.
cleaning antique, 3335*i*.
cleaning, before electroplating, 95*h*, 8284*g*.
coating from, by spraying, 986*a*.
coatings from chromated proteins on, P 7895*d*.
coatings of, stripping from scrap, 3297*b*
coloring of, 4148*i*, 5352*h*.
condenser-tube plates of Naval and rolled, 5719*f*.
containers of, ghee storage in, 6327*f*
copper detn. in, 4178*a*, 4973*b*.
corrosion by fungicides in humid tropical climate, 873*f*.
corrosion in metallic systems contg., inhibitors for, P 8349*c*.
corrosion (intercryst.) of, 2149*b*.
corrosion of, 5722*h*.
by 2-furaldehyde, prevention with mercaptobenzothiazole, P 9480*i*.
by Nitrolite, 5721*i*
in $SO_2$, 101*g*.
Zn loss in, 1704*d*, 7399*d*.
in corrosion prevention in petroleum fineries, 8128*b*.
corrosion underground, 6141*c*.
destruction of, detn. of resistance to 1299*c*.
diffusion between Cu and, 1622*h*.
elasticity of, temp. and, 5715*c*.
electrodeposition of, 3727*e*, 4147*i*.
electrodeposits of other metals and, P 4152*a*.
electroplating on, racks for, 8907*g*.
electroplating with, from cyanide baths 1268*i*.
with reversing current, P 956*c*
rubber bonding to metals by, 8191*f*
etching reagent for, 3761*f*.
friction (internal) of, 5252*a*.
friction of, effect of org. substances on 2060*b*.
gamma, magnetic susceptibility of, temp and, 8767*b*.
gas removal from, 1703*g*.
grain growth in, 534*a*.
grain size of deep-drawing, effect on tensile strength, elongation and endurance limit, 94*a*.
heat transfer by radiation to surface of, 4939*b*.
hollow ware of, refinishing of, 5676*a*.
iron, corrosion of, control of, 2564*e*.
iron detn. in, 2889*e*.
lead, in manuf. of clocks and instruments, 6059*a*.
manganese, P 8348*c*.
melting of, furnaces for, 2141*d*, P 4151*c*
molds from, effect on aging and tensile properties of rubber, 2023*h*.
nickel detn. in special, 968*f*.
paint-film thickness on, measurement of, 418*h*.
pipe fittings of, effect of water chlorination on, 3545*h*.
plastic deformation in, detection of, 8337*h*.
polarographic analysis of, effect of additives in quant., 4181*h*.
polishing (electrolytic) of, 6523*b*, 7351*a*
polishing (electrolytic) of pressings of, 7835*a*.
polishing of, soln. for, P 4626*h*.
powd., electroplating on parts from, 6924*h*.
powder metallurgy of, 7879*c*.
recovery and recrystn. in, 9013*h*.
recovery from scrap, 6090*c*, P 6966
recrystn. of strained, 7879*g*.
silicon carbide-contg., lapping bronze, P and steel with, 3786*h*.
solder for, P 9023*a*, P 9024*a*.
soln. (electrolytic) of, 1270*e*.
standards for, 4615*c*.
tin recovery from, 5712*h*.

tubes from, for petroleum industry, 1299*i*.
uniting of, with phenolic plastics, adhesives for, 4893*a*.
wastes of industry of, treatment of, 7885*g*.
zinc recovery from, 9011*g*.
zinc removal from, 4198*c*.
**Brassica.** (See also *Broccoli; Brussels sprouts; Cabbage; Cauliflower; Charlock; Collards; Crucifers; Kale; Mustard; Rape; Rutabagas; Turnips.*)
clubroot of—see *Clubroot*.
oils in, 8013*f*.
oils of—see *Oils*.
seed crops, control of insect pests on, 9336*b*.

of North Dakota, 4434*i*.
oil-field, amides of glyoxalidines for breaking emulsions of, P 9427*a*.
I in, of Krościenko, Poland, 3995*c*.
I manuf. from, 8622*i*.
of Saratov Dist., U.S.S.R., 4192*b*, 6371*h*.
stabilization and subsurface disposal of waste, 2757*f*.
water pollution by, in Kan., 9301*g*.
for olives (green), discoloration of, 5511*c*.
sauerkraut, carbohydrates in, 1499*d*.
sulfide-contg., treatment of, 8587*b*.
wells, 3982*i*.
of West Virginia, 6373*d*.
**Brinjal.** See *Eggplant.*
**Briqueting,** metal chips and borings, 530*gh*.
**Briquets.** (See also *Powder metallurgy; Tablets.*)
for grog firing in shaft kilns, 8113*d*.
of molybdenum oxide, P 7404*g*.
of ultramarine raw mix, P 9483*a*.
**Briquets, fuel,** binder for, cement and pulp-waste liquor as, P 4835*b*.
from charcoal and anthracite, for producer-gas manuf., P 4835*c*.
from coal, P 9419*c*.
carbonization of, 1948*e*.
coking of, 3598*d*.
in western Pennsylvanian beds, 6547*f*.
from coal, coke or lignite, P 1170*e*.
industry, 2127*c*.
for lighting fires, P 8122*b*.
from peat, 8118*e*, 9400*g*.
from pulp waste liquor and finely divided fuel, P 1170*e*.
from semicoked-peat fines, P 5174*g*.
semicoke, from brown-coal distn., 8118*d*.
stability of semicoke in making, 5172*i*.
from waste paper, P 7686*h*.
**Briquets, ore,** manuf. from Fe ore, 2517*h*.
manuf. from taconite concentrate, 4611*f*.
**Brissopsis lyrifera,** amino acids in basic protein fraction from sperm nuclei of, 4388*a*.
**Bristle grass.** See *Grasses.*
**Bristles,** from acrolein acetal polymers, P 5636*a*.
from acrylonitrile polymers, P 5636*a*.
-manufg. industry, combating anthrax in, 7999*i*.
**Britannia metal,** hollow ware of, refinishing of, 5676*a*.
**British antilewisite,** See *1-Propanol, 2,3-dimercapto-.*
**Britske, E. V.,** biography, 3251*b*.
**Brittle materials,** stress concn. for, 2837*h*.
**Brittleness,** dielec. loss and, of vinyl compds., 435*i*.
of interstitial phases, 918*d*.
of iron single crystals from acids, 7395*f*.
measurement of low-temp., of elastomers, 1208*i*, 8723*d*.
measurement of, of quartz colored and colorless parts, 976*g*.
of steel—see *Steel.*
**Brittle substances,** crushing of, energy and surface in, 8751*e*.
**Broad-horned flour beetle.** See *Gnathocerus cornutus.*
**Broccoli,** cabbage-maggot control on, 3136*i*.
carotene and vitamin C in, 3536*a*.
carotene, dry wt. and vitamin C of, effect of environment and fertilizers on, 6754*a*.
fertilizer expts. with, 1134*e*.
leaf meals from, nutritive value of, 4343*e*
nicotinic acid synthesis by, tryptophan in, 9177*f*.
vitamin $B_1$ in and effect of cooking thereon, 6753*h*.
vitamin C in, 5511*b*.
vitamin C in, effect of blanching with radar energy on, 1493*b*.
weed control in, 1894*b*.
**Brochantite,** from Mt. Ramazzo, Italy, and Sardinia, 2129*c*.
**Brode, Wallace R.,** biography of, 4939*g*.
**Bromal,** hydrate, pharmacology of chloral and, 1862*a*.
**Bromates,** alc. oxidation by Br in the presence of, 7800*g*, 8350*g*.
detection of, in blood and urine, 4324*d*.
detection of, in presence of other oxidizing agents, 5700*d*.
effect on acid production, growth and proteolytic properties of lactic acid bacteria, 4340*i*.
elec. conductivity of, 1630*d*.
oxidation of, on thermobalance, 7367*g*.
sepn. from nitrites, 6883*b*.
**Brome grass.** See *Grasses.*
**Bromethol.** See *Avertin.*
**Bromides** (See also *Alkali metal bromides; Alkyl bromides; Bromine, analysis; Bromine compounds; Halides.*)
in blood after elec. shock, 9235*f*.
bonding strengths of, in Co ammines, 2856*b*.
complexes with $Hg^{++}$ ion, 4545*g*.
crystallochem. electronegativity of, 8231*b*.
detn. of, 65*c*.
effect on gelling and viscosity of solns. of gelatin, 4540*f*
on isoelec and isoionic points of serum albumins, 3690*c*.
on polypnea, 2323*a*.
on protoplasts, 5091*c*
elec. cond. in various solvents, 7301*f*
exchange on Amberlite IRA-400, 6489*f*.
heat of transport of, 8835*d*.
hemolytic activity of, 5839*c*.
hydration of, activity and, 7302*a*.
hydration of ions of, 8244*b*.
lattice energies of, 8230*g*.
in mistura nervina, 816*f*.
polyelectrolyte membranes permeable to ions of, 4892*f*.
reaction with chlorates, kinetics of, 1248*e*
reaction with hypochlorites, kinetics of, 7799*b*.
sorption of ions of, by glass, 8233*h*.
**Bromination.** (See also *Halogenation,* and "reaction" under *Bromine.*)
of acetaldehyde and its homologs, 2575*b*
of acetylenic glycols, 3782*i*.
of alkyl benzenes, velocity of, 6583*e*.
of allyl sulfones, 558*h*.
of 4 aminosalicylic acid, its Na salt and *m*-aminophenol, 7379*e*.
of 2-aminothiazole and 2-aminoselenazole, P 3042*b*.
of aromatic acids, 2603*g*.
of arylcyanopyruvic esters, 1746*f*
of ε-benzamidocaproic acid, 6078*b*.
with bromine-$Me_4NBr$ mixts., 6970*h*.
with N-bromosuccinimide, 1013*g*, 3792*a*, 9034*e*.
of 2-carbethoxycyclopentanone, catalysis by metal ions, 3273*e*.
of castor oil, 7722*f*.
catalysis of, by electrolytes in AcOH, 7408*f*.
of chalcone derivs., 1742*e*.
of coprostanone, 7495*b*.
of cyclobutene, 587*a*
of 1,5-cyclooctadiene, 591*d*.
of 4,4-dibromocoprostanone, 4681*a*.
of dicarboxylic acids in α-position, 1325*b*.
of 3,5-diethoxypyridine, 3824*a*.
of *dl*- and *meso*-4,4′-(1,2-diethylethylene)-dicyclohexanone, 6187*d*.
of dimethoxystilbenes, 1037*i*, 7008*a*.
of 4,5-dimethylfluorescein, 1984*e*.
of 2,5-dimethyl-3-thiophenecarboxylic acid, 4666*g*.
of diphenylacetylene, 1755*f*.
of enols, 6980*e*.
of β-ethoxypropionaldehyde diethyl acetal, 3359*f*.
of ethyl acetoacetate, kinetics of, 4642*d*.
of ethyl cyclopentanone-2-carboxylate, kinetics of, 3698*c*
of ethylene and derivs., 5731*e*.
of ethyl tetrolate, 4220*c*.
of ethyl (trimethylsilyl)acetate, 562*g*.
of fluorene, 4658*f*.
of fluorene and 2-methylnaphthalene, 7004*g*.
of 3-furoic acids and derivs., 5020*g*
of herniarin derivs., 5024*c*.
of 3-hydroxy-2-naphthoic acid, 7010*e*.
of ketones (phenyl) contg. ether groups, P 1806*h*.
of 3-keto unsatd. steroids, 7494*h*.
in liquid $SO_2$ soln., P 2232*f*.
of methylenecyclobutane, 586*d*.
of methylenediphenols, P 4698*g*.
of 5-methyl-1,4-hexadien-3-one, 2163*g*.
of methyl 4-methyl-2-phenyl-5 pyrimidyl ketone, 1424*b*.
of 2-methylthiophenes, 5781*e*.
of 2- and 3-methylthiophene with N bromosuccinimide, effect of $Bz_2O_2$ on, 6612*h*.
of naphthalene, 2851*g*.
of 1,5-naphthalenediol and of its Me ethers, 615*b*.
of olefins with *N*-bromoacetamide, 5753*h*.
of olefins with *N*-bromosuccinimide, 9024*e*.
of phenanthrene, 1762*b*.
of phenylacetonitrile, 1752*i*.
photochem., of camphene and pinene with *N*-bromosuccinimide, 5768*a*.
photochem., of methylsiloxane films on glass, 2096*f*.
of polyallyl methacrylate, 8200*d*.
of quinoline, app. for, P 3726*f*.
of 8-quinolinol, 6113*g*.
of resinenes, 3597*i*.
of selenocyanates, 2159*i*.
of steroids, P 3474*i*.
of styrene polymers, P 1608*d*.
of sulfadiazine and sulfathiazole, 3804*b*
temp. effect on, of aromatic compds., 7471*d*.
of terpenes, 6600*h*.
of unsatd. compds., 109*i*, P 2628*i*
of unsatd. ketones and quinones, 1633*a*
of o-xylene, 1733*c*.
**Bromine.** (See also *Halogens.*)
absorption by $Na_2CO_3$ soln., 2378*d*.
accumulation by thyroid, 5471*f*.
adsorption of ions of, on $Al_2O_3$ chromatographic columns, 8271*d*.
alc. oxidation by, in the presence of $BrO_3^-$, 7800*g*, 8350*g*
alpha ray bombarded, Rb isotopes from 4122*e*.
antibacterial efficiency in dil. solns., 9159*g*.
atom, phys. consts. of, 2590*h*
reactivity in chalcone derivs., 1742*e*
reactivity of, in brominated pyridines, 641*eh*, 642*c*
substitution by I, rate of, 4628*e*.
in blood, 6684*h*.
bonds with Sb, As or C, elec. moment of, 5241*a*.
with Br, energy of, 8763*b*
with N, energy of, 8764*c*.
with P, molar sound-velocity increment of, 6025*b*.
catalysts of $CBr_4$, $CCl_4$, $CHBr_3$ or $CHCl_3$ and, in alkylation of paraffins, P 5181*g*.
compds. with polyvinyl borate or starch 4542*f*.
counters filled with, P 8284*b*.
covalent and packing radii of, relation between, 9*i*.
dehydrogenation by, of cyclohexane derivs., 158*e*.
as depolarizer of galvanic elements, P 6098*d*.
deuteron bombarded, Mn from, 8266*h*
as disinfectant for water supplies, 7165*b*
disintegration of, 2861*e*.
dissocn. of, 1630*e*, 7797*e*.
effect on adrenaline and insulin, 742*c*.
on cholinesterase in blood serum, blood sugar in relation to, 2311*c*.
on mitosis in onion root-tips, 3008*i*, 8449*e*.
elec. cond. of vapor of, in silent discharge, hysteresis in, 3730*i*.
explosion of mixts. with H, 4084*eg*.
flames, spectrum of, 5312*h*.
gamma-ray bombardment of, thresholds for reactions in, 4115*g*.
glucose oxidation by, kinetics of, 6895*i*
hydrolysis of, 7799*d*.
impenetrability radius of, 8794*e*.
ions (neg.) of, mass-charge ratio of, 8848*a*.
isotope of mass 80, efficiency of internal conversion of 4.5 hr. isomer to 18 min. isomer of, 4563*g*.
recoil energy of isomeric, 5295*f*.
sepn. of isomers of, 7332*d*.
isotope of mass 82, "cross-over transitions" for γ-rays in, 4119*b*.
as indicator in metabolism of triphenyl bromoethylene, 7106*h*.

*isotope of mass 82*, in therapeutics, 3524*c*.
isotope of mass 83, valence of, from $Se^{83}$ by β-decay, 7332*f*.
isotope of mass 84, data on forbidden β-decay of, 8860*a*.
isotopes of, in hormone and receptor studies, 9214*g*.
as indicator of spinal anesthetic distribution in tissue, 8058*b*.
in plant nutrition studies, 1079*f*.
sepn. of isomeric, 4123*c*, 7814*h*.
isotopes of masses 75, 77 and 80, from Se, 485*h*.
isotopes of masses 79 and 81, natural abundance of, 1649*h*.
isotopes of masses 79 and 81, neutron capture cross section of, 6506*a*.
isotopes of masses 82 and 83, from Th by α-ray action, 4127*a*.
isotopic wt., packing fraction and binding energy of, 4129*h*.
Joshi effect in, 2085*cg*.
Joshi effect in, and its mixts. with H and Cl, 7322*h*.
labilization of trans-group in complex by, 2854*g*.
lyoparachor of, 2834*d*.
in magnetic field, ratio of resonance frequency to proton frequency of, 8262*g*.
magnetic moments and gyromagnetic ratios of, 5303*f*.
manuf. and desorption of, 1535*g*.
manuf. of, in Argentina, 4819*i*.
from K salts, 1920*h*.
from sea water, 4819*d*, 8622*g*.
from sea water, etc., P 2381*g*, 5515*e*.
migration of, in bromocoumarins, 5024*c*.
migration of, in 1,3-diketones and β-oxo esters, 7908*i*.
mixts. with tetramethylammonium bromide, bromination with, 6970*h*.
neutron cross section of, 6909*d*.
neutron resonance levels in, estn. of spacing of, 4123*b*
phenylhydrazone cleavage by, mechanism of, 4247*h*
in pineapple juice, 783*i*
radius of bonded atoms of, 3252*c*.
reaction (cleavage) with tetraacetylglucose derivs., 1326*g*
reaction (color) with 17(α) hydroxy steroids in AcOH, 7941*c*.
reaction kinetics of, after neutron capture, 2078*a*.
reaction product with Et ether, 1313*b*
reactions see also *Bromination*
reactions with acetylenic glycols, 130*a*.
with aromatic sulfides, 2599*g*
with arylcyanopyruvic esters, 1746*f*.
with azide ion and thiosulfate or tetrathionate ion, 7799*g*
with bromotrichloromethane, 4548*d*
with EtOH, kinetics of, 7800*c*.
with H, kinetics of, 5266*c*, 8816*h*
with oxalic acid, catalysis by manganic ion, 2497*h*.
with oximes, 6569*b*
with Ag (+) α-phenylpropionate, 4241*d*.
with wood waste, P 3618*b*.
reaction with bromotrichloromethane, kinetics of, and prepn. of radioactive Br, 4548*g*.
removal from brominated compds. by enzymes, 1815*i*.
removal from bromo derivs. of $C_6H_6$, 8908*f*.
in sediments and sea water, 5350*e*
solns. of, spectra of, 6511*d*.
sorption by charcoal, 6038*b*.
substitution in inorg. compds., 2495*h*.
system $Cl-Cl_2-Br-Br_2-BrCl$, 5265*g*
thermal cond. and viscosity of, 4065*c*.
thermochor of, 8226*e*.
in vegetables, 3537*e*, 8572*d*.
in water (South African underground), 6763*i*.

**Bromine, analysis.** (See also *Bromides*.)
chromatographic sepn. from Cl, I and CNS on paper and detection, 8972*h*.
detn., 959*h*, 6539*g*, 8300*f*, 8947*e*.
ampuls of KI in, 9371*e*.
steeloscope in, 4179*g*.
detn. in antifermentatives and insecticides, 4179*e*.
in biol. material, 1454*a*, 5815*g*, 8419*d*.
in blood, 6684*g*.
in drugs, 7640*b*.
in halogenated fluoresceins, 8959*f*.
in org. compds., 6107*h*, 8959*g*.
in petroleum products, burner for, 6474*d*.
in presence of Cl and I, 6943*b*, 7369*e*, 8972*f*.
*detn.* in NaCl, 1286*i*.
detn. of combined Br, 3870*a*.

**Bromine chloride** (BrCl), bond moment of, 5240*i*.
dissocn. of, 1630*e*.
system: $Br-Br_2-Cl-Cl_2$, 5265*g*.

**Bromine compounds.** (See also *Bromides*.)
manuf. from bromo derivs. of methane and unsatd. compds., P 6644*h*.

**Bromine fluoride** ($BrF_3$), reactions with $CCl_4$, $CBr_4$, $CI_4$ and $C_2I_4$, 3774*i*.
reaction with halides, 3739*e*.

**Bromine iodide.** See *Iodine bromide*.

**Bromine ion.** See *Bromides; Bromine*.

**Bromine number.** (See also *Polybromide number*.)
detn. of, of benzine, 2415*b*.
detn. of, of unsatd. carbonyl compds, 6540*e*.

**Bromine oxide**, BrO, in flames of MeBr and Br, 5312*g*.

**Bromoacetate ion.** See *Acetic acid, bromo-*.

**Bromoaluminates**, structures of, 960*c*.

**Bromoargentates(I)**, 4971*a*

**Bromocadmates**, formation of, 8939*h*

**Bromocobaltates(II)**, in ethyl alc solns., 4970*i*.
spectra of, 520*a*, 7817*f*, 7818*b*, 8273*i*.

**Bromocobaltic(II) acid**, spectrum of ion of, 5305*a*.

**Bromocresol purple**, as adsorption indicator in thiocyanate titration, 8300*c*.

**Bromocuprates(I)**, properties of, 3308*a*.

**Bromocuprates(II)**, stability of, 4971*a*.

**Bromocyanogen.** See *Cyanogen bromide*.

**Bromoferrates(III)**, of nicotinamides, P 3471*b*.

**Bromoform** (*tribromomethane*), azeotrope with $(CHCl_3)_2$, 2834*f*.
catalysts of Br and, in alkylation of paraffins, P 5181*h*.
heat capacity of, 30*c*.
heat of soln. of $AlBr_3$ in, 2851*f*.
reaction with aldehydes, P 664*d*, P 4284*h*
soly. in Na xylenesulfonate solns., 1242*e*.
spectrum of, 12*d*.
ultrasonic velocity in, 1232*h*.
ultrasonic velocity in, temp. and, 7283*i*.

**Bromoiridates(III)**, system: bromoiridates(IV)-, 6535*g*.

**Bromoiridates(IV)**, system: bromoiridates(III)-, 6535*g*.

**Bromomercurates(II)**, formation of, 8939*h*

**Bromomethyl group**, parachor of, 2057*f*

**Bromophenol blue**, as adsorption indicator, 8300*c*.
cornea tolerance to, 3110*i*.
dissocn. consts. and tautomeric equil. of, in indirect colorimetry, 58*h*

**Bromopicrin**, spectrum of, 6016*d*.

**Bromosulfalein**, in bile, effect of choleretic agents on, 1869*i*.
in bile, excretion of, 1476*a*.
clearance of, as liver function test, 2657*i*
clearance of, detn. of, 5819*h*.
detn. in blood serum, 7539*i*.
detn. in blood serum, source of error in, 7539*i*.
hepatic and peripheral removal rates of, 3111*h*

**Bromotellurous acid**, $H_2TeBr_6$, 4167*h*.

**Bromothallates**, 8940*a*.

**Bromothen** See *Pyridine, 2-[(5 bromo-2 thenyl)2-dimethylaminoethyl)amino]-*.

**Bromothymol blue**, as adsorption indicator in thiocyanate titration, 8300*c*.
color changes and dissocn. consts. of, in alkali chloride solns., 3307*i*

**Bromural** ((*α-bromoisovaleryl*)*urea*), detection of, 8429*h*.
narcotic action of, in relation to action on cholinesterase in blood, 7142*e*.
solubility in iso-PrOH, 3147*i*.

**Bromus.** See "brome" under *Grasses*.

**Bronchi** and **Bronchioles**, -dilating effect of *N*-isopropylnorephedrine, 7582*c*.
-dilating substances, arterenol derivs., 3388*f*.
(hydroxyphenyl) amino alcs., P 3460*b*.
response of sensitized tracheal chain to, 1862*b*.
effect of adrenaline and noradrenaline on, 4375*e*.
response to adrenaline and histamine in lung distention, 759*c*.
spasm for mecholyl aerosol, protective action of diphenylhydramine and aminophylline on, 1861*f*.
spasmolytic prepn. for, 4226*e*.

**Bronchitis**, infectious, virus of, interfering phenomenon assocd. with, 8448*b*.

**Bronchodilators.** See *Bronchi*.

**Bronze.** (See also *Aluminum bronze; Copper alloys; Tin alloys*.)
adhesive for, 9521*d*.
aluminum detn. in, 6938*b*.
analysis of, for Sb, Fe, Pb and Zn, 6539*a*.
Bi counterelectrode in spectrographic, 8944*f*.
for P and Sn, 3314*c*.
ancient high-Sn, $SnO_2$ patina on, 2825*i*.
annealing of, in protective gas, 3757*d*.
antimony detn. in (*C. A.* has steel by mistake), 2543*b*.
bearings from, by powder metallurgy, 1703*h*, 6959*c*.
bells of, internal friction and, 3258*g*.
brazing of, effect of temp. on, 7890*a*.
casting of, 5355*h*, P 7892*d*.
casting of, Mercast process for, 3333*e*.
for casting, review on, 1703*h*.
Chinese (early), 8335*f*.
cleaning antique, 3335*i*.
cleaning of, for electroplating, 8284*g*.
coatings from, sprayed, 546*c*, 986*a*.
coatings of, stripping from scrap, 3297*b*.
containers of, glue storage in, 6327*f*.
copper detn. in, 4178*a*, 4973*b*.
corrosion-erosion test for, 1705*i*.
corrosion of pumps of, prevention of, 98*b*.
in corrosion prevention in petroleum refineries, 8128*h*.
corrosion resistance of condenser tubes of, 7399*a*.
electrodeposits of other metals and, P 4152*a*
electroplating with, 1268*i*, 8901*d*.
gases in Sn, melting and, 3763*a*.
gas evolution from, 532*h*.
gas removal from, 1703*g*.
iron detn. in, 2889*e*.
lapping hard, with SiC in $Al_2O_3$, Al, brass, bronze, brakeshoe materials and cast Fe, 3766*h*.
lead detn. in, 4178*d*.
lead-plating bearings of, 4147*g*.
lead, working condition in smelting and pouring of, 6559*b*.
metallurgy and thermodynamics of, 7877*a*.
octafluorocyclobutane decompn. in presence of, P 8220*a*.
porosity of, elimination of, P 5729*e*.
powder metallurgy of, 7879*c*.
soln. (electrolytic) of, 1270*e*.
standards for, 4202*i*, 4203*abc*, 4615*c*.
tin recovery from, 5712*h*.
tungsten (*the salt*) —see *Sodium tungstates*.
zinc detn. in, 3336*c*.
zinc removal from, 4198*c*.

**Bronzing.** (See also *Coating(s); Paint*.)
gold, Al-Cu-Zn dust for, 4489*h*.
gold powders for, 2444*h*.
nitrocellulose lacquers for, inhibiting caking of pigments and thickening of, 7719*a*.
powders or colors for —see also *Aluminum bronze* and "powd." under *Metals*.

**Bronzite.** (See also *Enstatite*.)
of Greenland (Sukkertoppen), 4191*f*.
from South Africa, 5346*i*.

**Bronzitites**, norms of average analyses of, 2552*b*.

**Brookite**, of Arkansas (Hot Springs Co.), 8318*e*.
colors and Fe ions in, 71*g*.
colors, crystal structure and Fe-contg. growth pyramids in, 72*f*.

**Broom.** (See also *Cytisus, Genista*.)
mixed yarns from, 4469*e*.

**Broomcorn.** See *Sorghum*.

**Broom grass.** See *Grasses*.

**Broussonetia.** (See also *Mulberries*.)
*papyrifera*, latex of, acetate from, 4041*i*.

**Brownian movement**, of clays, colloid content and, 2070*b*
micro-, of cellulose chains in rayon, 3202*f*

**Brownmillerite**, reduction by $CO_2$, 4967*g*.

**Browntop.** See *Grasses*.

**Brucea sumatrana**, glycoside from, 9377*g*.

**Brucella**, *abortus*, effect of gonadal hormones on infection with, 740*c*.
*abortus*, from mastitis, effect of antibacterial agents on, 3880*i*.
antibody-complement system, effect of sulfadiazine on, 9236*f*.
antigens of, 9236*hi*.
antiserum to, chromatography of, 9228*c*.
in chick embryo, therapy of infection by, 1113*e*, 7589*a*.
glucide-lipide antigen of, action of, 3916*h*.
*melitensis*, antibrucellina in treatment of meningitis from, 6708*a*.
oligodynamic Ag solns. and, 8446*a*.
*paramelitensis*, agglutinability and antigenic power of, 9152*i*.

protein antigen from, for diagnostic use, prepn. of, 8515*d*.
sensitivity to penicillin, streptomycin and sulfadiazine, 4336*g*.
**Brucellosis**, fat acids in blood serum in, 5857*d*.
oxidation-reduction potential of blood serum in, 5483*f*.
polymyxin in treatment of, 8554*i*.
**Bruchus pisorum** and(or) **Pea weevil**, control of, 1521*h*.
**Brucine**, 2396.
compd. with 3-acetyl-1,2-dihydroquinaldic acid, 1412*a*.
with (+)-α,γ-dihydroxy-β,β-dimethylbutyric acid, P 7038*i*.
with 1-ethyl-1,3-dimethylbutyl phthalate, 1312*g*.
with glucuronic acid, 2943*c*.
with glucuronidolyxose and tagaturonic acid, 5008*h*.
with 2-iodo-4,6-dimethylsuccinanilic acid, 1343*d*.
with γ-lactone of α,γ-dihydroxy-β,β-dimethylbutyric acid, P 1056*g*.
with malonic acid-$d_2$ derivs., 3392*e*.
with 1- and 2-naphthalenesulfinic acids, 9056*h*.
with D- and L-*N*-*p* nitrobenzoylthreonine, 8355*h*.
with (−)-phenethylsuccinic acid, 5380*e*.
with L-*N*-phenylacetylvaline, P 4698*a*.
with $H_2SO_4$ and $HNO_3$ esters of glycerol, 5368*b*.
with (2 thenyl)succinic acid, 6611*e*.
with valine derivs., 2270*h*.
detection and detn. as iodide with Bi and Sb, 357*d*.
detection in foods, 9273*h*.
detn. of, 3246*b*, 4810*f*.
dielec. potential and surface tension of, at different H ion concns., 7196*e*.
fluocolumbate(V), 5786*a*.
fluorescence of, 5311*a*.
iodosalicylate, 3148*d*.
isolation by electrodialysis, 3975*d*.
precipitation with heteropoly acids, 1672*b*.
quinoid derivs. of, respiratory and metabolic effects of, 3523*f*.
reaction with 1,2,3,4,5,6-hexachlorocyclohexane, 5752*h*.
soly. in Na salicylate solns. and its purification, 9363*h*
**Brucite**, as catalyst in isomerization of olefins, P 1561*b*.
as catalysts in thiol removal from hydrocarbon-oil cracked vapors, P 1174*e*.
decompn. and reaction with serpentine, 3274*h*.
dehydration by heat, kinetics of, 8816*e*.
in magnesia-$MgSO_4$ cements, 8633*g*.
-marble, of Ireland, 526*e*.
of Quebec, 525*d*.
synthesis of, 8804*g*.
**Bruni, Giuseppe**, obituary, 3669*f*.
**Brush** (*plants*), control of—see *Weed control*.
**Brushes**. (See also *Electric brushes*.)
bristles for—see *Bristles*.
**Brussels sprouts**, insecticide (systemic) for, 6776*d*.
**Bryobia praetiosa** and(or) **Clover mite**, control on apples, 3965*d*, 7630*d*.
**Bryonia dioica**, respiration of berry from, during ripening, 8014*i*.
**Bryophyllum**. (See also *Kalanchoe*.)
carbon dioxde fixation by leaves of, 8009*i*.
**BSM- 11**, for mildewproofing leather, 6853*c*.

with styrene, $Cl_3C(CH_2)_8SH$ as modifier in ferricyanide-activated, P 8195*f*.
with styrene with 2,4,4-trimethylpentylthiolactate modifier, P 2805*d*.
with 2,2,3,3-tetrafluoro-1-vinylcyclobutene, P 4295*d*.
with tetrahydrofurfuryl methacrylate, P 9519*d*.
with 1,1,3,3-tetramethyl-4-vinylisocoumaran, P 7250*a*.
with thiophene or alkyl derivs., P 5231*b*.
at −20° to −150°, P 3228*a*.
with vinyl compds., P 5991*f*.
with vinyl sulfones, P 7266*h*.
polymerization of, and its mixts. with styrene, P 4896*c*.
polymerization of, and its mixts. with styrene, monomer pressures during, 5222*g*.

polymerization of, at low temps. and properties of polymers, 4505*h*.
polymerization of, or copolymerization with acrylonitrile or styrene, creatine and creatinine as catalysts in, P 6859*c*.
polymerization of, or its derivs. with divinylarylene compds., P 7746*c*.
with satd. aliphatic compds. with peroxide catalysts, P 9520*b*.
with styrene at low temps., P 9521*b*.
with styrene in presence of drying oil, P 9520*h*.
with vinyl compds., P 5991*de*.
with vinyl compds., mercapto ether modifiers for, P 4507*g*.
with vinylidene compds. with quinone modifiers, P 2806*a*.
polymerization temp. effect on 1,2-, *cis*-1,4- and *trans*-1,4-addns. and structures of polymers, 8725*e*.
polymerization with diisobutylene at low temps. and reaction of polymer with P sulfide, lubricant additive by, P 2765*i*.
polymers (mixed) with styrene, P 2815*h*.
polymers of—see also *GR-S rubber; Nitrile rubbers; Rubber, substitute and synthetic*.
polymers of, and copolymer with styrene, infrared study of, 7822*f*.
polymers of, and its derivs., with acrylonitrile and derivs., P 7753*i*.
polymers of, with acrylonitrile and maleic esters, P 2470*d*, P 3239*c*.
with acrylonitrile, chemical- and weather-resistant vulcanized mixts. with vinyl acetate polymers, P 6860*a*.
with acrylonitrile, films from acrylonitrile-vinylidene chloride polymers and, P 2470*c*.
with acrylonitrile, lubricating greases and hydraulic fluids from, P 5184*b*.
with acrylonitrile, tetrabutyladipamide and its homologs as plasticizers in, P 7258*e*.
adhesion to cellulose, 8133*e*.
with alkyl esters of $\alpha,\beta$-dichloroacrylic acid, P 5638*e*.
alone and with styrene, crystal structure of low temp., and crystn effects of cooling and stretching, 8191*a*.
alone and with styrene or chlorostyrenes, 8189*b*.
breaking cationic emulsions of, P 5232*c*.
with butenes as petrolatum substitute, P 8743*f*.
with 1-butene, ultrasonic velocity in, 8239*f*.
with chloroprene, P 4051*f*.
compns. with cyclic diolefin polymers, P 8742*i*.
in corrosion prevention against chemicals, 6455*f*.
with cyclohexyl $\alpha$-chloroacrylate, P 2471*a*.
with diallyl chloromaleate, P 6866*b*.
with 1,1-dichloro-2,2-difluoroethylene, 2465*d*.
with 1,1-dichloroethylene and styrene, and films therefrom, P 8732*e*.
dynamic double refraction in solns. of, 6040*e*.
effect of heat and Na sand on, 4214*b*.
elasticity of, temp. and, 2027*g*.
emulsions from alkyd resins and oxidized, for textile-fiber treatment, P 6859*e*.
emulsions of melamine- or urea-HCHO resins and, for wool improvement, P 5602*f*.
with esters of cyano unsatd. acids, P 6651*e*.
with ethylene, cracking of, P 1049*h*.
with fluoromethacrylate esters, P 6465*g*.
with furfural, formed in extractive distn. in sepg. butene and butadiene, 1597*f*.
kinetics of thermal oxidation of, 924*e*.
with mercaptans, P 5232*e*.
with methyl isopropenyl ketone, 5988*ab*.
with 2-methylpropene, etc., P 8211*i*.
with 2-methylpropene, polyalkylated phenol-stabilized, P 5992*b*.
mol. wt.-viscosity relations and crystal structures of, effect of polymerization temp. on, 8727*a*.
with pentene or propene prepd. at very low temps., P 8195*b*.
polymers of, with propiolic acid esters, P 4514*i*.
pyrolysis of, and mass spectrometry and mol. wt. detn. of fractions therefrom, 7742*e*.
pyrolysis products of, 2810*g*.
reaction products with inorg. acids or anhydrides, P 2804*c*.
with styrene and with vinylidene chloride, mixt. of, P 2035*i*.
with styrene as pigment binder in paper, 1186*b*.
with styrene derivs., 1597*d*.
with styrene, dispersion incorporation into beaten fibers, P 6860*b*.
with styrene, intrinsic viscosities of, in vistex solvents, and calcn. of mol. wt., 9516*b*.
with styrene, low-mol.-wt., P 5641*g*.
with styrene, mixts. with polymers of unsatd. hydrocarbons, P 5228*i*.
with styrene, plasticizer for, P 4518*f*.
with $C_2F_4$, P 5410*g*.
with vinyl compds., stabilizing against aging and discoloration, P 8195*c*.
with vinylidene chloride and olefins, 2017*d*.
with 2-vinylthiazoles, P 2805*h*.
x-ray diffraction patterns of stretched low-temp., 8727*d*.
prepn. of, 993*i*, 4213*i*.
from 1,3-butanedione, 5359*i*, 5360*fghi*, 5361*a*.
from EtOH, 3644*a*
by EtOH decompn. with MgO catalysts, 2016*i*.
from EtOH, piperylene formation during, 991*h*.
by pyrolysis of Buna N and S, 2010*b*
purity of, app. for detn. of, 1616*i*.
reaction with $NH_3$, P 3439*d*.
with $BrCCl_3$, P 5789*f*
with CO and H, P 4287*c*.
with 1-chloroalkyl ethers, 9025*d*.
with $C_2ClF_3$ and with $C_2F_4$, P 4294*a*.
with 1,2-dichloroethyl ethyl ether, 2158*i*.
with $\alpha$ halo ethers, 6568*b*.
with HCN, P 4286*c*.
with $H_2S$, P 601*g*.
with methacrylic acid and its Me ester, 3373*g*.
with PhNO, 650*c*.
with olefins, P 5418*f*
with 2,4-pentadienenitrile, 4217*i*, 4218*a*.
with $C_2F_4$, 3370*d*.
and reaction with $C_2H_4$, P 6656*c*.
reactivity of, 9024*c*.
recovery of, P 7496*f*.
from alk. cuprous salt soln., P 4682*b*.
from gases P 7275*a*.
from hydrocarbons, 663*a*, P 2217*c*, P 3023*e*.
with liquid $NH_3$ solns., P 3192*b*.
from olefins, P 6218*b*.
polymeric residue detn. in furfural used in, 4184*c*.
purification of cuprous ammonium soln. used in, P 4682*c*.
from unsatd. hydrocarbons, P 1793*b*.
stability of, in kaolin-$Fe_2O_3$-KOH and kaolin-$H_3PO_4$ mixed catalysts, 4045*d*.
styrene detn. in mixt. with, 8884*i*.
sulfide*, 7420*e*.
system: styrene-, 2058*d*.
tetramer of, 1018*c*.
thermodynamic functions of, 5275*d*
transportation and handling of, 557*e*.
4-vinylcyclohexene detn. and removal from, app. for, 8975*d*.
4-vinylcyclohexene detn. in, 8975*e*.
**1,3-Butadiene, 2-amyl-**, 1311*f*.

——, **1,1(1,2-, 1,3-, 1,4-, 2,2- and 2,3)-dichloro-**, as scavengers in leaded gasolines, P 8667*g*.

——, **1,2-dichloro-**, chlorination of, 6567*i*.

——, **1,2(1,3 and 1,4)-dichloro-**, 6569*d*.

——, **1,2(and 2,3)-dichloro-**, dehydrochlorination of, P 663*d*.

——, **1,4-dichloro-**, P 4284*c*.
dielec. properties and structure of, 4912*b*.
hydrolysis velocity of, 129*c*

——, **1,2,3,4-diepoxy-**, condensation products from phloroglucinol and, P 1996*e*.
*dl-*, 2578*f*.

——, **1,4-difluoro-**, 3774*g*.

——, **2,2-difluoro-**, 2157*b*.
dehydrofluorination of, P 3437*f*.

——, **2,2-dimethyl-**, chlorination (photochem.) of, P 6644*h*.
cyclopentane extn. from, with liquid $NH_3$ solns., P 3192*e*.
distn. from naphtha, control of, P 3191*f*.
effect on myocardium sensitivity to adrenaline, 1111*e*.
formation of, in isomerization of $C_8H_{18}$ and $C_8H_{16}$, P 3833*d*.
reaction with polychloro ethylenes, 9025*a*.
spectra (infrared and Raman) of, 7822*a*.

—— **2,2(and 2,3) - dimethyl-**, compds. with desoxycholic acid, 3429*d*.
equil. with isomers, 5656*f*.
formation in isomerization of hexane, P 3833*b*.
in gasoline (Thermofor cracked), 4453*c*.
manuf. from hexane, P 4007*a*.
oxidation of, rate of, 5269*f*.
as solvent in cottonseed-oil extn., 423*h*.

——, **2,3-dimethyl-**, 2955*d*.
formation of, in isomerization of $C_8H_{14}$, P 3833*d*.
formation of, in reaction of $AlCl_3$ with iso-AmOH, 164*e*.
heat capacity of, 2758*g*.
lyoparachor of, 2834*a*.
manuf. of, P 1049*d*.
manuf. of, by alkylation of isobutane with $C_2H_4$, P 2422*h*, P 5181*a*.

Raman spectrum of, 2867*c*.
reaction with polychloro ethylenes, 9025*a*.
——, 1 - (3,5-dimethylcyclohexyl)-1,3-dimethoxy-, P 1058*g*.
——, 2,3 - dimethyl - 2,3 - dinitro-, 4217*f*.
——, 2,3 - dimethyl - 2,3 - diphenyl-. See *Bibenzyl, α,α,α',α' tetramethyl-*.
——, 1,2-dinitro-, P 6647*c*.
——, 1,1-diphenyl-, and dinitro deriv., 192*g*.
——, 2,3-diphenyl-. See *Bibenzyl, α,α'-dimethyl-*.
——, 2,3-dipiperonyl-, P 7047*g*.
——, dixylenol-*, effect on light action on GR-M vulcanizates, 7254*h*.
——, 2,3 - epoxy - 2,3 - dimethyl-, polymers, P 2038*f*.
——, 1-fluoro-3,3-dimethyl-, P 2628*g*.
——, 1,1,1,2,2,3,3 - heptachloro-4,4-bis(chlorophenyl)-, 9332*i*.
——, 1,1,2,3,4,4 - hexachloro-(?), isomers, 6200*b*.
——, 1,1,1,4,4,4-hexafluoro-, 2925*h*.
——, 1-iodo-, lyoparachor of, 2834*b*.
photolysis and photooxidation of, 5313*e*.
ultrasonic velocity in, 1232*g*, 7283*h*.
——, 1(and 2)-iodo-, decompn. by γ-rays, deuterons and neutrons, 8871*i*.
phys. consts of, 2591*a*.
——, 1-iodo-3-methyl-, heat capacity of, 30*i*.
phys. consts. of, 2591*a*.
——, 2-iodo-3-methyl-, decompn. of, kinetics of, 3350*d*.
——, 2 - (*p* - methoxybenzyl) - 1 - (*p*-methoxyphenyl)-, P 4699*i*.
——, 2-methyl-, alkylation of, with $C_3H_6$ in presence of $BF_3$ catalysts, 3773*b*
alkylation of, with 2-methylbutene with $H_2SO_4$ catalysts, 1554*f*
alkylation of, with propene, $BF_3$ and its compds. as catalysts in, 1711*f*.
alkylation with, of 1-pentene polymers with $AlCl_3$-HCl catalysts, P 4008*d*.
compds. with desoxycholic acid, 3429*c*.
detn. in hydrocarbon gases, 5930*h*
in paraffins, 8652*i*.
in petroleum-refinery $C_4$ fractions, 8123*e*.
distn. from naphtha, control of, P 3191*f*.
distn. from pentane mixts., 2414*b*.
effect on myocardium sensitivity to adrenaline, 1111*e*.
flame propagation limits for, 3618*e*.
formation of, in hexane isomerization, P 3833*b*.
in isomerizations of $C_6H_{14}$ and $C_5H_{12}$, P 3833*c*.
from pentane isomerization, 1712*e-h*.
in reaction of $AlCl_3$ with iso-AmOH, 164*e*.
heat capacity of, 2758*g*.
lyoparachor of, 2834*a*.
manuf. of, P 6217*f*.
manuf. of, by isomerization of pentane with HF-$BF_3$ catalyst in presence of $C_6H_6$, P 4006*h*.
mass spectrum of, 3288*g*.
Raman effect and thermal properties of, 2083*a*.
Raman spectrum of, 2867*c*.
recovery from gasoline in cycling plant, 2412*f*.
removal from amylenes for alkylation of 2-methylpropane, P 9130*e*.
system: pentane–, 5273*a*.
viscosity of, pressure and, 4067*d*.
——, 2 - methyl - 3 - phenyl-. See *Benzene, (1,2-dimethylpropyl)-*.

reaction with quinizarin derivs., P 9467*e*
——, **3-amino-**, compd. with 1-sulfanilyl-2 thiourea, P 687*a*.
——, **4-amino-**, 2579*f*
——, **2-amino-3-methyl-**, L-, and salts, 6979*a*.
——, **2 - benzyl - 2,4 - diphenyl-**, and carbanilate, 1351*a*.
——, **2-benzyl-2-nitro-**, P 3038*c*.
——, **3-(benzyloxy)-**(?), 6976*a*.
——, **3-bromo-**, acetate, P 4690*a*.
——, **2 - bromo - 3 - methyl-**, ethers, 3358*i*.
——, **2 - [*o*(and *p*) - bromophenylazo]-2-nitro-**, 4046*h*.
——, **3-chloro-**, 2934*h*.
——, **4-chloro-**, effect on seeds, 4733*i*.
——, **2 - [*o*(and *p*) - chlorophenylazo]-2-nitro-**, 4646*gh*.
——, **2 - cyclohexylamino-**, *p* - dialkyl aminobenzoates, hydrochlorides, P 2640*d*.
diphenylacetate-HCl, P 2639*i*.
hydrochloride, 3419*d*.
——, **3,4-dibromo-2-methoxy-**, 6157*g*.
——, **2 - (2,5 - dichlorophenylazo)-2-nitro-**, 4646*h*.
——, **3,4-dimercapto-**, 3783*g*.
——, **2,3-dimethyl-**, 6155*b*.
——, **2-ethyl-**, acetoacetate, reaction with aniline and with *o*-toluidine, 228*g*.
esters, 6168*c*, 7455*g*.
ester with 2-ethylhexyl 4-sulfophthalate, Na salt, pharmaceutical carrier for, P 2375*d*.
and α-ethylbutyrate, 2165*b*.
3-methoxysalicylate, 4242*b*.
phosphate, viscosities of, 4915*g*.
——, **2-ethyl-3-methyl-**, P 662*h*.
——, **2 - [(1 - ethylpropyl)amino]-**, diphenylacetate-HCl, P 2639*i*.
——, **3,3'-iminodi-**, compd. with 1-sulfanilyl-2-thiourea, P 687*a*.
——, **3-iodo-**, esters, P 4690*bf*.
——, **2 - (1 - isobutylisoamylamino)-**, *p*-aminobenzoate (ester), -HCl, P 3038*g*.
——, **2-isopropylamino-**, hydrochloride, 3419*d*.
——, **1 - (*p* - methoxyphenyl)-**. See *Anisyl alcohol, α-propyl-*.
——, **2-methyl-**. (See also *Amyl alcohol*.) and aluminum deriv. and α-methylbutyrate, 6155*e*.
*d*-, 3,5-dinitrobenzoate, 3776*f*.
(−), racemization of, 4215*b*.
——, **3-methyl-**. See *Isoamyl alcohol*.
——, **3-methyl-1-phenyl-**. See *Benzyl alcohol, α-isobutyl-*.
——, **3-methyl-3-*p*-tolyl-**, 5762*f*.
——, **4-(4-morpholinyl)-**. See *4-Morpholinebutanol*.
—— **4 - (naphthindenopyridazinyl)-** See *Naphthindenopyridazinebutanol*.
——, **4-(naphthyl)-**. See *Naphthalenebutanol*.
——, **2-nitro-**, acrylate, and polymerization of, P 2815*g*.
reaction with diazonium compds., 4040*g*.
——, **2 - nitro - 2 - (5 - nitro - *m*-tolylazo)-**, 4646*h*.
——, **2-nitro-2-*p*-tolylazo-**, 4646*h*.
——, **1-phenyl-**. See *Benzyl alcohol, α-propyl-*.
——, **2 - (1 - phenyl - 1*H* - tetrazol - 5 - ylmethylamino)-**, P 7972*c*.
pharmacology of, 1864*i*.
——, **4 - (piperidyl)-**. See *Piperidinebutanol*.
——, **4-(1-piperidyl)-**. See *1-Piperidinebutanol*.
——, **4-thiocyano-†**, 2945*f*.
acetate and propionate, P 5153*a*.
——, **2 - (2,4,5 - trimethoxybenzyl)-**, 2608*i*.
——, **2,2,3-trimethyl-**, hydrogenolysis of, 1312*i*.
**2-Butanol**. See *sec-Butyl alcohol*.
——, **4-amino-**, P 5412*a*, P 9081*c*.
hydrogen sulfate, cyclic salt, 2934*i*.
and picrate, 2935*b*.
prepn. of, 5367*b*.
——, **4-benzylamino-**, and carbanilate, 2935*b*.
hydrogen sulfate, cyclic salt, 2934*i*.
——, **4-(benzyloxy)-**(?), 6976*a*.
——, **3,3 - bis(4 - hydroxy - *m* - tolyl)-**, 8370*h*.
——, **3,3 - bis[4 - methoxy - *m*(and *o*)-tolyl]-**, 8370*i*.
——, **1 - bromo - 3 - methyl-**, ethers, 3358*i*.
——, **1-chloro-**, 6976*c*.
——, **3,4 - dibromo - 1 - ethoxy-**, 6157*f*.
——, **3,4-dibromo-1-methoxy-**, 6157*e*.
——, **2,3-dimethyl-**, *p*-nitroperoxybenzoate, 6189*f*.
——, **4-dimethylamino-**, and derivs., 2935*c*.
——, **1 - dimethylamino - 2 - (dimethylaminomethyl)-**, benzoate, anesthetic potency of, measurement of, 8095*b*.
benzoate, -HCl, effect on cholinesterase, 762*e*.
benzoate, identification of, 1151*g*, 7190*g*.
——, **4 - dimethylamino - 1,2-diphenyl-**, P 5417*g*.
——, **3 - (2 - dimethylaminoethoxy)-2,3-diphenyl-**, and hydrochloride, 2205*i*.
——, **1 - dimethylamino - 2 - methyl-**, benzoate, -HCl—see *Stovaine*.
——, **4 - dimethylamino - 3 - methyl-**, *p*-aminobenzoate, -HCl—see *Tutocaine*.
——, **2,4 - diphenyl - 3,4 - di - 1-piperidyl-**, 7025*d*.
——, **4 - ethoxy - 2 - methyl-**, 2570*i*.
——, **4-(ethylanilino)-**, hydrogen sulfate, cyclic ester, 2935*a*.
——, **2-methyl-**. See *tert-Amyl alcohol*.
——, **3-methyl-**, and 1-naphthalenecarbamate, 565*c*.
——, **3 - methyl - 4 - phenyl-**, and acetate, 5762*a*.
——, **2-methyl-4-(2,5-xylyl)-**, 2182*h*.
——, **4-(1-naphthylamino)-**, detection in rubber, 893*ci*.
——, **4 - (1 - naphthylimino)-**, as antioxidant in rubber, 9516*g*.
——, **1(and 3)-nitro-**, P 6647*c*.
——, **1-phenyl-**. See *Phenethyl alcohol, α-ethyl-*.
——, **2-phenyl-**. See *Benzyl alcohol, α-ethyl-α-methyl-*.
——, **4-phenyl-**, 4652*a*.
——, **1,1,1 - trichloro - 3 - methyl-**, P 664*f*, P 4284*h*.
**Butanone**, derivs., with pharmaceutical use, P 1914*h*.

**1-Butanone, 4-amino-1-(3-pyridyl)-,** and derivs., 4345*g*.
——, **1 - (5 - bromo - 2 - thienyl)-,** 4666*b*.
——, **1 - (2 - chloro - 1 - cyclohexen-1-yl)-,** P 6230*c*.
——, **1 - cyclohexyl - 2 - methoxy-,** and semicarbazone, 6974*i*.
——, **4 - diethylamino-1-(2-furyl)-,** and oxime, 2211*g*.
——, **4 - diethylamino - 1 - (8-quinolyl)-,** 2623*i*.
——, **4 - diethylamino - 1 - (2-thienyl)-,** and oxime, 2211*c*.
——, **1 - (3,6 - dihydro - 2,2 - dimethyl-2*H*-pyran - 4 - yl) - 3 - methoxy-,** 2162*c*.
——, **1 - (2,5 - dimethyl - 3 - furyl)-,** and 2,4 - dinitrophenylhydrazone, 6204*d*.
——, **1-(2-furyl)-,** 214*c*, 6204*a*, 8367*h*.
——, **1 - (4 - hydroxy - 3 - cyclohexen-1-yl)-3-methyl-,** formate, 2958*c*.
——, **1 - [4 - (*m* - hydroxyphenyl) - 1-methyl - 4 - piperidyl]-,** and acetate (ester)-HCl, P 2241*a*.
——, **4-hydroxy-1-(8-quinolyl)-,** 2623*i*.
——, **1 - (4 - methoxycyclohexyl) - 3-methyl-,** and semicarbazone, 2958*e*.
——, **3-methoxy-1-[4(and 5)-methyl-1-cyclohexen-1-yl]-,** 117*af*.
——, **3 - methoxy - 1 - (tetrahydro-2,2-dimethylpyran-4-yl)-,** 2162*d*.
——, **3 - methoxy - 1 - (tetrahydro-2-methyl-2-furyl)-,** 2163*c*
——, **1 - [3(and 4) - methylcyclohexyl]-,** and semicarbazones, 117*bg*.
——, **1-(naphthyl)-.** See *Butyronaphthone*.
——, **1-phenyl-.** See *Butyrophenone*.
——, **1 - (4 - propyl - 3 - pyridyl)-,** and picrate, 643*e*.
——, **1-(3-pyridyl)-,** 8367*g*.
and derivs., 643*c*.
——, **1 - (tetrahydro - 2,2 - dimethylpyran-4-yl)-,** 2162*e*.
——, **1-(2-thienyl)-,** 214*d*, 6204*a*
oxidation of, 5016*a*.
**2-Butanone,** acylhydrazones†, 6972*ceh*, 6973*cfi*.
in air, max. allowable concn. of, 4401*a*.
antiknock compd from, after exposure to ultraviolet light in presence of Pb, P 1558*d*.
antimony fluoride soly. in, 6890*b*.
azine with 5,5-dimethyl-2 thiohydantoin, 6171*i*.
chloroethane reaction with Pb-Na alloy in presence of, P 4287*e*.
compd. with HCHO, 7409*a*.
compd. with phenol, infrared and Raman spectra of, 107*b*
condensation of, in presence of H, P 2222*h*.
condensation product, reaction with $H_2S$, P 1063*b*.
decompn. by heat, kinetics of, 2848*i*
detn. of, 4183*h*.
4-dialkylamino derivs., P 2242*c*.
as diluent for acrylate and methacrylate resins in impregnation of leather, 7247*c*.
drying of, P 2048*i*, 8753*c*.
in ethylene chlorohydrin recovery from aq. solns., P 2633*b*.
flow of aq., through granular solids, mass transfer in, 8752*a*.
formation of, from $CrO_3$ oxidation of *sec*-BuEtCHOH, 2926*a*.
formation of, in reaction of $Et_3CCO_2H$, $H_2SO_4$ and $HN_3$, 9027*h*.
Grignard reaction with, 5004*f*.
lyoparachor of, 2834*b*.
manuf. of, P 3026*a*.
mixt. with Et butyrate, reduction of, 2944*f*.
and *p*-nitrophenylhydrazone, 122*h*.
oxidation of, P 6654*i*.
oxidation on catalyst, 928*b*.
oxime, benzenesulfonate, 2594*e*.
reaction with halogens, 6569*b*.
rearrangement of, 5740*d*.
toxicity to, and utilization by *Azotobacter*, 2276*d*.
peroxide†, detn. of, 1952*g*.
phys. consts. of, 2589*h*.
purification of, P 9079*i*.
reaction with acetaldehyde, 6159*i*.
with EtOH, 993*d*.
with HCHO, P 1051*e*.
with $H_2S$, 4633*c*.
with ketene, P 5415*a*.
recovery from reaction products of hydrogenation of CO, P 7214*b*.
reduction of, to 2-butanol, 2570*f*.
sepn. from EtOH, 2*h*.
solubilization of, with Na secondary alkyl sulfates, 466*a*.
spectrum of, 1656*c*, 3715*g*.
system: glycerol-$H_2O$-, P 9081*d*.
toxicology of, 5514*i*.
ultrasonic velocity in, temp. and, 7283*i*.
**2 - Butanone, 1 - amino - 3 - methyl-,** hydrochloride, 635*a*.
——, **1 - [*o* - (benzyloxy)phenoxy]-4-(4-morpholinyl)-,** P 1915*a*.
——, **1 - [*o* - (benzyloxy)phenoxy]-4(1-piperidyl)-,** P 1914*i*.
——, **4-(benzylmercapto)-,** 1321*d*.
——, **4 - [bis(2 - chloroethyl)amino]-,** in cancer therapy, 5505*c*.
——, **3,3-bis(*p*-hydroxyphenyl)-,** 8370*e*.
——, **3,3 - bis(4 - hydroxy - *m* - tolyl)-,** and diacetate, 8370*e*.

polymerization with catalysts of HF and P acids, anhydrides or esters, P 5939*e.*
polymers with butadiene as petrolatum substitute, P 8743*f.*
recovery from $C_4$ hydrocarbon mixts., P 1558*a.*
sepn. and recovery of, from alk. cuprous salt soln., P 4682*b.*
manuf. from hydrocarbon oils and conversion to isooctane, P 3605*b.*
manuf. from ketones, P 7496*g.*
manuf. of, and isobutane alkylation with, in antiknock fuel manuf., P 1955*i.*
mixts. with $C_3$, $C_5$ and $C_6$ olefins, alkylation with isobutane with $AlCl_3$-hydrocarbon complex catalysts, P 1956*h.*
mixt. with butane, polymerization and hydrogenation of, P 5174*c.*
polymerization of, P 906*a.*
with $H_3PO_4$-diatomite-$H_3BO_3$ catalyst to oils, P 3190*f.*
with $TiO_2$-$SiO_2$ catalyst to liquid hydrocarbons, P 2764*e.*
polymers of, condensation with naphthalene with $AlCl_3$ catalyst and then reaction with butene, oils by, P 3190*b.*
corrosion inhibitor from, P 7896*c.*
*polymers of,* depolymerization of, 1311*a.*
with 2 - methylpropene, depolymerization of, 1713*d.*
mixt. with polystyrene, water-vapor permeability of, 8738*d.*
prepn. of, 108*c.*
resinous products from $SO_2$ and, P 1217*c.*
sepn. from hydrocarbon mixt., P 379*i.*
**Butene, 2-cyclohexyl-,** dehydrogenation of, 5376*g.*
——, **diphenyl-,** 192*g.*
——, **fluoro-,** P 3437*f.*
——, **2-methyl-,** alkylation with, of 2-methylbutane with $H_2SO_4$ catalysts, 1554*f.*
manuf. of, by isomerization with $Al_2O_3$-HF catalyst, P 5939*d.*
polymerization with vinyl aromatic compds., viscous oils by, P 8130*d.*
polymers of, lyogels of, 4540*e.*
——, **phenyl-,** P 7507*g.*
*iso*-**Butene.** See *Propene, 2-methyl-.*
**1-Butene,** adsorption by C black and $SiO_2$ gel, 8254*h.*
alkylation with, and its isomers, of 2-methylpropane with HF catalyst, P 5583*g.*
analysis of mixt. of $C_4H_8$, butanes, 2-butene, 2-methylpropene and, by infrared and mass spectra, 6105*c.*
carbon exchange in, 2081*b.*
dehydrogenation of, 4213*i.*
dehydrogenation of, app for, P 3436*e.*
detn. in gases of petroleum industry, 8962*d.*
detn. in hydrocarbon gases, 5930*h.*
deuterium exchange, isomerization and hydrogenation of, kinetics of, 24*f.*
extractive distn. of, 8747*a.*
formation of, in acetyl peroxide decompn. in 3-bromopropene, 3775*h.*
formation of, in oxidation of $C_4$ hydrocarbons, 1309*c.*
fuel antiknock ratings of, 382*i.*
heat capacity and heat content of, 7215*h*
and hydration of, 9028*a.*
hydrogenation of, 3775*e.*
isomerization of, with $Al_2O_3$-HF catalyst, P 5939*c.*
bentonite and gumbrin as catalysts in, 6153*a.*
in vapor phase with HF catalyst, P 1175*g.*
labelled with $C^{14}$ in the 4 position, 9023*g.*
manuf. and isomerization of, in gasoline manuf , P 2763*h.*
manuf. of, P 660*h.*
manuf. of, by polymerization of propene or propane-propene fraction, P 3187*h.*
mixt. with 2-butene and 2-methylpropene, polymerization with $H_2SO_4$ and hydrogenation of polymer, safety fuel ingredient by, P 7222*c.*
oxidation of, P 2222*g.*
polymerization of, and its mixt. with 2-butene, with 2-methylpropene with $H_3BO_3F_2$ catalyst, and compns. of hydrogenated polymers, 8657*b.*
polymerization of, with imino compd. or nitrohydrocarbon catalyst, P 8666*h.*
polymers of, and copolymers with butadiene, ultrasonic velocity in, 8239*e.*
Raman and infrared spectra of, 2867*f.*
reaction with S, P 1066*e.*
sepn. from 1,3-butadiene, 1597*g.*
**1-Butene, 3-bromo-4-chloro-,** P 2218*d.*
——, **2 - bromo - 3 - chloro - 3 - methyl-,** 5363*a.*
——, **3-chloro-,** ethanolysis and hydrolysis of, rates of, 2849*d*
reaction with $NaCH(CO_2Et)_2$, 3351*d*
——, **1 - chloro - 3,4 - dimethoxy - 2-methyl-,** 5362*h.*
——, **1-chloro-3,3-dimethyl-,** 9024*h.*
——, **3-chloro-3-methyl-,** 111*h*, 113*i*, 5362*c.*
——, **4-chloro-2-methyl-,** 111*h.*
——, **4 - (4 - cyclohexylcyclohexyl)-1,1-diphenyl-,** *cis-* and *trans-,* 1375*h.*

——, **1,4-dibromo-1-phenyl-,** 1021*b.*
——, **1,3-dichloro-,** ethanolysis and hydrolysis of, rates of, 2849*d.*
——, **2,3**(and **3,4**)**-dichloro-,** P 663*g.*
——, **3,4-dichloro-,** P 2218*d*, 6152*g.*
oxidation of, 6976*f.*
——, **1,1 - dichloro - 3,3 - dimethyl-,** 3372*e.*
——, **1,1**(and **1,2**) **- dichloro - 3,3-dimethyl-,** 9025*a.*
**1,1-dichloro-3-methyl-,** 3372*e*,
**1,2 - dichloro - 3 - methyl-,** 9025*a.*
——, **2,3-dichloro-3-methyl-,** 5362*f.*
——, **3,4 - dichloro - 2 - methyl-,** 5362*e*
——, **3,4 - dichloro - 3 - methyl-,** P 2218*d.*
——, **3,3-difluoro-,** 1599*a*, P 2218*f.*
——, **3,3-dimethoxy-†,** 2577*e.*
——, **2,3**(and **3,3**) **- dimethyl-,** in gasoline (Thermofor cracked), 4453*c.*
——, **3,3-dimethyl-,** spectra (infrared and Raman) of, 7822*a.*
——, **1,3-diphenyl-,** *cis-,* 612*g*
——, **3,4-epoxy-,** compd. with styrene-maleic anhydride polymer, 8202*i.*
reaction with cellulose, P 1979*d.*
reaction with S compds., 7420*e.*
reaction with thiols in the presence bases, 6574*d.*
——, **2-ethyl-,** 3369*i.*
freezing point, purification, and purity of, 2924*g.*
in gasoline (Thermofor cracked), 4453*d.*
reactivity of, 9024*c.*
——, **2-isopropyl-3-methyl-,** formation from 2,2,4 - trimethyl - 3 - pentanol, 557*c.*
——, **4-isothiocyano-†,** in crucifer seeds, 3888*b.*
——, **2-methyl-,** 3370*b.*
detection of, in terpene deriv. decompn. products, 8975*c.*
formation from *tert*-AmMe$_2$SI, kinetics of, 3349*g.*
formation of, kinetics of, 3346*h.*
mixt. with methylcyclobutane in Gustavson's hydrocarbon, 991*f.*
polymerization with propene with $H_3BO_3$-$F_2$ catalyst and compn. of hydrogenated polymers, 8657*b.*
recovery of, from other $C_4$ olefins, P 4283*f.*
——, **3**(and **3**)**-methyl-,** 3355*b.*
detn. in petroleum-refinery $C_5$ fractions, 8123*e.*
from isoamyl alc., P 3834*a.*
isomerization of, kinetics of, 3343*g.*
——, **3-methyl-,** and derivs., 3358*i.*
formation from Me$_2$CHCHMeSMeI and from Me$_2$CHCHMeI, kinetics of, 3350*e.*
manuf of, P 6217*h.*
——, **2-nitro-1-phenyl-,** fungistatic activity of, 9334*d*
——, **1,2,3,4 - tetrabromo - 1-phenyl-,** 1020*e*
——, **1,1,3,3-tetraphenyl-,** 2569*d.*
——, **1,2,3 - tribromo - 1 - phenyl-,** 1020*h.*
——, **1,2,4-tribromo-1-phenyl-,** 1021*a.*
——, **4,4,4-trichloro-,** 3775*g.*
reactivity of, 9024*d.*
——, **1,3,4 - trichloro - 4 - cyclopentyl-†,** 9024*i.*
——, **1,1,2 - trichloro - 3,3 - dimethyl-,** 9025*c*
——, **1,1,2 - trichloro - 3 - methyl-,** 9025*c.*
——, **1,3,4 - trichloro - 2 - methyl-,** 5362*h*
——, **2,3,3-trimethyl-,** manuf. of, P 1432*e.*
**2-Butene,** alkylation with, and its isomers, of 2-methylpropane with HF catalyst, P 5583*g.*
analysis of mixt. of butanes, $C_4H_8$, 1-butene, 2-methylpropene and, by infrared and mass spectra, 6105*c.*
*cis-trans-,* effect on myocardium sensitivity to adrenaline, 1111*e.*
deuterium exchange, isomerization and hydrogenation of, kinetics of, 24*f.*
detn. in gases of petroleum industry, 8962*d.*
detn. in hydrocarbon gases, 5930*h.*
extractive distn. of, 8747*a.*
formation during reaction of 2-butanone and EtOH, 993*d.*
fuel antiknock ratings of, 382*i.*
heat capacity and heat content of, 7215*h.*
heat capacity of, 2758*g.*
and hydration of, 9028*a.*
hydrogenation of, 3775*e.*
manuf. and isomerization of, with $Al_2O_3$-HF catalyst, P 5939*c.*
manuf. by isomerization and alkylation with isobutane with HF catalyst, P 1175*g.*
manuf. of, and alkylation of isobutane with, to gasoline, P 2763*h.*
manuf. of, by polymerization of propene or propane-propene fraction, P 3187*h.*
mixt. with 1-butene and 2-methylpropene, polymerization with $H_2SO_4$ and hydrogenation of polymer, safety-fuel ingredients by, P 7222*c.*

oxidation of, P 2222*g*.
polymerization of, and its mixt. with 1-butene with 2-methylpropene, and compn. of hydrogenated polymers, 8657*b*.
polymerization of, with imino compd. or nitrohydrocarbon catalyst, P 8666*h*.
prepn. of, 6153*b*.
reaction of, with CO and H, P 4685*e*.
with S, P 1066*e*.
with $C_2F_4$, 3370*e*, P 4294*d*.
sepn. from 1,3-butadiene, 1597*g*.
sepn. of, and $C_4$ acetylenes by azeotropic distn., P 4682*a*.
*trans*-, forces between mols. and virial coeffs. of, 3077*e*.
**-Butene, 2,3-bis(phenylazo)-**, 1654*h*
——, **1-bromo-4-chloro-**, P 2218*e*.
——, **2 - bromo - 1 - chloro - 3-methyl-**, 5363*a*.
——, **4-bromo-1,1-dimethoxy-†**, 4219*a*
——, **1-chloro-**, ethanolysis and hydrolysis of, rates of, 2849*d*.
reaction with PhMgBr, 9051*b*.
reactivity of, 4214*d*.
——, **4-chloro-**, reaction with NaCH$(CO_2Et)_2$, 3351*d*.

**Butylocaine.** See *Pontocaine*.
**Butyl 9-octadecenyl phosphate,** $(C_4H_9)(C_{18}H_{35})HPO_4$, as corrosion inhibitor with dicarboxylic acids, P 1180*c*.
**Butyl octyl phosphite,** $(C_4H_9)(C_8H_{17})HPO_3$, as antioxidant for thiols, P 1794*b*.
**Butyl orange*,** silica gel prepn. in presence of 6489*e*.
*tert*-**Butyl peroxide,** aldehyde decompn. sensitized by, 1715*d*.
as catalyst in polymerization of isoprene or isoprene-styrene solns., 8190*i*.
as catalyst in reaction of polychloroethylenes with satd. hydrocarbons, 9024*f*.
manuf. of, P 669*c*.
reaction with BzH, 612*h*.
reaction with HBr, 3345*e*
**Butyl phenyl triphosphate,** $Bu_4PhP_3O_{10}$, P 9356*h*.
**Butyl phosphates,** salt compns. stabilized by acid, and effect on oils, P 3216*b*, P 7240*d*.
$Bu_3PO_4$, as antioxidant in alkyl benzenesulfonates, P 6845*d*.
effect on oiliness of lubricants, 1555*h*, P 9478*b*.
phosphorus detn. in, 6037*a*.
toxicity to vegetables, 1893*c*.
**Butyl phosphites.**
$Bu_3HPO_3$, toxicity of, 4401*f*.
$Bu_3PO_3$, as antioxidant in alkyl benzenesulfonates, P 6846*a*
*sec*-**Butyl phosphite,** $(sec\text{-}Bu)_2PO_3H$, 8350*i*.
**Butyl pyrophosphate,** $Bu_4P_2O_7$, prepn. and hydrolysis of, 1315*b*.
**Butyl rubber** (*GR-I*). (See also *Oppanol B*.)
adhesives from Neoprene-AC and phenolic resins for, 7743*i*.
agglomeration of particles of, coating preventing, P 9520*a*.
aging in air, temp. and, 9517*i*.
anomalous strain-stress relations in, 4510*e*.
carbon black dispersion in, effect of stearic acid adsorption on, 1599*h*.
catalyst injection nozzle for app. for making, P 9522*b*.
catalysts for manuf. of, P 5134*i*
coatings from, $NH_3$- and moisture-resistant, 5606*d*.
effect on brittle point, etc., of Lactoprenes, 4885*e*.
elec. insulators from, attack by soil microorganisms, 9517*f*.
Gough-Joule coeffs. at const. stress and strain, and modulus of, 6858*e*
improving cured, for pressure working, P 3228*d*.
laminates with polyvinyl alc., water permeability of, 6862*d*.
permeability of, analytical app. tubing and, 1596*c*.
pigment (reinforcing) behavior in, 1593*b*.
as plasticizer for polyethylene blends, 9522*i*.
plasticizers for, $Bz_2O_2$ as, P 4046*d*.
at low temps., diamyl or dibenzyl azelate as, P 5624*h*.
naphthyl or xylyl mercaptans as, P 4891*b*.
polymerization reactor design for, P 6859*d*.
reclaiming mixts. of rubber and, with resin oil-abietic acid mixt., P 6458*i*.
reclaiming with tertiary mercaptans or their salts, P 6459*a*.
sound propagation velocity and attenuation in, and dynamic viscoelastic consts. of, 6855*h*.
splicing of, P 5624*g*.
sponge, closed-cell, 1,3-bis(biphenylyl)triazene-blown gas-expanded, P 897*e*.
stable dispersions of, P 9519*i*.
tear-resistance tests on, 7256*d*.
tensile properties from -20° to 120°, 9513*g*.
tie ply with Neoprene, cementing to metals or other rubbers, P 6457*a*.
ultrasonic velocity in, 8239*e*.
ultrasonic-wave propagation velocity and attenuation, and elastic consts. of, 6856*c*.
vulcanization of, acceleration of, P 2464*c*.
vulcanization with *p*-quinone dioxime and its derivs., 5623*a*.
vulcanization with *p*-quinone dioxime, scorchiness lowering by aromatic acid salts in, P 8195*g*.
**Butyl silicate,** $Bu_4SiO_4$, polymerization of, P 6464*h*.
*tert*-**Butyl sodium sulfate,** 5737*f*.
**Butyl sulfate,** $Bu_2SO_4$, 6567*g*.
**Butyl sulfide,** phys. constants of, 2956*e*.
spectrum and structure of, 7410*d*.
*iso*-**Butyl sulfide.** See *Isobutyl sulfide*.
*sec*-**Butyl sulfide,** phys. constants of, 2956*e*.
*tert*-**Butyl sulfide,** 1000*b*.
prepn. and spectrum of, 4215*h*.
**Butyl sulfite** ($Bu_2SO_3$), 6567*g*.
in cellulose treatment, P 4853*g*.
rearrangement of (attempted), 1313*g*.
**Butyl sulfone,** as antioxidant in alkyl benzenesulfonates, P 6846*a*
**Butyl tetrasulfide,** 1002*c*.
**Butyl thiophosphate,** $(BuO)_2PS_2H$, in Mo detection, 7859*a*.
*sec*-**Butyl thiophosphate,** (*sec*-BuO)$_2$PS$_2$H, in Mo detection, 7859*a*.
**Butyl titanates,** 9026*i*.
oils and phenolic resins modified by, 2787*b*.
$Bu_4TiO_4$, manuf. of, and paints from, 2787*b*.
reaction products with linseed-oil glycerides, films from, 7239*c*.
**Butyl tolyl sulfite,** in cellulose treatment, P 4853*g*.
**Butyl triphosphate,** in foaming control in lubricating oils, 6815*c*.
**Butylxanthic acid.** See *Xanthic acid, butyl-*.
**Butyn.** See *Butacaine sulfate*.
**2-Butynamide.** See *Tetrolamide*.
**1-Butyne,** freezing point, purification and purity of, 2924*g*.
fuel antiknock ratings of, 382*i*.

——, α - hydroxy - γ - methylmercapto-, P 677*a*.
——, α-methoxy-, 6974*f*.
——, α-methylene-, polymers with diolefins, mixts. with phenol-aldehyde resins, P 2806*h*.
——, α-methyl-α-methylamino-, 8381*d*
reaction with $CS_2$, 1766*b*.
——, β-(methylpropylamino)-, P 254*i*
——, γ - (*p* - methylsulfonylphenyl)-, 1740*a*.
——, γ-morpholinyl-. See *Morpholinebutyronitrile*.
——, γ-oxo-γ-phenyl-. See *Propionitrile, β-benzoyl-*.
——, γ-phenyl-, hydrogenation of, 5738*i*.
——, γ-phenylmercapto-, 2272*g*
——, γ-piperidyl-. See *Piperidinebutyronitrile*.
——, γ-pyrrolidyl-. See *Pyrrolidinebutyronitrile*.
——, α,α,β-trimethyl-, P 3439*i*.
*iso*-**Butyronitrile**. See *Isobutyronitrile*.
**Butyrophenone**, 3012*f*.
and oxime, 6178*c*.
phys. consts. of, 2589*i*.
in prevention of crystn. of DDT or its analogs, P 6358*e*.
Raman spectrum of, 3716*e*
refraction by, 4651*g*
and semicarbazone, 2178*b*.
spectrum of, 4955*d*.
**Butyrophenone**, *o*-amino-, 3012*g*
——, α - amino - 3,4 - dihydroxy-, and hydrochloride, P 4696*e*.
——, α - benzhydrylamino - 3,4 - bis(benzyloxy)-, hydrochloride, P 4696*d*.
——, *p*-2-biphenylyl-, 4656*b*.
——, 3,4-bis(benzyloxy)-, P 4696*c*.
——, 3,4-bis(benzyloxy)-α-bromo-, P 4696*c*.
——, α-bromo-*p*-methoxy-, 603*g*.
——, γ-bromo-2,4,6-trimethyl-, 3390*b*.
——, 4-butoxy-2,5-dimethyl-, 7924*g*.
——, 4-butoxy-2-methyl-, 3826*a*.
——, 4-butoxy-3-methyl-, and semicarbazone, 3825*e*.
——, *p*-chloro-α-diazo-, 4653*h*.
——, *p* - chloro - γ - diethylamino-, and oxime, 2211*b*.
——, α-diazo-*p*-methoxy-, 4653*h*
——, α-diazo-*p*-nitro-, 4653*h*, 6178*a*
——, γ - diethylamino - *p* - fluoro-, and oxime, 2211*b*.
——, γ - diethylamino - *p* - phenoxy-, and oxime, 2211*c*.
——, γ - diethylamino - *m* - (trifluoromethyl)-, and oxime, 2211*c*
——, 3,4-dihydroxy-, P 4696*b*
——, *o*-(2,3-dihydroxyphenoxy)-, effect on nervous system, 312*b*.
——, *p*-(2,3-dihydroxyphenoxy)-, and oxime, effect on nervous system, 312*b*.
——, 2,5-dimethyl-, and derivs., 6990*g*.
——, γ - dimethylamino - α,α - diphenyl-, hydrochloride, 4244*e*
and hydrochloride, 9053*f*.
——, α - (dimethylaminomethyl)-, hydrochloride, 1757*g*.
——, α,α - dimethyl - γ - phenyl-, P 5800*h*.
——, 2,5-dimethyl-4-propoxy-, 7924*g*.
——, α,α - diphenyl - γ - (1 - piperidyl)-, hydrobromide, 7467*e*.
——, 4-ethoxy-3-methyl-, and semicarbazone, 3825*e*.
——, α - (2 - ethyl - 3 - methoxyphenyl)-*p*-methoxy-, and 2,4-dinitrophenylhydrazone, 198*c*.
——, hexahydro-. See *1-Butanone, 1-cyclohexyl-*.
——, α - 4 - hydroxycyclohexyl - *p*-methoxy-, benzoate, 2195*f*.
——, 2-hydroxy-4,5-dimethoxy-, 7461*d*.
——, α-hydroxy-*p*-methoxy-, and acetate, 603*h*.
——, α-(hydroxymethyl)-, 1757*f*.
——, 2-isoamoxy-4,5-dimethyl-, 7924*f*.
——, 2-isoamoxy-5-methyl-, 3826*a*.
——, 4-isoamoxy-3-methyl-, and semicarbazone, 3825*i*, 3826*a*.
——, *p*-methoxy-, attempted condensation with anisole, 2971*a*.
——, α-methoxy-, and semicarbazone, 6974*i*.
——, 2-methoxy-4,5-dimethyl-, 7921*f*.
——, 4-methoxy-2-methyl-, 3826*a*.
——, 4-methoxy-3-methyl-, and semicarbazone, 3825*d*.
——, *p*-methyl-, and semicarbazone, 2601*b*.
——, α-methylene-, 1757*g*.
——, 2-methyl-4-propoxy-, 3826*a*
——, γ - 4 - morpholinyl - α,α - diphenyl-, hydrochloride, 4244*e*.
——, *m*(and *o*)-nitro-, 3012*g*.
——, β-phenyl-γ-2-quinolyl-, and oxime, 7022*h*.
——, β-phenyl-γ-4-quinolyl-, 7022*h*.
——, tetrahydro-. See *1-Butanone, 1-(cyclohexenyl)-*.
——, γ-2-thienyl-, and semicarbazone (omitted from abstr.), 2982*a*.
——, 2,4,6 - trimethyl - 3,5 - dinitro - β-(nitrophenyl)-, 3390*c*.
——, 2,4,6 - trimethyl - 3,5 - dinitro - γ-(nitrophenyl)-, 3390*c*.
——, 2,4,6-trimethyl-β-phenyl-, 3390*b*.
——, 2,4,6-trimethyl-γ-phenyl-, 3390*c*
*iso*-**Butyrophenone**. See *Isobutyrophenone*.
**Butyrospermol***, and derivs., 7462*i*.
——, dihydro-*, and derivs , 7463*c*.
**Butyrospermone***, 7463*b*
——, dihydro-*, 7463*c*.
**Butyrospermum parkii**, fat from nuts of—see "shea" under *Fats*.
**Butyryl chloride**, reaction with alcs. and $H_2O$, rates of, 6057*e*.
reduction of, to BuOH, 2570*g*.
——, γ-cyclohexenyl-. See *Cyclohexenebutyryl chloride*.
——, α-oxo-, *O* ethyloxime, P 5422*e*
*iso*-**Butyryl chloride**. See *Isobutyryl chloride*
**Bythoscopus cedaranus**, control of, 3461*i*.
**Bytownite**, -wollastonite intergrowths in lime-silicate-granulite bands in granitization of Nanga Parbat massif, India, 4985*e*
**Byturus bakeri** and(or) **Western raspberry fruitworm**, control of, 9341*g*.
**Byturus tomentosus**, control of, 807*g*.

**5-C A.-7**, in weed control in bamboo, 5525*c*.
**6-C A.-4**, in weed control in bamboo, 5525*c*.
**Cabbage**, amino acids in, 3534*g*
antistiffness factor in, 2680*h*.
*Botrytis cinerea* action on, 1840*a*.
calcium in, utilization by rats, 288*c*.
carotene and vitamin C in, 3536*a*.
caterpillar control on, 6775*d*.
Chinese, as dietary supplement, 3892*g*.
photosynthesis by, 2281*h*.
virus-infected, protein and nucleoprotein from, 280*h*.
clubroot of, control of, 801*h*.
compn. of Fla. grown, and effect of soils thereon, 9289*c*.
compn. of, soil effect on, 2722*h*.
control of diamond-back moth and imported cabbage worm on, 2358*d*.
control of turnip aphid and foliage-feeding larvae on Chinese, 7628*a*.
DDT toxicity to, 5148*a*.
dried, sulfite loss from, 7156*e*.
fertilizer expts. with, 1134*e*.
fungus control on, 7178*a*.
germination of seeds of, effect of drugs on, 2357*e*.
heteroauxin effect on yield of, 1839*b*.
injury by insecticides in cabbage-maggot control, 3136*i*.
insect control on, 348*a*.
insecticides for, 5147*g*.
leaf meals from, nutritive value of, 4343*e*.
leaves, ultraviolet absorption by cuticular and waxy layers of, 1834*f*.
metabolism in, during vernalization, 5453*c*.
microelements in, 9289*b*.
nicotinic acid synthesis by, tryptophan in, 9177*f*.
*m*-nitrobenzamide-*N*-deriv. toxicity to, 7182*b*.
plastids of, cytochrome oxidase in, 8454*c*
plastids of, dehydrogenases in, 8454*c*.
pyrethrin and rotenone on, 9328*h*.
sauerkraut—see *Sauerkraut*.
*Sclerotinia* control on, 7179*h*.
storage life of, compn. and, 8070*d*.
vitamin C in, and its detn., 3487*h*.
vitamins of, effect of large-scale methods of prepn. on, 9288*b*.
weed control in, 1894*b*, 2359*a*.
**Cabbage aphid**. See *Brevicoryne brassicae*
**Cabbage butterfly**, control on cauliflower, 4416*g*.
**Cabbage clubroot**. See *Clubroot*.
**Cabbage fly**, control of, 348*a*.
**Cabbage looper**. See *Trichoplusia ni*.
**Cabbage maggot**. See *Hylemya brassicae*
**Cabbage moths**, control on cauliflower, 4416*g*.
**Cabbage worm**, control of, bis(2-hydroxy 3 nitro-5-chlorophenyl) sulfide for, P 1901*f*.
**Cables**. (See also *Insulation, electric; Insulators, electric.*) P 5518*e*.
from aluminum alloys, 1702*b*.
copolymer compn. for, P 5135*g*.
corrosion and protection of underground power, 6093*h*.
corrosion of Pb-sheathed, 5723*i*.
cathodic protection against, 1305*a*
by cinders, 4621*e*.
corrosion of sheathing of, 309*c*
dielecs for, P 4894*i*.
impregnants for, P 1223*g*.
impregnants for, for 2-vinylfluorene polymers, P 8740*h*.
insulating couplings for underground, 6090*d*.
insulators for, 434*h*, 1604*i*.
cellophane for, P 3120*a*.
from chlorinated polyethylene, P 9534*f*
continuous vulcanization of, 3649*c*
for high-frequency, P 1126*b*.
from Me silicone elastomers contg. vinyl groups, P 5625*c*.
from polyvinyl chloride, P 5231*a*.
thermoplastic, P 3657*d*.
jointing polyethylene-insulated, with polyolefinic rubber-bondable coatings, P 4045*i*.
lacquers for, P 876*g*
rubber-insulated, flame and mech. tests on, 3225*f*
rubber-insulated, standards for, 4787*c*, 4788*b*.
sheaths for, fluxing cement for, P 7610*e*
tape for, P 3231*g*.
vinyl-resin covering of, with strips or tapes of, P 5631*i*.
water-vapor permeability of sheath materials for, detn. of, 8738*a*
**Cacao**. (See also *Chocolate; Cocoa*.)
beans, coffee substitutes from wastes from, P 332*i*, P 3118*b*.
beans, compn. of mucilaginous pulp of, 8010*i*.
confectionery raw material and theobromine from, P 6759*c*.
constituents of, effect on detn. of sugar in chocolates, 5880*c*.
nibs, grinder and pulverizer for, P 1398*f*
soils, Cu-retaining powers of, 3955*i*
**Cacao butter** or **Cacao fat**, isomerization of, with $HNO_2$ catalyst in an org. solvent, P 2341*a*.
melting points and polymorphism of, 4495*c*.
as suppository bases, 3563*f*
**Cacao-butter substitutes**, from coconut oil (hydrogenated-) distn residue, 5610*i*.
**Cachaza**. See "filter cake" under *Sugar manufacture*.
**Cachexia**, bronze—see *Hemochromatosis*
**Cacodylic acid** (*dimethylarsinic acid*), acid and basic strength in $H_2O$, 7790*d*
bombardment of, in pile, $As^{76}$ prepn by, 1650*d*.
sodium salt, effect on heart and intestines, effect of methemoglobin on, 3161
ions formed in neutron bombardment of, 7333*c*.
as methyl donor, 4766*c*, 7526*i*
multinucleated unsegmented triton eggs produced by, 5873*f*.
**Cacoecia**. See *Archips*.
**Cacotheline**, reduction of, with $Na_2S$, Se as catalyst in, 8961*e*.
**Cactaceae**. See *Cactus*.
**Cactus**. (See also *Opuntia*.)
alkaloids from, 6837*g*.
use of, 6837*g*.
**Cadalene** (*4-isopropyl-1,6-dimethylnaphtha*

*lene*). (For derivs. see under *Naphthalene*.)
derivs., 2805*h*, 7928*a*.
pyrolysis of, 5590*f*.
**Cadaverine** (*pentamethylenediamine*, *1,5-pentanediamine*), deamination by legumes, 6706*d*.
*N*, *N'*-diphenacyl derivs. and their reduction products, 3800*d*.
effect on cornea, 7716.
effect on respiration inhibition by acriflavine, methylene blue, crystal violet, protamine sulfate and quinine, 7134*b*.
manuf. from 2-furaldehyde, P 4511*g*.
—, *N*, *N'*-**dioctyl-**, dihydrobromide, 3380*d*.
—, *N* - **isopropyl** - *N'* - (**6** - **methoxy-1-naphthyl**)-, and dihydrochloride, 7026*e*.
**Cadavers.** (See also *Legal chemistry; Toxicology.*)
analysis of, for CO, hydrocarbons, etc., 3316*e*.
thallium detn. in poisoned mouse, 3312*f*.
**Cadinene**, synthesis of, 3807*d*
**Cadmium**, alpha-ray-bombarded, $Sn^{119}$ from, 8267*e*.
atomic wt. and isotopes of, 5239*g*
atomic wt. of, 5239*h*.
bond with C, energy of, 5242*d*.
bond with $CH_3$ group, dissocn. energy of, 4939*e*.
book: Electro-plating and Anodising, 956*d*.
casting of, fluidity in, 5351*a*.
as catalyst in bromination of 2-carbethoxycyclopentanone, 3273*f*.
as catalyst in H-atom recombination, 8251*d*.
as cathode in electrolytic reduction of 2 methyl-3-buten-2-ol and 2-methyl-3 butyn-2-ol, 994*g*.
as cathode in reduction of nitroguanidine or nitrourea, 4150*d*.
cathodic polarization and H overvoltage on, 8285*ab*
cation exchanger dynamic activity toward, 3268*f*.
cleaning, penetrating and corrosion loosening compn. for, P 6147*h*
coated Pt electrodes in polarography, 8946*h*.
coated water pipes and fittings, health hazards from, 986*a*.
coating of, P 1710*i*
pretreatment for phosphate, P 2922*e*
with phosphates, P 556*e*
coatings of, on Fe and steel, after 5 years' exposure, 3766*f*
coatings of, sprayed, 5146*c*
coating with, on Al, 4995*e*
coating with, by vacuum evapn., P 104*d*.
colloids in toluene, coagulation in contact with immiscible phases, 4926*g*
coloring of, 5352*h*.
color reaction of ions of, with azo dyes, 597*f*
in concn. cells, 8286*i*.
corrosion of, 5722*g*
corrosion of, by lubricants, testing of, P 7839*h*.
crystallochem electronegativity of ion of, 8231*a*
depolarization (cathodic) of, 1663*e*.
diffusion const., diffusion current and half wave of reduction of, 5327*b*
drilling of, effect of liquids on, 7889*g*
effect on *Mycobacterium smegmatis*, 5444*c*
on oxidation of molten Pb, 7881*g*
on *Proteus vulgaris* and *P. X19*, 1455*r*.
on solders, 8343*c*.
on wheat resistance to *Oidium*, 1463*d*.
elastic and structural properties of, 9001*g*.
electrodeposition of, by internal electrolysis, 8285*f*.
electrodeposits (disperse) of, 5675*e*.
electrodes, effect of temp. on potential of, 7836*g*.
electrodes, hydrogenation and reduction on, 5677*i*.
electron absorption in, 7811*e*.
electroplates of, effect on bread doughs, 4781*f*.
**electroplating with, 4148*d*.**
**analysis and control of cyanide solns. for, 7352*e*.**
**analysis of cyanide solns. for, 4972*h*.**
**carbonate removal from cyanide solns. for, 6520*b*.**
**pitting prevention in, P 4152*bd*.**
**with reversing current, P 956*e*.**
**treatment of wastes from, 3125*g*.**
**films of, growth and structure of, 5352*f*.**
fluorescent sulfides contg., P 948*i*.
in foods, 323*d*.
friction between metals and, 5273*a*.
gamma-ray-bombarded, 936*h*.
hardening (thermal) of crystals of, 2142*h*, 3258*a*.
hazards (industrial) of, 3047*i*.
heat transfer by radiation to surface of, 4939*b*.
hydration of ion of, 8244*c*.
industry in 1946, 2126*i*.
isotope of mass 110, from decay of $Ag^{110}$, 5295*i*.
isotope of mass 113, threshold for neutron emission in γ-ray bombardment of, 8864*d*.
isotope of mass 114, metastable, from decay of $In^{114}$, 6911*a*.
isotope of mass 115, β- and γ-rays from, 4121*i*
isotopes of mass 115, of half-lives of 2.3 days and 43 days, from Th by α-ray action, 4127*b*.
isotopes of, migration in molten $CdCl_2$, 2862*f*.
isotopes of, natural abundance of, 1649*i*
luminescent materials contg., decay after cathode-ray excitation, 5670*c*.
luminescent substances activated by, 5671*a*.
magnetic susceptibility of, temp. and, 8767*b*.
marketing, 2554*f*.
mercury lamps contg., spectral energy distribution for, 2095*g*.
mercury-vapor trap from, 8215*a*.
mixt. with Se, valve photoeffect in, 4102*f*.
mixt. with Sn and Pb as bath in destructive distn., P 3175*i*.
neutron absorption by, 8851*i*
neutron binding energy of, and energy of γ-rays emitted on neutron capture by, 8861*c*
neutron bombarded, γ-rays from, 5282*b*, 6075*i*, 6910*i*
neutron cross section of, 6909*d*
neutron interaction with, 4946*g*
nuclear isomerism of, 3280*b*.
occurrence and uses of, 3324*i*
ores of—see *Ores*.
oxidation (anodic) of, ultraviolet radiation from, 8900*h*.
phosphors contg., P 7832*b*
photocond. of, 3705*g*.
photoelec. effect (external) in, 482*e*
pigments—see *Pigments*.
poisoning by, 2,3-bis(benzamidomethylmercapto) - 1 - propanol for use in therapy of, P 6223*c*.
effect of BAL on, 6739*f*.
review on, 6759*h*.
polarization and surface area of, 6893*i*.
polarography of, 3728*f*
in AcOH, 2874*b*.
effect of org. compds. on, 5316*a*.
viscosity of medium and, 4930*a*.
polishing (electrolytic) of, rotating anode in, 2101*c*.
powder metallurgy with Au and Ag powders, 7879*b*.
protoactinium deposition on, 7791*g*.
proton bombarded, carrier-free sepn. of radioactive In from, 4949*c*.
radioisotopes of, 2089*e*.
reaction products with maleic anhydride polymers with Me methacrylate, 8202*d*.
reaction products with Me methacrylate polymers with α,β-unsatd. carboxylic acids, 8202*g*.
reaction with $HNO_3$, 6102*a*, 6532*h*.
reaction with pyrophosphates, 8935*f*
removal from Pb, P 3340*e*.
removal from Zn-recovery electrolytes, P 7839*e*.
solid solns. with elements, lattice spacings of, 3685*b*.
soly. in Hg, 7880*f*.
soln. in acids, 506*g*.
soln. in acids, effect of Sb salts on rate of, 6140*i*.
spectrum of, 4136*d*, 6918*c*, 7858*h*.
steel coated with, brazing, soldering and welding of, 6561*d*.
storage battery electrodes from, 954*f*.
storage battery from Ni and, 8910*b*.
surface area of, 8325*d*.
surface energy and tension of, 5653*a*.
surface tension of, 8255*e*.
system: Sb–Ag–, 2915*h*, 6961*a*.
system: Hg–Na–, activities in, 8253*d*.
system: Ag–, hardness of, 6136*e*.
systems: Hg–, and Zn–, 4074*b*.
systems with metals, activities in liquid, 4930*i*.
system: Zn–, Zn activity in, 4552*a*
from uranium by α-ray action, 489*a*.
uranium in, 3285*i*.
vapor pressure over Ag alloys, 6558*i*.
x-ray-bombarded, isomeric transitions in, 36*d*.
x-ray-bombarded, Ag isotopes from, 5295*h*.
zinc sepn. from, with Cu, 8245*f*.
**Cadmium, analysis.** (See also *Hydrogen sulfide group.*)
chromatographic, 4595*g*.
detection, 60*h*, 2116*e*, 5344*e*, 7369*b*, 7375*i*, 7860*e*, 8966*c*, 8979*h*, P 8980*g*.
detection and detn., 7858*h*.
detection in foods, 9273*h*.
in presence of Cu, 924*b*.
in Zn soln., 1282*c*.
detn., 57*c*, 954*a*, 959*h*, 961*h*, 1672*a*, 2043*f*, 4597*f*, 6106*af*, 7352*h*, 7376*h*, 8947*ab*.
alone and in presence of Cu or Zn, 8952*b*
$CaCl_2$ as auxiliary electrolyte in polarographic, 5327*a*.
purification of $CCl_4$ used as solvent for dithizone in, 7862*f*.
detn. in Al, 3743*d*.
in biol. materials and foods, 4597*d*

in presence of Cu and Zn, 7859*f*.
in Sn, 8949*h*.
in water, P 4800*c*.
in Zn concentrate and Zn electrolyte, 964*h*.
in Zn-metallurgy products, 5353*f*.
detn. of Bi and Tl, 2546*e*.
detn. of Cd aerosols, 64*f*.
detn. of Zn, 7372*c*.
detn. of Zn in cathodic Cd, 5699*f*.
sepn. from Cu and detection, 6112*h*.
sepn. from Cu and detn., 1282*e*.
sepn. from Group II cations and detection, 4597*h*.
sepn. from Zn, 4176*b*.
**Cadmium, dimethyl-**, bond-dissocn. energy in, 4939*e*.
bond energies in, and heats of formation and combustion of, 5242*c*.
labeled, contg. $C^{14}$, 4680*i*.
spectrum of, 8882*h*.
**Cadmium, metallurgy of**, from cadmium-Cu ppt., 4145*g*.
condensers for vapors in, P 2920*c*.
at Donora Zinc Works, 9003*i*.
from fume dust of Zn smelter, P 6964*h*.
in lead smelting, 2554*f*.
refining by volatilization, P 554*i*.
**Cadmium acetate**, solvolysis in abs. $HNO_3$, 6495*i*.
**Cadmium alloys.** (See also *Bearing metals; Cadmium compounds; Solders; Wood's metal;* and "system" under *Cadmium.*)
aluminum-Mg-, P 5000*g*.
aluminum-Mn-, 4204*c*.
aluminum-Sn-Zn-, as solder for nonferrous metals, P 9024*a*.
amalgams, effect of temp. on potential of electrode of, 7836*g*.
amalgams, for Jones reductor, 5688*c*.
bearings, testing of corrosion by lubricants, 7839*h*.
bismuth-, analysis of, 2043*f*.
bismuth-, Pb-, Sn-, and Zn-, eutectics in, 4935*e*.
calcium-Pb-, as storage-battery anode, 7836*h*.
copper-In-Ag-Zn-, for brazing, P 2156*b*.
copper-Ag-Zn-, for brazing, P 2156*c*.
copper-Sn-, and Sn-, as catalysts in of fatty acids to olefins, P
lead-, spectrochem. analysis of, 8945*e*.
lead-Sn-, Bi diffusion in, to form quaternary eutectic, 6136*d*.
lithium-Mg-Zn-, P 1308*a*.
magnesium-Ag-, corrosion-resistant, P 2921*f*.
magnesium-Zr-, 4619*e*, 8339*a*.
nickel-, testing corrosiveness of lubricants toward, 8126*b*.
silver-, vapor pressure of Cd over, 6559*e*.
tin-, Cd detn. in, 8949*h*.
tin-, spectrographic analysis of surfaces of, for impurities, 5694*c*.

titanium-Zn-, P 106*a*.
zinc-, coatings from, on Fe and steel, 3766*f*.
electrodeposition and structure of, 7887*a*.
electrodeposition of, 4148*a*.
as solder for low temps., 6016*f*.
as Zn or Zn-alloy solder, P 3343*b*.
zinc detn. in, 64*c*.
**Cadmium ammonium chloride**, crystal structure of, 1623*a*.
**Cadmium antimonide**, CdSb, crystal structure of, 3260*g*.
**Cadmium borate** ($Cd_2B_2O_5$), cathodoluminescence of, and luminescence of its Mn-activated state, 3723*a*.
phosphors contg., response to far-ultraviolet light, 3717*b*.
**Cadmium bromide**, activity and osmotic coeffs. of, 22*d*.
lattice energy of, 2829*f*.
magnetic susceptibilities of hydrates of, 4528*f*.
spectrum of CdBr, 2863*h*, 3712*i*.
system: $CdCl_2$–, d. and molar vol. of, 6498*f*.
system: $CdCl_2$–, viscosity of, 4936*g*.
system: KBr–$H_2O$–, 8930*h*.
**Cadmium calcium silicate**, phosphor, P 6089*a*.
**Cadmium carbonates**.
**$Cd(HCO_3)_2$**, formation and stability of, 4171*a*.
**$CdCO_3$**, systems: $CaCO_3$–, and $MnCO_3$–, 4073*h*.
**Cadmium chloride**, activity and osmotic coeffs. of, 22*d*.
cadmium-isotope migrations in molten, 2862*f*.
as catalyst in $C_2H_2$ reaction with HCHO and HCl, P 5035*b*.
as catalyst in manuf. of chloro formals, P 4685*g*.
compds. with anils, 4227*h*.
with L-α-glycerylphosphorylcholine, 6167*a*.
with org. compds., 7000*g*.
with sulfenamides, as accelerators for rubber curing, P 8732*a*.
decompn. potential in molten $AlCl_3$-NaCl, 8915*e*.
effect on acetylcholine action, 3903*b*.
effect on bread doughs, 4781*g*.
electrolysis of fused, 950*d*, 8909*h*.
lattice energy of, 2829*f*.
magnetic susceptibilities of hydrates of, 4528*f*.
methane effect on, 5734*f*.
mixt. (molten) of KCl, NaCl and, condensation of $C_2H_2$ with $NH_4$ in presence of, 3778*g*.
polarographic diffusion current for, 5655*b*.
polarography of, with dipping Pt needle electrode, wave height temp coeff. in, 8947*a*.
as promoter in $HgCl_2$ catalyzed manuf. of Lewisite, P 5412*c*.
solid soln. with AgCl, disorder and elec. cond. in, 7772*e*.
spectrum of CdCl, 2863*h*, 3712*i*.
system: $CdBr_2$–, viscosity of, 4936*g*.
system: KCl–$H_2O$–, activity and elec. cond. of, 6892*h*.
systems: $BaCl_2$–, $CdBr_2$–, $PbCl_2$–, KCl–, and NaCl–, ds. and molar vols. of, 6498*f*.
system: AgCl–, solid soln. in, 8789*c*.
**Cadmium chromite**, $CdCr_2O_4$, catalysts of zinc chromite and (or), in prepn. of acrylonitrile, P 1051*b*.
**Cadmium compounds**, alkyls, bond energies and heats of formation of, 5242*d*.
ammines, P 3158*a*.
complex, 6892*h*, 8939*g*.
with alkali metal chlorides, 4595*c*.
with heteropoly acids and amines, 1672*a*.
polarography of, 5691*d*.
stability of, 4969*d*.
thermodynamic properties of, 3277*b*.
with copper, compression of $Cu_3Cd_8$, 4917*a*.
detoxicants for, P 3571*g*.
with 3,5-diodo-4-oxo-1(4*H*)-pyridineacetic acid, 5780*f*.
with (ethylenedinitrilo)tetraacetic acid, 2113*d*.
as fungicides for cotton fabric, 8085*f*.
with 3-hydroxy-2-naphthoic acid and pyridine, 2588*g*.
with kojic acid, as fungicides, P 4419*c*.
lattice energies of, 8230*g*.
luminescent substances contg. alk. earth metal sulfides and, P 500*h*.
of nicotine salts, P 8605*b*.
org., P 7953*d*.
org., antiseptic and fungicidal, P 363*i*.
with β,β′,β″-triaminotriethylamine, stability of, 8812*e*.
**Cadmium copper chloride**, $3Cu(OH)_2$·$CdCl_2$, 8929*g*.
**Cadmium cyanide**, lattice energy of, 2829*f*.
**Cadmium ferricyanide**, compn. of, 2113*b*, 7365*a*.
**$Cd_3[Fe(CN)_6]_2$**, detection of, 8966*e*.
soly. of, thermodynamic data on $CdCl_2$ complexes from, 3277*a*.
**Cadmium ferrocyanide**, compn. of, 1677*g*i.
detection of, 8966*e*.
**Cadmium fluorides**.
**CdF**, spectrum of, 6918*c*.
**$CdF_2$**, in fluorination of α,α,α-trichlorotoluene, 8364*h*.
heat of formation and lattice energy of, 2829*i*.
phosphor contg., for cathode-ray tubes, P 7831*f*.
**Cadmium formate**, $Cd(HCO_2)_2$, heat of formation and lattice energy of, 2830*a*.
**Cadmium gallate**, $CdGa_2O_4$, structure of, 4171*e*.
**Cadmium halides**, anticryptogams from, P 8604*i*.
**Cadmium hydroxides**, mixt. with kieselguhr, in S removal from water gas, 2401*f*.
**$Cd(OH)_2$**, lattice energy of, 2829*f*.
in system $CdSO_4$-CdO–$H_2O$, 2493*a*.
**$[Cd(OH)_2]_pCd_q$**, elec. cond. of, 6050*g*.
**Cadmium iodide**. (See also *Iodocadamates*.)
activity and osmotic coeffs. of, 22*d*.
activity in $D_2O$, 3693*h*.
binding energy of, 6895*f*.
as catalyst in polymerization of PhOC:CH, 6997*c*.
decompn. potential in fused $NaAlI_4$, 6519*g*.
decompn. potential of molten, 4582*e*.
effect on supercooling of water, 1620*h*.
lattice energy of, 2829*f*.
mixt. with molten NaI, decompn. potential of, 4582*g*.
phosphors contg., 3723*c*, 6086*c*.
photoeffect (internal) in, effect of dyes on, 7349*e*.
reaction with $BrF_3$, 3739*e*.
spectrum of CdI, 2863*h*, 3712*i*.
system: KI–$H_2O$–, 8939*h*.
**Cadmium magnesium chlorides**, 6104*d*.
**Cadmium molybdate**, $CdMoO_4$, luminescence of, 3722*f*.
**Cadmium nickel chloride**, $CdCl_2.2NiCl_2$, crystal structure of, 2064*g*.
**Cadmium nitrate**, activity and osmotic coeffs. of, 22*d*.
amphoteric character in abs. $HNO_3$, 6490*b*.
as catalyst in condensation of 2-furaldehyde with phenol, 5226*b*.
as catalyst in oxidation and hydrolysis of cellulose by nitric acid, 1979*a*.
heats of formation and soln. and lattice energy of, 2830*a*.
polarography of, 5691*e*.
Raman spectrum of, 8887*h*.
**Cadmium ores**, analysis of, for Bi and Tl, 2546*e*.
**Cadmium oxalates**, antifouling properties of, 3964*a*.
**$CdC_2O_4$**, decompn. by heat, 4934*a*.
**Cadmium oxide**, as catalyst in dehydrogenation of piperazine, P 1813*d*.
catalyst of zinc oxide and, in prepn. of acrylonitrile, P 1051*b*.
dust, retention after respiration, 5434*a*.
effect on phosphate glass, 5163*i*.
Hall effect and thermoelec. power of, 4555*d*.
photoeffect (internal) in, effect of dyes on, 7349*e*.
system: $CdSO_4$–$H_2O$–, pH in, 2493*a*.
voltaic cells contg., 7351*e*.
**Cadmium phosphate** ($Cd_3(PO_4)_2$), and cathodoluminescence thereof, 3723*a*.
phosphors, P 7831*i*.
**Cadmium phosphomolybdate**, $Cd_3(PO_4$·$12MoO_3)_2$, 7366*a*.
**Cadmium phosphotungstate**, $Cd_3(PO_4$·$12WO_3)_2$, 7366*b*.
**Cadmium potassium ferricyanide**, $KCd_{10}(Fe(CN)_6)_7$, 2113*b*, 7365*b*.
**Cadmium potassium ferrocyanide**, $K_2CdFe(CN)_6$, 1677*h*.
**Cadmium pyrophosphate** ($Cd_2P_2O_7$), and cathodoluminescence thereof, 3723*a*.
phosphor, activated by Mn, P 6518*a*.
**Cadmium salts**, adsorption and electrolytic polarization in solns. of, 503*h*.
**Cadmium selenides**, in photoconductive cells, 2858*g*.
**CdSe**, optical and elec. properties of, 3294*g*
photoelec. effect in, 35*a*, 482*e*, 4102*g*, 8896*a*.
**Cadmium silicates**, and cathodoluminescence thereof, 3723*a*.
**Cadmium stannate**, $CdSnO_3$, and cathodoluminescence thereof, 3723*a*.
**Cadmium sulfate**, compd. with nicotine sulfate, 8297*a*.
magnetic susceptibilities of hydrates of, 4528*f*.
mixt. with $ZnSO_4$, electrolysis of, 2874*e*.
polarography of, 2873*b*.
polarography of, with solid electrodes, 8946*g*.
reaction with albumin from blood serum, 6695*i*.
reaction with NaOH, 6050*g*.
system: CdO–$H_2O$–, pH in, 2493*a*
transference numbers of, 4930*e*.
**Cadmium sulfate reaction**, comparison with other clinical protein reactions, 7569*g*.
**Cadmium sulfide**. (See also *Pigments*.)
as counting substance, 4110*g*.
elec. and optical properties of, 3294*e*, 6031*d*.
fluorescent screen contg., P 7832*d*
fluoroscopic screens of ZnS and, luminescence of, 8281*h*.
luminophor contg., prevention of darkening of, P 6090*a*
neutron counting with, 4110*h*
oxidizability of pptd., 5700*i*
phosphors contg., electron traps in, 7348*a*.
prepn. of, 8893*g*
quenching of, 7347*c*.
response to far-ultraviolet light, 3717*b*
temp.-stability of luminescence of, 3723*g*
phosphors of ZnS and, 5670*h*
activated by Cu, luminescent screen contg., P 1267*b*, P 1268*c*
activated by Cu, quenching of phosphorescence of, 6920*h*
activated by Cu, temp. effect on cathodoluminescence of, 8280*i*
dependence of luminescence of, on wave length of exciting light, 4578*b*.
effect of fluxes on cathodo luminescence of Ag-activated, 7826*i*
excitation intensity and efficiency of poisoned, 8280*i*.
luminescence of, 8894*g*.
in photoconductive cells, 2858*g*.
as photocurrent carrier, 483*b*, 8896*a*
photoelec. effect in, 35*a*.
reduction (electrochem.) of, thermodynamics of, 4931*e*.
in scintillation counters, 4112*h*
soly. product of, 5344*f*
x-ray detections with crystal counter of, 8875*g*.
**Cadmium tellurides**, in photoconductive cells, 2858*g*.
**CdTe**, elec. and optical properties of, 3294*g*
photoelec. effect in, 35*a*.
**Cadmium thallide**, CdTl, as photocurrent carrier, 8896*a*.
**Cadmium thiocyanate**, $Cd(CNS)_2$, heats of formation and soln., and lattice energy of, 2829*i*.
**Cadmium thiocyanatomercurate II** ($Cd[Hg(CNS)_4]$), crystal structure of, 5325*a*, 6482*g*.
mol. wt. of, 8764*i*.
system: $Co[Hg(CNS)_4]$–, and $Zn[Hg(CNS)_4]$–, 7803*i*.
**Cadmium tungstate** ($CdWO_4$), crystals (single) of, absence of photoconductivity in, 5312*b*.
luminescence of, and of its U-activated state, 3722*f*.
phosphors contg., response to far ultraviolet light, 3717*a*.
**Cadmium vanadate (V)**, $Cd(VO_3)_2$, prepn. and soly. of, 8247*f*.
**Cadmium yellow**. See *Cadmium sulfide, Pigments*.
**Cados**, for making road crossings, 7220*b*
**Caeruloplasmin**, the term, 4309*h*.
**Caesium**. See *Cesium*.
**Cafesterol**. See *Cafestol*.
**Cafestol**, as impurity in caffeine, 9377*h*.
**Caffaro powder**, in smut control, 8595*h*
**Caffeic acid** (*3,4-dihydroxycinnamic acid*), antibacterial action of, 4327*ghi*.

pigment precursors in tomato juice, 8459c.
in plants and their exts., 2283g.
—, methylene-*, bactericidal action of, 4327h.
affeidine, thio analogs, 3794c.
—, 6-thio-*, and salts, 3794d.
affeine (1,3,7-trimethylxanthine). (See also Coffee; Tea.)
anticholinesterase activity of, 4380c, 9103b.
antihistamine action of, 1112i.
as antioxidant in alkyl benzenesulfonates, P 6846b.
cafestol as impurity in, 9377h.
complex with hemin, 702f.
cytological effect of, 3889i.
detection of, 5904g, 6785e.
detn. and urinary excretion of, 6693g.
detn. of, 5904e.
in coffee and crude caffeine, 1878c
in dry coffee exts., 1498g.
in ground coffee, 1689f.
in medicinal mixts., 5536d.
differentiation from theobromine, 2666i.
effect of, on brain function and metabolism, 7147h.
on circulatory system in typhus, 8535h.
on digitalized heart, 8051g.
on heart inhibition by K, 1108d.
on intracranial hypertension, 765e.
on normal and denervated muscles, 8064b.
on perception of motion, 8062c.
on polypnea, 2323a.
on prothrombin time, 9255e.
on protoplasmic colloids, 3932i.
in sports, 8543a.
on tropokinesis in onion meristems, 4346i.
electrocapillary properties of, pH and, 6887f.
electrodialysis of, 3975e
glycemia from, 8542h
identification of, 5535h.
ionization of, 8615g.
as methyl donor, 2316c, 7526i
N-methyl group detection in, 1689b
multinucleated unsegmented triton eggs produced by, 5873f.
muscle contracture by, 1861c.
mutations in fungi from, 3881e.
prepn. contg. 2-naphthaleneacetic acid and, for use against fatigue, P 5909c.
prepn. from tea dust, 5535b.
preps. contg. indole fatty acids and, P 5909d.
preps. contg. pyrrole fatty acids and, P 5909e
recovery from green coffee, P 6371b.
removal from coffee, P 5882i, P 6331d
in respiration stimulation, 5122d
salts derived from boric acid complexes of carbohydrates or of sugar alcs., P 1800g.
soly. of, effect of salts of org. bases on, 8803f.
in Na salicylate solns., 8803e.
in solns. of Na salts of org. acids, 8803d.
stratification and deformation of Arbacia punctulata eggs centrifuged in, 3939d.
in tea-seed hulls, 1878e.
thio analogs, 3794c.
toxicity of, 7591e.
triboluminescence of, 409c.
trypepsin output in cats treated with, 297g.
Caffeine, 8 - (benzyloxymethyl)-†, 3794f.
—, 8-(bromomethyl)-†, 3794f
—, 8-(chloromethyl)-†, 3794f.
—, 2,6-dithio-, 3794d.
—, 8-(ethoxymethyl)-†, 3794f.
—, 8-(hydroxymethyl)-†, and acetate (ester), 3794e.
—, 8-methyl-. See Xanthine, 1,3,7,8-tetramethyl-.
—, 8 - (phenyliminomethyl)-†, 3794h.
—, 6-thio-, 3794c.
8-Caffeinecarboxaldehyde*, and derivs., 3794e.
8-Caffeinecarboxylic acid*, 3794g.
Cajanus indicus (Cajan cajan, Cajanus cajan, pigeon pea), growth-limiting essential amino acids of, 9186g.
in Hawaii, 9292f.
Cake. See Bakery products.
Caking. See Agglomeration.
Calabash curare. See Curare.
Calamagrostis. See "reed" under Grasses.
Calameone, 3807i.
Calameone, 3808a.
Calamine. (See also Hemimorphite; Smithsonite.)
lotion, silica as suspending agent for, 8600c.
phenolated lotion of, 358i.
Calamone, and semicarbazone, 3808a.
Calandra. See Sitophilus.
Calaverite, density and x-ray data on, 8982g.
Calcarinus, oils of—see Oils.
Calcemia. (See also Hypocalcemia.)
in Besnier-Boeck's disease, 3091e.
intestinal-juice secretion during, 8050e
from milk and alkali intake, 5489e.
Calcerolaria, poisoning (self-) of cut, 8458g.
Calcides, the term, 8927e.
Calciferol. See "D" and "D2" under Vitamins.
Calcification. (See also "D" and "D2," etc., under Vitamins.)
of bones—see Bones.
of cell cultures in presence of embryo juice and mammalian serums, 8409a.
of coronary artery, 8513g.
of dentine during low-Ca rickets, effect of F on, 6295d.
of dentine of tooth crown, 4357d.
of hypertrophic epiphyseal cartilage in vitro, following inactivation of enzymes, 1446a.
of integuments of Coleps hirtus, 3941a.
joint stiffness and, 6292f.
of lungs, sensitivity to coccidioidin, histoplasmin and tuberculin in relation to, 3513g.
of teeth, 2681e, 6394e, 6715g.
of teeth after nephrectomy, effect of calciferol and parathyroid ext. on, 9203he, 9204b.
Calcimeters, 5235a.
Calcimine, glue in, 4489e.
Calcination, of alk. earth carbonates, etc., app. for, P 7276a.
of alumina (hydrated), 1921f.
in alumina manuf., 1921g, 1922ab.
of alums, P 7651i.
of calcium carbonate, app. for, 9409e.
of carbonate rock, P 8110f.
of carbon black to remove chemisorbed O and volatile substances for GR-S rubber reinforcement, 8724f.
of cement—see "burning of" under Cement, hydraulic or structural.
of dolomite, P 7838f, 9395g.
flash drying in, 8752d.
furnaces for—see Furnaces
of gypsum and magnesite, catalytic effects through gas phases in, 8621i.
with indirect-fired rotary kilns, 8217g
kilns for—see Kilns.
of lime and lime soda sludge, 8587e.
of lime sludge, P 6378d.
of limestone—see Limestone.
of magnesia, 3156d.
of magnesite, Fe oxides in, 6955c
of phosphate rock for F removal, 7174n
of phosphates (super-) to remove S, P 788c.
of silica, etc., app. for, 912d
temps. for U ppts., 2889i.
zinc oxide activation by, 2402a.
Calcinosis, blood chemistry in, 5485c
Calcite (calcspar, Iceland spar). (See also Aragonite; Calcium carbonate; Marble.)
α-ray effect on, 7769h.
in antimony deposits of Soyatal Dist., Mex., 4982g.
asterism of etched crystal surfaces of, 8311i.
from Brazil (Lageado, São Paulo), 2549a.
calcination of, vol. changes in, 9409e.
cathodoluminescence of, 947b, 2516c.
as cementing substance for sands, 6550d.
of China (Kumush, Sinkiang), 3323h.
concrete from, 4827b.
in copper deposit (Ward) in Alaska, 6949g.
crusts on pebbles, periodic rhythmic formation by ground water, 4610e.
crystal lattice of, oscillation of, 4955f.
crystal structure of, 6482g.
crystal twinning of, 72h.
druses in calcitic limestones in Västunfjärd, Finland, 5345h.
elec. cond. of split face of, 6026c.
electron-microscope goniometry of, 3260d.
fluorescence and phosphorescence of, 6117i.
formation of, from aragonite and vaterite, kinetics of, 6494f.
from aragonite, kinetics of, 24d.
by earthworms, 341e.
of Greenland (Holsteinborg dist.), 8313c.
of Idaho (Boise Basin), 4981d.
in limestone of Northampton Sand, England, 5347g.
massive, in fluorite deposits of Ky., 2551de
in mercury deposits in the Urals, 2130h.
in mercury ores of Huahuaxtla district, Mex., 4981h.
minerals in vein of, of Akol, U.S.S.R., 5707g.
in mineral springs at Beppu, Japan, 5703h.
of Montana (Libby Quadrangle), 8315d.
of muds of thermal springs of Budapest, 8994f.
from nepheline pegmatites of Vishnevye Mts., Mid Ural, 2897d.
neutron cross section of, 4558h.
nickel-contg., of Uluntui Valley, U.S.S.R., 3319g.
of Norway (Rana Mines), 6546c.
of Ontario (Silver Harbour, Lake Superior), 4606c.
optical, of Mexico, 2901g.
of Peru (Huitor region), 6545c.
polishing of, effect on hardness and surface structure, 4071i.
in pyroxenite Ti ores of Buorijärvi, Karelia, 7381a.
Raman spectrum of, 4956d.
removal from boilers, 4605c.
in sands of Ticino River, Italy, 2130f.
sepn. from EtOH, by heating liquid-vapor interface, 7298b.
soils, 3127d
soly. of, 2073d.
surface layers of, 3259h.
in tilleyite deposits of Carlingford, Ireland, 5347b.
tritolyl phosphate contact angles with, 8234f.
tungsten-contg. fluorescent, in Darwin, Calif., 6124c.
from Ugauda (Mbale mine), 8985c.
of U.S.S.R. (Krasnoyarsk Dist.), 2897f
in Utah (Iron Co.), 7873a.
Calcium. (Other entries relating to calcium and its compounds can be found under the heading Alkaline earth metals and under such headings as Alkaline earth sulfates.)
absorption of, by barley and pea roots, effect of exchange capacity of clay minerals and acidoid content of plant on, 8010a.
absorption of, by clays and soils, 7618e.
by humic acid and soil, 7618c.
by intestines, 7556h.
by intestines, effect of citric acid on, in relation to its antirachitic action, 5464c.
by lupine, effect of B and Mn on, 731a.
by rectal mucosa, 5470h.
in actin, and effect on actin polymerization, 9095h.
activity of, in clay suspensions, 1132i.
adsorption by rubber-latex particles, 7249d.
adsorption in plant nutrition, 279b.
aerosol contg., effect on pulmonary vol., 7128g.
Amberlite contg., effect on barley and lettuce, 7622i.
ammonia solns. of, 2500c.
antagonism to antibacterial action of atebrin and other drugs, 1826a.
antagonism to K on electrocardiogram, 6742g.
apyrase system of muscle and, 9123g.
balance in inanition, 8471e.
balance in inanition, and effect of Ca administration on Ca and Mg balance, 8498b.
balance of premature infants on diet of evaporated milk, 5100i.
in barley, effect of K on, 9175d.
binding in liver, effect of age on, 6715a.
binding of ions of, at protein-water interfaces, 8411i.
in birch root sap, 730a.
in bismuth removal from Pb, 8326g.
in blood—see also Calcemia; Hypocalcemia.
in blood and blood serum of various mammals, 8510g.
in blood and cerebrospinal fluid after Ca chloride injection in sound and meningitic children, 3937b.
in spasmophilic and normal infants, 5487a.
in tetanus, 2311g.
in blood and tissue during breathing air rich in $CO_2$, 8542a.
in blood and urine in Recklinghausen disease, 8523g.

in blood coagulation, 2664*f*, 4747*b*.
in blood, during diphtheria intoxication, 1100*d*.
effect on action of F in predentine and dentine formation, 6716*a*.
during fasting, 8471*c*.
in fever in hypertensive persons, 3011*i*.
in glaucoma, effect of irritants on, 6310*i*.
in hereditary osteopetrosis, 1482*h*.
during hysteria, 7124*h*.
after oral and intravenous administration of Ca, 737*i*.
in parturition and milk fever, 7119*i*.
after rectal administration of Ca and Mg salts, 6733*a*.
in rickets with or without tetany, 1854*g*.
after sulfonamide administration, 5121*d*.
in visceral leishmaniasis of children, 2313*e*.
during vitamin A treatment in tuberculosis, 3499*c*.
vitamin $D_2$ effect on, 6294*d*, 9181*c*.
vitamin $D_2$ prepn. for increasing, P 4433*c*.
in blood plasma and brain, convulsive threshold in normal and desoxycorticosterone-treated animals in relation to, 7146*a*.
in blood plasma of fresh water and terrestrial invertebrates, 4388*e*.
in blood plasma of heifers, effect of vitamin A on, 2293*h*.
in blood serum, 8038*b*.
in diabetic acidosis, 5855*a*.
effect of K administration on, 3496*h*
effect of Na cholate and taurocholate on, 2688*b*.
in mammary cancer and osseous metastases, and effect of estrogens and androgens thereon, 8521*g*.
after nicotinamide injection, 1472*b*
of normal cows and in metabolic disorders, 4737*a*.
in parathyroid intoxication, 5120*i*
pptd. by various concns. of $NH_4$ oxalate, significance and clinical application of, 6271*d*.
in bone, biol. availability of, 5462*i*.
in brain after cerebral concussion, 5111*g*
in brome grass, effect of K on, 7088*a*.
catalyst from copper, chromite and, in hydrogenation of coal, 2404*d*.
as catalyst in bromination of 2-carbethoxycyclopentanone, 3273*f*.
in carbonyl compd. manuf. from olefins, CO and H, P 4287*c*.
in polymerization of butadiene, 1597*b*.
in polymerization of $C_2H_4$, P 6001*b*.
cation exchanger dynamic activity toward, 3268*f*.
chlorosis and metabolism in apple and cherry, 730*g*.
in coal, 8639*e*.
coli phage T5 requirement for, 8443*e*
color reaction of ions of, with azo dyes, 597*f*.
in cotton, N source effect on, 8017*i*.
crystallochem. electronegativity of ion of, 8231*a*.
deficiency of, blackening of feathers of chicks in, 285*a*.
effect of F on calcification of dentine in rickets from, 6295*d*.
effect on *Pinus taeda*, 5095*b*.
effect on susceptibility to poliomyelitis virus, 9188*g*.
in kudzu, 3552*hi*.
in lipophilic dystrophy, 8474*h*.
in oil palms in relation to chlorosis and bronzing, 7088*h*.
in potatoes, diagnosis of, 2675*f*.
symptoms in muscadine grapes, 9173*h*.
deposition in bones of chick embryos, effect of estradiol benzoate on, 7579*f*.
in diet, effect on digestibility of fatty acids, triglycerides and natural and hydrogenated fats, 5460*g*.
diet low in, Ca hypophosphite and other Ca compds. as supplements in, 5835*b*.
diet rich in protein and, effect on life cycle, 5461*e*.
diffusion in suspengel of bentonite, 7777*h*.
distn. of, from $CaH_2$ manuf., P 2380*h*.
effect on absorption of K and Na by roots, 804*h*.
on acid formation and respiration of sea-urchin eggs, 7150*c*.
on action current of heart, 6742*e*.
on action potential of sympathetic ganglion, 9208*gh*.
effect on adsorption of color of molasses and Ponceau 4 R by $CaCO_3$, 8791*i*.
on agglutination in *Strongylocentrotus droebachiensis*, 4389*i*.
on Al in plants on acid soils, 2350*a*.
on amino acids in legumes, 342*a*.
on bactericidal properties of quaternary $NH_4$ compds., 8588*f*.
on bedbug development on rabbits, 4739*h*.
on blood-vessel tone, 5116*a*
on $CO_2$ removal from aconitic acid, P 1057*c*.
on chlorophyll and yellow pigments in soybean leaves, 9174*h*.
on cold resistance of infusoria, 8564*h*.
on Cu electrodes, 8342*f*.
on creep strength of Pb, 4197*e*.
on decompn. of oxalosuccinic acid, 1014*b*.
on digitalis lethal dose, 5872*i*.
on elec. cond. of Amberlite IR-100, 7785*f*.
on eugenol-induced desquamation of mucus epithelium in gastric pouches, 8048*f*.
on formation and transformations of org. matter in lake sediments 7612*c*.
on fruit formation in *Kaktorovskya aschersoniana*, 8459*f*.
on glycosuria in pregnancy, 4753*c*.
on *N*-glycylleucine dipeptidase, 2249*i*
on heart, 297*c*.
on isoelec. and isoionic points of serum albumins, 3690*c*.
on Pb recrystn., 4199*a*.
on lespedeza tolerance to Mn, 3067*i*
on mammary gland, 3101*a*
on membrane forming capacity of echinoderm eggs, 8560*a*.
on metabolism of *Pseudomonas aeruginosa*, 1827*e*.
on metallic coating by vacuum evapn. P 104*c*.
on metamorphosis of Bugula species 8563*e*.
on minute vol. of heart, 3108*b*
on muscle inhibition in crayfish, 2333*d*.
on *Mycobacterium smegmatis*, 5114*c*
on neuromuscular action of 2,4 dichlorophenoxyacetate, 2329*f*
on nutritive value of feeds for rabbits, 1091*f*.
on org.-matter decompn. in soil, 8082*g*.
on oxidation of Cr-Ni alloys and Ni, 1619*f*.
on oxidation of fumarate in liver, 3894*e*.
on oxidation of molten Pb, 7881*g*
on oxidation resistance of Cr Ni Fe alloys, 3332*h*.
on O consumption by frog skin, 3530*a*
on $H_3PO_4$ esterification, 2695*c*.
on K in barley, 2282*h*.
on procaine action, 1869*a*.
on proteinase action on cornea, 8511*e*
on *Proteus vulgaris* and *P. X19*, 1455*f*.
on protoplasts, 5091*c*.
on radicle development of cotton seedlings, 283..
on relation of riboflavin and ascorbic acid to carbohydrate and N fractions of oat plants, 4734*d*.
on temp. of endothermic peak of rhodochrosite, 8984*d*.
on thermal stimulation and activity of nerve fibers, 9206*e*.
on thrombin-fibrinogen reaction, 5472*f*.
on viscosity of Al, 1701*i*.
in *Elodea canadensis* and *Fontinalis antipyretica*, plasmolysis form in relation to, 5089*e*.
energy levels, ionization potentials, magnetic splitting factors and spectrum of, 8883*f*.
energy levels of, 8871*c*.
exchange in normal tissues and in epidermal carcinogenesis, 1859*e*.
exchange of ions of, in glass, 2746*i*.
exchange with uranyl ion on bone, 8481*df*.
excretion of, diet and, 3902*h*.
by hens, 2291*b*.
in feces and urine, in osteoporosis, effect of steroid hormones on, 5487*i*.
in fertilizers—see *Fertilizers*.
films of, structure of, 2482*e*.
fixation by tissues and its function in nerve activity, 1475*b*.
fixation in bone, nervous system and, 8485*f*.
in food material as it moves along alimentary tract of hen, 2291*d*.
in forage of Southern Great Plains area, 1501*d*.
in forest leaves, 725*f*.
in forest soils, tree spp. and, 6769*g*.
in fruits (Italian), 5878*d*.
gamma-ray bombardment of, threshold for reaction in, 4115*g*.
getters from, 2877*d*.
in glomerulonephritis treatment, 1488*a*, 8534*b*.
in grapevine sap, 3889*f*.
in graphite (Acheson), 8276*c*.
in grasses and herbs of hay plots, 4347*i*
in guayule leaves, anion-cation balance and, 281*f*.
heat of transport of ion of, 8835*d*.
hemorrhage treatment with glycineas corbic acid and, 3933*f*.
hydration of ion of, 7302*b*, 8244*c*.
hypothrombinemia and thromboplastin in relation to, 8514*f*.
interaction with P and vitamin D, 8470*i*
in interstellar space, 1263*i*, 4952*h*.
in interstellar space and stars of classes O and *B*, 7335*b*.
in iodinated proteins and thyroid, 702*i*
in irrigation water, 3951*d*.
isotope of mass 40, mass difference between $A^{40}$ and, 6507*f*.
isotope of mass 41, energy levels of, 8869*i*
isotope of mass 42, from $K^{42}$ by $\beta$-decay, 8860*b*.
isotope of mass 45, $\beta$-rays from, 8268*d*
detn. of radiation dosages from, in bone, 4951*i*.
metabolism in calcified tissue, 3856*i*
secretion in egg, 6715*e*.
isotopes of, natural abundance of, 10
in lemons and oranges, effect of K 8018*e*.
in lipides, 5431*f*.
in magnesium manuf., P 4625*d*
-magnesium ratio of oil field water 839*f*.
manuf. of, by electrolysis, 8899*b*
manuf. of, from CaO, P 3769*d*
metabolism of, 6683*f*.
citric acid and, 9205*a*.
compared with Ra and Sr, 4754*f*
by cows during lactation, effect of thyroxine on, 2295*d*.
by cows, effect of Cu, Fe and Mn on 9313*a*.
by cows in relation to milk fever and grass tetany, 1843*d*.
effect of digitalis, strophanthin and vitamin D on, 8536*h*
effect of thiourea on, 4764*d*
during growth, effect of fat on, 7758
oxalate content of diet and, 3892*e*
in pregnancy, 8464*h*
in sheep, 9273*e*.
vitamins in, 8476*a*.
metabolism of, and therapy with, 5815
migration from muscle and skin, effect of spleen on, 8038*b*.
neutron cross section of, 4947*d*, 6909*d*
in nutrition during growth, 7556*d*.
oat yield and, 1836*d*.
in orange flowers and fruit, 8020*d*.
in orange juice, effect of fertilizers on 9319*h*.
in orange (Valencia) leaves, effect of root stock on, 3491*g*.
in oyster muscle, 3939*g*.
in peach-flower buds during development, and effect of weather thereon, 8457*h*
in peach leaves in relation to bacterial leaf spot, vigor and yield, 9173*e*.
peanut fruit absorption of radioactive 5087*c*.
peanut fruit filling and, 3067*b*.
in peanut growth, 2290*a*.
in pecan leaves, effect of fertilizer on, 2287*e*.
penetration into nerve fibers, 4744*a*
in perspiration, 4739*e*.
in petroleum, 2139*a*.
phosphate soly. and, in soils, 1511*h*
-phosphorus balance in hypotrophic children under various food rations, 7351.
-phosphorus ratio in blood and diet, tooth compn. and, 2681*f*, 6294*f*.
-phosphorus ratio in diet, blood balance and, 6706*g*.
in placenta of rodents, 5466*h*.
in plants, cation-exchange properties of soil and, 3128*d*.
from potassium by $\beta$-ray decay, 485*d*.
potassium deficiency in citrus and, 1132*i*.
-potassium ratio in blood serum, diagnostic significance of, 9224*a*.

purification of, 7851*d*.
in pus, 3512*d*.
quartz activation by, 6953*hi*.
reabsorption by kidneys, effect of parathyroid on, 2092*c*.
reaction products with maleic anhydride polymers with Me methacrylate,
reaction products with Me methacrylate polymers with α,β-unsatd. carboxylic acids, 8202*g*.
in red clover and timothy at various stages of growth, 727*e*.
removal of, from acetates and fluoroacetates, 4976*e*.
from blood with Amberlite resin, coagulation after, 7103*i*.
from bone, 3872*d*.
from cellulose, P 6415*e*.
from molasses, 5615*e*.
from phosphates in analysis, 4182*i*.
from teeth by acid beverages, effect of sugar content and pH on, 9220*h*
from teeth by citrate and lactate, effect of fluoride on, 6310*e*.
from tissue, test for end-point of, 8424*a*.
from water—see Water, *purification of*.
removing action of phytic acid in flour, 777*e*.
retention of, effect of complex-forming amorphous Na phosphates on, 1467*h*.
by hen, effect of dietary level of Ca on, 2291*e*.
in rickets, effect of citric acid and vitamin D on, 1094*h*
in rice in K deficiency, 9176*h*
root environment, 1461*e*
requirement for, 8458*g*.
rye and wheat, effect of ppng and weather on, 5450*e*.
in saliva, 4356*g*
sediments and sea water, 5350*e*
seasonal differences in, of newly hatched chicks, 295*a*.
silicic acid crystn. in presence of, 8934*h*
in soil, crop response to Mg and, 9320*d*
effect of ratio to Mg on alfalfa, 3956*g*
effect on absorption of nutrients by trees, 8455*h*.
growth of barley and lettuce in relation to, 7622*h*.
of Hawaii, effect of ratio to Mg on K availability, 9314*a*.
movement of, 1509*e*.
solubilization by fermenting org. matter, 7172*d*.
soil-exchangeable, effect of $(NH_4)_2SO_4$ on, 8503*f*.
soil granulation and, 794*h*.
in soybean milk and curd, 8476*a*.
soybean milk fortification with, and its availability for growth, 8469*i*.
spectrum of, 5300*i*, 7338*b*, 7858*h*.
in star ζ Aurigae, 1263*h*.
in star CY Aquarii, 5663*a*.

elec. furnace for, P 3299*e*.
electrodes for, 8899*f*.
furnace for, 8898*i*.
from waste CaO from $C_2H_2$ generators, 2081*i*.
melting point of, and system with CaO, 2081*f*, 2082*b*.
reaction with aldehydes and ketones in presence of alkalies, P 2219*b*.
reaction with MgO, 1925*cef*.
in sugar-beet-nematode control, 3134*s*.
sulfur removal from ferrous metal with, P 6143*c*, P 7404*b*.

**Calcium carbonate.** (See also *Alkaline earth carbonates; Aragonite; Calcite;*

*Chalk; Dolomites; Limestone; Multsfex; Whiting.)*
activity coeffs. in alkali carbonate melts, dissocn. and heat of fusion of, 6053*c*.
adsorption of color of molasses and Ponceau 4 R by, 8791*h*.
aluminous-shale calcination with $Na_2CO_3$ and, 1924*b*.
anion deformation in, 2513*f*.
as catalyst in decarboxylation, 7801*c*.
as catalyst in ketone manuf. from fatty acids, P 7037*f*.
catalyst of Pd and, in reduction of bromobenzene and 4-bromobiphenyl, 4242*f*.
colored paste of, for water detection, P 3748*f*.
corrosion by $Ca(HCO_3)_2$, 6962*f*.
crystd. from $H_2O$, ratio of $O^{18}$ to $O^{16}$ in, 2507*a*.
in DDT stabilization, P 7634*a*.
decompn. by heat, app. for, 9409*e*.
in petrogenesis, 2552*a*.
rate of, 7306*i*, 7307*f*.
rate of, and effect of foreign gases thereon, 2078*c*.
density (apparent) of powd., 3265*a*.
deposition of $CaCO_3$ on steel in $Ca(HCO_3)_2$ solns., 7889*e*.
deposition on rocks, microbiol. factors in, 7549*b*.
detn. in soils, calcimeter for, 5235*a*.
effect of $Ca(HCO_3)_2$ on phosphate fixation in sugar-cane soils, 8591*i*.
effect on flour, wheat germ and sugar mixt., 777*g*.
on phosphorus mineralization in soil, 1510*d*.
on soils, 2722*d*.
fire-fighting value of, 1570*a*.
formation from $CaSO_4$ and $Na_2CO_3$ in aq. soln., kinetics and catalysis of, 7311*f*
in gypsum solonchak in Georgian S.S.S.R., 7386*g*.
hydrogen-ion concn. of solns. of $Ca(HCO_3)_2$, of various concns. free from $CO_2$, 9306*f*.
hydroquinone crystn. on, 1237*c*.
in liver glycogen, blood glucose and lactate formation, 7995*g*.
manuf. from $Ca(OH)_2$, absorption app. for, 1616*a*.
mixt. with liquid O, electrolysis to give Ca saccharate, P 7840*h*.
mixt. with $MgCO_3$, Mg detn. in, 5329*g*.
neutron cross section of, 4558*h*.
as paper filler, 401*a*.
phosphate fixation on, 8592*b*.
pigments, effects of particle size of, on phys. properties of paints, 6836*b*.
percussion treatment of, P 422*g*.
reducing adhesive requirement and oil absorption of, P 1994*c*.
polythene compns. contg., P 4897*g*.
precipitation in sucrose solns., 3221*e*.
reaction of $Ca(HCO_3)_2$, with $Ca(OH)_2$, catalysis and kinetics of, 4086*i*.
reaction with $Al_2O_3$, kinetics of, 8826*e*.
with chlorinated fatty acids, 2164*f*.
with $CuSO_4$, 1138*gh*.
with $MgCl_2$ soln., 6060*g*.
as rubber-filler, 1209*b*, 1593*d*, 3226*d*, 7251*c*, 8187*i*.
for rubber filling, activation with 1-dodecylpyridinium bromide, 1599*d*.
in sediments of Black Sea, 5709*i*.
sepn. from EtOH, by heating liquid-vapor interface, 7298*a*.
sepn. from $MgCO_3$, P 3984*g*.
soil treatment with—see *Lime*.
solid soln. with $SrCO_3$, study by "emanation" method, 8271*f*.
system: liparite–, 1920*i*.
systems: $CdCO_3$–, and $MnCO_3$–, 4073*h*.
in tuffs of Casale, 2552*f*.
water (soft) requirements of, for coating formation on pipes, 6765*i*.

**Calcium caseinate.** See *Casein*.

**Calcium chlorates.**
**$Ca(ClO_3)_2$,** manuf. of, low in $CaCl_2$, P 3984*c*.
**$Ca(ClO_3)_2$, $Ca(OH)_2$,** manuf. of, P 5555*g*.

**Calcium chloride.** (See also *Alkaline earth chlorides; Alkaline earth halides.*)
activity and osmotic coeffs. of, 22*c*.
activity coeffs. of, hydration and, 7301*i*.
adhesive from HCHO-adhesive mixt. and, P 2471*i*.
in agar-agar gels during syneresis, 8793*f*.
ammino complex, reaction with 2-hydroxy-1-acetonaphthone, 6607*c*.
basic, manuf. of $CaCl_2.Ca(OH)_2$, P
brines in Carboniferous and Devonian sediments of Saratov, U.S.S.R., 4192*cd*.
brines, salt sepn. from, 2743*d*.
cement from ash, CaO and $MgSO_4$, P 6804*k*.
cement setting and, 8635*a*.
charcoal predigestion with, 6396*d*.
in coagulation of oxalated blood plasma, 3054*a*.
coating soap-powder particles with, to inhibit dust formation, P 6438*a*.
cornea tolerance to, 3111*a*.
corrosion by, 5721*b*, 6962*e*.
of aluminum, 4996*b*.
in petroleum-treating app., prevention of, P 9431*a*.
as decarboxylation catalyst, 7801*c*.
dehydration of hexahydrate of, 1278*g*.
detergent films on solns. of, 7777*a*.
diffusion in aq. solns., 8806*b*.
diffusion in polyvinylbutyral resin contg. $SiO_2$, 6490*a*.
drying agent (liquid) from, P 1126*d*.
drying of gas by solns. of, 2841*d*.
effect on absorption of sugar from intestines, 5466*i*.
on actin, 704*e*.
on adhesion of epithelium to stroma in cornea, 769*a*.
on Ca-alginate fibers, 8237*i*.
on Ca in blood and cerebrospinal fluid in sound and meningitic children, 3937*b*.
on cholesterol soln. in bile and blood serum, 9210*d*
on concrete, 3589*e*.
on eggs of *Limnaea stagnalis*, 5508*a*.
on elastic properties of rennet curd, 4394*b*.
on electrokinetic potential of gypsum, 4924*e*.
on erythrocytes of turtle, 3939*b*.
on formation of $H_2S.6H_2O$, 1672*g*.
on H overvoltage on Hg, 6494*b*.
on kola prepns., 5903*e*.
on Hg catalysts in sulfonation of an thraquinone, 617*h*.
on renal excretion, 8557*e*.
on staphylococcus antitoxin inactivation in urea solns., 2304*i*.
on supercooling of water, 1620*h*.
on swelling of collagen in liming of hides, 6449*b*.
on unimol. films of lecithin, 7526*e*
on vitamin $B_1$ action on intestine, 9186*b*.
on $H_2O$ action on frog taste fibers, 9274*a*.
evapn. of solns of, P 3158*f*
as firming agent for frozen strawberries, 3535*d*.
firmness retention in canned and frozen apples in relation to, 782*h*.
folic acid prepn. contg., 355*i*.
freezing-point depressions by, 5903*c*.
humidity-control standards from, 8812*i*
hydrolysis by steam, Berthelot-Thomsen principle of max work and, 2847*c*.
in lake waters of Central Kazakhstan, 7164*i*.
methane effect on, 5734*f*.
microwave absorption by solns. of, 2480*b*
mixt. with $NaClO_3$, tree treatment with, in tree debarking, 2767*e*.
muscle contraction by, 3861*c*.
muscle (heart) contraction by, and its mixt. with KCl, 5867*i*.
paste from bentonite and, P 6868*f*.
in peach-X-disease control, 9347*h*.
as polarographic auxiliary electrolyte, 5327*a*.
polarographic detn. of Cu and Fe subgroup cations in relation to, 7376*h*.
quaternary ammonium bactericides contg., P 9390*a*.
reaction with mica, 7200*d*.
removal from KCl and NaCl, 7860*g*.
solubilities of, 8805*e*.
solubilities of KCl and NaCl in solns. of, 2844*i*, 6889*d*.
in sugar-beet-juice treatment, 6443*h*.
in sulfur removal from coal during coking, 2754*i*.
system: Ca–, 7803*d*.
system: $Fe_2O_3$–NaCl–$H_2O$–, 7316*b*.
system: $MgCl_2$–KCl–$H_2O$–, 2854*d*.
systems: $MgCl_2$–KCl–$H_2O$–, and $MgCl_2$–KCl–NaCl–$H_2O$–, 6067*e*.
thermal cond. of aq., 5655*i*.
voltaic cells contg., 7351*e*.

**Calcium chromate,** dissocn. of, 9405*b*.
system: $Na_2CrO_4$–, 6898*f*.

**Calcium chromite,** $CaCr_2O_4$, 9405*b*.

**Calcium citrate,** calcium liberation from, in blood plasma by gram-negative bacteria, 1830*i*.
effect on firmness retention in canned and frozen apples, 782*h*.
ionization of, 7790*g*.

**Calcium compounds.** (See also *Alkaline earth compounds;* and such headings as *Alkaline earth sulfates.*)
in bread making, 1873*a*.
with ethyl 1,3-dioxo-2-indancarboxylate, 3308*a*.
with (ethylenedinitrilo)tetraacetic acid, 2113*c*.
in gas-turbine deposits, 5172*e*.
hexammine, 7851*f*.
intermetallic, 7771*d*.
lattice energies of, 8230*g*.
with lecithin and phytic acid, P 5156*d*.
with magnesium, $Mg_2Ca$, 4594*h*.
medicinal prepn. contg., P 8019*e*.
with 2-mercapto-5,5-dimethyl-4(5*H*)-imidazolethione, 6171*e*.
with phenol sulfides, disulfides and their polymers, P 4400*c*.
with phenyliminodiacetic acid and *N,N*-bis(carboxymethyl)anthranilic acid, spectra of, 7341*a*.
with phthalocyanine sulfonamides for lakes, P 8692*i*.
removal from fermentable materials, P 3972*a*.
with salipyrine, 5540*i*.
with tin, heats of formation of $Ca_2Sn$ and $CaSn_3$, 5275*c*.

**Calcium cyanamide.** (*For indexing purposes the name "calcium cyanamide" is used not only for the compound $CaCN_2$ but also for the various commercial products, as "Cyanamid," "Lime-nitrogen" and "Nitrolim," the chief constituent of which is $CaCN_2$.*)
in control of root-knot and weeds, 5145*a*.
crystals of, P 4821*e*.
derivs. of, 1278*h*
detn. of, and $Ca_3N_2$ detn. in $CaCN_2$, 1287*b*.
effect on germination of wheat and on *Tilletia tritici*, 1137*gi*.
equil. with $Ca(CN)_2$, 8930*d*
in *Hoplocampa brevis* control, 6355*d*
in leaf removal from shrubs and tree before storage, 1893*a*.
reaction with $NH_4$ salts in presence of urea, P 5706*d*.
in soil, transformations of, 797*b*
in sugar-beet-nematode control, 3134*e*
toxicity to bees, 344*h*.
in weed control, 9337*h*.
in gladiolus, 5145*f*.
in lawns, 2727*h*
in vegetables, 3134*g*.
in wireworm control in soils, 348*b*

**Calcium cyanide,** equil. with CaNCN, 8930*d*.
in fire-ant control, 1897*f*.
in grain-pest control, 9336*a*.
in sugar-beet-nematode control, 3134*e*

**Calcium dithionate,** $CaS_2O_6$, crystal structure of, 2483*i*.

**Calcium ethyl sulfate,** pharmacology of 4426*g*.

**Calcium ferrate(III),** $CaFe_2O_4$, formation in $Al_2O_3$ manuf., 1924*abc*.

**Calcium fluophosphate,** phosphor, P 7831*h*.

**Calcium fluoride.** (See also *Alkaline earth fluorides; Alkaline earth halides; Fluorite.*)
as catalyst in dehydration and dehydrogenation of EtOH and HCOOH, 6497*i*.
in esterification of fatty acids with glycerol, 4031*a*.
in pyrolysis of 1,1-difluoroethane, 6645*a*.
in reduction of MgO by ferrosilicon 4932*f*.
chlorine-resistant app. from, P 6387*b*.
effect on $Al_2O_3$ reaction with $BaSO_4$ 6894*i*.
on $Al_2O_3$ reaction with $CaCO_3$, 8826*e*
on caries, 6299*g*.
on migration of P and other elements in soils, 7624*a*.
films of, dielec. strength of, 3731*d*.
films on glass, crystal structure of, 4071*b*
in fluorination of $\alpha,\alpha,\alpha$-trichlorotoluene 8364*h*.
fluorine detn. in fresh and calcined 8960*c*.
in fluorite-contg. Pb-Zn deposits of Sa Antonio Canyon, Tex., 6950*i*.
glasses of, electron microscopy of, 4436*g*
interaction of nuclear spins in, 8273*d*.

photoelastic properties of, 5251*i*.
Raman spectrum of, 3294*d*.
refractive index of, 3259*h*.
scintillation decay in, 5292*e*.
soly. in $Be(NO_3)_2$, 6049*i*.
system: FeO–CaO–MgO–, 8630*a*.
uranium incorporation in fluorescent, 2869*f*.

**alcium gluconate**, as calcium supplement in Ca-low diets, 5835*b*.
carboxyl group in, 4641*g*.
cationic impurities in pharmaceutical, 8614*g*.
detn. of, 5339*i*, 5703*c*, 6541*e*.
detn. of, in AcOH in presence of $(NH_4)_2MnO_4$, 3317*b*.
effect on growth of plant tissue, 4349*c*.
effect on renal excretion, 8557*f*.
manuf. by electrolysis, 8904*e*.
metabolism of, 310*f*.
oxidation by *Acetobacter suboxydans*, 1828*e*.
prepn. of, 3147*f*.
sterilization of solns. of, 2367*b*.

**Calcium glycerophosphate**, dentifrice contg., P 7650*a*.
detn of, 5703*c*.

**Calcium halophosphates**, phosphors of, 4577*d*, 8280*b*.

**Calcium hydrides**. (See also *Alkaline earth hydrides*.)

**CaH**, in stars of late type, 6916*c*.

**$CaH_2$**, calcium for manuf. of, P 2380*h*.
manuf. of, 2342*f*.
voltaic cells contg., 7351*e*.

**Calcium hydroxide** (See also *Alkaline earth hydroxides*; and "hydrated" and "hydration of" under *Lime*.)
aluminum soln. in, rate of, 7305*e*.
calcination in indirectly-fired rotary kilns, 8217*g*.
carbonation of, acceleration with soda, P 1821*g*.
as catalyst in condensation of 2-furaldehyde with phenol, 5524*i*.
in decarboxylation, 7801*c*.
in dehydration of hydracrylonitrile, P 3837*a*
condensation of aldehydes with HCHO in the presence of, P 7505*a*.
cornea tolerance to, 3111*a*
as corrosion inhibitor for petroleum-refining app., 96*i*.
diacetone alc. decompn. in solns. of, and dissocn. of $Ca(OH)^+$, 6055*a*
drug contg., detn. of concn of, 7639*b*.
fire retardant coatings for wood from, 4493*a*
in formaldehyde condensation to sugars, 149*a*.
gel-type, P 6375*f*.
mixt. with Celite for chromatography, 2068*a*.
mixt. with liquid O, electrolysis to give Ca saccharate, P 7840*h*.
reaction of amino acids with $CO_2$ in presence of, P 5415*d*.
reaction of, and $Na_2CO_3$ with vegetable materials, P 669*a*.
reaction of, and NaOH with vegetable materials, P 608*h*.
reaction with $Ca(HCO_3)_2$, catalysis and kinetics of, 4086*i*.
reaction with soils, 3128*i*.
sedimentation vol. of quartz, sand, and $SiO_2$ gel in, 7777*f*.
in slag hardening, 8635*h*.
solid soln. with $3CaO.As_2O_5$, 5324*c*.
in waste-acid treatment, 6337*e*.

**Calcium hypochlorite**. (See also *Bleaching powder*.)
in bleaching cork, 5585*i*
effect on respiration of germinating seeds, 802*f*
in ketone oxidation to acids, 5015*i*.
manuf. of, P 1927*a*, P 5555*h*, 9394*a*.
mixt. with Na chlorite in bleaching of cotton, 8687*g*.
penetrating power and stability of solns. of, effect of surface-active agents on, 7233*i*.
in slime control in papermaking, 4012*h*.
stable prepns. of, P 1158*a*.

**Calcium hypophosphite**, as calcium supplement in Ca-low diets, 5835*b*.
detn. of, 9368*g*.

**Calcium hyposulfite**. See *Calcium thiosulfate*.

**Calcium iodide**. (See also *Alkaline earth halides*.)
activity and osmotic coeffs. of, 22*c*.
effect on cement setting, 8635*a*.
effect on supercooling of water, 1630*h*.

**Calcium ipral**. See *Ipral calcium*.

**Calcium lactate**, in cellulose-deriv. stabilization, P 849*f*.
detn. of, 5703*c*.
effect on firmness retention in canned and frozen apples, 782*h*.
manuf. from molasses, 2366*d*, 6445*f*.

**Calcium lithium silicate**, $Li_2CaSiO_4$, and cathodoluminescence thereof, 3723*a*.

**Calcium magnesium carbonate**, manuf. of, P 2745*c*.

**Calcium magnesium chloride**, crystn. from $CaCl_2$ brines, 2743*e*.

**Calcium magnesium phosphate**, manuf. in elec. furnace, 45*d*.

**Calcium magnesium silicate**. (See also *Diopside*.)
and cathodoluminescence thereof, 3723*a*.

**Calcium metaphosphates**, 6534*e*.
in feeds or fertilizers, 797*h*.
trimetaphosphate, as fertilizer, 7624*d*.

**Calcium molybdates**, manuf. of, P 5160*b*.

**$CaMoO_4$**, luminescence of, and of its mixt. with $CaWO_4$, 3722*f*

**Calcium nickel phosphates**, catalysts from, P 2382*e*i.

**Calcium nitrate**. (See also *Alkaline earth nitrates*.)
absorption by barley seedlings, 7555*a*.
activity and osmotic coeffs. of, 22*d*.
as catalyst for condensation of 2-furaldehyde with phenol, 5226*b*.
as catalyst in nitric acid oxidation of cellulose, 1978*i*.
concd. solns. of, P 5556*a*.
crystn. from phosphate soln., P 8759*f*.
effect on onions and onion roots, 9171*e*.
manuf. of, P 4821*f*.
from Ca phosphate and $HNO_3$, P 5161*b*, P 8623*i*.
from dolomite, etc., P 4436*c*.
in Poland, 9325*d*.
Raman spectrum of, 8887*g*.
system: $NH_4NO_3$–$H_2O$–, 1637*h*.
system: $Ca_3(PO_4)_2$–$HNO_3$–$H_3PO_4$–$H_2O$, 4553*a*.

**Calcium nitride** ($Ca_3N_2$), detn. in presence of $CaCN_2$, 1287*c*.
reaction with C, 8930*d*.

**Calcium oxalate**, in bryophyte cells, 280*f*.
formation in leather preservation, P 6452*i*.
heat action on dihydrate of, on thermobalance, 7367*f*.
prepn. of, 4972*h*
reduction (electrolytic) of, 2874*h*.
soly. and vapor pressure of hydrate and soln. of, 5267*b*.
turbidity of ppts. of, formed in gummy solns., 3873*i*.
in vegetables, phys. study of, 8414*d*.

**Calcium oxide**. See *Alkaline earths; Lime*.

**Calcium perchlorate**. (See also *Alkaline earth perchlorates*.)
magnetic susceptibility of, 5689*b*.

**Calcium periodate**, $Ca_5(IO_6)_2$, formation and behavior on thermobalance, 7367*f*

**Calcium phosphates**. (See also *Alkaline earth phosphates; Calcium metaphosphates; Calcium pyrophosphates; Fertilizers; Phosphates*.)
acid, manuf. from phosphates and $HNO_3$, P 8623*i*
in bread making, 1873*a*.
as catalysts in polymerization of $C_2H_4$ with monohaloalkanes, P 5640*f*.
effect on firmness retention in canned and frozen apples, 782*h*.
in feeds and fertilizers, 797*h*.
influenza-virus adsorption by, 3925*d*
periodic ppts in agar gels, effect of electrolyte mixts on, 7788*h*.
phosphors, phosphorescence of, 6085*b*.
polyphosphates in feeds or fertilizers, 797*h*.
superphosphate analysis for free acid and sol. phosphate, 7867*b*.
system: $Ca(NO_3)_2$–$HNO_3$–$H_3PO_4$–$H_2O$–$Ca_3(PO_4)_2$, and manuf. of $Ca(H_2PO_4)_2$ and $CaHPO_4$, 4553*a*.

**$Ca(H_2PO_4)_2$**, manuf. of anhyd., P 3984*f*.
manuf. of, in Poland, 9325*d*.
and reaction with glycerol, 7902*e*.
in reduction of discoloration of potatoes on cooking, 7603*i*.

**$CaHPO_4$**, as calcium supplement in Ca-low diet, 5835*b*.
as fertilizer, 798*e*.
mobility in soils, 5141*h*.
molding powder from alum, sawdust or wood flour and, P 6466*b*.

**$Ca_3(PO_4)_2$**, in bones and their formation, 6716*e*.
as catalyst in dehydration and dehydrogenation of EtOH and HCOOH, 6497*i*.
and cathodoluminescence thereof, 3723*a*.
existence of $\alpha$-, 9201*f*.
manuf. from phosphate rock, P 7652*i*.
phosphors contg., P 1662*a*.
energy transfer in, 3721*g*.
response to far-ultraviolet light, 3717*b*.
sensitive to both corpuscular and undulatory energy, P 7831*d*.
solubilization in soils by microorganisms, 5521*i*.
structure of, 4073*g*.
turbidity of ppts. of, formed in gummy solns., 3873*i*.

**Calcium phosphomolybdate**, $Ca_3(PO_4.12MoO_3)_2$, 2537*f*.

**Calcium phosphotungstate**, $Ca_3(PO_4.12WO_3)_2$, 2537*g*.

**Calcium plumbates**, white, P 1994*c*.

**Calcium preparations**, cell-protecting action of, 5493*a*.

**Calcium pyrophosphate**, in bones, 6716*f*.
and cathodoluminescence thereof, 3723*a*.
in fertilizers or feeds, 797*h*.
fluorescence of, activated by Bi, 8894*b*.
luminescent materials contg., decay after cathode-ray excitation, 5670*c*.

**Calcium salts**. (See also *Alkaline earth salts; Calcium*.)
absorption by normal and tubercular subjects, and effect of Mg phosphate thereon, 3512*c*.
adsorption by bone char, 6445*g*.
antagonism to bacteriostatic action of NaF on hides, 7731*e*.
catalysts of Mn salts and, in oxidation of petroleum products, P 3186*i*.
detn. in bone tissue, 8418*i*.
effect on Ca and Mg in blood after rectal administration, 6733*a*.
on cream vol., 326*e*.
on renal excretion, 8557*e*.
formation in antifouling varnish surface in the sea (*C. A.* has Cu by mistake), 3631*i*.
of fruit acids, P 1880*h*.
in giant cells in cicatrizing enteritis, 300*d*.
heart-muscle contracture from, 5867*h*.
pharmacology of, 4426*g*.
in pharmacy, 8099*a*.
pyrolysis of, of carboxylic acids, 1317*i*, 1318*a*.
removal from bituminous sandstones, 381*f*.
in soils of India, 9311*d*.
in sugar-beet juices, 6443*i*.

**Calcium selenates**, in greenhouse-pest control, 1141*d*.
as insecticides, 2357*f*.

**Calcium selenide**, phosphors contg., temp.-stability of luminescence of, 3724*b*.

**Calcium silicates**. (See also *Alite; Alkaline earth silicates; Wollastonite*.)
adsorbent, regeneration by oxidation, P 2422*g*.
and cathodoluminescence thereof, 3723*a*.
effects on GR-S rubber, 8189*a*.
in lime system with $SiO_2$, 1923*f*.
phosphors, P 6517*h*.
optical properties of, 8278*c*.
phosphorescence decay of, 8280*b*.
pigment for rubbers, P 5991*a*.
rubber pigmentation and reinforcement by, 1593*d*.
sulfides in slags of, agricultural value and, 6773*h*.

**$Ca_2SiO_4$**, crystal structure of $\beta$-, 5253*a*.
phosphor, activated with Pb, P 7352*b*.
phosphors contg., energy transfer in, 3721*g*.
as rubber-reinforcing agent, 1209*b*.

**$Ca_3SiO_5$**, $\alpha'$-, in spiegeleisen slags, 5705*h*.
in alumina manuf., 1923*h*, 1924*b*.
in ceramics, 2388*c*.
compn. with NaF, 1535*f*.
polymorphic inversions of, 7314*b*.
prepn. and structure of, 4073*f*.
solid solns. with merwinite and system with akermanite and monticellite in slag from ferrovanadium manuf., 1691*e*.
in system $Al_2O_3$–CaO–$SiO_2$, 6499*b*.
system: $Al_2O_3$–MgO–, 6798*f*.

**$Ca_3Si_2O_7$**, in alumina manuf., 1924*c*.

**Calcium silicide**, heats of formation of Ca-Si, CaSi and $CaSi_2$, 5275*c*.

**Calcium sodium silicates**.

**$Na_2CaSiO_4$**, thermal properties of, 9404*i*.

**$Na_2Ca_2Si_3O_9$**, and cathodoluminescence thereof, 3723*a*.

**Calcium sodium thiophosphate**, $NaCaPO_3S$, 4170*e*.
**Calcium stannates**, and cathodoluminescence thereof, 3723*a*.
**$CaSnO_3$**, mixt. with $BaTiO_3$, elec. properties of, 5245*a*.
**Calcium strontium chloride**, $CaCl_2.2SrCl_2$, crystn. from $CaCl_2$ brines, 2743*d*.
**Calcium sucrates**. See "calcium deriv." under *Sucrose*.
**Calcium sulfate**. (See also *Alkaline earth sulfates; Anhydrite; Gypsum; Plaster of Paris*.)
anion deformation in, Raman effect in study of, 2513*f*.
binding properties of, effect of TETs cement on, 9409*c*.
calcination with phosphate rock, 823*i*.
catalyst of, and C in addn. of HBr to fluoro olefins, 7407*b*.
cement resistance to, improvement of, 7657*i*.
concrete resistance to, effect of Vinsol on, 1546*a*.
corrosion by, 6962*e*.
as desiccant in hydrogenation of CO, P 1171*d*.
dissocn. of, 2493*i*, 6895*g*
effect on cement setting, 8635*a*.
effect on soly. of CaO in eutectic of $K_2SO_4$ and $Na_2SO_4$, 5323*e*.
evapn. of solns. of, scale formation in, 4521*d*.
formation from $CaSO_3$, 7307*f*.
hemihydrate, in deserts of Middle Asia, 2897*i*.
Liesegang rings in presence of, 1628*h*.
magnetic susceptibilities of hydrates of, 4528*f*.
mixt. with clay and $H_2SO_4$ as electrolyte for Pb battery, P 4590*e*.
mixt. with Fe, x-ray spectrum of, 8326*c*.
as paper filler, 400*i*.
peroxide (org.) desensitization with, P 1807*b*.
reaction with $Na_2CO_3$ in soln., 6060*g*, 7311*f*.
in sodium chloride brine, prevention of, 3982*i*.
soly. in aq. systems, 8805*b*.
in salt solns., 6889*e*.
in Na xylenesulfonate solns., 1242*e*.
**Calcium sulfides**. (See also *Alkaline earth sulfides*.)
adhesive from soybean protein contg. CaS and $Ca(SH)_2$, 1604*f*.
phosphor of Pb and, effect of infrared rays on luminescence of, 4576*g*.
**$Ca(HS)_2$**, depilating value and properties of, 6449*f*.
**CaS**, formation from $CaSO_3$, 7307*f*.
phosphors contg., P 7832*c*.
manuf. of, 1195*h*.
stimulating action of exciting light in, 5668*e*.
temp.-stability of luminescence of, 3723*e*.
phosphors of SrS and, improvement with Pb, P 2517*f*.
phosphors of SrS and, luminescence of, 4142*c*.
phosphor with Bi, decay of luminescence of, 5667*f*.
phosphor with Pb, infrared extinction in, 5669*d*.
sulfur manuf. from, P 4822*g*.
use of phosphorescent, by bacchantes, 2477*e*.
**Calcium sulfites**. (See also *Alkaline earth sulfites; Sulfite liquor*.)
soly. in aq. systems, 8805*b*.
**$CaSO_3$**, for coating paper, P 1568*b*.
decompn. to CaS and $CaSO_4$, 7307*f*.
hydrates of, 3302*h*.
**Calcium tartrate**, gels of, effect of salts on setting time of, 6889*a*.
in processed cheese, 3534*c*, 3944*c*.
**Calcium thiocyanatopalladate(II)**, $CaPd(CNS)_4$, in photographic-fog inhibition, P 6100*a*.
**Calcium thiophosphate**, $Ca_3(PO_3S)_2$, 4170*f*.
**Calcium thiosulfate**, pharmacol. action of, 3934*c*.
**Calcium titanates**. (See also *Alkaline earth titanates*.)
as dielectrics, 2388*d*.
**$CaTiO_3$**, dielec. const. of, 3674*d*.
dielec. const. of, at ultra-high frequencies, 2877*h*.
dielec. properties of, 7205*b*.
**Calcium tungstates**, luminescence of **$CaWO_4$** and $Ca_2WO_5$, and of their U-activated states, 3722*f*.
**$CaWO_4$**, crystal structure of, 4074*f*.
luminescent prepns. contg., 7347*e*.
phosphors contg., response to far-ultraviolet light, 3716*i*.
photoconductivity in, 5312*b*.
in scintillation counters, 4112*h*.
**Calcium uranate**, $CaUO_4$, crystal structure of, 3709*i*, 3710*b*.
**Calcium uranium fluoride**, $CaUF_6$, magnetic susceptibility of, 8768*d*.
**Calcium vanadate(III)**, $CaV_2O_4$, 4171*i*.
**Calcium vanadate (V)**, $Ca(VO_3)_2$, prepn. and soly. of, 8247*f*.
**Calcium zirconate**, $CaZrO_3$, and cathodoluminescence thereof, 3723*a*.
**Calcogens**, the term, 8927*e*.
**Calcosol Red BN**. See *Dyes*.
**Calcouranite**. See *Autunite*.
**Calcspar**. See *Calcite*.
**Calculations**. (See also *Integrals; Nomographs; Punched cards; Stoichiometry*.)
in analysis (spectrochem.), 2539*e*.
boards for, 1679*d*.
computing recorder for infrared transmission for, 7857*h*.
book: Graficheskie Raschety v Tekhnologii Soleĭ, 5555*a*.
elec.-analog-computer application to fluid-flow and heat-transfer problems, 8217*i*.
of errors in analysis, 2115*f*.
for grinding efficiency, 4193*b*.
machines for, finishing of, 1578*i*.
**Calculi**. (See also *Bezoars; Concretions*.)
biliary—see also *Cholelithiasis*.
biliary, bilirubin in blood serum in, 8516*d*.
citric acid in, 9270*g*.
scleroderma with calcareous, blood chemistry in, 5485*c*.
urinary, formation in osteoarticular tuberculosis, 2698*a*.
formed in childhood, 6722*e*.
in hyperparathyroidism, 9231*a*
solvents for, 1528*e*.
**Calculus**. See *Mathematics*.
**Caledon Dark Blue G**, photosensitization of oxidation and polymerization by, 4580*c*.
**Caledon Dark Brown 2G**, photosensitization of oxidation and polymerization by, 4580*d*.
**Caledon Golden Yellow GK**, photosensitization of oxidation and polymerization by, 4580*c*.
**Caledon Gold Orange 3G**, photosensitization of oxidation and polymerization by, 4580*d*.
**Caledon Jade Green**, absorption by cotton, 2776*f*.
synthesis of, 210*b*.
**Caledon Jade Green 2G**, photosensitization of oxidation and polymerization by, 4580*c*.
**Caledon Jade Green XN**, photosensitization of oxidation and polymerization by, 4580*c*.
**Caledon Orange 2RT**, photosensitization of oxidation and polymerization by, 4580*c*.
**Caledon Red BN**, absorption by cotton, 2776*f*.
photosensitization of oxidation and polymerization by, 4580*c*.
**Caledon Yellow 5G**, photosensitization of oxidation and polymerization by, 4580*c*.
**Calendering**, app. for, of rubber, 7251*i*.
app. for, of rubber, pencils for temp. measurement and control in, 6853*h*.
**Calglucon**. See *Calcium gluconate*.
**Calgon**. See *Sodium metaphosphates*.
**Calibration**. (See also *Meters; Weights;* etc.)
verifying devices for, standards of A.S.-T.M. for, 4202*g*.
**Caliche** (*calcium carbonate deposits*). (*Entries for Chile caliche or saltpeter are put under* Sodium nitrate.)
of Trinity River Tributary area in Okla. and Tex., 4607*i*.
**California Spray RE338**, as fungicide, 7177*i*.
**Calines**, identity with adenine, 9178*e*.
**Calking compositions**, P 1548*d*, P 4900*a*.
from alkyd resin, etc., P 3242*d*.
rheology of gun, 3166*b*.
from Thiokol latex, PrOH, iso-PrOH, $Bu_2NCSSNH_2Bu_2$ and asbestos, P 4508*i*.
**Calla**, ethiopine from, 1156*g*.
**Calliergin**, effect on carbohydrate metabolism, 310*e*.
**Callitris**, *erythrocephala*, amino acids during metamorphosis, 9270*h*.
*erythrocephala*, control of, P 7188*d*.
DDT effect on larvae of, reversibility of, 4416*c*.
toxicity to, of α-aminonitriles and S compds., 4414*f*, 4415*d*.
tyrosinase and glucose dehydrogenase activity in larva of, Weismann's ring in relation to control of, 6321*f*.
*vomitoria*, effect of piperonyl butoxide, piperonyl cyclonene and pyrethrum applied to selected parts of, 8602*i*.
**Callitris**, *calcarata*, tannins from bark of, 5219*f*.
oil of—see *Oils*.
**Callitroga americana** and(or) **Screw-worm**, control of, phenylsemioxamazide compns. for, P 5530*b*.
**Callosobruchus chinensis**, control of, 1142*e*.
control of, inert materials in, 1139*g*
toxicity to, of *p*-dichlorobenzene and $C_{10}H_8$, 1142*b*.
**Calocasia**. See *Taro*.
**Calogerasite**. See *Simpsonite*.
**Calogreen**. See "HgCl" under *Mercury chlorides*.
**Calombo**. See *Calumba*.
**Calomel**. See *Mercury chlorides*; for the term see 9*d*.
**Calorific value**. (See also *Heat of combustion*.)
calcn. of, of fuel gas from coal properties, 7661*e*.
of coal—see *Coal*.
compn. and, of solid fuels, 2753*h*
control of, of fuel gas, 9414*e*.
detn. of optimum, of fuel gas, 8120*b*
of gas (fuel)—see *Gas, fuel*; *manufactured Gas, natural*.
jet propulsion and, 4828*h*.
measurement of—see also *Calorimeters, Calorimetry*.
measurement of, of coal, 8117*h*
of coal tar fuels, 1551*c*.
of fuel gas, 3171*f*, 3596*g*, 3953*i*, 4445*f*, 6808*a*
of solid fuel, 3989*h*.
standards for, 4786*i*
**Calorimeters**, 5274*g*.
differential recording, 6903*a*.
for energy detn. for accelerated particles, 3706*e*.
gas (continuous), 6391*e*.
for gaseous fuels, 5647*i*.
for halogen-compd. heat of reaction in vapor phase, 6070*i*.
for heat capacity, 4523*g*
for heat of hydration of cements, etc., 2395*g*
for heats of adsorption of gases and liquids, 6871*d*
for hydrogen detn. in solid fuels, 5921*i*
recording, water feed for, 8217*c*
for rubber sp. heats, 3642*f*
semimicro low-temp., 5276*a*.
**Calorimetry**, combustion, mixing in, 2082*i*
gas (continuous), 6394*e*
of imperfect complexes, 7317*de*.
review on, 1038*b*.
transient effects in, circuits for minimizing, 3248*a*.
**Calorization**, of steel pipes, 2916*f*
**Calotermes**. See *Termites*.
**Caltha palustris**, pharmacology of, 9380*d*
**Calumba**, identification of fluidexts. of 3145*h*.
**Calves**. See *Cattle*.
**Calycanthine**, structure of, 7194*d*
**Calycopteretin** (*3,4',5,6,7,8 - hexahydroxyflavone*), anthelmintic action of, 3566*c*.
hexamethyl ether—see *Flavone, 3,4',5,6,7,8-hexamethoxy-*.
synthesis of, 639*f*.
**Calycopterin** (*4',5 - dihydroxy - 3,6,7,8-tetramethoxyflavone*), anthelmintic activity of, 3566*b*.
isolation from *Calycopteris floribunda*, 3565*h*.
**Calycopteris floribunda**, anthelmintics from, 3565*h*, 3566*a*.
**Camasulene**. See *Chamasulene*.
**Camel hair**, review on, 8685*h*.
**Camelina sativa**, seeds and extd. residues of, volative S compds. in, 8814*a*.
**Camelina, seed**, water detn. in, 8708*c*.
**Camelina oil**. See *Oils*.
**Camellia japonica**, active C and charcoal from, 5572*b*.
**Cameras, black finishes for**, 420*g*.
**electron-diffraction**, for low temp.,

for light scattering by solns., 6888*d*.
mirror high-speed, with 2 independent lens assemblies, 3198*i*.
multiple Guinier, 911*i*.
Polaroid Land, use for ultraphotomicrographs, 4904*i*.

allyl ester, polymers of, P 9531*f*.
amyl ester, as antioxidant in alkyl benzenesulfonates, P 6846*a*.
aryl esters, *N*, *N* derivs., P 1438*f*.
aryl, polysaccharide esters, 153*i*.
book: Klinik und Pharmakologie des Urethans und anderer cytostatischer Stoffe, 9268*i*.
*tert*-butyl ester, 578*i*.
choline ester, effect on auricles arrested by paludrine, 2704*b*.
derivs.—see also *Urethans*.
derivs, 593*b*, 4633*h*.
antimalarials, 593*b*.
effect on chloroleukemia, 4385*b*.
esters with hydroxy derivs. of quaternary ammonium salts, P 6875*b*.
in leukemia therapy, 3107*b*, 3917*g*, 6737*a*.
polymeric, P 5602*i*.
polymeric, treatment with $CH_2O$, P 902*h*.
polymers and condensation compds. of, P 6865*h*.
vinyl esters, polymers, P 4898*d*.
2,2′-dithiobisaryl, as softeners for rubber, P 6858*h*.
esters, 2945*d*.
with Bu *p*-hydroxybenzoate, 593*e*.
with *cis*-cryptol, 161*b*.
denaturation of methemoglobin by, 5813*h*.
effect on resting potential nerve, 3933*a*.
with glycerol 1,2-cyclic carbonate, P 6653*a*.
with (2-hydroxypropyl)trimethylammonium hydroxide, effect on stomach, intestine and urinary bladder, 8540*a*.
nerve-fiber block by, 2329*f*.
with polyhydric compds., P 4690*g*.
polymers of, P 3658*h*.
reaction with unsatd. aldehydes, 1389*i*.
with trihydroxy triglycerides, P 5968*c*.
ethyl and Me esters, condensation products with HCHO and dicyanodiamide or stearoyltriaminotriethylenebiguanide, P 2780*g*.
ethyl ester, action mechanism of, 9263*d*.
activation of *Nereis* eggs by, 8066*a*.
analeptic action of metrazole, picrotoxin and samandarine on, 3519*i*.
azeotropes of, 2834*eg*, 2835*b*, 5247*c*.
binding by proteins, 1241*e*.
in blood-disease treatment, 5498*d*.
carcinogenic action of, 305*a*.
carcinoma-growth inhibition by, 5488*d*.
cytostatic effect on leucocytes, 9263*g*.
detection of, 521*g*.
detn. in blood, 5437*h*.
diabetogenic action of, 2314*g*.
distribution of radioactivity in tissues after injection of carbonyl-labeled, 3917*g*.

*ethyl ester*, effect on adenosinetriphosphatase in heart muscle, 8058*b*.
effect on basal metabolism and erythrocyte sedimentation rate in leukemia, 5854*e*.
effect on blood coagulation with some vitamin systems, 6679*e*.
effect on central nervous system, 5498*b*.
effect on easily-split Fe of blood, 8051*f*.
effect on eosinopenia in trichinosis, 7105*c*.
effect on fibroblast division, 3526*b*.
effect on gastric secretion, 5872*a*.
effect on glycogen synthesis from glucose in liver, 7134*b*.
effect on heart and intestines, effect of methemoglobin on, 316*h*.
effect on heart frequency and electrocardiogram, 5493*e*.
effect on ionic permeability of red blood cells in relation to narcotic action, 7143*h*.
effect on leukemia, 5498*d*, 8548*b*.
effect on lipide and nucleic acid in thymoma, 5853*f*.
effect on mitotic cell division, 4380*i*.
effect on normal and malignant lymphoid tissue, and effect of adrenalectomy thereon, 3109*f*.
effect on psittacosis virus, 305*i*.
effect on respiration of embryonic cells, 771*f*.
effect on reticulocytes in blood of cancerous and normal rats, 6723*f*.
effect on spore disinfection and effect of hydrostatic pressure thereon, 5082*b*.
effect on sprouting of potato tubers, 7092*e*.
effect on tissue, 7139*e*.
effect on yeast fermentation and respiration, 5444*b*.
lymphopenia from, in normal and adrenalectomized rats, 7580*e*.
mechanism of action and therapeutic use of, 5906*c*.
multinucleated unsegmented triton eggs produced by, 5873*f*
narcotic action of, in relation to action on cholinesterase in blood, 7142*e*.
necrotizing action of $CHCl_3$ and, 7135*a*.
neoplasms of lungs from, and its *N*-alkyl derivs., 5108*a*.
pulmonary adenomata from, 307*bc*, 1103*i*.
pulmonary tumors and, 2695*e*.
review on, 8064*d*.
system with picric acid, 6066*e*.
volatility of, 3975*a*.
ethyl ester, catabolism in normal and neoplastic mice and its measurement, 9251*a*.
ethyl ester, in tissue and its detn., and effect on enzymes, 9258*c*.
hydrazide—see *Semicarbazide*.
hydroxyalkyl derivs., esters, for molding dentures, P 9538*f*.
manganese salt, as fungicide, 7177*b*.
**Carbamic acid acetyldithio-**, 3-chloroallyl ester, 2928*f*.
——, **allyl-**, ethyl ester, in printing pastes, P 9473*h*.
methyl ester, 2945*h*.
——, **amino-** See *Carbazic acid*.
——, **(2-aminoethyl)-**, inner salt, 6158*a*.
——, **[α-(aminomethyl)benzyl]ethyl-**, ethyl ester-HCl, 6176*f*.
——, **[α-(aminomethyl)-*p*-methoxybenzyl]ethyl-**, ethyl ester-HCl, 6176*f*.
**(β-aminopelargononyl)-**, 236*c*.
**(benz[*a*]anthracen-7-ylmethyl)-**, 2-(2-chloroethylmercapto)ethyl ester, 621*e*.
——, **benzhydryl-**, 2981*c*.
——, **benzyl-**, benzylamine salt, 1351*g*, 6157*i*.
——, **[α-(benzylaminomethyl)benzyl]ethyl-**, ethyl ester-HCl, 6176*g*.
——, **[(benzylcarbamyl)methyl]dithio-**, benzyl ester, 1398*g*.
——, **[(benzylcarbamyl)methyl]thiol-**, benzyl ester, 1398*g*.
——, **benzylmethyl-**, *N*-methylbenzylamine salt, 6158*a*.
——, **bis(2-chloroethyl)-**, ethyl ester, 7422*i*.
ethyl ester, in leukemia therapy, 3107*d*.
methyl ester, 2927*b*.
——, **bis(2-hydroxyethyl)-**, salt with 2,2′-iminodiethanol, 6158*a*.
——, **bis(2-hydroxyethyl)dithio-**, effect on eye injury by mustard gas, etc., 767*a*.
sodium salt, chemotherapy of, 1111*g*.
——, **(2-bromoethyl)nitroso-**, methyl ester, 2945*i*.
——, **2-butenylidenedi-**, esters, 1390*a*.
——, **(butoxymethyl)-**, ester with λ-hydroxyoleic acid triglyceride, P 5969*a*.
——, **butyl-**, ethyl ester, 4653*a*.
——, **butyldithio-**, compd. with $BuNH_2$, P 4508*f*.
——, ***sec*-butylethyldithio-**, sodium salt, chemotherapy of, 1111*g*
——, **butylnitroso-**, ethyl ester, 4653*a*.
——, **carbamyl-**. See *Allophanic acid*.
——, **(2-carbamylethyl)-**, benzyl ester, 1448*h*.
ethyl ester, derivs., β-ureido acids from, 6597*g*.
——, **[(2-carbamylethyl)carbamylmethyl]-**, benzyl ester, 1448*h*.
——, **(carbamylguanyl)-**, octadecyl ester, P 5552*f*
——, **{[1-carbamyl-2-(3-indolyl)ethyl]carbamylmethyl}-**, benzyl ester, 4712*c*.
——, **[α-(carbamylmethyl)benzyl]-**, ethyl ester, 236*e*, 6597*h*, 3822*c*.
——, **{2-[(carbamylmethyl)carbamyl]ethyl}-**, benzyl ester, 1448*h*.
——, **[1-(carbamylmethyl)heptyl]-**, ethyl ester, 6597*g*.
——, **[2-carbamyl-1-(2-naphthyl)ethyl]-**, ethyl ester, 6597*i*.
——, **carboxy-**. See *Imidodicarboxylic acid*.
——, **[2-carboxyamino-2-(carboxyaminomethyl)trimethylene]di-**, tetraethyl ester, 2936*e*.
——, **chloro-**, ethyl ester, reaction with $C_2H_2$, P 3032*a*.
——, **(α-chloroacetyl-*p*-methoxyphenethyl)-**, benzyl ester, 7158*e*.
——, **(2-chloroethyl)-**, 3-chloroallyl ester, 2928*d*.
esters, 4634*b*.
——, **[2-(2-chloroethylmercapto)ethyl]-**, methyl ester, 2945*h*.
——, **[2-(2-chloroethylmercapto)ethyl]nitroso-**, methyl ester, 2945*i*.
——, **(2-chloroethyl)nitro-**, methyl ester, 2946*a*.
——, **(2-chloroethyl)nitroso-**, esters, 4634*b*.
ethyl ester, 2945*i*.
——, **[1-(chloroformyl)-2-(3-indolyl)ethyl]-**, benzyl ester, 4712*c*.
——, **[α-(chloroformyl)-*p*-methoxyphenethyl]-**, L-, benzyl ester, 7458*c*.
——, **(chloromethyl)-**, derivs., as textile-treatment agents, P 4488*i*.
——, **(2-chloropropyl)-**, methyl ester, 7422*i*.
——, **[2(and 3)-chloropropyl]-**, methyl esters, 2945*h*.
——, **(2-chloropropyl)nitroso-**, methyl ester, 2945*i*.
——, **chlorovinyl-**, ethyl ester, P 3032*a*.
——, **cinnamylidenedi-**, esters, 1390*a*.
——, **α-cyanobenzyl-**, ethyl ester, 4223*b*.
——, **α-cyanobenzylethyl-**, ethyl ester, 6176*d*.
——, **(α-cyano-*p*-methoxybenzyl)ethyl-**, ethyl ester, 6176*e*.
——, **cyclohexyl-**. See *Cyclohexanecarbamic acid*
——, **diamyldithio-**, copper, Pb, Se and Zn salts, prepn. and value as vulcanization accelerators in GR-S rubber, 5987*a*.
——, **dibenzyldithio-**, sodium salt, chemotherapy of, 1111*g*.
——, **dibutyl-**, ester with ethyl(2-hydroxyethyl)dimethylammonium sulfate, ganglionic blocking action of, 6309*c*.
ethyl ester, in leukemia therapy, 3107*d*.
——, **dibutyldithio-**, compd. with $Bu_2NH$, P 4508*h*.
copper, Pb, Se and Zn salts, prepn. and value as vulcanization accelerators in GR-S rubber, 5987*a*.
——, **(2,3-dichloropropyl)-**, methyl ester, 2945*i*.
——, **(2,3-dichloropropyl)nitroso-**, methyl ester, 2945*i*.
——, **diethyl-**, esters with resorcinol and its derivs., P 251*i*.
——, **diethyldithio-**, anhydride—see *Sulfide, bis(diethylthiocarbamyl)*.
bismuth and Na salts, chemotherapy of, 1111*g*.
copper, Pb, Se and Zn salts, prepn. and value as vulcanization accelerators in GR-S rubber, 5987*a*.
derivs., as antidote for bis(2-chloroethyl) sulfide injury to eyes, 767*a*.
derivs., spectra and structures of, 7410*i*.
effect on cornea, 771*b*.
ester with hydracrylic acid, P 7506*g*.
indium salt, temp. limits for weighing of, 8952*h*.
selenium salt, 7855*i*.
sodium salt, adrenaline potentiation by, 3104*f*, 5116*h*.
complex formation with Cu in *Melanoplus differentialis* embryos, 8562*a*.
effect on respiration of active and blocked embryonic cells, 2331*f*.
oxidation of, P 4690*i*.
as polymerization stopping agent, 8727*i*.
zinc salt, effect on yield of cyclic and polysulfides in dihydromyrcene reaction with S, 4886*d*.
——, **(3,4-dihydroxyphenacyl)methyl-**, benzyl ester, and its diacetate and dibenzoate, 2601*h*.
——, **(2,3-dimercaptopropyl)-**, ethyl ester, 3783*h*.
——, **(3,4-dimethoxyphenethyl)-**, 3,4-dimethoxyphenethylamine salt, 1351*f*
——, **dimethyl-**, 2-(dimethylaminomethyl)-3-pyridyl ester, dihydrochloride, effect on muscle potential, 9261*b*
*m*-dimethylaminophenyl ester and its derivs., P 3843*g*.
esters, P 6671*h*.
with butyl *p*-hydroxybenzoate, 593*e*
with *m*-dimethylaminophenol derivs., P 7966*d*.
effect on muscle potential, 9261*b*
with 3-hydroxy-1-methylpyridinium bromide and 3-pyridol, P 5050*l*
with (2-hydroxy 5-phenylbenzyl)trimethylammonium bromide, effect on esterases, 4305*c*.
with (*o*-hydroxyphenyl)trimethylammonium bromide, P 7040*a*.
with (*o*-hydroxyphenyl)trimethylammonium methyl sulfate, P 7966*a*
3-pyridyl ester, and its derivs., P 4702*f*
——, **dimethyldithio-**, antibacterial and antifungal activity of, 3883*e*
anhydride—see *Sulfide, bis(dimethylthiocarbamyl)*.
bismuth and Na salts, chemotherapy of, 1111*g*.
copper, Pb, Se and Zn salts, prepn. and value as vulcanization accelerators in GR-S rubber, 5987*a*.
iron and Mn salts, in apple-scab control 9327*d*.
iron and Zn salts, in control of *Alternaria* blight of petunias, 2725*f*.
effect of sprays contg., on apples, 1838*c*
as fungicides, 7176*h*.
in *Sclerotinia* control on cabbage, 7179*i*.
in tomato disease control, 2456*a*, 4413*b*.
in tulip-*Botrytis* fire control, 9338*a*
iron salt, in anthracnose control on Lima beans, 9329*h*.
in apple-scab control, 804*c*, 7630*f*
in carnation-disease control, 9338*f*.
as citrus seed disinfectant, 1516*g*
in control of blackroot of sugar beet seedlings, 7175*i*.
in cranberry-fruit-rot control, 804*e*
in downy-mildew control on Lima beans, 3959*i*.
as fungicide and insecticide for dates, 4417*e*.
in gladiolus corm treatment, 9338*c*.
in gladiolus-storage-rot control, 3961*g*
in grape-root-rot control in soln. culture, 9351*b*.
in mummy-berry control on cultivated blueberries, 5143*g*.
in pear-sooty-blotch-disease control, 9348*c*.
in pine-root-disease control, 7179*f*.
in *Pythium*-root-rot control on aroids and Easter lilies, 3133*e*.
in termite control, 6356*e*.
lead salt, effect on ebonite, 430*g*, 8729*g*
methyl ester, antifouling properties of, 3964*c*.
methyl ester, spectrum and structure of, 7410*i*.
sodium salt, in copper analysis, 4175*a*.
zinc salt, antifouling paints, etc., contg., P 4872*h*.
in control of fruit rot of cranberries, 804*e*.

*zinc salt*, as date-insect control, 4417*e*.
formation in tetramethylthiuram disulfide acceleration of dihydromyrcene reaction with S, 4886*e*.
in melanose control on grapefruit, 3553*g*.
in pecan-scab control, 1139*a*.
in potato-fungus control, 9328*c*.
in powdery-mildew control on oriental magnolias, 7179*g*.
in rubber-bonding mixt., 4887*h*.
in *Sclerotinia sclerotiorum* control on beans, 2355*g*.
in tomato-fungus control, 9328*d*.
in tomato-late-blight control, 4412*i*.
——, **[4-(2,5-dioxo-4-oxazolidyl)butyl]-, benzyl ester**, 575*b*.
benzyl ester, polymerization of, 6488*c*.
——, **diphenyl-**, ethyl ester, chromatographic sepn. and identification of, 8138*i*.
phenyl ester, 7912*d*.
3-pyridyl ester, and its derivs., P 4702*g*.
——, **dipropyl-**, ethyl ester, in leukemia therapy, 3107*d*.
——, **dipropyldithio-**, copper, Pb, Se and Zn salts, prepn. and value as vulcanization accelerators in GR-S rubber, 5987*a*.
——, **dithio-**, amine salts of, or its derivs., prepn. and use as coalescing agents in polysulfide sealing compns., P 4508*g*.
ammonium salt—see *Ammonium dithiocarbamate*.
as antidote for bis(2-chloroethyl) sulfide injury to eyes, 767*a*.
cadmium, Pb and Ni salts, and their detection, 8307*h*.
carboxymethyl ester, antithyroid activity of, 9242*a*.
derivs., P 7506*e*.
antifouling paints, etc., contg., P 4872*h*.
chem. structure in relation to antibacterial and antifungal activity of, 3883*e*.
chemotherapy with, 1111*f*.
effect of high mixing temps. on stability of rubber vulcanization accelerators of, 1210*f*.
as fungicides, P 4418*g*, 9335*c*.
oxidation of, P 2227*a*.
salts of, P 5224*e*
in tomato-late-blight control, 4413*a*.
dialkyl derivs., salts, prepn. and value as vulcanization accelerators in GR-S rubber, 5987*a*.
zinc salt, compd. with cyclohexylamine, as fungicide, 7177*i*.
zinc salt, for lubricant improvement, P 1177*i*.
zinc salt, in cucurbit control, 9327*g*.
——, **[2-ethoxy-1-(*p*-sulfamylphenylcarbamyl)vinyl]dithio-**(?), benzyl ester, 1399*b*.
——, **ethyl-**, 2-chloroethyl ester, 4634*a*.
ethyl ester, 2956*g*, 4652*i*.
——, **ethylenebis-**, diethyl ester, contg. $C^{14}$, 1324*g*.
——, **ethylenebis[dithio-**, copper, Mg and Mn salts, in brown-rot control, 3553*h*.
disodium and Zn salts, in control of black-root of sugar-beet seedlings, 7175*i*.
in control of bulb diseases of gladioli and tulips, 9338*a*.
in potato-fungus control, 9327*i*.
in *Sclerotinia* control on cabbage, 7179*i*.
in tomato blight control, 4413*b*.
disodium salt, in *Alternaria* blight control on petunias, 2725*f*.
in azalea-petal-blight control, 802*g*, 1891*i*.
as citrus-seed disinfectant, 1516*g*.
in cranberry-fruit-rot control, 804*e*.
in downy-mildew control on Lima beans, 3959*i*.
in fungicidal sprays, P 4419*a*.
in grape-disease control, 3133*i*.
in peach-silver-mite control, 1523*e*.
in peach-X-disease control, 9347*h*.
in pear-psylla control, 9348*f*.
in pine root-disease control, 7179*e*.
in snapdragon rust control, 9327*i*.
iron salt, in brown-rot control on lemons, 3553*h*.
magnesium, Mn, di-Na and Zn salts, as fungicides, 7176*h*.
manganese and Zn salts, in melanose control on grapefruit, 3553*g*.
salts, fungicidal action of, 9335*c*.
zinc salt, in *Alternaria*-blight control on petunias, 2725*f*.
*zinc salt*, in apple-scab control, 9327*e*.
in azalea-petal-blight control, 802*h*.
for control of root disease and weeds in pure nursery, 7179*f*.
as cucurbit fungicide, 9327*g*.
effect on DDT as insecticide for aphids on celery, 346*d*.
in gladiolus-corm treatment, 9327*h*.
in gladiolus-storage-rot control, 3961*h*.
in *Sclerotinia sclerotiorum* control on beans, 2355*g*
in snapdragon-rust control, 9327*i*.
in tomato-fungus control, 9328*d*.
——, **ethylenedi-**, diallyl and bis(2-methylallyl) esters, polymerization of, P 7263*c*.

**Carbamyl chloride**, aryl derivs., P 1438*h*.
derivs., reaction with aralkyl amines, P 1439*hi*.
derivs., reaction with piperazines, P 6245*afg*.
manuf. of, P 2635*h*.
reaction with hydrocarbons, 6183*c*.
——, **(2-chloroethyl)methyl-**, 7423*a*.
——, **dibutylthio-**, P 5038*c*.
——, **diethyl-**, condensation product with sulfonated 2-heptadecylbenzimidazole, P 441*g*.
——, **diethylthio-**, P 5038*c*.
——, **diisopropyl-**, P 6245*c*.
——, **dimethylthio-**, P 5038*c*.
——, **phenyl-**. See *Carbanilyl chloride*.
——, **thio-**, derivs., P 5038*b*.
**Carbamyl fluoride, diethyl-**, 3741*g*.
——, **phenyl-**. See *Carbanilyl fluoride*.
**Carbamyl group**, parachor of, 2057*g*.
**Carbanilaldehyde**. See *Formanilide*.
——, **2,6-dimethyl-**. See *2,6-Formoxylidide*.
**Carbanilic acid** (*phenylcarbamic acid*). (*The esters of this acid with complex alcohols and phenols will usually be found under the names of the hydroxy compounds.*)
*m*-4-biphenylylphenyl ester, 611*a*.
*tert*-butyl ester, 578*i*.
3-chloroallyl ester, 2928*c*.
*p*-chlorophenyl ester, 1352*b*.
compd. with decahydroquinaldine, 2960*a*.
derivs., 593*f*.
esters, 1028*h*, 7441*bf*.
with benzoin oxime and related compds., 1038*f*.
with 4-benzylamino-2-butanol, 2935*b*.
in weed control, P 1904*d*.
ethyl ester, consts. of benzene soln. of, 1619*f*.
effect on ionic permeability of red blood cells in relation to narcotic action, 7143*h*.

*ethyl ester*, effect on tropokinesis in onion meristems, 4346*i*.
as insecticide, 4415*b*.
in leukemia therapy, 3107*d*.
reaction product from stearoyltriaminotriethylenebiguanide, $CH_2O$ and, as surface-active agent, P 2786*g*.
isopropyl ester, effect on grasses, 9328*f*.
effect on mitosis in rye and onion, 7089*b*.
effect on respiration of plant tissue, 5456*i*.
effect on soil microörganisms and microbial processes, 1514*d*.
effect on sprouting of potato tubers, 7002*d*.
as herbicide, 1893*b*, 3554*g*.
in soils, persistence of, 3961*a*.
in weed control, 7625*a*, 9352*a*, 9354*d*.
4-*p*-menthyl ester, 3374*g*.
*m*-methoxyphenyl ester, 593*f*.
2-methylenecyclohexyl ester, 589*a*.
$\alpha,\alpha,\alpha$-trifluoro-*m*-tolyl ester, 593*f*.
vinyl ester, polymers, P 4898*e*.
**Carbanilic acid**, ***p*-(acetylsulfamyl)-**, benzyl ester, P 1805*b*.
———, ***p*-amino-**, furfuryl ester, 6176*b*
———, **4-amino-2,5-bis(benzyloxy)-**, esters, P 4165*g*.
———, **3-amino-2(and 4)-hydroxy-5-sulfo-**, ethyl ester, azo dyes from, P 5961*ab*.
———, ***N*-benzyl-**, ethyl ester, chromatographic sepn. and identification of, 8138*i*.
———, ***p*-carboxy-**, 4-butyl ester, ester with Bu *p*-hydroxybenzoate, 593*h*.
4-butyl 1-phenyl ester, 593*g*.
———, ***p*-chloro-**, ester with Bu *p*-hydroxybenzoate, 593*g*.
———, **2-chloro-*N*,3(and *N*,4)-dimethyl-**, esters with (*m*-hydroxyphenyl)trimethylammonium bromide, P 1439*f*.
———, **4-chloro-2-methoxy-**, ester with Bu *p*-hydroxybenzoate, 593*g*.
——— ***m*(*o* and *p*)-chloro-*N*-methyl-**, *m*-dimethylaminophenyl esters, P 1439*c*.
***p*-chloro-*N*-methyl-**, ester with (*m*-hydroxyphenyl)trimethylammonium bromide, cholinesterase inhibition by, 9103*b*.
ester with (*m*-hydroxyphenyl)trimethylammonium bromide, effect on muscle potential, 9261*b*.
———, **2-chloro-4-nitro-**, methyl ester, 169*a*.
———, ***p*-chlorothiono-**, ethyl ester, 5746*d*.
———, **2,4-dibromo-*N*-methyl-**, ester with (*m*-hydroxyphenyl)trimethylammonium bromide, P 1439*e*.
———, ***N*-(3-diethylaminopropyl)-**, ester with Bu *p*-hydroxybenzoate, 593*g*.
———, ***p*-(α,β-diethyl-*p*-methoxyphenethyl)-**, methyl ester, 9056*a*.
———, ***m*,*N*(*N*,*o* and *N*,*p*)-dimethyl-**, *m*-dimethylaminophenyl esters, P 1439*a*.
———, ***N*,*p*-dimethyl-**, ester with (*m*-hydroxyphenyl)trimethylammonium bromide, effect on muscle potential, 9261*a*.
———, ***p*-(α,β-dimethylcrotonylsulfamyl)-**, ethyl ester, P 7961*a*.
———, **4,5-dimethyl-2-ribitylamino-**, D-, ethyl ester, P 5044*b*.
———, **dithio-**, butyl ester, as insecticide, 4415*b*.
cadmium salt, in oat smut control, 1137*g*.
zinc salt, antifouling properties of, 3964*b*.
———, ***N*-ethyl-**, ester with Bu *p*-hydroxybenzoate, 593*g*.
ethyl ester, chromatographic sepn. and identification of, 8138*i*.
———, **ethyldithio-**, bismuth and Na salts, chemotherapy of, 1111*g*.
zinc salt, identification of, 6856*h*.
———, **hexahydro-**. See *Cyclohexanecarbamic acid*.
———, ***o*-hydroxy-**, lactone—see *2(3H)-Benzoxazolone*.
———, ***p*-hydroxythiol-**, *p*-tolyl ester, polymerization of, P 3659*b*.
———, ***o*(and *p*)-methoxy-**, esters with Bu *p*-hydroxybenzoate, 593*g*.
———, ***p*-methoxy-**, ester with Et *p*-hydroxydithiobenzoate, 593*g*.
phenyl ester, 593*g*.
*p*-sulfamylphenyl ester, 593*h*.
———, **2-methoxy-4(and 5)-nitro-**, methyl esters, 169*a*.
———, ***o*-methyl-**, ethyl ester, chromatographic sepn. and identification of, 8138*i*.
———, ***p*-methyl-**, *tert*-butyl ester, 578*i*.
———, **2-methyl-4-nitro-**, methyl ester, 169*a*.
———, **4-methyl-3-nitro-**, esters, 7448*d*.
———, ***p*-nitro-**, esters, 5736*h*.
ester with Bu *p*-hydroxybenzoate, 593*h*.
furfuryl ester, 6176*c*.
———, **5-nitro-2-propoxy-**, methyl ester, 169*a*.
———, ***N*-phenyl-**. See *Carbamic acid, diphenyl-*.
———, ***p*-(2-pyridylsulfamyl)-**, benzyl ester, P 1805*a*.
———, ***p*-sulfamyl-**, benzyl ester, P 1805*a*.

abrasive contg. cryst., P 3164i.
as absorbent for $SO_2$ from flue gas, P 7201g.
activated with $CO_2$, $K_2CO_3$, KCNS and $ZnCl_2$, adsorption by, 8790a.
active—see also *Water, purification of.*
active, 5571i, 5572bcdefgh.
acid-treated phosphate-impregnated, P 4452d.
adsorbent, deposited on porous space, P 6762e.
adsorbent, reaction with O, 4546h.
adsorption of acetone, BuOH, 2,3-butylene glycol and ethylene chlorohydrin by, 6b.
adsorption of molybdic or perrhenic acid by Norite, 8794b.
amine adsorption by, 6037d.
from *Balanites aegyptica*, 8572d.
catalyst alone and with metal chlorides in chlorination of bis(perfluoroalkyl)benzenes, 6174f.
as catalyst carrier in hydrogenation of CO, 2398i, 2399c
catalyst for Hg vapor reaction with $O_2$, 6054c.
as catalyst in amination of isomeric butyl ales, 1005a.
as catalyst in dehalogenizing and desulfurizing hydrocarbon oils, P 390c.
as catalyst in dehydrochlorination of dichloroethane, 4628h
as catalyst in 2-methylpropene reaction with nitrosyl halides, P 7950
as catalyst in pyrolysis of 1,1-difluoroethane, P 6645a.
as catalyst in S removal from gasoline 8125e.
catalyst of Co or Ni carbonyl and, in reaction of olefins, CO and $H_2$ P 670i.
catalyst of $CuCl_2$ and, in chlorination of pyrazine, P 5809f.
catalyst of $HgCl_2$ on, in $C_2H_3Cl$ manuf., P 3024f.
catalyst of $HgCl_2$, $ThCl_4$ and, in HCl reaction with $C_2H_2$, P 1433e
catalyst of platinized, blocking by decompn. products of hydrocarbons, 7802a
catalyst of platinized, hydrogenation of $C_3H_6$ on, 1249g.
catalysts contg. $AlCl_3$ from, P 3162
catalysts of Co and, for polymerization of $C_2H_4$ and $C_3H_6$, P 2763h
catalysts of Cu pyrophosphate and, in polymerization of olefins, P 1559
catalysts of Ni, or Ni and Se and, in isomerization of oils, 2792a.
catalysts of Pd or Pt on, in ring closure of *o*-allylphenol and of *o*-ethylphenol, 4252i.
catalytic properties of platinized, effect of heat treatment on structure and, 1249e.
from coconut shells, in air purification in apple storage, 3537d.
in contratoxification of plant-growth regulators, 2355h.
dimerization of diolefins in the presence of, 590i.
disporportionation and dehydrogenation of hydrocarbons on, 5656h.
effect on invert-sugar detn. in molasses, 8715a.
in $C_3H_4$ sepn. from fuel gas, P 7670e.
fluidization in manuf. of, 9414h.
gold adsorption by, in cyanide process, P 6562c.
from grape seeds and nut shells, 9295i
heats of adsorption of $C_2H_2$ and $H_2S$ by, 7317c.
heats of adsorption of gases and vapors by, 6903g.
iodized salt contg., P 1926e.
as lysozyme inhibitor, 8405i.
manuf. from dried blood, P 4838b.
manuf. from fluidised-wood distn., 1950c.

*active*, manuf. from molasses, sugar-house waste water, etc., P 369*i*.
manuf. from rice husk, effect of gas atm. on, 4834*f*.
manuf. of, P 5574*e*.
methane sorption by, under high pressure, 1237*h*.
occlusion of $Et_2O$ vapor from air current by layer of, 5255*c*.
in odor control at Key West sewage plant, 1887*f*.

catalyst of $CaSO_4$ and, in addn. of HBr to fluoro olefins, 7407*b*.
catalyst of Pd and, in reduction of aromatic ketones, 4241*g*.
catalysts from, P 5886*h*.
chains of—see *Chains (chemical)*.
in chem. engineering, 8745*b*.
chlorite activation by, P 1160*f*.
in chromium-Fe and Cr-Fe-Si alloys, 2553*h*.
in coal tar, 1949*b*.
coating with, on vitreous $SiO_2$, 2833*a*.
colloidal, effect of particle size and shape of, in coatings (vol. reference of jour. should be 33), 3629*b*.
combustion of, and its inhibition, 9417*a*.
combustion of, inhibition of, 3592*e*.
combustion of spherical particle of, effect of secondary reactions on, 5268*a*.
combustion of tubes of, 2495*a*, 6896*a*.
in comet Bester (1947 *k*), 938*e*.
in comet 1947 *n*, 2509*a*.
in comet 1948 *g*, 3711*e*.
in comet 1948 *l*, 5662*g*.
in comets, 490*i*.
complexes with montmorillonite, 2841*d*.
cosmic-ray absorption in, at high altitudes, 4095*g*.
covalent and packing radii of, relation between, 9*i*.
crystallochem. electronegativity of ion of, 8231*b*.
decolorization by, in sugar manufacture—see *Sugar manufacture*.
decolorizing, in sugar detn. in plant material, 6542*a*.
as deoxidizer in Cr-Mo alloys, 8336*i*.
deposition on catalyst in $CH_4$ synthesis, 3169*g*.
deposition on catalysts in cracking of hydrocarbons, effect on extractability of surface Na, 2414*h*.
deposits, in air compressors, C-O complex on, in initiation of explosions and formation of CO, 5952*c*.
deuteron bombardment of, 4560*e*.
energy levels of $N^{14}$ from, 8869*i*.
$\gamma$-ray resonance in, 4093*h*.
$\gamma$-rays and neutrons from, 5294*d*.
neutrons from, 8866*h*.
proton resonances in, 4947*f*.
threshold for nuclear reaction in, 5294*c*.
dextran-fraction adsorption by, mol. wt. and, 6886*g*.
diffusion and soly. in Fe, 9004*c*.
diffusion of, in austenite, 80*c*, 3334*c*, 6958*b*.
in Fe, strain aging and, 7881*d*.
into steel during carburizing, calcn. of curves for, 2144*d*.
disintegration of, by mesotrons, 2861*f*.
disintegration of, in stratosphere, 4560*f*.
displacements of, in austenite-martensite transformation, 918*h*.
effect on activity of S in liquid Fe, 4930*f*.
on adsorption of $CH_4$ by Ni Fischer catalysts, 6064*a*.
on antiaging effect of *m*-dinitrobenzene and nitro compds. in rubber, 3226*de*.
on brittleness of steel, 1301*e*.
on Cu-Ni steel welds, 552*g*.
on corrosion resistance of steel, 1306*a*
on fireclay, 8112*a*.
on graphitization of Fe, 8997*g*.
in gray-Fe castings, 2555*f*.
on high-speed steel, 8334*g*.
on interfacial tension in FeS system with silicate, 7795*a*.
on Fe, 2912*a*.
on Fe single crystals, 2558*h*.
on lubricants, 7219*c*.
on Mg-alloy grain refinement, P 105*h*.
on magnetic properties of Co-Fe-V alloys, 8338*b*.
on nitridation of steel, 6958*b*.
on steel weldability, 3767*c*.
on steel yield strength and aging, 4200*ce*.
elec. arcs with, 2523*g*.
elec. brushes of—see *Electric brushes*.
elec. charge on, in org. mols., 6582*f*.
elec. resistance of, temp. and, 2501*d*.
for electrodes, ash removal from coal for, 1940*h*.
for electrodes, from coal, 5927*d*.
electrodes of—see *Electrodes*.
electron affinity of, 5303*g*.
electron stopping power of, 34*d*.
energy levels, spectrum, ionization potentials and magnetic splitting factors of, 8883*f*.
equil. with metals, 4917*e*.
equiv. in gray cast Fe, 9004*i*.
exchange of, in hydrocarbons, 2081*b*.
fatty acid adsorption by, effect of ultrasonic waves on, 7774*f*.
fluorination of, P 3834*g*.
formation of, on catalyst in $CO_2$ reaction

with $CH_4$ and prevention thereof, 1944*g*, 4445*g*.
during combustion, inhibition by $SO_2$, 4145*a*.
in gas engines, prevention and relation to preignition and detonation, 2411*e*.
on MgO-$SiO_2$ catalysts in cracking by fluid-catalyst process, 8656*d*.
free radical ($C_2$) in cyanogen combustion, 7663*e*.
free radical ($C_3$) in low-pressure flames, 5312*g*.
gamma-ray absorption by, 1647*a*, 8867*a*.
gamma-ray action on ionization current after passage through, 5282*g*.
gamma-ray bombardment of, cross section for, 484*h*.
gamma-ray bombardment of, threshold for reaction in, 4115*f*.
gamma-ray scattering by, 8266*a*.
gasification of fluidized, by $CO_2$, 6807*h*
geochemistry of, and $C^{12}/C^{13}$ ratio in earth, meteorites, limestones and shales, 2906*a*.
graphitization of—see *Graphitization*.
heat of dissocn. of, 8877*f*.
heat of reaction with $SiO_2$, 4582*i*, 7794*e*.
heat of sublimation of, 452*gi*.
histidine isomers as source of, for bacteria, 7080*g*.
hydrogen overvoltage on, in MeOH solns., 4585*c*.
-hydrogen ratios of coal and petroleum, 2409*d*.
impregnation of, for primary-cell electrode, P 6530*e*.
industrial, 1551*e*.
inorg. constituents of, 3597*d*.
ions (neg.) of, mass-charge ratio of, 8848*a*.
isotope of mass 10, from $B^{10}$ by proton action, radioactivity of, 3284*c*.
isotope of mass 10, skin of, 4911*i*.
isotope of mass 11, from γ-ray action on $C^{12}$ and $O^{16}$, 8850*b*.
isotope of mass 11, mass value for, 8850*d*.
isotope of mass 13, in acetate and butyrate incorporation into liver glycogen, 5099*h*.
in aminodicarboxylic acid formation in blood, 8499*e*.
in $CO_2$ fixation in α-oxoglutaric acid, 2249*c*.
dehydroisoandrosterone acetate contg., in 16-position, 2213*i*.
in exchange between a formamido group and formamide, 6984*a*.
in D-glucose oxidation by yeast, 1460*c*.
in H-exchange reactions of $Me_2(C^{13}H_3)CH$, 7897*eg*.
magnetic moment and gyromagnetic ratio of, 5303*f*.
magnetic moment of, 4114*f*.
in oxalic acid and its decompn. products, 8859*e*.
in α-position of alanine, 5004*h*.
proton emission in production of, from $B^{10}$ by α-ray action, 6910*a*.
rupture of C-C bonds in propane labeled with, in 1-position, 5299*c*.
thermodynamic equil. in, freezing-in of, 3708*i*.
tryptophan labeled in $CO_2H$ group from hydantoin contg., 211*f*.
in tryptophan metabolism studies, 8026*c*.
isotope of mass 14, in acetate and $CO_2$ incorporation into liver proteins, 9090*a*.
in acetate and pyruvate utilization by heart, 8513*a*.
in acetate and pyruvate utilization in diabetic rat heart and diaphragm, 8513*c*.
in acetic acid synthesis and uric acid decompn. by *Clostridium acid urici*, 9146*i*.
in acetic and aspartic acid formation from glycine, 5482*h*.
acetylene contg., 1713*h*.
in aldoketene dimer structure detn., 4220*g*.
in amino acid formation from acetate and bicarbonate, 8027*g*.
in amino acid incorporation in animal tissue proteins in amino acid deficiencies, 734*i*.
in anthranilic acid metabolism in *Neurospora*, 7541*h*.
assimilation in *Scenedesmus*, 8009*f*.
autoradiographs of, in blood cells, 2262*h*.
*isotope of mass 14*, in benadryl metabolism studies, 7584*i*.
in benzidine rearrangement study, 7927*c*.
β-rays from, 36*g*, 3707*g*, 4091*h*, 4096*d*.
biotin contg., in the ureylene group, 9066*a*.
bromomethane, dimethylcadmium and progesterone contg., 4680*f*.
1-butene contg., in 4-position, 9023*g*.
in caproic and valeric acid synthesis by *Clostridium kluyveri*, 7077*i*.
$CCl_4$ and $CH_4$ contg., 2090*h*.
in cholesterol synthesis from acetate by adrenal cortical tissue *in vitro*, 2245*d*.
in citric acid synthesis studies, 7990*e*.
cyanamide and urea contg., 7814*g*.
in cyanamide, urea and related compds., 5007*b*.
deposition in bone, 4373*f*.
6-dimethylamino-4,4-diphenyl-3-heptanone, EtBr and EtOH contg., 9031*f*.
distribution in blood sugar, glycogen and lactate, 7995*g*.
in drugs synthesized by plants, 1910*b*.
effect of cathode rays on niacin labeled with, 8863*b*.
effect on chromosomes, 4733*a*.
effect on leaves of medicinal plants, 6786*h*.
electroscope for, 7757*d*.
elimination after administration as carbonates from tissue and tissue components, 3905*e*.
$C_2H_4$ and EtI contg., 37*h*.
fate in animal after injection of labeled $Na_2CO_3$, 7507*d*.
in Fischer-Tropsch synthesis, 2080*i*.
fixation by *Bryophyllum* leaves, 8009*i*.
D-glucose and D-mannose contg., 3795*c*.
in glucose metabolism in diaphragm, 6714*e*, 8020*e*.
in D-glucose oxidation by normal and alloxan-diabetic rats, 2310*a*.
in glutathione synthesis from glycine in liver, 8503*c*.
in glycine incorporation into protein and lipide fractions of homogenates, 7538*c*.
in glycine metabolism studies, 9120*g*.
half-life of, 6508*b*, 8266*d*.
in hemoglobin synthesis from glycine, 2243*f*, 8480*d*.
incorporation into desoxyribonucleic acid in animal organism, effect of x-rays on, 7529*g*.
as indicator of lactic acid and $CO_2$ function in fermentation of lactate by *Clostridium lacto-acetophilum*, 2276*h*.
ionization by β-rays from, 4093*d*.
in lipide synthesis studies, 5481*b*, 7114*g*.
in lipogenesis from glucose, 8509*g*.
from malic and succinic acids, 1324*g*.
in methadone distribution studies, 5865*i*.
in $CH_4$ formation study, 7187*h*.
in 17-methyltestosterone and progesterone, 5029*a*.
microsynthesis of EtMgI labeled with, 4130*g*.
in nicotinic acid and nicotinamide metabolism studies, 2295*e*.
org. compds. contg., 1007*b*, 9040*i*, 9051*f*.
in pentobarbital metabolism studies, 6306*h*.
in phenylalanine metabolism studies, 8550*g*.
in phenylglyoxal rearrangement study, 608*b*.
in photosynthesis studies, 5456*a*.
in protein synthesis studies, 5436*f*.
pyruvic acid carbonyl group, 2582*i*.
in rearrangements of tertiary alkyl chlorides, 6969*b*.
in serine formation from choline, 7504*i*.
in silk synthesis in silk worms, 7149*b*.
succinic acid contg., in carboxyl position, 2861*i*.
in succinic acid metabolism by heart in biotin deficiency, 293*b*.
in sugar formation during photosynthesis, 7088*i*.
tridecanoic acid contg., 7333*b*.
in trilaurin oxidation studies *in vivo*, 2298*a*.
*isotope of mass 14*, DL-tryptophan and related compds. contg., 8379*h*.
in tryptophan metabolism studies, 7114*h*.
tyrosine contg., ketone body formation from, 1745*h*.
uptake by bones and other tissue, 8508*e*.
uptake from carboxyl-labeled glycine into protein of *Torula utilis*, 8439*a*.
in urea metabolism study, 2302*h*.
in urethan metabolism studies, 9251*c*, 9258*c*.
uric acid labeled with, biosynthesis of, 3501*f*.
in wood of different ages and origin in nature, 3288*a*.
in yeast metabolism study, 9141*a*.
isotopes (heavy and radioactive) of, in microbiology, 4725*h*.
isotopes of, adenine contg., 3366*i*.
in animal organism studies, 4710*c*.
in bacterial metabolism study, 5449*d*
biochem. applications of, 7069*d*.
in earth's atm., 3289*i*.
in glycogen after feeding labeled compds. in study of intermediary metabolism, 5482*g*.
isotopes of masses 11 and 12, from deuteron action on $B^{10}$ and $B^{11}$, 8866*d*.
isotopes of masses 13 and 14, benzene, benzoic acid and toluene contg., 9045*e*.
isotopes of masses 13 and 14, as indicators of chem. reactions, 7338*a*.
isotopic mass effect on rate of rupture of bonds of, 2862*d*.
in lampblack manuf., loss of, 6396*b*.
lining conduits with, P 3669*e*.
linings of, for blast furnaces, 7878*d*.
loss from soil org. matter, 1891*d*.
lyoparachor of, 2834*c*.
manuf. of, P 1172*c*, P 3177*e*.
mass defects of, 8271*i*.
mass photoelec. absorption coeff of, 483*c*.
melting of, 4909*i*.
mesotron-bombarded, electrons from, 6504*g*.
metabolism of, in *Anabaena cylindrica* in relation to growth and heterocyst production, 7091*e*.
metabolism of, in *Chilomonas paramecium* kinetics and energetics of, 3881*h*.
in metals, reactions with gases in vacuum, 29*f*, 6053*f*.
metamorphosis of, in coal formation, 6395*d*.
in nature, and use of its reactivity, 2477*h*
neutron-bombarded, deuterons, protons and tritons from, 4947*e*, 8265*f*.
neutron cross section of, 3282*h*, 4111, 5286*b*, 6909*d*.
neutron range in, 6075*g*.
nickel contg., P 7358*e*.
-nitrogen assimilation ratio in *Chlorella* effect of starvation, N deficiency and light intensity on, 2285*f*.
from nitrogen by neutron action, 2088*h*
-nitrogen ratio in soils of Spain, 8590*g*
in oil removal from solids or $H_2O$, P 3949*e*.
in open-hearth process, addn. as gas, 7289*c*.
oxidation of, in acid open-hearth process, rate of, 8327*e*.
crystal structure and purity in relation to, 26*c*.
kinetics of, 1632*g*.
life of chain carriers in, 7308*e*.
oxy ions of, bond lengths in, 4910*f*.
in photosynthesis, 6287*e*.
pigments—see *Pigments*.
in pollens and spores of vascular plants, 8010*f*.
potential against $MnO_2$ electrode, 2101*i*.
precipitation of, from solid soln. in α Fe, 3758*a*.
properties of, 2051*d*.
proton-bombarded, N from, 4114*i*, 6910*c*.
proton bombardment of, γ-rays from, 8860*h*.
proton bombardment of, reactions in, 1646*g*.
proton scattering by, 1259*g*.
radius of atoms of, 2478*e*, 3252*c*.
reactions with Ba, Ca and Mg nitrides, 8930*d*.
with $CO_2$, 3649*i*, 7309*b*.
with O and steam, 2076*g*.
with protons and γ-rays in sun, rate of, 4093*c*.
with steam, mechanism of, 3694*e*.
with S and water to form $H_2S$, 2847*b*.

from gases from heating rubber, retort for, P 5992*f*.
refractory materials from, 3584*f*.
removal from steel—see *Steel*.
removal of, cleaning compns. for, P 3640*c*.
from contact material, P 2764*b*.
from engines, turbines, etc., compn. for, P 6439*b*.
from fuel gas, P 6397*d*.
from Fe powder, P 2566*g*.
in sediments and sea water, 5350*e*.
silica reduction with, rate of, 5687*h*.
in soils of India, 9311*d*.
of prairie, effect of fertilizers on, 1129*i*.
of Spain, 5891*a*.
solid solns. in Fe, 1300*h*.
source of, as determinant in amylase formation by *Bacillus subtilis*, 2278*e*.
spectra of, 940*b*, 7338*g*, 8877*g*, 8883*h*.
in flames, 5312*g*.
Swan bands in, 2510*ef*.
in star AR Pavonis, 7335*e*.
in star Nova Cygni 1948, 39*d*.
in star Nova Persei 1901, 8877*d*.
in star Nova Serpentis 1948, 39*e*, 490*c*.
in star γ Pegasi, 938*f*, 2509*f*, 5301*e*.
in star R Coronae Borealis, 6916*b*.
steel cementation with, 7883*b*.
in steel (Cr) refining, relation to Cr, 947*i*, 2560*f*.
in steel deoxidation, 7397*a*.
in steel, detn. of state of, 4993*a*.
structure of, 4072*ef*.
in sun, 39*a*, 939*f*, 3711*a*.
suspension of, flow of, 7291*g*.
system: $CO_2$–CO–H–$CH_4$–water–, at high temp. and pressure, 3170*i*.
system: Fe–Ni–, 3765*bd*.
system: Fe–Si–S–, 5353*d*.
systems: Fe–, and Fe–Si–, activities in liquid, 4931*a*.
systems: O–, and O–Zn , 4931*h*
systems with Fe and other elements, 2914*a*, 6958*l*.
system: W–, 1297*h*.
system: uranium–, 5273*f*.
thermionic work function of, 5278*i*
thermochor of, 8226*e*.
trivalent—see also "free" under *Radicals*.
trivalent, history of, 6014*g*.
in *Urobacillus* nutrition, 8445*g*.
valences, directional properties of, 8805*e*.
valency of, thermochemistry of $C_2H_2$ and allylene in relation to, 3276*d*.
water adsorbed by, diffusion of, 7288*j*
wave functions for, 492*b*, 7336*a*.
x-ray absorption by, 5299*g*.
yeast requirements for, 9361*d*.

**Carbon, analysis**. (See also "org." under *Analysis*.)
detn., absorption app. for micro, 2*i*.
app. for, 4054*f*.
by combustion, 4180*f*.
effects of N oxides formed during combustion in, 8943*b*.
elec. furnace for semimicro, 1267*i*.
with microcombustion tube, 6108*a*.
detn. in alloys and metals, 510*e*.
in benzylisothiourea-HCl and nicotinic acid, 8962*f*.
in carbonates, cyanides and alkali or alk. earth org. salts and mixts., 8306*h*.

aluminum-Cr-Fe-Mn-Si-Ti-, cold-rolled strip of, 4206*a*.
antimony-Cu-Pb-Sn-, as bearing metal, 80*h*.
beryllium-Fe-, 543*d*.
iron-, age-hardening of, 4205*h*.
effect of B on hardenability of, 3333*a*.
lattice spacing of retained austenite in, 4205*g*.
viscometry of, 531*d*.
iron-Mn-Ni-Si-, heat-treatment of, P 1709*f*.

**Carbonates**. (See also *Alkali metal carbonates; Alakline earth carbonates; Carbonic acid*.)
acid, amino acid formation from, 8027*f*.
acid, in blood at various altitudes, 8484*e*.
in brain tissues, 1099*c*.
carbonic anhydrase as tool in studying reactions involving, 3862*i*.
detn. of alky. of, 2892*a*.
exchange in erythrocytes, temp. coeff. of, 9197*a*.
of Group II formation, and stability of, 4171*a*
leaf damage in grain crops from, 3070*g*.
in pancreatic juice stimulated by secretin, 9231*f*.
sodium hexametaphosphate stabilization of, in water of oil fields, 3953*g*.
in urine during hypoxia, 6727*a*.
calcination of rock, P 8110*f*.
carbon detn. in, 8306*h*.
carbon dioxide detn. in solns. of, 7866*c*.
carbon dioxide (radioactive) excretion after administration of isotopic acid, 3097*i*.
decompn. to oxides and $CO_2$, entropy of, 1242*a*.
detn. in clays, 8628*e*.
in electroplating baths, 961*g*, 8903*i*.
in fused salt baths, 2546*i*.
in industrial waters, 4787*d*.
in natural waters, 4403*f*.
in photographic materials, 7360*h*.
in water, indicator for, 5519*i*.
in xanthates, 5343*h*.
effect on adsorption of color of molasses and Ponceau 4 R by $CaCO_3$, 8791*i*.
on catalase, 256*c*.
on crystn. of $NH_4Cl$, 2483*c*.
on fermentation inhibition by U, 2257*a*.
on Fe reaction with chlorides and perchlorates, 9005*a*.
on photolysis of peroxydisulfate, 4144*i*.
on setting time of Ca tartrate gels, 6889*b*.
electrophoretic deposition of, with thermoelectronic emission, effect of alcs. on, 8908*e*.
electroscope for, contg. $C^{14}$, 7757*e*.
excretion by hens, 2291*b*.
ferriferous, of Pennine orefield and northeast coalfield, England, 5704*i*.
in food material as it moves along alimentary tract of hen, 2291*d*.
formation of, by bacteria in sea water, etc., 8994*b*.
in guayule leaves, anion-cation balance and, 281*f*.
hardness of water due to, stabilization in heat exchangers, etc., P 6346*f*.
in irrigation water, and their detn., 3951*d*.
light-metal corrosion by, prevention of, 4622*e*.
light polarization by, 2869*b*.
lyoparachor of O in, 2834*e*.
manuf. from $CO_2$ and organolites, P 6374*d*.
metabolism of, 3905*e*.
mobility of ion of, 6050*h*.
in purification of carboxylic and sulfonic acids, P 2222*i*.
reaction with chlorinated fatty acids, 2164*f*.
reaction with K salt solns. in salt clay, polyhalite formation by, 8995*d*.
removal from cyanide-plating solns., 6520*g*.
removal from metal-cleaning salt bath, P 3769*c*.
removal from water—see *Water, purification of*.
retention by hen, effect of dietary level of Ca on, 2291*e*.
in *Scenedesmus quadricauda* growth, 6706*b*.
in soils (Spanish), 5891*b*.
sorption of ions of, by glass, 8233*h*.
thermal analysis curves of, 8987*h*.
titration of normal to acid, with HCl, Malachite green-tropolein 000 indicator in, 4175*b*.
uranyl complexes, 8270*d*.
vibration frequencies of, 4571*d*.
in water in heterogeneous terrain, 8581*b*.

**Carbonation**. See *Carbon dioxide; Sugar manufacture*.

**Carbon bisulfide**. See *Carbon disulfide*.

**Carbon black**. See *Lampblack;* and "black" under *Carbon*.

**Carbon bromide**, free radical (CBr), 5312*g*.
free radical (CBr) in MeBr and Br flames, 5312*g*.

**Carbon chains**. See *Chains (chemical)*.

**Carbon chloride**. (See also *Carbon tetrachloride; Ethylene, tetrachloro-;* etc.)
free radical (CCl), identification in cyanogen combustion with Cl, 7663*e*.

**Carbon chlorosulfides**. See *Thiophosgene*.

**Carbon compounds**, with hydrogen (CH)—see *Methylidyne (free radical), Methylidyne group*.
with hydrogen ($CH_2$)—see *Methylene (free radical.)*
with nitrogen (CN)—see *Cyanogen (free radical)*.
with oxygen on C deposits as initiator of explosions and formation of CO in compressed-air systems, 5952*c*.
quaternary, 5685*b*, 4265*f*.
review on, 2105*h*.

**Carbon density**, detn. of, of unsatd. hydrocarbons, 8971*a*.

**Carbon dioxide**. (See also *Carbonic acid; Photosynthesis; Respiration, animal; Respiration, plant*.)
absorbents for, P 8578*c*.
absorption app. for, 4054*f*.
absorption of, by aq. glycerol and $H_2O$ in wetted-wall columns, 6053*i*.
in blood of *Triton cristatus*, curve for, 5123*c*.
by hydroxide solns., rate of, 1631*a*.
kinetics of, 23*gh*.
nomograph for NaOH solns. for, 3157*a*.
in acetylene flame, 7822*i*.
acetylene from, and $C_2{}^{14}H_2$ from $C_2{}^{14}O_2$, 1713*g*.
-activated C, 8790*d*.
activation of C from rice husks with, 4834*g*.
adsorption of, by $BaF_2$, 3485*b*.
by charcoal, 3686*h*.
effect on floatability of minerals, 3325*c*.
by Mn oxides, 1623*hi*.
in *Aerobacter aerogenes* growth, 5080*e*.
in agene-induced canine epilepsy, 1869*e*.
alc. recovery from, from fermentation, P 2366*f*.
alkali neutralization by, in gastric mucosa, ulcers and, 2309*a*.
ammonia-soda process under high pressure of, 1917*ghi*, 1918*fhi*.
anhydrase—see *Carbonic anhydrase*.
in apple tissue, 4350*c*.
asphyxiation by, in canning industry, 1871*i*.
assimilation by oats in Mn deficiency, 8016*c*.
assimilation by plants grown under dry conditions, 5088*h*.
assimilation (heterotropic) of, 3886*b*.
in atm., climate and, 7621*h*.
atomic function and viscosity of, 8774*f*.
in beer, 3970*i*.
binding energy of, 6895*f*.
binding in limestones, 4537*b*.
blood aminodicarboxylic acid formation from, 8499*g*.

in blood of arteries, cerebral arteriovenous difference in O and, 3088*c*.
cerebral constituents in relation to, 5848*g*.
after histamine treatment, and effect of pretreatment thereon, 9243*h*.
in rickets, 5486*e*.
at various altitudes, 8484*e*.
bottling champagne under, app. for, 1905*a*.
calcium hydrogen carbonate solns. free from, pH of, 9306*f*.
capacity of saliva, 4356*h*.
central inhibitory effects of, 4770*b*.
charging liver with, P 2339*g*.
in citric acid synthesis by liver, 7990*e*.
from combustion of fuel gas, relations among air required for combustion, calorific value of fuel and, 4446*a*.
control in refrigerated storage, effect on keeping qualities of food, 4779*g*.
corrosion by, of boiler tubes in petroleum refineries, 6401*h*.
of petroleum-well equipment, prevention of, P 3185*h*.
in petroleum wells and processing, prevention with S compds., P 7221*h*.
decompn. into CO and O, furnace design for, 2475*h*.
detn. of, 2759*f*, 3745*e*, 6943*h*.
in absorbent liquors or carbonate solns , 7866*c*.
in air, 4182*a*, 4972*d*, 6687*a*, 8308*d*.
in air, app. for, 8216*h*.
app. for, 5104*h*, 7153*g*.
in baking powders, 9278*d*.
in baking powders, app. for, 3531*i*
in blood, 9131*h*.
in coal gas, 8971*a*.
in dolomites, 4601*e*
in flue gases, P 914*h*.
in gases, 6109*h*, 6869*i*.
in gases, app. for, 910*h*.
in gases, infrared analyzer for, 5666*f*
in industrial waters, 4787*d*.
in Fe ores, 520*g*.
in mixts. with O and N, mass spectrometer for continuous, 7270*f*.
in spring water, 5889*e*.
diffusion and soln. in polystyrene at high pressures, 2811*d*.
diffusion into leaves during photosynthesis, stomatal frequency and distribution in relation to, 283*i*.
in diluting explosive coal-dust atm., 7663*c*.
in dough-fermentation cabinet, 6325*h*.
in doughs, maltose-producing capacity of flours in relation to, 325*f*.
*Drosophila* sensitivity to, 4778*i*.
drying of, P 8109*g*.
effect on adrenaline sensitivity of peripheral vessels, 9201*g*.
on brain, 9261*e*.
on cement and concrete, 2395*h*.
on chemoreception in intestines, 7564*d*.
on contact angles between metals or sulfides and water, 2485*i*.
on convulsions from N chloride, 3106*c*.
on corrosion of Al and Zn, 6140*a*.
on decompn. of $CaCO_3$, 2078*e*.
on electrolytes of blood and tissue, 8541*i*.
on *Escherichia coli*, 715*i*.
on extinction point of $C_2H_2$ flames, 8823*a*.
on eye pupil, 4374*i*.
on flame propagation limits in H and $CH_4$ mixts., 3618*d*.
on flavor of apple juice pasteurized in bottles and on vitamin C content, 783*b*.
on fumarate formation in *Rhizopus nigricans*, 9146*e*.
on grinding of refractory materials, 5562*d*.
on growth of higher plants during heterotropic feeding, 7093*c*.
on inflammability limits of dichlorodimethylsilane, 7229*i*
on inflammability limits of HCN, 8248*g*.
on intestinal motility, 8041*f*.
on lactate, phosphate and pyruvate in brain, 9202*g*.
on lungs, 3910*d*, 7135*i*.
on Mn availability in Mn-deficient soil, 3957*b*.
on muscle metabolism during rest and work, 4743*e*.
on Ni corrosion by steam condensate, 4996*f*.
*effect* on normal and convulsive potentials, 9260*d*.
on photolysis of dimethylmercury, 7825*d*.
on protoplasmic colloids, 3932*i*.
on respiration, typhoid-paratyphoid vaccine and, 8063*d*.
on tissue respiration, 3910*c*.
on tolerance to high altitudes, 5431*g*.
on toxin production and growth of *Corynebacterium diphtheriae*, 4726*b*.
effusion at crit. velocities, mol. wt. and, 2056*b*.
equation of state of, 8774*b*.
equation of state of, detn. of, 6021*c*.
ethylene-polymer film permeability to, 9522*g*.
exchange of water vapor and, over plants, measurement of, 729*a*.
fire extinguishing with—see *Fires*.
fixation of, in animal tissue, 3912*e*.
in citrulline synthesis, 1816*c*.
by leaves of *Bryophyllum*, 8009*i*.
in α-oxoglutaric acid by enzymes, 2249*c*.
in parsley root, synthesis of tricarboxylic acid by, 5056*i*.
by *Rhizopus nigricans* in fumaric acid formation, 272*g*.
in *Scenedesmus*, 8009*f*.
stability of biotin during, 9066*a*.
flash lamps contg., P 4966
flow through porous $SiO_2$, 6883*d*
foam formation on colloidal Ag and gelatin solns with, 8794*g*
in food drying, P 1123*h*.
formation and removal from metals in vacuum, 29*f*, 6053*f*,
formation of, from aspartic acid in *Escherichia coli* after incubation in phosphate, and effect of biotin thereon, 1833*f*
by barley roots during fermentation, carbohydrate loss and, 4808*h*
from $CaCO_3$, 6053*c*.
from carbonates, entropy of, 1242*a*
in $C^{14}$ detn. in org. compds., app. for, 1684*e*
from CO in animal, 8030*g*.
in combustion of propene, 5268*f*
in cottonseed in storage, relations of molds and moisture to, 4875*c*.
in decompn. of acetyl peroxide, 3775*h*, 3776*b*.
in fuel bed combustion and its inhibition, 3592*d*.
from graphite, O and steam, 2076*h*
by ladino and white clover encased in ice, in relation to survival, 7088*g*
by microorganism or tissue, app. for detn. of, 1075*h*.
from oxalic acid, isotope effect in, 8859*e*.
in oxidation of $C_2H_6$, 6516*b*.
by *Polyporus anceps*, 5094*b*.
in pyrolysis of 2-octanol nitrite, 3779*c*.
during reaction of 2-butanone and EtOH, 993*d*.
from reaction of hydroxyl radical with hydrocarbons, 6149*i*.
in respiration, app. for measurement of, 2265*i*.
by soil microörganisms, effect of plant-growth regulators on, 1514*d*.
in stored barley, 4345*e*.
in sugar manuf , 9502*h*.
by tartrate-fermenting *Clostridium*, 274*a*.
thermodynamics of, 2907*e*.
by thermophilic cellulose-fermenting bacteria, 720*c*.
from tyrosine, 1746*a*.
by ultraviolet-light photolysis of cotton cellulose, 1563*c*.
by yeast after x-irradiation, in relation to colony production, 7081*h*.
*Fusarium eumartii* and *F. oxysporum* tolerance to, 1455*b*.
gas counters filled with, efficiency of, 8263*e*.
generator for, 8755*i*.
generator for, for Dumas N microdetn., 6869*c*.
heat capacity ratio of, 7280*f*.
heat of adsorption by active C, 6903*g*.
heat transfer by film of, detn. of, 2476*a*.
from hydrocarbon synthesis, $CH_4$ manuf. from, P 4446*g*.
hydrogenation of, catalyst for, 8076*g*.
hydrogen-ion concn. of, in gas-condensate wells (reference should be no. 5), 7216*i*.
hypoxanthine formation from, in liver homogenates, 3869*c*.
incorporation in liver glycogen, 3905*h*.
insecticides propelled with, toxicity of residues from, 6353*g*.
in intestinal flatus, effect of gaseous transfer between colon and blood stream on, 298*c*.
in iron and steel manuf., P 9019*e*.
in iron-siderophilin complex formation, 9211*c*.
in lactate fermentation by Clostridium lacto-acetophilum, 2276*g*.
lactic and pyruvic acid formation by *Escherichia coli* from alc. or AcOH and, 8443*f*.
liberation by leaves in light, 8010*g*.
light scattered by, depolarization of, 7281*i*.
liquid, heat exchange in boiling, 5*c*.
liquid, manuf. of, 7650*h*.
liquid treatment with, app. for, P 4058*b*.
lubricant unctuosity and pressure of, 7675*e*.
lyoparachor of, 2834*d*.
malate conversion to lactate and, by *Lactobacillus arabinosus*, 1830*a*.
in measurement of domestic ventilation, 9309*i*.
in metabolism (heterotropic), replacement of, 8435*bc*.
in metabolism of bacteria, 9164*b*.
metabolism of, in tissue and total organism, 5481*i*
in milk (dry whole) in storage, 780*d*
mixing of, in open-hearth furnace models, 7878*g*.
mixing with gases, temp. effects in 8773*c*.
mixts. with ethylene oxide as fumigant for grains, 9336*a*.
with gases, thermal diffusion of 8224*e*.
with $CH_4$, hydrates of, 4832*f*.
with O, in blowing metal in converters, P 6143*i*.
naphthalene vaporization into, from fixed and fluidized beds, 5647*a*.
neutron diffraction by, 5285*d*
org. vapors yielding, on pyrolysis, detection of, 4602*d*.
in oxygen evolution from triturated spinach leaves, 732*h*
-oxygen quotient in *Chlorella*, effect of starvation, N deficiency and light intensity on, 2285*e*.
oxyhemoglobin dissocn. curves and 5811*h*
partition between liquid hydrocarbon and NaCl soln , 7297*f*.
photosynthesis in isotopic, distribution of labeled C in plant sugars after, 7088*i*
photosynthesis in leaves at low concns. of 6284*e*
photosynthesis limitation by, 2281*h*
pigment damage by, 4870*h*
polymers from $C_2H_4$ and, P 4515*d*
potential function of, calcn. of interaction terms in, 8765*c*.
pressure of, in solns., detn. of, 333*g*
pressure-vol. relations of, 8772*d*.
production from wells in Washington, 6547*d*.
pulmonary vasoconstriction from, 5113*a*
pumps (diffusion) for, speeds of, 2043*e*
radiation from, in furnaces, measurement of, 378*c*.
radioactive, counter for $C^{14}$ detn. in, 3281*h*
detn of $C^{14}$ as, 2090*f*.
excretion after administration of isotopic carbonates, acetates and succinates, 3097*i*.
incorporation into liver proteins, 9089*i*.
prepn. from $BaCO_3$, 4951*h*.
utilization of ordinary and, in photosynthesis, 4730*d*.
in rancidity control in fish, 1498*b*.
reactions at high pressure of, process and app. for effecting, P 6811*e*.
reactions involving, carbonic anhydrase as tool in studying, 3862*i*.
reaction with alkali hydroxide and $NH_3$ solns., rates of, 1632*c*.
with amines, P 5614*d*, P 5639*i*, 6157*i*
with amino acids in the presence of hydroxides, P 5415*d*.
with $NH_3$ in the presence of $Al_2O_3$ and $ThO_2$, 2946*d*.
with ammonium salt solns., 3155*adh*, 3574*h*.
with aralkyl amines, 1351*f*.

*reaction* with Ca ferrite, 4967*f*.
with C, 3694*i*, 7309*b*.
with diamines, P 692*a*.
with fluidized C, fuel gas manuf. by, 6807*h*.
with $H_2$ in MeOH manuf., P 7036*d*.
with CaO water, acceleration with soda, P 4821*g*.
with metalized benzhydrylamine, 2981*a*.
with $CH_4$, 1944*fgh*, 4445*g*.
with organolites in carbonate manuf., P 6374*d*.
with $K_2CO_3$ and $H_2O$, equil. in, 8806*e*.
with Na, P 3164*i*.
with Tl, 9006*i*.
recovery from flue gases, P 8121*d*, P 8758*e*.
recovery from natural gas and manuf. of Dry Ice therefrom, 1169*a*, 1882*d*, 2343*b*, 2711*g*, 5516*c*.
reduction by chloroplast hydrogenase, product of, 5452*f*.
reduction of, 7899*c*.
in regeneration of solid bed catalysts, P 5134*i*.
released from supersatd. soln., 3082*g*.
release from liquids by solids, 2068*c*.
removal of, from aconitic acid, P 1057*c*.
from Cl, P 4822*g*.
from gases, P 4450*ad*, P 7669*ce*.
from $H_2S$, P 9396*i*.
from steel ingots and castings, P 104*i*.
respiratory, source of O of, 9212*f*.
rubber, Butyl rubber and silicone tubing diffusion consts and permeability to, 1596*d*.
in saliva, factors influencing, 6715*i*
in *Scendesmus quadricauda* growth, 6706*a*
scrubber for, 6873*a*
sodium aluminate soln treatment with, 1922*gh*.
from soils, 4408*f*.
in soils of forest, 5141*f*.
solid, in air displacement from solns in iodometry, 7368*d*.
contg. oil, $H_2O$, etc., P 3985*a*.
from flue gas, 9296*g*
in fruit juice industry, 8069*g*.
in N detn. by Dumas-Pregl method, 6540*a*.
refrigerating app. using, P 9158.
use in lime softening of water, 3122*h*
spectra in atm., 4139*e*, 4952*h*
spectra of, 491*a*, 3289*i*, 8880*h*
steel oxidation by, in furnaces, 4992*b*.
as stripping gas for catalysts used in dehydrogenation of hydrocarbons, P 9078*e*.
in sugar-juice clarification—see *Sugar manufacture*.
system: $NH_3$–$H_2S$–$H_2O$–, 6048*d*.
system, $NH_4HCO_3$–$Na_2SO_4$–$H_2O$, 1917*h*.
system: butane– 3274*c*.
system, C–CO–H–$CH_4$–water, at high temp. and pressure, 3170*i*.
system of urine during hypoxia, 6727*a*
systems: piperidine–$CS_2$–, morpholine–$CS_2$–, piperidine–COS–, morpholine–COS–, 836*g*.
thermodynamic functions of, effect of Fermi resonance on, 4066*b*
thermoosmosis through membranes, 4062*f*.
transport of, carbonic anhydrase in, 6677*i*.
in tumor glycolysis, fermentation and dehydrogenation, interrelationship with biotin and heavy metals, 2694*i*.
ultrasonic absorption by, 5652*c*.
uptake by leaves, 1079*i*.
utilization in synthesis by *Escherichia coli*, 8431*f*.
vapor d. over boiling $NH_3$ liquor, 2480*g*.
virial coeffs. of, 3677*d*.
in Warburg app., app. for control of, 8750*c*.
in waters (natural), calcd. and experimentally detd., 3121*d*.
in waters of mineral springs of Japan, $B_2O_3$ contents and, 7876*a*.
in waters of natural-gas-condensate wells, corrosion and, 3599*f*.

**Carbon disulfide**, absorption and elimination of, 7576*i*.
as activator for sulfide catalysts in hydrogenation of nitro compds., P 682*a*.
adsorption of, from rayon-making waste gases, P 5603*b*.
by soil, 3960*h*.
by solids, 7288*d*.
in air, max. allowable concn. of, 4401*a*.
anthelmintic action of, 3566*c*.
assocn., compressibility, mol. size and sound velocity in, 7284*b*.
corrosion inhibition by, due to $CO_2$ in petroleum wells and processing, P 3185*i*, P 5730*f*, P 7221*h*.
in density detn. of carbonized coal, 9412*e*.
detection of, 4602*d*.
detn. and removal of, in coal carbonization, 9414*b*.
dotriacontane soly. in, 6890*c*.
effect on polymerization of allyl and meth acrylate compds., 8199*f*.
on rice weevil, 8603*d*.
on soybean protein solns. in NaOH, 4859*f*.
evapn. rate, heat received by surface and temp. of surface of, and its mixt. with $C_6H_6$, 4532*f*.
fires in, extinguishing, 6417*g*.
formation of, thermodynamics of, 8838*a*.
in fuel gas, removal therefrom and systems: piperidine–$CO_2$–, morpholine–$CO_2$–, 836*g*.
gas counters filled with, efficiency of, 8263*e*.
heat of combustion of, 4089*e*
hydrogen sulfide detn. in tech., 6944*c*.
hydrolysis of, 7429*e*.
ignition by elec. sparks, 407*c*.
ignition of mixt. of O and, by shock waves, 5951*d*.
impenetrability radius of, 8794*e*.
as insect fumigant, 5898*e*.
insecticide from, P 8604*e*.
lyoparachor of, 2834*d*.
manuf. of, P 5555*f*, P 8623*i*.
from hydrocarbons and S, P 7201*i*.
from HCN from coke oven gas, 7666*g*
in thiophene manuf., P 1066*i*.
meniscuses of, 4061*c*.
mixts. with $NH_3$, inversion spectrum of, 3716*h*.
with $C_6H_6$, colored suspensions of inulin in, 8801*b*.
with org. vapors, adsorption by active carbons, 16*g*.
with NaOH, soybean protein solns. in, 4470*c*
mol. assocn. and sound velocity in, 2835*e*.
nitrogen soly. in, 8803*h*.
parachor and thermochor of, 2923*f*.
poisoning by, 4789*e*.
neurological aspects of, 3936*c*.
review on, 6759*b*.
theory and pathology of, 7577*d*.
potential function of, calcn. of interaction terms in, 8765*c*.
purification of, for spectroscopic use, 7817*g*
reaction with amino groups, 2247*f*.
with α amino nitriles, 3109*e*.
with $NH_3$, 2946*d*.
with C, effect of activation on, 5572*d*
with glycine, 1398*e*.
with α methylamino nitriles, 1766*b*.
with S and aniline or thiocarbanilide, 2021*cd*.
with water, 2847*b*.
with water, catalyst for, P 5887*b*.
recovery from coke-oven gas, 5924*a*.
from viscose baths, P 849*d*.
from viscose-industry wastes, 6408*h*.
removal of, from gases, 4833*g*, P 7669*e*
from hydrocarbons, P 6797*b*, P 7041*d*.
in viscose industry, 8134*i*, 8685*f*.
resin from HCHO, 1,6-hexanediamine and, P 2466*c*.
in retarding alkali-cellulose aging, P 6825*f*.
review on, 2826*d*.
as silver-plating brightener, 4146*h*.
in soil disinfection for *Agrotis* and wireworms, 8599*b*.
in soil-Mn mobilization, 8081*c*.
as solvent in Friedel-Crafts reaction, 209*h*.
spectrum of, 42*d*.
steel resistance to, 1304*b*.
thermal cond. and viscosity of, 4065*c*.
vapor-d. distribution over surface of, 7282*i*.
vapor pressure of, temp. and, 8775*a*.
viscosity (dilatational) of, 5249*g*, 8780*a*

**Carbon fluorides.** (See also *Carbon tetrafluoride*.)

alkenyl esters, esters with dihydric phenols, polymerization of, P 2234*e*.
esters with halo *p,p'*-dialkylidenediphenols, polymerization of, P 2234*d*.
esters with hydroxy derivs. of hydrogenated thiophene 1,1-dioxide, P 690*i*.
alkyl carbalkoxyalkyl esters, as plasticizers, P 2435*d*.
alkyl esters, carbalkoxylation with mixts. of alcoholates and, P 2225*h*.
in dustproofing diazo compds., P 9474*a*.
phys. constants of, 2957*d*.
reaction with acetylene, 6167*g*.
reaction with acetylene compds., 6168*f*
therapeutic materials contg., P 9388*c*.
allyl ester, diesters with 4,4'-isopropylidenediphenols, P 3847*d*.
diester with diethylene glycol, polymer with allyl carbamate, P 9531*f*.
esters with allyl esters of hydroxy aliphatic acids, P 3452*c*.
ester with diethylene glycol, polymers with Et acrylate, 5988*i*.
polyesters with polyhydric phenols, P 4298*h*.
anhydrase of—see *Carbonic anhydrase*.
benzyl ester, ester with *dl*-nor-ψ-ephedrine, 4238*c*.
bis(*p*-chlorophenyl) ester, as acaricide and insecticide, 3137*i*.
bis(2-fluoroethyl) ester, 6164*c*.
bis(2-fluoroethyl) ester, volatility and vapor pressure of, 8841*b*.
bis(2,4,5-trichlorophenyl) ester, cottonseed treatment with, 3133*i*.
in blood coagulation, 5842*b*.
*tert*-butyl (di-) ester, 578*h*.
compd. with 3,5-dimethylcyclohexylamine isomers, 2963*c*.
compd. with 2-methylcyclohexylamine, 2961*b*.
concrete deterioration from, 8636*i*.
corrosion by, prevention of, P 5730*e*.
1,2-cyclic ester with glycerol, haloformates and carbamate, P 6652*k*.
dibenzyl ester, P 4293*c*.
2-diethylaminoethyl ester, ester with testosterone, assay of, 7993*k*.
diethyl ester, chloroethane reaction with Pb-Na alloy in presence of, P 4287*e*.
lyoparachor of, 2834*d*.
reaction with *tert*-BuCl, 111*f*.
spectrum of, 1656*c*.
dihydrazide—see *Carbohydrazide*.
diphenyl and di *m*-tolyl esters, in chigger control, 8599*h*.
diphenyl ester, in chigger control, 1518*f*, 9349*b*.
detn. of, 71*a*.
for impregnation of clothing in mite control, 3554*i*.
ester (cyclic) with 2,2-diphenyl-1,3-propanediol, 9042*g*.
esters, P 1057*d*, 3361*a*, 7455*h*.
alkali metal salts, as catalysts for alcoholysis of polyvinyl esters, P 6867*f*.
with diethylene glycol and amino alcs., P 5180*g*.
with 3(α)5, - dihydroxycholestane, 1785*a*.
with 3(β),5 - dihydroxycoprostane, 1787*b*.
as plasticizers for vinyl resins, P 5998*b*.
polymeric, for molding dentures, P 9538*f*.
reaction with alkyl o-hydroxyphenyl ketones, P 693*h*, P 694*a*.
esters, and polymers, P 1608*gi*.
esters (mono-) with pyrocatechol derivs., P 4299*a*.
esters with 4'-hydroxysalicylanilide 2-acetate and with salicylo-*p*-phenetidide, 2603*d*.
ethylene cyclic ester, hydroxyethylation with, P 673*g*.
ethyl ester, anhydrides with acetic and with benzoic acids, 6980*a*.
anhydride with isothiocyanic acid†, 1402*d*.
diester with α,α'-diethyl-4,4'-stilbenediol, P 2641*f*.

*ethyl ester*, diester with ethylene divanillate, 4242*b*.
esters with 2-(4-chloro-2-nitroanilino)-2-methyl-1,3-propanediol and its monopropionate, P 7694*d*.
esters with 8-phenanthridinols and related compds., P 2647*c*.
ester with 6-dimethylamino-4,4-diphenyl-3-heptanol-HCl, 3391*c*.
ester with hesperidin, adrenaline potentiation by, 5117*a*.
ester with hydroferulic acid, 7001*e*
ester with 2-*p*-hydroxybenzamido 2 thiazole, P 6239*c*.
free energy of ionization of, 2075*b*.
glass attack by, 2385*f*.
ionization and resonance of, 7789*i*.
methyl ester Na salt, P 0867*f*.
methyl ester, spectrum of, 1656*c*.
monohydrazide—see *Carbasic acid*.
oxydiethylene ester, esters with derivs. of 2-imidazoline-1-ethanol, di-HCl, P 5180*e*.
photochem. transformation of, by chlorophyll, interpretation according to the electronic theory, 1839*h*.
reactions involving, carbonic anhydrase as tool in studying, 3862*i*.
salts (acid) with amino acids, salts, P 5415*c*.
salts with guanidine derivs., P 5046*f*.
salt with 1-(*p*-chlorophenyl)-5-(4-diethylamino-1-methylbutyl)biguanide, P 6659*g*.
**Carbonic acid, azidodithio-.** See *Formic acid, dithiotriazo-*.
**, chloro-.** See *Formic acid, chloro-*.
**, dithio-**, esters with α-mercapto acids, as corrosion inhibitors, P 7955*f*.
methyl ester K salt, toxicity to seed, 3133*b*.
——, **thio-**, *O*-ethyl ester, anhydrosulfide with *N*-dithiocarboxyglycine and ester with 4-(ethoxymethylene)-2-mercapto 5(4 *H*)-thiazolone, 1399*c*.
*O* ethyl ester, ester with 4-benzylidene-2-mercapto-5(4 *H*)-thiazolone, 1400*e*.
——, **thiolthiono-**. *O*-ethyl ester—see *Xanthic acid, ethyl-*.
——, **trithio-**, esters (cyclic) of, 7419*b*.
esters, detn. in xanthates, 5343*g*.
esters with α-mercapto acids, as corrosion inhibitors, P 7955*g*.
**Carbonic anhydrase**, in blood, 3508*f*
in blood, in dystrophy, 750*a*, 5486*f*.
effect of aminopyrine, ascorbic acid and Na salicylate on, 4773*f*.
effect of high-altitude conditions on, 5475*c*.
effect of sulfonamides on, 772*d*
effect of sympathomimetic substances on, 7142*c*.
in pneumonia, 4760*e*.
in pulmonary tuberculosis and normal patients, 1481*f*.
detn. of, 2266*d*, 5432*c*
effect of convulsants and anticonvulsants on, 5865*f*.
effect of sea water on, 7524*b*.
in eye tissue in ontogenesis, 1358*i*
in hydrochloric acid production in stomach, 2689*d*, 4753*h*.
inhibition by sulfanilamide in kidney tubules, effect on salt and water excretion in congestive heart failure, 3526*d*.
in neoplastic and normal tissue, 8045*i*.
in nervous system of developing fetus, 4747*d*.
in premature children, 4749*h*.
review on, 6677*i*.
sulfonamide effect on, 3862*g*.
as tool in studying reactions involving $H_2CO_3$, $CO_2$ or bicarbonate ion, 3862*i*.
zinc and, 3903*b*.
**Carbonic anhydride.** See *Carbon dioxide*.
**Carbonimidic acid.** See *Imidocarbonic acid*.
**Carbonitriles.** See *Nitriles*.
**Carbonium compounds**, formation in $H_2SO_4$, 569*c*.
formation of carbonium ion in aromatization and rearrangement of sulfonic acids, 9044*i*.
in depolymerization and isomerization, 1713*g*.
in elimination reactions, 3346*g*.
in isomerization of pentane in the presence of additives, 1712*f*.
in Schmidt reaction, 9027*gi*.
steric effects and, 6968*f*.
ions of, 8762*d*.
reaction with ethylene derivs., 1733*b*.
ions of, in styrene polymerization, 2966*i*.
**Carbonization.** (*This heading is restricted to pyrogenic decomposition of coal, etc. For impregnation of metals with carbon see* Steel; *etc. See also* Charcoal; Coking; Destructive distillation; Gas, fuel (manufactured); Lignite; Tar; Tar oils; *etc., and* "distn. of" *under* Coal.)
app. for, refractory materials in, 3582*e*, 3583*c*.
of briquets from coal waste, 1948*e*.
of coal, 5923*d*, 8641*fhi*, 8642*b*.
$(NH_4)_2SO_4$ yield from, 8639*i*.
in Bavaria, 8366*b*.
controlled oxidation in, 3168*i*.
recovery and utilization of N and S from, 5923*h*.
swelling pressure in, 4443*i*.
of coal and oil shale in small samples, app for, 4829*i*.
detg. length of period for, 1551*e*
effect on yields of $NH_3$ and HCN in producer gas, 4833*d*.
furnaces for, P 4837*de*, 4838*a*.
in Great Britain, 1549*g*.
high-temp., heat of coking in, 4834*a*
hydrocarbon decompn. in, prevention of, P 9421*b*.
low-pressure, 1948*a*.
low-pressure, app. for, 1948*c*.
low-temp., of coal, 3993*g*.
plant for, 375*b*.
of subbituminous coal, 5170*b*.
of molded products from coal, P 3176*i*
of peat, 5924*a*, 5926*i*.
plant for, 1944*e*.
properties of coal—see *Coal*.
review on, 7665*cd*.
of rice husks, effect of gas atms. on, 4834*f*.
of shales (bituminous), from Carpathians, 3995*h*.
of shales (oil), retorts for, 3996*e*.
of solid fuels, testing of, 4828*f*.
of stump wood, 6407*e*.
sulfur removal in, 9414*b*.
test for, 1947*a*.
of wood, P 4838*a*, 6392*e*
of wood, AcOH source in, 6809*i*.
active C and charcoal by, 5571*i*.
app. for by-product recovery from, P 1952*a*.
kiln for, 837*f*.
stainless steel in, 8120*c*.
thermal study of, 6809*g*
of wood and other org. compds., P 6398*d*.
**Carbon monoxide.** (See also *Carbonyls.*)
in acetylene flame, 7822*i*.
activation by desorption from catalysts and reaction with O, 4088*a*
adsorption by Co, 3686*e*.
by Co and Fe catalysts in gasoline synthesis, 2413*de*.
by Cu oxides in films, effect on elec. resistance, 474*h*.
by Ni, 2079*h*.
in air, 7276*d*.
of ferrous foundries, 8998*b*.
max. allowable concns. of, 4400*i*.
in air and smog, 7672*g*.
blast-furnace-brick disintegration by, detn. of, 7655*e*.
blast-furnace-brick or firebrick disintegration by, 1933*ac*, 4437*b*.
in blood of Chinese, 8480*a*.
bonds in, 8764*a*.
books: The Technology of Fisher-Tropsch Process, 2756*b*; Neue Entwicklungen auf dem Gebiete der Chemie des Acetylens und, 7034*g*.
from butane combustion, 3725*a*.
carbon dioxide formation from, in animal, 8030*g*.
chemistry of, recent developments in, 4211*i*.
in cigaret smoke, 7645*e*.
combustion of, inhibition of, 3592*e*.
in comet Bester (1947 *k*), 938*e*.
in comets, 490*i*, 6918*d*.
compds. with nonmetal, 3682*h*.
condensation with $C_2H_4$, 4829*f*.
detection of, aspirating app. for tubes for, 5646*i*.
detn. of, 2759*f*, 3563*h*, 6943*i*.
in air, 970*i*, 1686*e*, 2892*h*, 4974*i*.
in air, app. for, 4596*f*, 8749*d*.
in alveolar air in detn. of hemoglobin content of body, 4320*i*.
in alveolar air, sampling for, 4320*h*.
in blood, 5070*g*, 7585*f*.
in cadavers, 8316*e*.
in coal gas, 8971*a*.
*detn. of*, in fuel gas, 6394*a*.

in gases of petroleum industry, 8962*c*.
in gases with infrared analyzer, 6869*i*.
in fe, 4199*f*.
in mine gases, 6008*g*.
dissocn. energy of, 452*i*.
dissocn. in reduction of metallic oxides, kinetics of, 4933*b*.
effect on decompn. rate of $CaCO_3$, 2078*d*.
on elec. cond. of oxides and spinels at high temps., 4534*a*.
on metals, 6139*g*.
on polymerization of butadiene with Na, 2019*i*.
on respiration by potatoes, 2280*h*
explosions of, dissocn. and unreleased energy in, 849*i*.
explosions of, effect of water vapor on flame temps. in, 851*d*.
flames, formation of electronically excited O in, 4571*i*.
heat transfer from, 7805*c*.
infrared emission bands of O from 4571*g*.
velocity of, 8248*i*.
flame temp. of, 1231*i*.
formation and removal from metals in vacuum, 29*f*, 6053*f*.
formation of, from $CO_2$, furnace design for, 2475*h*.
in combustion of propane, 5268*f*.
in compressed-air systems, C O complex on C deposits in, 5952*c*
from diethyl esters of phenoxyoxalacetic and phenylmercaptoöxalacetic acids, 632*e*.
from graphite, O and steam, 2076*h*
from MeOH on ZnO catalyst, 7314*a*
during nitration of cyclohexane, 1019*a*.
from oxalic acid, isotope effect in, 8859*e*.
in oxidation of $C_2H_4$, 6516*b*.
from reaction of aldehydes with olefins, 4637*b*.
during reaction of 2-butanone and EtOH, 993*d*.
from reaction of C with $CO_2$, 3695*b*
from reaction of C with steam, 3691*e*
in Schmidt reaction, 9027*fg*.
in solid-fuel combustion, prevention of, P 5928*d*.
thermodynamics of, 2907*e*
heat of dissocn. of, 2830*c*, 8251*f*.
heat of formation from C and $SiO_2$, 7794*e*.
hydrogenation of, P 839*c*, P 1170*i*, P 1171*bc*, P 1172*a*, 1550*c*, P 1551*h*, 2397*ehi*, 2398*bdeghi*, 2399*aceghi*, 2400*acegh*, 2401*bcefgh*, 3167*cdfh*, P 3174*g*, P 3175*bdf*, 3591*de*, P 4446*g*, P 4447*acf*, P 4448*fi*, 4638*a*, P 4834*i*, 5570*i*, P 5573*bd*, P 5574*b*, 6390*i*, P 6810*k*, P 6811*ab*, P 7213*acd*, P 8120*gi*, P 8121*a* 9415*h*, P 9420*f*.
benzine by, 2406*eg*.
catalysts for, P 827*b*, P 4448*de*, P 4836*g*, P 5928*b*, 6003*g*, 7313*c*, 8076*g*, P 9419*i*.
chemical manuf. by, 5921*c*, 8646*i*, 9416*d*.
Co catalysts in, 3273*g*.
compn. of gasoline by, 7211*h*.
conversion of hydrocarbons from, P 4447*h*.
detn. of Co and Th in catalysts for, 60*a*.
effect of preheating Ni catalysts on, 8831*c*.
effect of $H_2O$ on catalyst in, 6497*a*.
effect on German economy, 7212*b*.
gas manuf. from oil shales for, P 1170*f*.
gasoline by, P 3994*bc*, 7664*c*.
heat control in, P 4908*e*.
heat transfer in app. for, 2343*a*.
heat transmission through fluidized bed of catalyst for, 8753*h*.
hydrocarbon oils by, P 4835*g*.
$Fe_3C$ in, 1636*a*.
Fe catalyst for, P 6397*a*.
Fe catalysts in, 8117*a*.
Fe oxide-alkali metal ferrate catalyst for, P 1950*g*.
Fe oxide-alkali metal pyroantimonate catalyst for, P 1950*f*.
kieselguhr as support for catalysts for, 8830*h*.
mechanism of, 2080*i*, 4828*i*.
$CH_4$ by, 2402*a*, 2405*k*, 3169*e*, 4832*b*, 7666*h*.

*hydrogenation of*, methanol by app. for, P 8218*e*.
Ni catalysts for, changes during prepn., 2853*b*.
Ni - thoria - kieselguhr catalyst for, 5921*g*.
in prepn. of alcs., 994*e*.
recovery of oxygenated products from, P 8650*h*.
regeneration of catalyst for, P 3994*e*, P 9420*bdh*.
sepn. of reaction products from, P 7213*e*.
in silent discharge, 1272*c*.
S removal from synthesis gas for, P 7214*c*.
temp. control in, P 8650*h*.
wax removal from catalysts for, P 3994*gi*.
x-ray diffraction by catalyst for, 2853*d*.
hydrogen manuf. from steam and, P 840*b*.
in hydropolymerization of ethylene, 108*a*.
ignition of mixts. of O and, by elec. sparks, 406*g*.
ignition of mixts. of O and, by shock waves, 5951*e*.
inflammability limits for mixts. of MeBr and, 3619*b*.
iron cementation with, near Curie point, 6018*f*.
iron-ore reduction with, P 2879*e*.
manuf. from $CH_4$ and CuO in fluidized bed, 7199*i*.
manuf. of, P 2407*i*.
metabolism of, in animal tissue, 4753*h*.
mixing with $C_2H_6$ or N, temp. effects in, 8773*c*.
mixts. with H, manuf. by $CO_2$ reaction with $CH_4$, 1944*i*.
with H, manuf. from coke-oven gas, 3595*b*.
with H, manuf. from $CH_4$, 7200*b*.
with H, $CH_4$ and N, sepn. in reflux condenser, 6022*g*.
with N, O detn. in, 1286*b*.
with O and H or $PH_3$, conjugated oxidation in, 4548*a*.
molecular consts. and spectra of, 7312*e*
oxidation of, by atomic O, 8823*e*.
on NiO catalysts, 2498*i*.
by O contg. Co or Ni sulfides and by O in presence of CoS(OH), 2076*i*
oxide reduction by compressed, P 6562*h*.
oxygen and respiratory acceleration in root nodule bacteria in relation to, 1461*b*.
phosphorus vapor oxidation in presence of, 7649*f*.
poisoning by, 6759*h*, 8527*c*, 8533*c*.
blood vessels in, 5194*h*.
effect on easily-split Fe of blood, 318*f*, 5864*c*, 8051*e*.
Fe alc. tolerance in, 1866*f*
lipides and P in blood in, 5114*a*.
neuro-vegetative system in, 5108*g*.
pulmonary edema after, 3105*d*
poisoning by trichloroethylene and, 3931*f*.
polymers of, formation in carbonyl formation, 56*g*.
polymers with olefins, P 2816*g*, P 3236*g*.
pumps (diffusion) for, speeds of, 2043*b*.
reaction products with aromatic amines, P 5639*g*.
reactions of, 2884*h*.
with $C_2H_2$ and its derivs., P 5112*i*.
with alcs. or ethers to give esters, P 3443*b*.
with β-alkoxypropionic acid esters, P 3451*i*.
with $NH_3$, P 1926*b*.
with $NH_3$ (alone and in presence of Cl) and $N_2H_4$, 2946*d*.
with CsOH, 2109*i*.
with chloro derivs. of $C_2H_6$ and $CH_4$, 9031*c*.
with chloro olefins in the presence of $BF_3$ $2H_2O$, P 671*h*.
with $CuCl_2$, P 3160*b*.
with films of Cu and Cu oxide, 6531*i*.
with HCHO and H, P 673*d*.
with formals, H and alcs., P 675*a*.
with halogenated hydrocarbons, P 6650*f*.
with Hg salts in amine media, 2111*b*.
with MeOH, P 5035*f*.
with olefinic compds. and phenols to give esters, P 6234*i*.
with olefins and H, P 4085*d*, P 5031*i*.
with olefins and $H_2O$, P 669*g*, P 670*i*.
with polyhalo ethanes, P 1434*d*.
with Na, P 3164*i*.
with S and $H_2O$ in presence of Co and Ni sulfides, 2532*i*.
*reactions of*, with Ti, 9006*i*.
with $H_2O$, catalysts for, 5133*d*.
with water vapor, kinetics of, 7308*h*.
reaction with alcohols, kinetics of, and soly. of CO in alcs., 3697*i*.
recovery from fuel gas, 8119*d*, 8644*g*.
reduction of, 7899*c*.
removal of, from air, and gas-mask canister therefor, 8075*b*.
in $NH_3$ manuf., 1534*e*.
from α,α-dialkyl derivs. of γ-cyano butyraldehyde, P 3440*a*.
from gases, P 1537*i*.
from H, 7051*a*.
resistance to, of construction material, 3330*e*.
resuscitation after exposure to, 756*i*.
spectra of, 2092*a*, 2510*h*.
spectrum of, Cameron bands in, 2091*h*.
in steel deoxidation, 7397*a*.
structure of, 3672*e*, 3712*i*.
in sun's spectrum, 4568*g*.
system: C–$CO_2$–H–$CH_4$–water–, at high temp. and pressure, 3170*i*.
virial coeffs. of, 3677*d*.

from chlorination of $CH_3CHF_2$, P 3024*a*.
from chlorinolysis and pyrolysis of perchlorinated olefins, 4231*h*.
gas removal from, 8622*g*.
in gelation inhibition of acrylonitrile-vinylidene chloride polymer solns. in 2-butanone, P 7755*b*.
health hazards of, 787*h*.
heat and temp. of transition and fusion of, 5276*c*.
heat capacity of, 30*d*.
heat of wetting of activated charcoal by, 8835*f*.
hydrate, 2570*b*.
impenetrability radius of, 8794*e*.
inflammability limits of mixts. of $CH_4$ and, 3619*c*.
in inhibition of oxidation of CO, 3592*f*.
as inhibitor of C combustion, 9417*b*.
labeled with $C^{14}$, prepn. of, 2090*h*.
liver damage from, 2701*g*.
effect of diet on, 2699*b*, 3077*b*.
effect of thyroidectomy and thiouracil on, 5118*b*.
lyoparachor of, 2834*a*.
magnetic susceptibility of, 6016*h*.
mixts. with $C_6H_6$, distn. in packed columns, 4053*g*.
with $C_6H_6$ or cyclohexane, adsorption by charcoal, 461*d*.
with benzyl ether as solvent for rubber, 3223*i*.
with $C_2H_4Cl_2$, from dewaxing lubricants, HCl removal from, P 5940*i*.
with $N_2O_5$ spectrum of, 8273*g*.
with org. vapors, adsorption by active carbons, 16*g*.
with toluene, distn. in sieve-plate columns, 909*f*.
mol. assocn. and sound velocity in, 2835*e*.
as nitrating medium for cellulose, 1967*hi*, 1968*c*.
osmosis of, effect of alternating elec. field on, 8235*a*.
parachor and thermochor of, 2923*f*.
phosphorus soly. in, 2073*g*.
poisoning by, 3106*a*, 3523*g*, 4789*e*, 7605*i*.
cholinesterase and tributyrinase in blood serum in, 5116*a*.
dietary proteins and, 3497*d*, 4737*c*.
hypochloremia and alkalosis in, 5500*a*.
nitrogenous compds. and vitamin E in protection against, 2292*f*.
polarography of, 8916*h*.
polymethylmethacrylate delayed fracture in, 4048*i*.
potassium iodide solns. contg., ultrasonic production of I in, 1060*h*.
in potato-germination speeding, P 349*g*.
prepn. of, 2150*g*, 5361*f*.
properties of, 7298*f*.
purification of, for use as solvent for dithiazone in Cd detn., 7862*f*.
reaction (photochem.) with $Ph_2Hg$, 8895*b*.
reaction with $NH_4Cl$, 557*f*.
with $BrF_3$ and $IF_5$, 3774*i*.
with butylmagnesium chloride, 2925*g*.
with CO and $SO_2$, 9031*d*.
with chlorotrifluoroethylene, P 661*f*.
with $C_2H_4$, free radicals in, 109*e*.
with KI, effect of ultrasonic waves on, 8779*i*.
removal from chlorinated paraffin wax soln., P 5586*f*
resistance to, effect of dietary factors on, 3072*d*.
sclerosis from, 4377*i*.
as soil fumigant, 7186*e*.
soly. in Na xylenesulfonate solns., 1242*e*.
sorption by activated charcoal, measurement of, 4536*d*.
by charcoals, 4922*be*.
by $Fe_3O_4$, 1240*e*.
of solutes from, by MgO, 17*a*.
spectrum of, 42*d*, 4573*i*, 7342*a*.
styrene polymerization in, 3273*d*.
styrene polymerization in, chain transfer in, 1340*c*.
system: AcOH–$H_2O$–, 8833*b*.
system: $AsCl_3$–, 2534*i*.
system: $C_6H_6$–, 2474*b*.
system: $I_2$–$H_2O$–, mass transfer in, 5647*b*.
system: MeOH–, 6023*a*.
system: MeOH–, H bonds and mol. assocn. in, 8765*i*.
system: perfluoromethylcyclohexane, 3267*a*.
systems: aromatic ethers–, 2585*b*.

systems: cyclohexane-, dioxane-, and pyridine-, 1637c.
systems with other liquids, 2854d.
system: tetrahydrofuran-, 2535a.
system: $VCl_4$-, d., f.-p. diagram, magnetic susceptibility and spectra of, 4528i.
thermal cond. and viscosity of, 4065c.
thermodynamic properties and ultrasonic velocity in, 6024i.
thermoösmosis through sintered-glass disk, 2069d.
toxicity of, nutritional factors affecting, 733h.
toxicology of, 5514c.
ultrasonic velocity in, 1232h.
ultrasonic velocity in solns. of camphor, diphenylamine, naphthalene and o-$NO_2C_6H_4OH$, 8793a.
ultrasonic velocity in, temp. and, 7283i.
vapor-d. distribution over surface of, 7282i.
as vermifuge for *Dicrocoelium lanceolatum*, 4414c.
vibration frequencies of, 5307h.
vibration frequencies of, calcd. from valency-force fields, 4571e.
vinyl acetate chain-transfer coeff. in, 5271e.
viscosity (dilatational) of, 5249g, 8780a.
**Carbon tetrafluoride**, attempted reaction with butylmagnesium chloride, 2925g.
from boron fluoride and $CI_4$, 3775b.
force field of, 2051h.
heat of formation of, 8255h.
magnetic susceptibility of, 6016i.
manuf. of, P 3437a, P 3834h.
**Carbon tetraiodide**, atomic radii in, 9i
reaction with $BrF_3$ and $IF_5$, 3774i.
**Carbonyl chloride**. See *Phosgene*.
**Carbonyl chloride fluoride**, COClF, prepn. and reactions of, 3741f.
**Carbonyl compounds**. (*Organic carbonyl compounds (containing the carbonyl group connected only to hydrogen or carbon atoms).*) (*See also* Acids, Aldehydes; Ketones, *etc. For inorganic carbonyl compounds see* Carbonyls.)
amination of, P 2633d.
α-amino, reaction with imidic acid esters, 2989d.
bond energies and dissocn. of, 452h.
bromine nos. of unsatd., detn. of, 6510e.
chromatography of, in apricot concentrates, 1120i.
condensation of, sulfonic acids and metallo-org. compds., P 690c.
condensation with ketenes, P 5795ae
cyclization mechanism of, 6194b.
detn. in oxidized gasoline, 1952g.
detn. of α,β-unsatd., 8976c.
β-di-, 1007g, 1009h, 1010i.
1,2-di-, condensation with α-amino amides, 3009e.
formation by hydrogenation of lignin, 2428c.
Grignard reaction with, 1718c.
hydroxy, 1743g.
isomerization of, 1753c.
manuf. of, P 5409i
from CO, H and olefins, P 4287b
by dehydrogenation of ales, P 4287f.
mol. compds. of, 7408i.
prepn. of, 183a.
reaction products with 4-ethoxy-3,4-dihydro-3-phenyl-2(1*H*)-quinazolinethione, 1047a.
reactions of, review on acid-catalyzed prototropic, 4212h
reaction with $C_2H_2$ in KOH solns., P 1928f.
with alkyl halides, 111a.
with ketene, P 1055gi, P 1056ac, P 5414i.
with $NaN_3$, 1765i
reduction of, P 7509d.
in thyroid cells, 3907h
unsatd., P 2222f.
**Carbonyl cyanide**, properties of, 3682i.
**Carbonyl fluoride** ($F_2CO$), heat of formation and heat of reaction with KOH, 6500f.
prepn. and reactions of, 3741f.
spectra (infrared and Raman) of, 7821a
**Carbonyl group**, bond in, of aldehydes and ketones, 7413f.
calcn. of free-energy function, heat content, heat and free energy of formation of, 5658e.
in carbon black, 2068g.
characterization of, in steroids, 3018h, 3019g.
detection of, 2777c.
*detection of*, color test for, 239i.
in rubber reclaim, 1600c.
in tissue, 8421c.
detn. of, 1280g.
detn. of, in fatty materials and their oxidation products and Me oleate hydroperoxide, 6841b.
effect on miscibility of liquids, 6817c.
effect on spectra of S compds., 4215h.
labeled with $C^{14}$, in pyruvic acid, 2582i.
in lignin, 8674e.
optical rotation due to, 4680e.
phys. consts. of, 2589h.
reactivity of, in isatin series, 215b
in thiolignin, 7225i.
vibration frequency of, 1656b.
viscosity and, of oxidized hydrocarbon oils, 4842a.
**Carbonylhemoglobin**, detn of, 4320g.
diffusion of, 3f.
effect on O detn. in blood, 7141h.
spectra of, of fetal and adult cows, 1850d
**Carbonylmyoglobin**, spectrum and extinction coeffs. of, 7058h.
**Carbonyl number**, detn. of, of lubricants and transformer oils, 3602f.
**Carbonyloxy group**, phys. consts. of, 2590e.
**Carbonyls**, complexes with tertiary arsines, phosphines and stibines, as catalysts for trimerization of $C_2H_2$ and its derivs., 6202a.
formation of, 56f.
metal, P 9398b.
in metal-coating on metals, P 7893b
of nonmetals, 1673b.
organometal, 2111e, 4596b
polymers of, 2535f.
review on, 3741f.
**Carbonyl selenide** (COSe), microwave spectrum of, 4141c.
potential function of, calcn. of interaction terms in, 8765c.
prepn. and properties of, 1673c
soly. of $CO(CN)_2$ in, 3683a.
Stark effect in, 4095e.
**Carbonyl sulfide**, detection of, 3806h
detn. and removal of, in coal carbonization, 9414b.
formation from reaction of camphor oxime with $Bz_2NCS$ and with PhNCS, 4232d.
formation in viscose, 9440c.
in fuel gas, removal therefrom and systems: piperidine $CO_2$-, morpholine $CO_2$-, 836g.
microwave absorption by, 8888h
microwave spectrum of, 1658a, 3293i
potential function of, calcn. of interaction terms in, 8765c.
reaction with $NH_3$, 2946d
removal from gases, P 7669e
spectrum of, 4141b.
spectrum of $OCS^{34}$, 8869h.
**Carboplasts**, the term, 1214e.
**Carborundum**. (See also *Silicon carbide*.)
alpha-conduction pulses in, 8263h.
bricks in furnace regenerator, P 7357d.
prepn. of, 2871c.
spectrum (x-ray) of, 4131f.
**Carbostyril** (*2-quinolinol or 2(1H) quinolone*), derivs., formation from quinoline derivs. by liver enzymes, 6267g.
dielec. potential and surface tension of solns. of, pH and, 3267g.
effect of vapors of, on aspergilli, 6277b
electrolytic hydrogenation of, 7355c
formation from 2-chloroquinoline, 9069g.
1-oxide, 2997b.
——, **6-(*p*-acetamidobenzyl)-4-methyl-†**, 645i.
——, **4-amino-**, 9068f.
——, **6-(*p*-aminobenzyl)-4-methyl-**, 645i.
——, **4-amino-5,6,7,8-tetrahydro-**, 9068g.
——, **6-*p*-bromobenzyl-4-methyl-**, 645i.
——, **6-*p*-chlorobenzyl-4-methyl-**, 645i.
——, **4,8-dimethyl-**, 228h.
——, **1-ethoxy-**, 2997c.
——, **hydroxy-**. See *Quinolinediol*
——, **6-*p*-methoxybenzyl-4-methyl-**, 645i.
——, **4-methyl-**, 228h.
——, **7-methyl-**, 5403d.
——, **8-methyl-**, formation by 8-methylquinoline oxidation in liver, 6267c.
——, **8-methyl-4-phenyl-**, 228h.
——, **4-phenyl-**, 228h.
**Carbothioplasts**, the term, 1214e.
**Carbowax compounds**. See "polyethylene" under *Glycols*.
**Carboxamides**. See *Amides*.
**Carboxazylic acids**. See *Amides*.
**Carboxyhemoglobin**. See *Carbonylhemoglobin*.
**Carboxylases**. (See also *Cocarboxylases; Codecarboxylase;* and the individual enzymes.)
β-, model of, 6267g.
β-, of plants, 5827i.
formation in bacteria, effect of pH of medium on, 8446f.
of plants, 5057c.
in soybean sprouts, 7554e.
**Carboxylation**, of aminophenols, 7925d.
of lepidine, 2-picoline and quinaldine, 7022d.
mechanism of, and analogous reactions, 1351h.
of phenols, P 3040d.
**Carboxyl group**, assocn. and, 7793e
cation-exchange resin contg., P 5517d
detn. of free, in oxidized rubber, 7741e
detn. of, in aromatic acids, 8974a.
in glucosidic compds, 4641g.
in humic prepns., 66c.
in tan liquors, 1205e.
detn. of polyuronide, app. for, 3614i
effect of, in chlorination of aliphatic compds., 4627i.
on fungistatic activity of $C_6H_6$ derivs., 4803h.
on gelation of cellulose nitrate, 8131e
on nitrosation of symdiaryl ureas, 170f.
on transformations of lactones of α-hydroxy diphenylacetic acids, 2496e.
free energy of bonds in, 3276h
hydrogen bonding and spectrum of, 3715
lyoparachors of O in, 2834d.
removal of, 7024h.
from aconitic acid, in cane sirups and molasses, 7153d
from aconitic acid, methyl galacturonide and pectinous substances 2126c.
from aconitic acid to form itaconic acid, P 678b.
from 3 alkoxycinchoninic acid derivs. 227h
from 3-alkyl-2 (2-thienyl)cinchoninic acids, 228a
from amino acids, 6570b
from amino acids by bacteria, effect of pH on, 8446g
from 4 aminosalicylic acid and its HCl, 2973b.
from 4-aminosalicylic acid and Na salt, 1154c.
from aspartic acid by *Rhizobium trifolii*, 4346f.
from benzo[g]quinoline 2 carboxylic acids, 1420a.
from 5 bromo-4-methyl 2,3 furandicarboxylic acid, 5020k
catalysis of, 7800h.
from cyanosuccinic acid monoesters, 2167f.
from 1,3 dialkyl-9 oxo 9*H* indeno[2,1-c]pyridine-4 carboxylic acids, P 5809a.
from dibromomalonic acid, 6975k
from β-(3,4 dihydroxyphenyl)serine by animal tissue and *Streptococcus faecalis*, 2691e.
from formylcinnamic acids, 7456e
from 2 furanacrylic acid, 2615e
from β-halo fatty acids, 7901f.
from (*o*-hydroxyphenyl)alanine in animal organism, 9103d.
from 3-isoxazolecarboxylic acids, 7020i.
from labeled malonic acids, isotope effect in, 7333a.
from malic acid in plants, triphosphopyridine nucleotide specific enzyme catalyzing, 9168e.
from malonic acid derivs., 7904d
from malonic esters, P 7956e
from 1,2-naphthalenedicarboxylic anhydride derivs., 206i.
from niacin by cathode-ray irradiation, 8863c.
from optically active amine salts of malonic acid-$d_2$ derivs., 3392e.
from oxalacetate by blood, 3903e.
from oxalacetate by Cu and Fe, 5839d.
from oxalacetic acid, effect of cations on, 5057f.
from oxalosuccinic acid, 1013h, 6579h.
from 1-oxo-2,1*H*-benzopyran-3(and 4)-carboxylic acids, 1045e.
from pimelic acid derivs., 8578e.

*removal of*, from polycyclic azulenecarboxylic acid esters, 207*d*.
from quinaldinic and isoquinaldinic acids, kinetics of, 7310*b*.
from reaction products of ketene with carbonyl compds., 5366*g*.
from resin acid by pyrolysis, 9442*i*.
from 2 - sulfanilamido - 5 - thiazolecarboxylic acids, P 2644*ghi*.
from triacetic acid, 1724*i*.
from $CCl_3CO_2H$, 5361*g*.
in viscose sheet, effect on equil. absorption of Chrysophenine G, 4015*h*.
**Carboxylic acids.** See *Acids; Fatty acids*.
**Carboxypeptidases** (See also *γ-Glutamic acid carboxypeptidase*.)
action on peptide derivs. of tryptophan, 4712*c*.
detn. of, 713*e*.
effect of x-rays and α-rays on, 6678*b*
esterase activity of, 4712*b*.
inhibitors of, structural requirements for, 6265*i*.
kinetics and inhibition of, 701*d*.
optical specificity of, 7068*e*.
pancreatic, 3859*h*.
chem. nature and mode of action of, 7068*d*.
sedimentation behavior and mol. wt. of, 9117*e*.
specificity of, 1448*b*.
**Carboxyplasts**, the term, 1214*e*
**Carboxypolypeptidase.** See *Carboxypeptidases*.

**Carcinogenic substances** (See also *Benz[a]anthracene; Benzopyrene; Cholanthrene, methyl-, Carcinogenic substances; Dibenz[ah]anthracene*.)
2-acetylaminofluorene analogs as, 9238*e*.
action of, 302*e*, 8049*d*
action of, and viruses in relation thereto, 1479*f*.
analogs of, 7013*b*.
antioxidant effect of, 1859*c*.
azo compds. as, 5109*d*
azo derivs., polarography of, 7835*g*
benzanthracenes and benzacridines as, 5731*g*.
3,4-benzopyrene as, effect of lipide solvents on, 307*d*.
3,4-benzopyrene as, effect of nonlipide solns. on, 307*f*
chem. constitution in relation to activity of, 8375*b*
cholesterol assocn. with, in blood, 3083*g*.
cholesterol pyrolysis products and, 7573*i*.
from coal tar, 306*h*.
complex with cell element, 3920*i*
complex with tissue, 9220*c*.
*p* - dimethylaminoazobenzene derivs., 3801*e*.
effect of interrupted treatment by, on tumor formation, 749*e*.
effect of solvents on effectiveness of, 1857*h*.
effect on bone callus formation, 9239*f*.
on guinea pigs and their offspring, 7121*h*.
on papain, 5054*d*.
on plants, 7553*c*.
on proteolytic enzymes, 3476*f*.
on vitamin C in liver, 3921*e*.
electronic structure of, 9234*e*.
estrogenic hormones as—see *Estrogenic hormones*.
2-fluorenamine as, 300*b*, 5770*b*.
fluorene derivs., 3811*a*, 7004*i*.
fluorescence and penetration studies on, dissolved in ethylene glycols and acetone, 8525*e*.
formation and localization of, 7988*a*.
hydrocarbons, cancer production in rhesus monkeys with, 304*a*.
7-hydroxy-2-acetamidofluorene as, 307*b*.
inductive phase in contact, 5850*d*.
infrared absorption in relation to activity of, 3915*c*.
kinetoclastic substances and, 8517*a*.
in livers of rats fed various diets contg. *p*-dimethylaminoazobenzene, 2310*d*.
metabolism of, 750*g*.
α-naphthylacetic acid as, 8047*c*.
photodynamic effect of, measurement of, 7149*i*.
polyethylene glycols as carriers for, 5108*g*.
protein binding of 4-dimethylaminoazobenzene and Me derivs., 8048*b*.
reviews on, 1856*c*, 3514*h*, 7120*b*.
in skin with precancerous keratoses of actinic origin, 3921*d*.
solubilization by assocn. colloids, 4363*d*.
sunlight action on, 7012*b*.
survey of, 749*h*.
tumors of alimentary tract from feeding, in mineral oil, 8046*c*.
tyrosine as, 1480*h*, 7571*d*.
urethan as, 305*a*.
**Carcinoma.** (See also *Cancer; Neoplasms; Sarcoma*.)
from 2-acetaminofluorene, effect of thouracil on, 1857*i*.
from 2-acetylaminofluorene, 750*h*, 8046*h*.
arginine and arginase in relation to adeno, 2306*i*.
3,4 - benzopyrene effect on Ehrlich's adeno-, 4363*d*.

disproportionation of, to *p*-cymene, 5012*f*.
isomers, *p*-cymene from, 5767*i*.
**Δ³ - Carene** (*4,7,7-trimethyl - 3 - norcarene*), *d*-, detn. in mixts. with *d*-α-pinene and *l*-nopinene in turpentines and optical rotation of, 5971*b*.
*d*-, viscosity of, 5249*c*.
reactions on activated C, 5656*i*.
**Carex**, feeding stuffs from, in Europe, 7604*f*.
**Carica papaya.** See *Papaya*.
**Carminatives**, action of, 5114*g*.
**Carminic acid**, as oxidimetric indicator, 8949*a*.
polarography of, 2521*a*.
**Carnallite**, argon of mass 40 in, 5712*a*.
crystn. from $CaCl_2$ brines, 2743*d*.
glass batch contg., P 9407*d*.
in hydrocarbon-fuel manuf. from fat acids, P 4835*b*.
prepn. for production of Mg, 2553*d*.
**Carnations**, cutting propagation and disease control, 9338*e*.
fertilizer expts. with, with N and K, 4804*c*, 9337*h*.
fungus control on, 7178*d*.
pest control on, with $Na_2SeO_4$, 1141*i*.
red-spider control on, 807*b*, 811*f*.
**Carnauba tree.** See *Palms*.
**Carnauba wax**, adhesive from, P 7756*c*.
electron microscopy of dispersions of, contg. borax and soap, 2002*b*.
emulsions of, waxing rubber goods with, P 2803*b*.
sapon. no. of, detn. of, 5211*i*.
**Carnegieite**, thermal properties of, 9404*i*
**Carnitine**, as methyl donor, 7526*h*.
**Carnosinase**, in kidneys, 7068*b*.
**Carnosine**, in muscles in tonic and atonic states, 5478*a*.
**Carnotite**, crystal structure of, 8983*i*.
plutonium in, 1618*i*.
radium in, of Colo., 2000*b*
as uranium source, 8270*b*.
**Caroa** and(or) **Neoglaziovia variegata**, fiber, 5192*a*.
**Carob beans** (*ceratonia siliqua, locust beans, St.-John's bread*), compn. of, 5128*f*.
juice of, 4814*e*.
meal, processing for textile finish and size manuf., 5596*e*.
mold growth on, effect of water on, 9275*g*.
polyphenols in, 8452*d*.
**Carob gum**, 8717*a*.
constitution of, 581*ac*.
gel compn. from mixt. with Irish-moss ext. and edible salt, P 5132*b*.
mannose from, 2171*d*.
mixt. with Carrageen and K salt, 5510*g*.
mol. wt. of, 1626*g*.
properties of, 21*f*.
**Carobinase**, effect on *Endamoeba histolytica*, 8550*f*.
**Carolic acid**, effect on heart, 1110*d*, 7138*h*.
**Caronamide***, absorption and elimination of, 759*a*.
detn. of, 5074*i*.
effect on appearance of phenol red in kidneys, 3502*i*.
on blood penicillin levels and on renal function, 6318*b*.
on penicillin in blood, 5500*i*.
on phenolphthalein excretion, 5120*h*.
**Caro's acid.** See *Peroxymonosulfuric acid*.
**Carotene, Carotin.** (See also *Lipochromes; Neo-β-carotene*; "A" under *Provitamins*.)
absorption from digestive fat, 9211*h*
in alfalfa, 3539*a*, 8574*e*.
effect of moisture on, 9291*e*.
extn. of, 5543*f*.
prevention of loss of, 2339*c*, P 6760*d*.
all-*trans*-γ-, provitamin A activity of, 9180*f*.
α- and β-, effect on glucide metabolism of yeast, 4330*f*.
vitamin A activity of, 7560*e*.
vitamin A storage after feeding, 8024*g*
α-, β- and γ-, and derivs., review on, 3798*d*.
α-, β- and γ-, spectra of, 1264*g*.
α-, pyrolysis of, 2172*g*.
bacteria in concn. of, P 6792*d*.
β-, absorption and solvent of, 9196*e*.
color of, steric hindrance and, 493*e*.
in gametes of Fucaceae, 2677*f*.
in intestine, vitamin A formation from, 3899*e*.
lipide oxidation in presence of, 2172*i*.
lipide oxidation in presence of chlorophyll and, 2173*a*.
in loquat, 8456*g*.

β-, in palm fruits, 3116*d*.
retinene formation from, 2294*h*.
sepn. from other pigments in egg yolk and chick carcass, 2291*h*.
standards for, 3561*g*.
β- and K-, in oranges, 2708*i*.
-bleaching substances in bacon adipose tissue and hemoglobin solns., 3633*g*
in blood, effect of dietary soybean and butter oils on, 8473*d*.
in blood plasma and milk of cows, effect of soybeans and soybean meal on, 8479*d*.
in blood plasma of cattle, effect of breed, age and season on, 6711*f*.
in blood plasma of heifers, effect of vitamin A on, 2293*h*.
in blood serum during nutritional reconditioning of children, 3498*b*
bodies, chromoplasts and vitamin A in relation to, 731*d*.
brine contg., for canning vegetables, P 5882*f*.
in broccoli, carrots and collards, effect of geographical location and fertilizers on, 6754*a*.
in butter (Wyo.), 6327*e*
in by-products of meat packing industry, 9285*d*.
in cabbage, effect of large scale methods of prepn. on, 9288*c*.
in canned goods, effect of storage on, 1491*i*, 1493*h*
from carrots and vegetables, P 3118*a*
in carrots (dried), effect of antioxidants on, 7157*b*.
in *Celtis integrifolia* and *Trema guineensis* seed oils, 1201*e*.
al id ass, 8574*d*, 9291*g*.
in cod-liver oil, conserva ele hydrogenation, 6841*i*.
in colostrum, 8472*f*.
in colostrum, effect of cold storage on, 9193*d*.
concentrates of, prepn. and storage of, 3971*h*.
detn. of, 6692*h*, 6948*d*.
in alfalfa meal, 7152*d*
in carrot meal, 7156*g*
in dried grass, 2895*e*
in feeding stuffs, 6756*h*, 9276*b*
in plants, 711*c*.
in plants, preservation of samples for 9291*d*.
in silage, 3946*e*.
in sweet potatoes, 1395*d*.
diasolysis from carrots, 4077*g*
in diatoms, 2281*e*.
effect of cathode rays and x-rays on, 9276*e*.
effect on fat of turkeys, 1087*i*
effect on growth of chicks and storage in tissue, 4353*i*.
extn. from fats and oils after sapon., P 3220*e*.
from green leaves, 9378*a*
from plants, P 3152*d*, P 5158*b*.
in feeding beef calves, 6712*b*.
in feeding stuffs, 1123*d*.
effect of water content and storage temp. on, 1879*g*.
effect on vitamins A and C of blood, milk and liver of ewes and their lambs, 8467*c*.
for pigs, vitamin A content of blood plasma and liver in relation to, 9193*c*.
for poultry, prevention of loss of, 3538*h*.
in *Festuca kingii* and in alfalfa silage, 9273*de*.
in food, 3535*i*, 4780*g*
in grasses and milk, 9328*g*
in grasses of Southern Great Plains area, 1501*h*
in hay, losses on curing and storing, 4783*i*.
in *Holothuria*, 2334*b*.
isomers of, crystal form of, 6881*g*.
isomers of, isolation and spectrophotometric characterization of, 7152*e*.
kelp as source of, 8616*f*.
in kidney bean plants, effect of 2,4-dichlorophenoxyacetic acid on, 8021*c*.
in leaf meals, 4343*f*.
in leaves, 1837*a*.
in meats and vegetables, effect of electronic cooking on, 4779*f*.
metabolism of, in herbivores, 3899*b*
in milk fat, effect of storage on, 7805
in milk of uniovular calf twins, genetic influence on, 1098*h*.
from *Navicula* cultures, 3878*g*.
in nutrition of cattle, 6712*a*.
in oil of Crustaceae, 1087*d*.
in oil-palm oil, 2792*d*.
in olive pit oil, P 7647*i*.
oxidation (coupled) of, 7987*c*.
in oxidation of unsatd. esters, 9076*f*.
in peanut oil, free fatty acid content and, 8178*i*.
in peas, effect of maturity, fertilizers and variety on, 9289*f*.
in peppers, effect of ripening on, 2338*f*.
peroxides, formation in autoxidation of peanut oil, 5973*a*.
in photolyzed milk, 735*d*.
prepn. and solns. thereof, P 8106*b*.
prepn. from leaf-meal exts., 8101*e*.
prepn. from water hyacinth, 9364*b*.
preservation of, in carrots and red clover during drying, wet preservation and storage, 4395*i*.
in red clover and timothy at various stages of growth, 727*h*.
reproductive capacity in mammals in relation to, 9183*e*.
retention in cannery wastes and food prepn., P 330*g*.
review on, 9190*c*.
in snap beans, irrigation and, 1515*a*.
in spinach, effect of large scale methods of prepn. on, 9288*f*.
in sweet potatoes, 9329*h*.
in sweet potatoes (preserved), 1121*i*
in sweet potatoes (Puerto Rico), effect on vitamin A and butter fat, 3946*h*
in tomatoes (dried), effect of storage on, 1122*b*.
in tomato juice (canned), effect of storage on, 1877*h*.
utilization by rat, effect of α-tocopherol on, 736*h*.
from vegetable leaf waste as vitamin A source for chickens, 8466*f*.
vitamin A formation from, in animal organism, 4745*h*.
effect of 2-thiouracil on, 733*c*.
in sheep, effect of thiourea on, 5096*e*.
site of, 2682*b*.
in wheat (hard winter), 6331*d*.

**Carotene, dihydro-*, β**, spectrum of, 3798*d*.

**ζ-Carotene**, structure of, 1311*e*

**Carotenoids** (*carotinoids*). (See also *Antheraxanthin; Astacin. Lipochromes. Retinene; Xanthophylls; Zeaxanthin*, and "A" under *Provitamins*.)
in carrots (dried), stability of, 7156*i*.
chlorophyll conversion to, in tomatoes, 2286*d*.
detection in yeast, 5446*g*
detn. in blood plasma, interferring substances and, 8423*c*.
effect on glucide metabolism of yeast, 4330*e*
effect on growth of chicks and storage in tissue, 1353*f*.
extn. from fats and oils after sapon., P 3220*e*
of fruits of India, 5830*g*
generative functions of plants and, 8011*i*
in *Holothuria*, 2334*a*.
in leaves, 1836*i*.
of *Lilium candidum* anthers, 4233*d*.
of loquat, 8456*f*
metabolism in plant leaves during development, 5453*i*.
metabolism in typhoid fever, 2294*i*.
in milk of uniovular calf twins, genetic influence on, 1098*h*.
of oranges, 2708*h*
oxidation by enzymes, 8406*b*
from palm oil, in concd. form, P 2794*i*.
in papaya, 9314*c*.
in peaches, effect of canning and freezing on, 3535*h*.
in photosynthesis of diatoms, 2281*c*.
reviews on, 3798*c*, 7561*f*.
sporogenesis and, 4730*i*.
storage by chicks, 2291*f*.
synthesis of, 2587*d*.
therapeutic and physiol. effects of, 6366*a*.
in *Thoracophelsa mucronata*, 5123*d*.
vitamin A activity of, 7500*e*.

**Carotenols**, effect on fertilizing capacity of fowl sperm, 1088*c*.

**Carotid**. See *Arteries*.

**Carotid sinus**, acetylcholine and cholinesterinase in, and in *carotis communis*, 5842*a*.
acetylcholine sensitivity to, effect of NU 683 on, 7134*c*.
discharge from, adrenal gland and, 5470*c*.
effect of sparteine mono- and diphenylethylbarbiturates on, 2316*d*.
reflexes, intracisternal injection of drugs and, 7130*b*.
respiratory reflexes from, effect of NU 683 on, 7134*d*.

**Carotin**. See *Carotene*.

**Carotinoids**. See *Carotenoids*.

**Carotol**, constitution of, 3808*a*.

**Carpet beetles**, control of, P 350*b*.
control of *Anthrenus verbasci*, 5894*e*.
control of *Anthrenus verbasci* in insect boxes, 7631*c*.
control of *Attagenus piceus*, P 6358*d*.
control of black, 9348*i*.
control of, DDT and Mitin FF in, 8080*e*
control with MeBr, 1900*g*.
rearings of *Attagenus piceus* in lab., mite control in, 1899*g*.
toxicity to *Anthrenus verbasci* of *p*-di chlorobenzene and $C_{10}H_8$, 1142*b*.

**Carpet grass**. See *Grasses*.

**Carpets**. (See also *Rugs*.)
energy-absorption ability or resilience of, measurement of, 5957*g*.

**Carpinus betulus**, cuticular transpiration in, and its relation to membrane swelling capacity, 730*e*.

**Carpocapsa pomonella**. See *Codling moth*

**Carrageen** (*Chondrus crispus, Irish moss*), diabetic sirups contg., 3145*a*.
extn. of, and mixt. with chocolate flavor sirups, P 3542*a*.
extn. of, and mixt. with locust-bean gum and K salt, 5510*g*.
gel compn. from mixt. with locust bean gum and edible salt, P 5132*b*
manuf. and properties of, 9206*g*
mixt. with lecithin, preservative coatin for foods from, P 5881*a*
stabilizer from residue of, P 5132*a*.

**Carrageenin**, from algae, 4728*i*.

**Carrel-Dakin solutions**, alky. of, 8150

**Carriers**, for insecticides—see *Insecticides*

**Carroting**. See *Furs*.

**Carrots**, acids in, chromatographic sepn and identification of, 6947*a*.
amino acids in, 3534*g*.
bacterial metabolism-inhibiting substances in, 9165*b*.
bromine and Cl in, 3537*g*, 8572*d*
canned, vitamins in, effect of storage temp. on, 1493*h*
carotene and vitamin C in, 3536*i*
carotene diasolysis from, 4077*g*
carotene, dry wt. and vitamin C of effect of environment and fertilizers on, 6754*a*.
carotene from, P 3118*a*.
carotene in, preservation of, 4395*i*
carotenoids in, during development 5454*a*
DDT effect on, 1520*i*
dried, carotenoid stability in, 7156*i*
effect of antioxidants on, 7157*b*
sulfite loss from, 7156*e*
glycerol utilization by, 2281*c*
growth substance effect on yield of, 1839*b*.
leaf meals from, nutritive value of, 1343*e*
meal, detn. of carotene in, 7156*i*
melanin-forming oxidases in, 2771
membrane substances in roots of, 6287*i*
nitrogen in cultures of, 3495*d*.
pectins from, effect on cranberry and red currant jams, 3536*i*.
peroxidase in chloroplasts of, 1083*d*
pest control on, 7178*i*.
petroleum-hydrocarbon effect on, 1895*d*
plastids of, cytochrome oxidase in, 8454
potassium ion effect on growth of, 2781*b*
respiration of, effect of succinate on, 8455*c*
soil pH for, 6349*h*
sucrose inversion and synthesis by, 6286*i*
sugar detn. in, 6752*i*.
sugars in, effect of phosphate fertilization on, 7624*c*.
toxicity to, of DDT and hexachlorocyclohexane, 5148*a*.
vitamin A availability from, 5459*b*.
vitamin B1 in Italian, 6753*h*.
vitamin C in, 5511*b*.
vitamin C in, effect of blanching with radar energy on, 1493*b*.
weed control in, 1894*e*, 1895*c*, 2359*a*
wireworm control in soil under, 348*a*
yellows of, control of, 9329*b*.

**Carthamus**. See *Safflower*.

**Cartilage**, calcification of hypertropic epiphyseal, *in vitro*, following inactivation of enzymes, 1446*a*.
chondroitin sulfate combination in, 3910*g*.
chondroitin sulfate content and distribution in, in osteoarthritis, 6727*i*.
degeneration of, chloride content of car-

tilage, muscle and skeletal tissue in relation to, 9237*i*, 9238*a*.
glycogen in, in rickets and its relation to healing, 8038*a*.
metachromasia of, enzyme diastase destroying, 8406*a*.
oxygen consumption by, 747*e*.
physiology of hyaline, 7118*c*.
**Cartón.** See *Fiberboard; Paperboard.*
**Cartons.** See *Containers.*
**Cartridges** (*explosive*), case cup of, standards of A.S.T.M. for brass, 4203*b*.
cases for, from steel, P 3770*e*.
cases for, intergranular weakness in brass, 2563*i*.
Parkerized clips for, rust-preventive slushing compds. for, P 1563*a*.
shotgun-shell casings, protein adhesive for, 900*c*.
**Cartridges** (*respirator*). See *Respirators.*
**Carum, *carvi*(*carui*)**—see *Caraway.*
**Carvacrol** (*2-p-cymenol*), bactericidal action of, 6363*g*.
detn. in thyme oil, 8614*a*.
effect on polarography of metals, 5316*a*.
identification of, 7447*e*.
propionate, 613*h*.
**Carvacrol, chloro-**, antifouling properties of, 3964*b*.
—, **5-chloro-**. See *Carvasept.*
—, **5,5′ - (1,2 - diethylethylene)di-**, and esters, 614*c*.
—, **5,5′ - (diethylidene-ethylene)di-**, and esters, 614*b*.
—, **5-nitroso-**, spectrum and isomerism of, 5378*h*.
**Carvacrolphthalein**, laxative activity of, 2319*f*.
**Carvacrylamine** (*2 - aminocymene, 2-cymidine*), reaction products with maleic anhydride polymers with Me methacrylate, 8202*c*.
**Carvacryl bromide.** See *p-Cymene, 2-bromo-.*
**Carvasept**, 4427*c*.
**Carvene** See "*d-*" under *Limonene*
**Carvomenthene** (*1-p-menthene*), acylating oxidation of, with $Hg(OAc)_2$, 7915*c*.
8-alkoxy derivs., 8368*i*.
bromination of, 6601*a*
reaction with PhOH, P 6237*a*.

**Cascara**, assay of fluidext. of, 5536*i*.
manuf. of dry exts. of, 1149*a*.
**Cascara sagrada**, 355*i*, 4810*h*, 8100*h*.
**Casehardening.** See *Metals; Steel.*
**Casein, Caseinogen.** (See also *Curd.*)
acylated, in latex prepn., P 9521*a*.
adhesives from—see *Adhesives.*
Ag-nized, effect on animals and humans, 3532*i*.
aluminum compn. with, stabilizer for, P 3242*f*.
ammonium deriv., heptane emulsions in, crit. dispersity of, 7776*e*.
baking properties of, effect of heat-treatment on, 6328*f*.
basophily of, 5054*g*.
biuret complex, spectrum of, 6249*i*.
bonding and water adsorption by, and effect of HCHO on, 7787*c*.
in breadmaking, 1872*i*.
calcium compd. in, detn. of size of, 7537*c*.
cathepsin action on, 9089*c*.
N-chlorinated, P 7517*g*.
chlorine bound to, 9238*a*.
in cirrhosis treatment, 7148*d*.
coagulation by rennet, detn. of alk earth ion by, 7790*g*.
coating compn. from alginate, polymerizable compd. and, P 1611*c*.
coating (fire-retardant) from, 4493*a*.
coating from, prevention of darkening of luminophors in sun by, P 6090*a*.
coating with, on Al and Al alloys, P 5001*e*.
in colostrum of cow, effect of prepartal rations on, 740*i*.
condensation products with HCHO, compns. with nitrilotriacetic acid esters, P 5229*i*.
conversion into paracasein, 5812*g*.
copper complex with, phenoloxidase action of, 3856*a*.
decompn. of, 260*d*.
detection of, 4324*h*, 5704*b*.
detn. in milk, 3533*d*, 7598*h*.
devitaminized, P 8072*d*.
diet contg., effect of feeding excess glycine, arginine and methionine during, 4739*b*.
diet contg. salad oil and, vitamin A activity of, 9185*h*.
in diet, effect on hemoglobin and plasma protein production, 3500*e*.
diet low in, effect of gelatin on tryptophan transformation to niacin on, 3500*a*.
drying of, and water absorption by, 6882*b*.
effect on biochem. decompn. of cellulose, 3009*d*
on growth efficiency of amino acids, 1468*f*.
on hypophysectomized rats and effect of growth hormone thereon, 1093*a*
on lactation and reproduction of rats fed purified rations, 1091*c*
in polarographic analysis of brass, 4181*h*.
on retention of hepatic riboflavin and on development of liver tumors from azo dyes, 4741*c*.
egg substitutes from, P 5512*e*
growth-promoting value of, 3897*g*
human, 9122*g*.
human and cow, 3900*h*.
hydrolysis of, by acid and enzyme, amino acid liberation from, 1819*b*.
by acid, food fortification products from, 7599*a*.
by pancreatic exts., 9089*d*.
hydrolyzate of, biol. action of, 3524*b*
dicoumarol inhibiting action of, 3094*d*
effect of glucose on deamination by *Bacterium fluorescens liquefaciens* and *Proteus vulgaris*, 5418*c*.
effect on nutritional value of corn, 9179*e*.
effect on regeneration of plasma proteins in protein depletion, 8023*b*.
glycine detection in, 4978*b*.
growth-promoting action on *Lactobacillus leichmanni*, effect of vitamin C on, in relation to reduction of oxidation products of vitamin $B_{12}$, 9158*c*.
methionine from, 5743*b*.
optical specificity of, 6265*b*.
*Penicillium notatum* culture medium contg., P 7649*b*.
utilization of peptides of, 6741*b*.
iodinated, action, fate and distribution of radioactive, 9255*b*.
in diet and growth of parasitized chicks, 1088*f*.
effect on cattle, 8474*d*
effect on thyroid development in chick, 8482*a*.
prepn. of radioactive, 4305*g*.
thyroxine content and biol. activity of, 9185*f*.
iron passivation with phosphated, 8246*d*.
isocyanate deriv., P 3241*f*.
kersey impregnation with solns. of, wear resistance and, 6830*h*.
lactalbumin differentiation from, 3533*h*.
leather finishes contg., 7733*h*, 9510*g*.
manuf. from milk (buffalo or cow), 1496*i*.
manuf. of, 7599*b*.
in milk, 7598*b*.
mixts. with CaO and Na silicate or with NaOH, rheological properties during thickening of, 2844*a*.
mixt. with carotene, 3971*i*.
nutritive value of, 1469*c*, 3900*d*, 8568*a*.
amino acid content of and, 1818*a*.
for cotton-rat, 288*h*.
from cow and human, 6748*i*.
effect of alc. extn. on, 289*b*.
effect of autoclaving with dextrose on, 8478*a*.
effect of vitamin B complex on, 1468*d*.
for rabbits, 1843*c*.
oxidized, utilization for methylation of homocystine in animal organism, 3895*b*.
pancreatic-juice action on, and products therefrom, 9089*e*.
for paper and pulp manuf., demand and supply of, 5948*h*.
phenylacetylated pancreatic digest of, effect on penicillin production, 2269*h*,
in pill prepn. with oleophilic liquids, 1149*i*.
plaster of Paris contg., P 4444*a*.
plastic emulsion contg., P 6000*e*.
plastics from, 439*i*.
plastics from Me stearate, polystyrene and, P 3235*b*.
prepn. of, 4725*c*, 9282*a*.
preservation of, esters of unsatd. tricarboxylic acid for, P 7634*d*.
in protection against $CCl_4$ poisoning, 2292*g*.
proto acid and Na salt, colloidal properties of, 3053*h*.
proto acid, water removal from, 3860*d*.
purification of, P 4791*c*, P 5136*d*.
rayon-cord treatment with, effect on cord-rubber adhesion and flex life of tires, 2012*g*.
serology of, from milk of ass and cow, 6302*f*.
in sheep milk, acidity and, 9280*c*.
sizes from, for rayon, P 856*e*.
sol., from defatted milk for food fortification, 7598*f*.
soybean—see *Legumin.*
spinning solns. of, P 4021*c*.
spinning solns. of, air removal from viscous, P 4021*d*.
sulfur balance indexes of, and effect of methionine thereon, 8483*f*.
textiles, yarns, etc.—see *Lanital; Rayon.*
in thickening latexes, 6411*a*.
threonine from, 3787*b*.
tryptophan availability from, for chicks, 2293*a*.
utilization of, supplemented with methionine, effect of thiamine and riboflavin intake on, 5833*f*.
vegetable—see *Legumin.*
vitamin C excretion after feeding vitamin $B_{12}$, carcinogen and, 6315*e*.
water-vapor absorption by, 467*d*, 4537*b*.
**Caseinase.** See *Cathepsin.*
**Cashew**, -nutshell liquid, 9050*a*.
-nutshell liquid and its distillates and polymers, allyl ethers of, P 3240*i*.
allyl ethers of, reaction products with aldehydes, P 3241*b*.
condensation products with hydrocarbon polychlorides, P 904*d*.
resins from acrolein and, P 2030*i*.
-nutshell liquid, cardol component of, 1348*e*.
chem. resistance of coatings on wood from, 3632*e*.
ethyl ether, reaction product with cresols, condensation product with $(CH_2)_6N_4$, P 4513*b*.
hydrogenation of, and its derivs. with Raney Ni catalyst, P 4497*i*.
oxidation of, and oxyalkylated derivs. of, P 1557*e*.
polymers of, in friction elements, P 2715*b*.
sepn. from kernel oil, P 9404*g*.
solvent fractionation of, P 5215*i*.
**Cashew oil.** See *Oils.*
**Cashmere**, wool—see *Wool.*
**Casimiroa edulis**, carotene and vitamin C in, 3536*a*.
**Cassaine**, from *Erythrophleum*, 8101*b*.
**Cassava** (*manioc*). (See also *Manihot; Tapioca.*)
fermentation of roots of, 5530*i*.
meal, as feed for swine, 9292*i*.
starch, adsorption of malt α-amylase by, 9504*g*.
**Cassia.** (See also *Senna.*)
*reticulata*, antibiotic substance from, 3062*f*.
*tora*, carotene and vitamin C in, 3536*b*.
**Cassic acid.** See *2-Anthraquinonecarboxylic acid, 4,5-dihydroxy-.*
**Cassida vittata**, control on beets, 9346*h*.
**Cassiterite.** (See also *Tin ores.*)
of Alaska (Potato Mt., Seward Peninsula), 4608*e*.
of Belgian Congo, 2135*d*, 6546*a*.
concentrates from Sn-bearing pegmatites of Katanga, loellingite in, 6543*e*.
concn. of, 979*c*.
crystal form of artificial, 6031*g*.
elements in, of Far Eastern U.S.S.R., 6123*h*.

in greisenized pegmatites, decay of $Sn^{115}$ to $In^{115}$ by electron capture in, geol. age and, 1691*h*.
origin of, in quartz-sillimanite veins in Nigeria, 6117*i*.
scheelite flotation from, 2139*i*.
in tantalum-bearing deposits of Pilbara goldfield, W. Australia, 6124*e*.
tin detn. in, 4174*b*, 6934*c*.

ionic mechanism of, in region of unimol. adsorption, 7801*e*.
of isomerization of aldehydes into ketones by acids, 4632*f*.
of cod-liver oil by $SO_2$, 9380*g*.
of hexanes by Al halides, 5656*f*.
of isopropyl alc. decompn., 7802*i*.
journal: J. of Research Institute for, Hokkaido University, 3278*e*.
by manganese oxides, 1623*f*.
of mercury reaction with $O_2$ by activated C, 6054*c*.
by metals, 7769*d*.
multiplet theory of, hydrocarbon cracking on $Al_2O_3$ and, 1250*c*.
of 1-naphthylamine reaction with dichromate or vanadate by hydroxycarboxylic acids or $H_2C_2O_4$, 4977*f*.
neg., in oxidation of HBr, 7800*e*.
of nitric acid reaction with Zn by Pt, 6101*i*.
of nitrogen dioxide reaction with $SO_2$ on glass, 7308*d*.
of oxidation of coal and petroleum products with air, 5133*e*.
of Et linoleate by $Bz_2O_2$, 5271*g*.
of HBr by chromic acid with $MnSO_4$, 1634*f*.
of hydrocarbons, 6565*h*.
of org. compds. in flow, 927*d*.
of $PH_3$ in adsorbed layers, 6898*a*.
of $SO_2$ by metals, 5910*g*, 8325*d*.
of phenyl isocyanate reaction with alcs., 7441*a*.
by phosphorus acids, corrosion prevention in, P 8349*f*.
photochem.—see also "sensitization to" under *Light*.
poisoning in heterogeneous, 6498*b*.
of polymerization—see *Polymerization*.
of polythionate decompn., 2886*f*.
radioisotopes in studying mechanism of, 1172*f*.
of reduction by colloidal Rh in liquid phase, 27*e*.
of reduction (electrolytic) by Hg of cathode, 955*g*.
review on heterogeneous, 1634*h*.
selectivity in, 6497*h*, 8832*a*.
by semiconducting oxide catalysts, 474*i*.
of soln. of Cu by Cu and halogen ions, 6496*f*.
in sulfuric acid manuf., 8621*f*.
theory of homogeneous, in org. chemistry, 474*g*.
thermodynamic properties of adsorption complexes in, 1634*i*.
**Catalysts**. (See also *Antioxidants; Auxins; Catalysis; Enzymes; Growth substances; Hormones; Polymerisation modifiers; Promoters; Vitamins;* and "vulcanization accelerators" under *Rubber*.) P 825*ef*, P 4791*f*.
in acetal formation from butyl vinyl ether and phenols, 3783*e*.
in acetal manuf., P 2222*c*.
from $C_2H_2$ and alcs., $HgSO_4$ and $H_2SO_4$ as, P 5034*f*.
from $C_2H_2$ and alcs., $HgSO_4$ as, P 5034*g*.
from alcs. and vinyl esters, mixt. of $HgO$, acids and $BF_3$ complexes as, P 1433*h*.
in acetonitrile prepn. from $C_2H_2$ and $NH_3$, molten halides as, 3778*f*.
in acetylene and S removal from coal and synthesis gas, 3169*i*.
in acetylene reaction with AcOH, P 5035*h*.
in acrylonitrile and succinonitrile manuf.

from ethylene oxide and HCN, P 3439*g*.
in acrylonitrile manuf. from $C_2H_2$ and HCN, P 1051*ab*, P 3439*a*, P 7037*c*.
activation of CO and O desorbed from, 4088*a*.
activity of, prepn. temp. and, 4935*b*.
in acylation, with acyl chlorides, $H_2SO_4$ as, 7000*i*.
of alkyl aryl ethers, P 7967*a*.
of alkyl phenyl ethers, strong HO acids as, P 7966*g*.
of furan and thiophene, $BF_3$ complexes as, 214*b*, 6204*a*.
of furans, P 3464*i*, P 3465*bd*.
of olefins, P 2634*d*.
of thiophene, P 2643*g*, P 2644*abde*.
of thiophene, I as, P 3465*g*.
adsorption and desorption of N and stearic acid by supported, and their components, 6897*g*.
adsorption by, 2498*c*.
in alc. addn. to $(CH_2{:}CH)_2O$, effect of acid-base nature on, 2079*d*, 6157*c*.
in alc. and aldehyde manuf. from CO, olefins and H, Co or Fe as, P 5032*a*.
in alc. decompn., P 4835*d*.
in alcoholysis, disproportionation and transesterification of silicic acid esters, 5737*h*.
in alcoholysis of esters, acid, 7418*c*.
of polyvinyl esters, alkali metal alkyl carbonates as, P 6867*f*.
of soybean oil by EtOH and MeOH, alkalies as, 5209*cde*.
in aldehyde and ketone manuf. from mixts. of carboxylic acids, P 5791*h*.
in aldehyde manuf. from olefins, CO and H, Co as, P 4685*d*.
from alkali metal ferrates and Fe oxides, P 6338*g*.
in alkenylation of aromatic hydrocarbons, $BF_3$-$H_3PO_4$ as, P 7507*f*.
in alkoxyacetaldehyde acetal manuf. from formals, CO, H and alcs., Co or Ni as, P 675*a*.
in alkylation and hydrogenation (simultaneous) of quinoline, P 2241*c*.
in alkylation and isomerization, metal halide complexes with ethers as, P 8666*b*.
in alkylation and isomerization of paraffins, HF-$BF_3$ as, P 5583*i*, 8074*d*.
in alkylation and polymerization, $BF_3$ and its compds. as, 1711*f*.
in alkylation, of alkyl aromatic hydrocarbons, azines, oximes and similar =C—N— compds. as, P 6657*g*.
$AlCl_3$-nitro paraffin solns. as, 108*e*.
of aniline with alcs., P 7041*h*.
of aniline with butene, $Al_2O_3$-$SiO_2$ as, 4644*f*.
of aromatic hydrocarbons, 2966*d*.
of aromatic hydrocarbons, aromatic sulfonic acids as, and their regeneration, P 4458*c*.
of aromatic hydrocarbons, H halides and metal halides as, P 4005*a*.
of aromatic hydrocarbons, hydrous Al silicates as, P 3606*b*.
of aromatic hydrocarbons, mixt. of $Al_2O_3$, $SiO_2$ and $ThO_2$ as, P 680*a*.
of aromatic hydrocarbons or furan, anhyd. HF as, P 1174*g*.
of aromatic hydrocarbons, P acids as, and removing acid vapors from alkylates, P 9430*h*.
of aromatic hydrocarbons with alkyl halides or olefins, $AlCl_3$-hydrocarbon complex, P 5181*i*.
of $C_6H_6$, P 3844*i*.
of $C_6H_6$, $AlCl_3SO_4H$ as, 6582*h*.
of $C_6H_6$, $BF_3H_3PO_4$ as, 7915*i*.
of $C_6H_6$ with $C_2H_4$ or propene, $H_3PO_4$-$BF_3$ as, 4638*b*.
of B halides with alkyl halides, P 6220*d*.
centrifugal sepn. and return of liquid, P 3604*h*.
of cyclic hydrocarbons, anhyd. toluenesulfonic acids as, P 4458*b*.
of cyclic unsatd. hydrocarbons, Na as, P 1057*f*.
effecting contact with $AlCl_3$, by kinetic energy from pumping hydrocarbon reactants, P 1175*e*.
F compd. removal from alkylates obtained with HF, P 4002*c*, P 4006*d*.
HF and a fluoride as, P 3435*g*.
of indan and 1,2,3,4-tetrahydronaphthalene, $Al_2O_3$-$SiO_2$ as, 2197*e*.
of 2-methylbutane with $C_2H_4$, $BF_3$ and its complexes as, 3773*b*.
*in alkylation*, of 2-methylbutane with 2-methylbutene, $H_2SO_4$ as, 1554*g*.
of 2-methylpropane, $AlCl_3$ as, P 1049*e*.
of 2-methylpropane with butenes, HF as, P 5583*g*.
of 2-methylpropane with cyclopropane, 1,2-dibromopropane as, P 5583*d*.
of 2-methylpropane with $C_2H_4$, HF-$BF_3$ as, P 2422*h*.
of $C_3$-$C_5$-mixed olefins with isobutane, promoted $AlCl_3$-hydrocarbon complexes as, P 1956*e*.
of paraffins, $AlCl_3$-branched-chain paraffin mixts. as, P 3189*g*.
of paraffins, $AlCl_3$ recovery from, P 4005*i*.
of paraffins, app. using $H_2SO_4$ as, P 1175*c*.
of paraffins, Br mixts. with $CBr_4$, $CCl_4$, $CHBr_3$ or $CHCl_3$ as, P 5181*g*.
of paraffins, control of viscosity of $AlCl_3$-hydrocarbon complex, P 4005*g*.
of paraffins, fluophosphoric acid-$BF_3$ reaction products as, P 5583*b*.
of paraffins, hydrocarbon pretreatment to lengthen life of $H_2SO_4$ or S-deriv., P 3189*b*.
of paraffins, HF complexes with high-S hydrocarbons as, P 389*h*.
of paraffins in fractionating column, HF as, P 5939*a*.
of paraffins, reaction with effluents and removal of HF, P 390*a*.
of paraffins, recovery of HF, P 914*c*, P 1559*b*, P 3189*h*, P 5182*b*.
of paraffins, $H_2SO_4$ as, P 4004*i*, P 4458*d*.
of paraffins, $H_2SO_4$ dild. with $Et_2SO_4$ or di-Me ether as, P 6404*b*.
of paraffins, water as, P 3604*g*.
of paraffins with pentenes, P 3189*f*.
of phenols, carboxylic acids as, P 7966*c*.
of phenols with alcs. or ethers, $Al_2O_3$ as, P 687*f*.
of phenol with alkyl halides, drying oil gels as, P 3036*g*.
prevention of corrosion by HF, P 3190*a*.
reducing time of contact of, P 7223*b*.
$SiF_4$ removal from alkylates formed with HF, P 4006*b*.
of 1,2,3,4 - tetrahydronaphthalene, 1369*g*.
of thiophene, P 691*d*, 1395*bc*.
in alkylation of butanes with HF, defluorination of $C_4H_{10}$ with bauxite and dehydrogenation of $C_4H_{10}$ with Cr oxide, P 1174*i*.
for alkylation of naphthalene with chlorinated paraffins, 4454*i*.
of paraffins, $AlCl_3$ complex, P 7677*c*.
of paraffins, $AlCl_3$-hydrocarbon complex satd. with $AlCl_3$, P 390*a*.
of paraffins at low temps. to safety fuel, $H_2SO_4$-aliphatic mixed, P 5181*e*.
in alkyl disulfide cleavage with olefins, P 1794*c*.
in alkyl group removal from hydrocarbons, Ni-kieselguhr as, P 5584*c*.
in alkyl halide manuf. from halo olefins and isoparaffins, P 662*g*.
from H halides and olefins, $AlCl_3$ and $FeCl_3$ as, P 6218*e*.
from H halides and olefins, Th salts as, P 2628*b*.
in alkyl halide reaction with olefins, Friedel-Crafts-type, P 7035*c*.
alloys as, 4088*b*.
alumina, P 1161*c*, P 1930*a*, P 1931*a*.
β-alumina, P 1931*d*.
from alumina and $Li_2O$, P 6702*i*.
from alumina and Mo oxide, P 8579*e*.
alumina-BeO, P 2299*f*.
alumina-halogen-Pt, P 8578*h*.
alumina-$SiO_2$, P 1930*bc*, P 1932*a*, P 4792*a*, P 5887*b*, P 6338*d*.
flow of fluidized, in conduits, 6475*h*.
pressure drop in vertical tubes of fluidized, 6476*b*.
aluminum chloride, electrolytic regeneration of, P 3733*e*.
aluminum chloride supported, P 1931*b*, P 3162*e*.
aluminum halide, P 5134*h*.
in amide manuf. from amines, nitriles and $H_2O$, $SiO_2$-$Al_2O_3$ as, P 8398*g*.
from carboxylic acids, P 2240*a*.
from esters and $NH_3$ or amines, alkali metal alcoholates as, P 4289*a*.
in amination of aryl halides, CuCl as, P 3454*gh*.
in amination of isomeric butyl alcs., 1005*a*.
in ammonia decompn. hydrogenation, P 3032*e*.
in ammonia decompn., Fe as, 7312*i*.
for ammonia synthesis, adsorption of vapors by reduced-Fe, 7288*e*.
in ammonia synthesis, recovery of, P 7204*c*.
in analysis with photometer, 7860*b*, 8298*e*.
in aromatic hydrocarbon formation from $C_2H_2$, P 5040*d*.
in aromatization, $Al_2O_3$-$Cr_2O_3$ as, P 3453*i*.
of cracked distillates, aluminosilicates as, 3998*h*.
of gasolines, $Cr_2O_3$ $SiO_2$ gel as, 3997*d*.
of hydrocarbon oils, P 1955*g*.
of naphthenes or paraffins, $Cr_2O_3$ or $MoO_3$-$ZnAl_2O_4$ mixts. as, P 3605*c*.
of petroleum hydrocarbons, P 7047*b*
sulfides as, P 5039*i*.
for aromatization of gasoline from shale oil, 5577*i*.
for aromatization of hydrocarbons and hydroforming of naphtha, pptn. from hot solns. of $ZnAl_2O_4$, P 7222*f*.
for aromatization of hydrocarbons and naphthas and for reforming naphthas, $ZnAl_2O_4$ base in oxide or sulfide, P 3188*f*.
in Beckmann rearrangements of oximes, $PCl_5$ or $H_2SO_4$ as, 5740*d*.
in benzene and toluene manuf. from petroleum and its gases, 8661*a*.
in benzyl *p*-toluenesulfonate decompn., *p*-toluenesulfonic acid as, 7707*h*.
biochem., 5429*a*.
bio-, effect of trace metals on, 7014.
plant inorg., 6287*b*.
for vegetation, large scale agriculture and, 4803*d*.
in bleaching of paper, P 9418*a*.
for bleaching of paper pulps and textiles with alkali or alk. earth chlorites, P 8176*a*.
books: from Alloys of Ni and Non-catalytic Metals, 932*c*; Kataliticheskaya Aromatizatsiya Parafinovykh Uglevodorodov, 8307*b*.
boron fluoride compds. as, 5657*e*
boron fluoride-HF, recovery from org. matter, P 3949*b*.
for bromination of $C_{10}H_8$, 2851*h*.
for 1,3 butadiene prepn., 994*a*.
in butadiene prepn., from AcH and AcOEt, $SiO_2$-$Ta_2O_5$ as, 1714*a*
from EtOH, 991*i*.
from EtOH, $Al_2O_3$-Cr oxide, P 5410*i*
from EtOH, $Al_2O_3$-MgO $SiO_2$ as, 7898*d*.
from EtOH, MgO as, 2016*i*.
from EtOH, Ta oxide on $SiO_2$ as, 5733*h*.
in 1-buten-3-yne prepn., CuCl-$NH_4Cl$ and its mixt. with HCl as, 1598*d*, 3225*c*.
in butyl alc. prepn. from EtOH, 5363.
for Butyl rubber manuf., injection nozzle for, P 9522*b*.
in 2-butyne-1,4-diol prepn., 2578*a*.
in calcium carbonate decompn., gases as, 2078*d*.
calcium nickel phosphate, P 2382*c*.
in Cannizzaro reaction, 4651*d*.
from carbon impregnated with alkali-alk. earth hydroxide, P 5886*h*.
in carbon monoxide reaction with S and $H_2O$, Co and Ni sulfides as, 2532*i*
for carbon monoxide removal from gases P 1537*i*.
carbon, porosity of, 2080*c*.
in carbon-S bond cleavage in $PhCH_2SPh$, $AlBr_3$ as, 2178*c*.
in carbon tetrafluoride manuf. from halo methanes and HF, P 3437*a*.
in carbonyl compd. manuf. from olefins, CO and H, P 4287*b*.
in carbonyl group removal from α,α dialkyl derivs. of γ-cyanobutyralde hyde, peroxides as, P 3440*a*.
in carboxyl group removal from 2-furanacrylic acid, 2615*c*.
from malonic acid derivs., amines as, 7904*d*.
from org. acids, 7800*i*.
in carboxylic acid (long-chain) manuf. from ethylene and carboxylic acids, P 670*d*.
in carboxylic acid manuf. from olefins, CO and $H_2O$, P 670*i*.

in carboxylic acid (unsatd.) manuf. from CO and acetylenes, Ni salts as, P 5412*i*.
in carene conversion to *p*-cymene, $SiO_2$ as, 5767*i*.
in chlorate-bromide reaction, $H_3AsO_4$ as, 1248*f*.
in chlorination of acrylonitrile, pyridine as, 2574*d*.
of aromatic hydrocarbons, Fe filings as, P 1437*c*.
of $C_6H_6$ and its derivs., metal silicates as, P 7041*f*.
of $C_6H_6$, N compds. as, P 4295*h*.
of bis(perfluoroalkyl)benzenes, 6174*f*.
of (1-chloroethyl)benzene, I as, P 680*f*.
of $CH_2$:CHCl, Fe as, P 7035*f*.
of $C_2H_4$, $CuCl_2$ as, P 1433*e*.
of $CH_4$, Pb-Na as, 2156*f*.
of methyl silanes, P 3441*e*.
of phthalic anhydride, P 3463*i*, P 3464*a*.
of pyrazine, C-$CuCl_2$ as, P 5809*f*.
for chlorination of $C_2F_4$, 6071*a*.
for chlorine manuf. from HCl, P 1160*f*.
for chlorite manuf. from $ClO_2$, P 3159*i*.
in chloroethylene manuf. from $C_2H_2$ and HCl, $Al(OH)_3$ as promoter for $HgCl_2$, P 3437*h*.
from $C_2H_2$ and HCl, C-$HgCl_2$-ThCl$_4$ pellets as, P 1433*e*.
from $C_2H_2$ and HCl, fluorides or fluosilicates as, P 4284*e*.
from $C_2H_2$ and HCl, $HgCl_2$ on C as, P 3024*e*.
from $C_2H_2$ and HCl, Hg compds. as, P 5790*a*.
from $C_2H_2$ and HCl, metal salts as, 6969*g*.
from $C_2H_2$ and HCl, nitriles as, P 7951*b*.
in chloromethylation of aromatic hydrocarbons, $Al_2O_3$-$SiO_2$ gel or coconut charcoal as, P 5583*e*.
for chloroprene-polymerization inhibition, 1598*f*.
in chlorovinylation of satd. hydrocarbons with polychloro ethylenes, peroxides as, 9024*e*.
clay, P 7162*a*.
clay, activation with mineral acids, P 1004*d*.
clays as, 6035*g*, 6799*a*.
for combustion, P 4835*f*.
in combustion of black rocket gunpowder and rocket propellants, 9449*fh*.
compression of powd., app. for, P 6403*f*
in condensation of aldehydes and ketones, P 2632*c*.
of aldehydes with $CHBr_3$ or $CHCl_3$, P 604*e*, P 4284*h*.
of alcuritic acid and its Me ester, *p*-$MeC_6H_4SO_3H$ as, 2941*a*.
of aromatic hydrocarbons with nitriles, metal halides as, P 2424*c*.
of chlorinated paraffin wax with $C_6H_6$ and in hydrogenation of condensate, $AlCl_3$ and Ni as 2416*hi*.
of coconut fatty acid anilide with *N*-methylol chloroacetamide Na sulfonate, acids and Zn chloride as, P 8866*b*.
of crotonaldehyde, $Bu_2NH$ as, 5376*h*.
of cyclohexene and epichlorohydrin with phenols $BF_3$ as, 6173*g*.
of HCHO, aroylcarbinols as, 6159*h*.
of HCHO with PhOH, 8737*cdef*.
of HCHO with PhOH, amines as, P 5097*i*.
of HCHO with phenols, sulfonic acids as, P 9526*d*.
of ketones in presence of H, oxides as, P 2222*h*.
of ketones with phenols, mercapto carboxylic acids and their derivs. as, P 5424*b*.
of phenols with terpenes, P 6237*a*.
of 1 2,3,3-tetrachloropropene, $AlCl_3$ as, 5361*h*.
of triamines to give piperazines, P 2242*g*.
for condensation of aralkyl hydrocarbons with ketones, P 2036*h*.
of 2-furaldehyde with phenols, 5224*hi*, 5225*abcehi* 5226*abcaf*.
of thiophenes with aldehydes, P 2031*hi*.
of urea with HCHO, P 4512*h*.
in condensation of HCHO with PhOH and curing of resin, onium compds. as, P 8208*a*.
copper, P 1161*c*, P 7609*f*.
from copper-Al alloy, P 6763*f*.
copper chromite, 6336*a*.
copper-Cr oxide, crystal structure of, 5653*i*.
copper-Cr oxide, prepn. of, 6062*i*.
for cracking, P 7162*d*, P 9299*d*.
drying hydrogel, by distn. with BuOH, P 1558*f*.
of hydrocarbon oils acid-activated clay P 6403*g*, P 8662*i*.
of hydrocarbon oils, $Al_2O_3$-$SiO_2$, P 5181*a*, P 5583*b*.
of hydrocarbon oils, increasing gasoline-producing efficiency of $SiO_2$-$ZrO_2$, P 8665*c*.
of hydrocarbon oils, metal sulfide, P 844*e*.
of hydrocarbons, chambers for, P 843*g*.
of hydrocarbons to fuel gas, 6814*c*.
of petroleum, 5579*g*, 6814*d*.
of petroleum, analysis and testing of, 8124*d*.
of petroleum, attrition resistance and testing of fluid, 7217*f*.
of petroleum, crystal structure and activity of montmorillonite, 1554*d*.
of petroleum, etc., activated kaolin, P 8129*gh*.
of petroleum, Houdry app. for measuring activity of, 5176*d*.
pore-size distribution of clay and $Al_2O_3$-$SiO_2$-gel, 5575*c*.
pore size-surface area distribution of, 3180*g*.
$SiO_2$-$Al_2O_3$ $SiO_2$-MgO mixed, stable to steam, P 3188*h*.
from $SiO_2$ hydrogel and $ZrO_2$,, P 3160*i*.
in cracking and refining of low-temp. tar, 7667*h*.
in cracking and reforming of hydrocarbon oils, app. controlling circulation of suspended, P 9428*b*.
in cracking, app. for hydrocarbon stripping from fluid, P 6403*h*.
of distn. oil from rubber, clay-$V_2O_5$ mixt. as, 5619*i*.
of gasoline, gum formation and, 8656*b*.
heat of combustion of residual, and of carbonaceous deposit on, 3180*f*.
of hydrocarbon oils, fused $Al_2O_3$ as, P 386*h*.
of hydrocarbon oils in two stages, $SiO_2$ complex, P 387*a*.
of hydrocarbon oils, kiln for regenerating granular, P 8129*i*.
of hydrocarbon oils, Th phosphates as, P 9428*g*.
of hydrocarbons, $Al_2O_3$ as, 1250*c*.
of hydrocarbons, conveyor for, P 3187*i*.
of hydrocarbons, distribution in app., P 3188*a*.
of hydrocarbons, recovery and oxidative regeneration of P 9427*h*.
of hydrocarbons, regenerator for, P 3604*d*.
of hydrocarbons, Na contamination, detn. and effects on $Al_2O_3$-$SiO_2$, 2414*g*.
loss recorder for fluid, 7217*e*.
metallic contaminant detn. in $Al_2O_3$-$SiO_2$ fluid, 8655*i*.
of $CH_4$, Ir, Rh or Ru as, 3773*fg*.
of olefinic naphtha, $SiO_2$-oxide mixt. as, P 7677*i*.
of petroleum by Houdriflow and Thermofor moving-bed processes, 3180*c*.
of petroleum by Houdriflow process, 7217*i*.
of petroleum, fluid MgO-$SiO_2$, 8656*c*.
of petroleum, reactivation of $Al_2O_3$-$SiO_2$, P 9428*c*.
of S-high crude oil, steam in prevention of S poisoning of, 8656*e*.
recovery of, P 370*b*.
regeneration of, 3181*d*, P 3604*c*.
statistical procedures for fluidized-bed, 8217*a*.
in cracking of hydrocarbon oils and olefin-content reduction in cracked gasoline, P 4004*a*.
in cracking of hydrocarbon oils, regeneration of, and refining fuels with regenerated catalyst, P 9429*b*.
in cross-linking vinyl polymers, 7406*h*.
for curing of aminoplasts, P 5230*t*, P 5631*f*, P 5633*b*.
in curing of polyesters, org. peroxides as, 4892*h*.
of thermoreactive resins, spectrographic study of, 3293*a*.
of thermosetting materials, di(aryl sulfonyl) peroxides as, P 6002*h*.
in cyanoacetate (alkyl) reaction with aldehydes or ketones, P 1436*e*.
in cyanoethylation of reactive methylene compds., bases as, P 3446*h*.
in cyanohydrin (acetone) manuf. from acetone and HCN, CuCN as, P 7955*c*.
in cyanohydrin manuf. from alkylene oxides and HCN, sterically hindered amines as, P 1435*b*.
in cycloalkyl nitrite manuf. from cycloalkanes and $N_2O_4$, P 4694*a*.
in cyclohexanone reaction with Et cyanoacetate, amides as, P 7507*e*.
dehydrating-dehydrogenating, in manuf. of styrenes, P 6231*a*.
for dehydration, 2533*i*.
in dehydration and dehydrogenation of EtOH and HCOOH, 6497*i*.
in dehydration and isomerization, bentonite and gumbrin as, 6153*a*.
in dehydration and isomerization of BuOH, CuO-$H_3PO_4$ as, P 3833*h*.
in dehydration and isomerization of isoamyl alc., P 3834*a*.
for dehydration, isomerization or oxidation of drying oils and drying-oil fatty acids, 4025*g*.
in dehydration of amyl alcs., P 6217*h*.
of 1,3-butanediol, 5359*i*, 5360*fghi*, 5361*a*.
of 1,3-butanediol, kaolin-$Fe_2O_3$-KOH and kaolin-$H_3PO_4$ mixts. as, 2015*ghi*, 2016*abc*.
of 1,3-butanediol, stability of butadiene in kaolin-$Fe_2O_3$-KOH and kaolin-$H_3PO_4$, 4045*ef*.
of BuOH, P 7035*b*.
of castor oil, $NaHSO_4$ as, 872*g*, 4872*a*.
of cyclohexanol, 5010*e*.
of EtOH, $Al_2O_3$ gels as, 2080*e*.
of EtOH, Al as, P 1434*h*.
of glycols, Br-contg. Friedel-Crafts catalysts as, P 3834*c*.
of hydracrylic acid, P 6221*i*
of hydracrylonitrile, P 3836*i*, 4629*i*.
of α methylbenzyl alc., 592*a*.
of pinacol, P 1434*i*.
of tetrahydrofuran, P 5410*d*.
for dehydration of hydroxylated oils, $BPO_4$ or boric acid mixts. with phosphoric acids, P 2790*b*.
for dehydrocyclization and dehydrogenation, autoregenerative, P 370*e*.
for dehydrogenation, P 5410*a*.
from $Cr_2O_3$ and $Fe_2O_3$, P 7610*b*.
of hydrocarbons, P 1538*h*, P 3161*e*, P 4791*g*, P 5039*g*.
of naphthenic-oil fractions to toluene, P 5186*i*.
in dehydrogenation and hydrogenation of hydrocarbons, 6567*a*.
in dehydrogenation and racemization of *sec*-BuOH, Cu and Zn chromites as, 1249*c*.
in dehydrogenation of alcs. to aldehydes or ketones, Cu, Pb and Zn mixt. as, P 4287*f*.
of alkaryl or alkyl hydrocarbons, P 5788*e*.
of amines, 132*i*.
of benzaldehyde oxime, Cu as, 5760*f*.
of 2,3-butanediol, P 3641*h*.
of butene, Cr as, 4213*i*.
of butene, mixt. of MgO $Fe_2O_3$, CuO and $K_2O$ as, P 663*a*.
of butenes to butadiene, removal of catalyst poisons from steam in, P 7950*g*.
of cumene, mixt. of MgO, $Fe_2O_3$, $K_2O$ and CuO as, P 680*f*.
of cyclohexane, 7911*h*, 7912*a*.
of cyclohexane and decahydronaphthalene, metals and oxides as, 4551*d*.
of di- and trialkylcyclohexenones, Pd-C as, 2968*h*.
of 1,1-diaryl paraffins, P 2235*e*.
elec. heater for chamber for, P 4151*b*.
of fatty acids, 3357*c*.
of hydroaromatic compds., kinetic and adsorption coeff. study of, 1731*f*.
of hydroaromatic compds., kinetics of, 1732*a*.
of $C_2$-$C_6$-hydrocarbons, P 5030*e*.
of hydrocarbons, BeO-impregnated $Al_2O_3$ as, P 6404*c*.
of indan, $Cr_2O_3$ as, 6608*h*.
of isoborneol, 5382*e*.
of nitriles NiS-$WS_2$ as, P 2220*e*.
of olefins, P 3023*d*.
of olefins, maintaining K content of oxide, P 2764*f*.

*in dehydrogenation* of 1,4-pentanediol, Cu chromite as, P 3458*e*.
of piperazine, P 1813*d*.
poisoning of Ni, 2499*b*.
regenerating S-contg. oxide, P 3188*i*.
of secondary alcs., $Bi_2O_3$ and ZnO as, P 6650*e*.
stripping with $CO_2$, P 9078*e*.
of 2-*o*-tolyl-2-butene, 5012*d*.
in depolymerization of butene polymers, clay as, 1311*a*.
of olefin polymers, 1713*e*.
of triisobutylene, aluminosilicates as, 6151*a*.
in dialkyldihalosilane manuf., P 4286*h*.
in diaryl paraffin mol. decompn. to aromatic compds., silicates as, P 2228*f*.
in *N*, *N*-dibutylphenethylamine manuf. from styrene and $Bu_2NH$, Na as, P 681*i*.
in 1,4-dicyano-2-butene manuf., Cu salts as, P 4286*d*.
in dihydro terpene reaction with phenols, P 9085*c*.
in dimerization of acetylene, P 7951*a*.
in diphenylamine manuf. from $PhNH_2$, $Al_2O_3$ free of alkali as, P 682*g*.
in disproportionation of carene, $Fe_2O_3$-gypsum as, 5012*g*.
in dissocn. (thermal) of Ca, K and Na sulfates, 6895*h*.
drying hydrogel, P 9300*d*.
in drying of coatings from glycerol α-allyl ether phthalate and succinate, peroxides as, 9480*g*.
drying or heat-treatment of beads of gel, P 6339*i*.
drying pelleted, P 6477*a*.
in elaidinization of oils, liquid $SO_2$ as, P 5215*f*.
in elaidinization of palm oil, Raney Ni or Se as, 1582*b*.
electronic properties and activity of solid, 8251*d*.
electron microscopy of, 32*d*, 4087*b*.
in emulsification of phenol-HCHO reaction mixts., acids and bases as, 5223*h*.
in enol acetate manuf. from ketene and ketones, sulfonated, P 3838*h*, P 3839*a*.
in esterification, of AcOH with EtOH, $NaHSO_4$ as, 7799*i*.
of amino alcs., acids as, P 674*e*.
$ClSO_3H$ as, 6573*f*.
of cyanohydrins, $Et_3N$ as, P 2631*h*
of dehydrated castor oil-cinnamic acid-styrene polymer with glycerol, Ca stearate as, P 5972*d*.
of dibasic anhydrides, KOH as, 2974*g*
of enols, $H_2SO_4$ as, P 7953*h*.
of EtOH, Cu as, 8252*e*.
of α-halo acids, Zn and $ZnCl_2$ as, P 2632*h*.
of linseed fatty acids with tetramethylolcyclohexanol, stearates as, 4871*c*.
in esterification (poly) of λ-hydroxystearic acid, 2166*c*.
in esterification (re-), P 1224*a*, P 6236*d*.
of acetates with Me esters of fat acids, NaOMe as, 3631*b*.
of esters of secondary and tertiary alcs. with the desired secondary or tertiary alc., P 7951*e*.
of esters of β,β′-thiodipropionic acid, P 5414*g*.
of palm oil with EtOH, 7723*h*.
of peanut oil with EtOH, NaOH as, 3635*f*.
in ester manuf. from CO and alcs. or ethers, P 3443*c*.
in ester manuf. from CO, olefinic compds. and phenols, P 6234*i*.
in ester (α,β-unsatd.) manuf. from esters of β-alkoxy acids, P 3442*e*.
for ether formation from acetals, P 1050*a*.
in etherification of alcs., *p*-toluenesulfonic acid as, 5003*d*, 6156*e*.
in ethylation of $PhNH_2$, $Al_2O_3$ and C or $SiO_2$ as, P 1437*e*.
in ethylation of $C_6H_6$ with EtOH, $Al_2O_3$-$SiO_2$ as, 1019*d*.
in ethylene-$C_2H_6$ mixt. conversion to higher-boiling products, P 3833*g*.
in ethylene oxide formation from $(CH_2Cl)_2$, 4638*g*.
in ethylene reaction with $H_2SO_4$, $Ag_2SO_4$ as, P 6645*e*.
in ethylidene and vinyl ester manuf., P [illegible]
fluidised, P 1538*i*, 8830*f*.
d., particle size and viscosity of, 6805*g*.
*fluidised*, history of, 8074*d*.
pressure drop from vapor flow through, 6476*c*.
testing app. for, 7217*d*.
in fluorination of acetylenic hydrocarbons, Hg compds. as, P 7035*f*.
of C, fluorides as, P 3834*g*.
of Et chlorothiophosphate, $SbCl_5$ as, 1313*i*.
of halogenated hydrocarbons, $SnCl_4$ as, P 2628*e*.
of polyhalo methanes with $C_7F_2$, $AlCl_3$ as, P 3834*f*.
of unsatd. hydrocarbons, HgO-charcoal as, P 2218*e*.
in fluoro olefin reaction with HBr, 7407*b*.
in formal (Cl-contg.) manuf. from $C_2H_2$, HCHO and HCl, P 4685*g*, P 5035*b*.
formation and aging of, solid-state reactions in, 6897*c*.
for Friedel-Crafts reaction from halides on $Al_2O_3$, etc., P 3161*b*.
in furan manuf. from 2-furaldehyde, P 5047*g*.
in furfuryl alc. resin manuf., S as, P 3232*f*.
in gas (coal) purification, 3172*ei*.
in gasification of solid fuels, P 6397*c*.
in gasoline (cracked) treatment to reduce olefin and S contents, $SiO_2$-$Al_2O_3$ gel as, P 4003*a*.
gel, P 1884*d*.
beads of, P 1161*b*.
copptd., P 1930*e*.
for gelation of phenolic resins, P 2033*b*.
in germanium org. halide manuf., P 2631*e*.
in glucoside prepn. from glucopyranosyl bromide tetraacetate, 7430*h*.
in glycol manuf. from olefins and aldehydes, $H_2SO_4$ as, P 673*c*.
in Grignard coupling of *p*-(1-bromopropyl)anisole, $CoCl_2$ as, 3812*f*.
in halo acetal manuf. from vinyl esters and halohydrins, P 6649*i*.
in (haloalkyl) cycloalkane manuf. from halo olefins and cycloalkanes, P 4693*h*
in halogen and S removal from hydrocarbon oils, active C as, P 390*c*
in halogenated alc. and formal manuf. from HCHO, H halide, olefins and halogenated olefins, P 3835*h*.
in halogenation, electrolytes in AcOH as, 7408*g*.
in halogenation of bicyclic hydrocarbons with alkyl halides, $AlCl_3$ as, P 689*f*.
heat-absorbing and -retaining pelleted, P 8578*f*.
in hydration of $C_2H_2$, Hg salts as, P 3837*h*
of isoölefins to tertiary alcs., ion exchange substances as, P 8397*g*.
of nicotinonitrile, IRA-400 as, 1411*c*.
of olefins, fluoride-promoted HF, P 3438*f*.
of olefins, $W_2O_3$ as, P 8397*h*.
in hydrocarbon conversion, P 4447*h*, 4448*b*.
absorption from products, P 2764*a*.
$AlBr_3$- or $AlCl_3$-molten halide mixts as, P 4843*c*.
app. for recovery and regeneration of, P 2422*b*.
app. for regeneration of powd., P 7222*e*.
app. for varying depth of beds of, P 2422*a*.
in closed cycle, app. for conveying powd., P 388*f*, P 1174*g*.
descent through gaseous reactants of clay-type, P 843*h*.
elevator for, P 9429*d*.
fluidized beds of, P 1956*a*.
in fluid state, and sizing and sepn. of catalysts therein, P 388*b*.
fused pelleted $Al_2O_3$, P 387*h*.
reducing corrosiveness of Al halide-hydrocarbon complex, P 5582*i*
regeneration of fluidized, preventing afterburning in, P 1956*cd*.
removal of Al halide, from products, P 7222*h*.
stripping carbonaceous matter and recovering hydrocarbons from used fluid, P 388*c*.
sublimed $AlCl_3$ as, P 1174*f*.
temp. control in beds for, P 6819*c*.
vapor contact with fluidized, P 389*d*.
in vapor phase, recovery and regeneration of, P 4843*e*.
for hydrocarbon conversion, from activated $Al_2O_3$ impregnated with metal compds., P 5181*c*.
heat-treatment of, P 7608*i*.
*for hydrocarbon conversion*, Fe removal from clay, P 4843*a*.
$SiO_2$-gel, P 3604*a*.
hydrocarbon conversion with stationary bed of, app. for, and regeneration of catalysts, P 7760*h*.
in hydrocarbon-fuel manuf. from fat acids, P 4835*b*.
for hydrocarbon halide reaction with Si, P 5517*a*.
in hydrocarbon manuf. from $Me_2O$, $Al_2O_3$-$SiO_2$ as, P 3435*f*.
for hydrocarbon-oil conversion, $NH_4$ ion activated Mg silicate, P 7224*d*.
pelleted $Al_2O_3$-$SiO_2$, P 843*i*.
$SiO_2$-gel bead, P 4004*c*.
in hydrocarbon-oil conversion, in fluidized state and its regeneration, P 387*f*
maintaining const. heat evolution during continuous regeneration of, P 8664*b*.
measuring and controlling flow of powd., P 9429*a*.
recovery, scrubbing and recycling of finely divided, 844*b*.
suspension of powd., P 9429*d*.
in vapor phase, P 6403*i*.
in hydrocarbon-oil conversion or distn., maintaining powd., in fluidized phase of different ds., P 9429*f*.
for hydrocarbon-oil conversion or refining, $Al_2O_3$-$SiO_2$, P 8664*h*.
in hydrocarbon refining, aluminates as, P 3191*b*.
in hydrocarbon synthesis, control of particle size of Fe, P 3832*h*.
for hydrocarbon treatment, $Al_2O_3$-MoO, $TiO_2$ pelleted, P 1561*d*.
$Al_2O_3$-oxide pelleted, P 4004*f*
HF and HF-$BF_3$ mixed, P 844*f*
noncorrosive arylsulfonic acid-As, P 2636*e*
in hydrocarbon treatment, app. for stripping contaminated fluidized, P 388*i*
in hydrochloric acid formation in chlorinated paraffin wax, triethanolamine as inhibiting Fe, P 1179*d*.
in hydrochloric acid removal from chlorinated fatty acids or their esters, P 7502*f*.
from dichloroethane, 4628*h*.
from dichloroethane, grog as, P 7951*b*
in hydrocyanic acid manuf., $MnO_2$ as, P 1926*b*.
in hydrocyanic acid manuf., Pt as, P 9396*h*.
in hydrofluoric acid removal from polyfluoro paraffins, $CrF_3$ as, P 3437*c*
in hydrofluoric acid removal, regeneration of, P 5518*c*.
in hydroforming and S removal from petroleum, MoO₃ coppt'd. with MgO as, 2761*a*.
in hydroforming of naphthas, fluidized Zn spinel-supported oxide, P 1958*i*
in hydroforming, regeneration of Al Mo, P 9307*a*.
in hydrogenation and hydrolysis of fats and oils in autoclaves, Ni oxide as, 5609*e*.
in hydrogenation and oxidation reduction Pt as, 6062*b*.
in hydrogenation and reduction of org. compds., 6967*d*.
for hydrogenation, etc., P 2382*c*
in hydrogenation, of $C_2H_2$ to $C_2H_6$, P 3833*i*, P 5030*b*.
of acetylenic alcs., 6969*i*.
of aldehydes, NiO-$Cr_2O_3$ as, 5363*g*.
of alkynes, nitriles, nitrites and nitro compds., Ti hydride as, P 1793*i*.
of anhydrides of unsatd. acids, Co and Ni as, P 3839*d*.
of $C_6H_6$, platinized C, 1249*g*.
of $C_6H_6$, blocking of active centers of platinized C, by decompn. products, 7802*a*.
of bis(alkenyl-2-alkoxyphenyl)carbonates, P 4299*b*.
of CO, P 1171*ab*, 2397*ehi*, 2398*bdeghi*, 2399*gi*, 2400*acegh*, 2401*bdg*, 2402*a*, 3167*dfh*, P 3174*i*, P 3175*cdf*, P 4447*cf*, 4448*i*, 4828*i*, P 5574*b*, P 6810*h*, P 6811*a*.
CO adsorption by Co, Co-kieselguhr and Co-kieselguhr-ThO₂, 2413*d*.
CO adsorption by Fe, Fe-kieselguhr and Fe-kieselguhr-Cu-Mn, 2413*c*.
of CO, carbide decompn. in carburized Co, 6064*c*.
of CO, Co and Fe as, 2081*a*.
of CO, Co, Fe and Ni as, 6063*i*, 9415*h*, P 9419*i*.
of CO, Co-ThO₂ and Fe as, P 839*c*.

*in hydrogenation*, of CO, Co-$ThO_2$ as, P 4685*g*.
of CO, desorption of gases from Co, 2401*h*.
of CO, effect of G and H on adsorption of $CH_4$ by Ni Fischer, 6064*a*. $CO_2$ effect of preheating Ni, 8831*c*.
of CO, fluidized alkalized Fe as, 7664*c*.
of CO, fluidized, and their regeneration, P 8120*gi*.
of CO, heat transmission through fluidized beds of $Fe_3O_4$, 8753*h*.
of CO, H adsorption by Fe and Fe-kieselguhr, 2412*i*, 2418*ab*.
of CO in alc. synthesis, fused Fe as, 994*e*.
of CO in MeOH synthesis, 3351*i*.
of CO, Fe and Fe salts as, P 5573*b*.
of CO, Fe as, P 3994*b*, P 4446*h*, 8117*a*.
of CO, kinetics of adsorption of $CH_4$ by Ni Fischer, 6064*b*.
of CO, Ni and Co as, 2405*h*.
of CO, Ni as, 3169*e*, 7666*h*.
of CO, Ni-$ThO_2$-kieselguhr as, 5921*f*.
of CO, KF-promoted Fe compds. as, P 8121*a*.
of CO, regeneration of, P 1551*h*, P 3994*e*, P 4448*f*, P 9420*adh*.
of CO, regeneration of Fe oxide, P 6811*b*.
of CO, temp. control of, P 8650*h*.
of CO to benzine, CO absorption by, 2406*g*.
of CO, wax removal from, P 3994*fi*.
of carbonyl compds. during reaction with an amine or $NH_3$, P 2633*d*.
of carbonyl compds. in presence of S, P 2629*h*.
of cashew-nutshell liquid and its derivs., Raney Ni as, P 4497*i*.
of castor and olive oils, Ni as, 7722*h*
of cinnamic aldehyde, BzH and hydroxybenzaldehydes, Pt as, 8832*a*.
of cinnamic and crotonic acids, effect of amt. of, 8819*b*.
of citronellal, 2160*i*.
of coal, 1943*ah*, 1944*b*, 6391*d*, 8640*cdfghi*.
of coal, Ca-Cu-chromite as, 2404*d*.
Cu as, P 2218*h*.
of $NCCH_2CO_2H$, Ni as, P 2225*g*.
of cycloalkan-2-ol-1-ones, Ni or Co as, P 6220*i*.
of cyclopentane, 589*c*.
of di- to monoolefins, NiS as, 1554*i*.
of esters, effect of ratio of, on rate, 573*f*.
of esters to alcs., 573*b*.
of 2-furaldehyde, Cu and Cu compds as, 1719*a*, P 7049*a*.
of 2 furaldehyde, Ni as, 1718*i*
of furan and its derivs., P 4301*i*.
of furfuryl alc., Ni as, 1719*b*.
of glucose, Ni salts as, P 5794*h*.
of glycolonitrile in presence of HCHO, Co and Ni as, P 3839*e*.
of hexafluoro-2-butyne, 2025*h*.
of hydrocarbon oils, $MoO_3$.2HCl as, P 9431*c*.
of hydrocarbons, Co as, 6172*c*, 7663*i*.
of iso-PrPh or *m*-$C_6H_4Me_2$, Ni as, 8246*i*.
of Kogasin to gasoline, 2415*fi*.
of Me 3(α)-hydroxy-12-keto-$\Delta^{9,11}$-cholenate, 3433*g*.
of mixts. contg. higher alcs. in purification, P 5032*e*.
of 2-naphthol, 2197*c*.
of nitro compds., Cr, Mo or W sulfides as, and $CS_2$ as activator for, P 682*a*.
of N compds. Raney Ni as, 5738*i*.
of oils, life and recovery of Ni, 5210*i*.
of oils, Ni oxide-acid clay as, and effect of acid clay and water on Ni oxide, 5610*efg*
of phthalic anhydride to o-xylene, $MoS_2$ as, P 7507*e*.
Raney Ni as, 4651*i*.
of seal fats, $Al_2O_3$-Ni and $Cr_2O_3$-Ni as, 877*g*.
of semicarbazones of oxo acids, Raney Ni as, 2604*d*.
in solns., mass and, 4551*c*.
of sulfurated oil, Ni contg. S as, P 5613*b*.
of S in fuel-gas desulfurization, P 3806*e*.
of thiol esters, Ni as, P 3445*c*.
of thiophene 1,1-dioxide derivs., P 7512*e*.
of triisobutylene, $Al_2O_3$-0.1 Pd or -Pt pellets as S-resistant, P 4007*e*.
*in hydrogenation*, V oxides as, 2853*b*.
of wood, Raney Ni as, 8675*de*.
for hydrogenation, of aldehydes to unsatd alcs., P 1063*c*.
of CO, P 827*a*, P 4836*g*, P 5928*i*, 6063*g*.
of CO, acid treatment of siliceous diluents for, P 7214*e*.
of CO, activity and surface of Co, 3273*h*.
of CO, activity measurement of Ni-Si-Al, 6389*g*.
of CO, detn. of Co and Th in, 60*a*
of CO, disintegration-resistant $Fe_3O_4$, P 6397*a*.
of CO, effect of $H_2O$ on Co, 6497*a*.
of CO, Fe oxide-alkali metal ferrate, P 1950*f*.
of CO, Fe oxide-alkali metal oxalato ferrate(III), P 4448*d*.
of CO, Fe oxide-alkali metal pyroantimonate, P 1950*f*, P 4448*d*.
of CO, kieselguhr as support for Fischer, 8830*h*.
of CO, prepn. of Ni, 2853*b*.
of CO, reduction with H of Ni Fischer, 26*i*.
of CO, surface during reduction, 27*b*.
of CO, x-ray diffraction by Ni-$ThO_2$-kieselguhr, 2853*c*.
of CO, x-ray diffraction study of Fischer, 7313*c*.
of 2,3-dihydrofuran derivs., P 2643*b*.
of fats, 7607*h*.
of oils, effect of pptn. with NaOH and $Na_2CO_3$ on activity of, 5211*bc*.
from $SiO_2$ and chloroplatinic acid, P 2746*j*
of $NaHCO_2$ to $NaO_2CH$, 3301*d*
for hydrogen-atom recombination, 8251*c*.
in hydrogen-exchange reactions of paraffins, $Al_2O_3$-$AlCl_3$ as, 7897*i*.
in hydrogen halide addn. to aliphatic unsatd. compds., P 2629*a*.
in hydrogen halide addn. to cyclohexenes and hydrogenated naphthalenes, 2173*g*.
in hydrogen halide reaction with tetrahydrofuran, P 1433*d*.
in hydrogen halide removal from aromatic halogen compds. in polymer prepn., 1603*d*.
in hydrogen halide removal from halogenated hydrocarbons, P 5424*b*
for hydrogen manuf. from CO and steam, P 840*c*, 5133*d*.
in hydrogen manuf. from natural gas and steam and in hydrogenation of coal, 5171*a*.
in hydrogenolysis of aromatic nitriles, Ni as, 7916*f*.
in hydrogenolysis of 2,2,3-trimethyl 1-butanol, 1313*a*.
for hydrogen peroxide decompn., 5553*h*
for hydrogen peroxide decompn., etc., from Pb oxide, P 6096*d*.
for hydrogen reaction with S, from bauxite, P 7201*i*.
for hydrogen sulfide reaction with O to form S, P 7652*g*.
in hydrolysis of PhCl, $SiO_2$ gel as, porosity and, 7313*e*.
of esters, cation-exchange resin as, 6064*i*.
of lactams, P 2225*b*.
of polyvinyl esters, guanidine carbonate, P 5413*c*.
of proteins by acids, dodecanesulfonic acid, etc., as, 6681*a*.
in industrial chemistry, 8074*c*.
iron, P 5135*a*.
iron, N adsorption and surface of promoted, 6036*f*.
iron oxide, extruded, P 3162*d*.
for manuf. of liquid hydrocarbons and oxygenated compds., P 6762*g*.
pelleted, P 5135*b*.
in isomerization, alkylation and polymerization of hydrocarbons to branched-chain hydrocarbons, P 6217*d*.
in isomerization of butane, $AlCl_3$-$Al_2O_3$ as, P 4283*d*.
of $C_4H_{10}$, $AlCl_3$ as, P 1561*c*.
of butene to 2-methylpropene, P 2216*e*.
of camphene, 2975*d*.
of cycloalkanes, $AlCl_3$ as, 157*e*.
of cyclohexane and methylcyclopentane, 587*b*.
of dichlorobutenes, Cu and Cu salts as, P 663*f*.
of $Ph_2CHCHO$, $ZnCl_2$ as, 1753*c*.
of fats and oils, $HNO_3$-contg., P 2341*b*.
*in isomerisation* of hexane, HF-$BF_3$ mixts. as, P 4007*a*.
of β-hydromucononitrile, P 6647*f*.
of linseed oil, metals as, 4027*f*.
of methoxychloropentenes, metal halides as, 130*f*.
of morphine, Pd and charcoal as, 5786*e*.
of 1-octene, $ZnCl_2$ as, 6152*c*.
of oils, Ni-active C or Ni-active C-Se as, 2792*a*.
of olefins, HBr or HCl or their hydrolyzable salts as, P 3604*i*.
of paraffins, $AlCl_3$-hydrocarbon complexes as, P 1559*h*, P 5174*a*.
of paraffins, $AlCl_3$-FeCl$_3$ mixt. as, P 8667*b*.
of paraffins, Al halide-S compd., P 3188*e*.
of paraffins, $HBF_4$-olefin complex as, P 660*f*.
of paraffins, HCl- and $NaHSO_4$-promoted $AlCl_3$, P 4006*f*.
of paraffins, HCl-promoted $AlCl_3$ as, P 1957*g*.
of paraffins, HF-$BF_3$ mixt. as, P 4006*h*.
of paraffins in presence of H and HCl, $AlCl_3$ as, P 5182*e*.
of $C_4$-$C_9$-paraffins, liquid halides as, P 3190*c*.
of paraffins, maintaining activity of Al halide, P 4006*g*.
of pentane in presence of additives, $AlCl_3$-HCl as, 1712*d*.
of pentene isomers, silica gel as, 3343*g*.
of pinene to camphene, pyrophyllite as, P 2234*f*.
of *cis*-α,β-unsatd. acids, P 1798*d*.
of unsatd. hydrocarbons, 6153*h*.
for isomerization of butane, impregnation in catalyst bed of $AlCl_3$, P 4449*a*.
of paraffins, P 5886*f*.
of paraffin wax, $AlCl_3$ complexes with *tert*-butyl chloride or toluene, P 7677*c*.
in isomerization of olefins and alkylation of 2-methylpropane, HF as, P 1175*g*.
in isomerization, polymerization and hydrogenation of olefins, P 1561*b*.
in isopropylation of benzene with $C_3H_8$, $BF_3$, $H_3PO_4$ as, 1732*e*.
in ketene manuf. from AcOH, P 5413*d*.
in ketene reactions, 5366*h*.
in ketone manuf. from anhydrides and olefins, P 3441*i*, P 3442*a*.
from fatty acids, carbonates as, P 7037*f*.
from olefins and anhydrides or ketenes, P 4685*i*.
$ThO_2$ as, 8367*f*.
in ketone reaction with dialkylformamides, $MgCl_2$ as, 7921*a*.
in Kjeldahl digestion, of heterocyclic N compds., HgO-Se mixt. as, 7374*a*.
of proteins, Hg as, 4180*c*.
Se and Te as, 8961*g*.
in β-lactone manuf. from aldehydes and ketene, P 5037*g*.
from carbonyl compds. and ketenes, P 5795*e*.
from carbonyl compds. and ketenes, $Al_2O_3$-$SiO_2$ as, P 3840*d*.
from carbonyl compds. and ketenes, boric acid and its derivs. as, P 5414*i*.
from carbonyl compds. and ketenes, $HClO_4$ salts, $Zn(NO_3)_2$ and $Zn(CNS)_2$ as, P 1055*hi*.
from carbonyl compds. and ketenes, esters of phosphoric acids, fluoborates and Hg halides as, P 1056*ac*.
from esters of oxo acids and ketenes, P 2635*f*.
in Lewisite manuf., $HgCl_2$ and promoting chlorides as, P 5412*c*.
loss of fluidized, decreasing, P 8665*e*.
manganese dioxide as, relation to depolarizing and magnetic properties, 7313*d*.
in manganometric detn. of telluric acid, Ru salts as, 3315*i*.
manuf. of metallic, by electrolysis, P 2103*g*.
manuf. with ion exchangers, P 4791*i*.
mercury-treated charcoal, P 1932*d*.
in metalation and polymerization of rubber, alfin or alcoholate, 429*g*.
metals from salt reduction in liquid $NH_3$ as, 2535*i*.
for methane-$d_4$ reaction with $CH_4$, Ni as, 7802*f*.

in methanol manuf. from $CO_2$ and H, $Cu(OH)_2$ and $Mn(OH)_2$ as, P 7036*d*.
in methyl acetate manuf. from CO and MeOH, $Co(OAc)_2$ as, P 5035*f*.
in methylamine manuf. from $NH_3$ and MeOH, $Al_2O_3$ as, P 3440*g*.
in methylation of aromatic hydrocarbons, acid P compds. as, P 6791*i*, P 10588*i*.
in methylation of $C_{10}H_8$ with $Me_2O$, bauxite as, 2197*a*.
in 2-methylpropene reaction with nitrosyl halides, P 7950*c*.
molybdenum, 3758*e*.
molybdenum detn. in, 7864*c*.
from molybdenum oxides, P 1931*g*, P 6763*d*.
from montmorillonite, P 370*f*.
neg., in ignition of H-O mixts., org. vapors as, 407*b*.
in oxidation of rubber, phenyl-2-naphthylamine, α-tocopherol and Zn salt of mercaptobenzimidazole as, 7249*a*.
for solns. of polythionates and polythionic acids, P 7051*f*.
nickel, coated with NiS, 7802*h*.
H adsorption by, 2079*f*.
structure and activity of supported, 8831*c*.
nickel-impregnated clay, P 1162*b*.
in nitration of aromatic compds., Hg salts as, 6585*c*.
in nitration of paraffins, P 2220*a*, P 4285*c*.
in nitrile manuf. from $NH_3$ and aldehydes, Co or Cu-Zn as, P 1433*g*.
from $NH_3$ and hydrocarbons, P 3439*bcdef*, P 4285*gi*.
from $NH_3$ and olefins, P 7498*c*.
from HCN and olefins, P 3439*h*, P 4286*c*.
in nitroanisole or nitrophenetole manuf. from $O_2NC_6H_4Cl$ and alcs., P 687*gi*.
in nitrogen detn. in meat products, 7154*i*.
in nitrogen detn. in org. nitrates, $HClO_4$ and Se as, 59*g*.
for nitrogen fixation in *Azotobacter*, 8591*f*.
in octene transformation, aluminosilicates as, 6150*g*.
in olefin (di-) manuf. from monoölefins, Cu as, P 7950*c*.
in olefin manuf. from BuOH, P 6217*g*.
for olefin reactions, Fe phosphate as, P 5419*b*.
in olefin reaction with bromo derivs. of methane, P 6644*h*.
with BrCCl$_3$, P 5789*f*.
with halogenated paraffins, 3345*a*.
with thiols, Fe as, P 2219*h*.
in oleic acid compd. solidification, Sc as, P 1202*c*.
org., 4248*g*.
in oxalacetic acid decompn., ferric and cupric ions as, 6497*b*.
for oxidation, active halogen compds., P 7517*d*.
from $Al_2O_3$, $SiO_2$ and $V_2O_5$, P 6338*e*.
of coal and petroleum products, 5133*c*.
of 2-furaldehyde, P 4700*h*.
of olefins to cyclic ethers, Ag surface, P 4289*h*.
of soupfin-shark liver oil, 9379*h*.
of styrene by $H_2O_2$, 7311*e*.
of $SO_2$, P 6798*a*.
in oxidation and hydrolysis of cellulose by $HNO_3$, metal nitrates as, 1978*i*.
in oxidation (auto-) of oleic acid, metallic soaps as, 1998*c*.
in oxidation, of AcH, $Mn(OAc)_2$ as, 4633*e*.
in adsorption bleaching of oils, adsorbents as, 5208*a*.
of aldehydes to acids, P 2632*f*.
of alicyclic hydrocarbons, H halides as, P 5422*b*.
of alkyl aromatic hydrocarbons, P 5421*g*.
of alkylbenzenes, $V_2O_5$ as, P 7047*a*.
of aromatic compds., V and its oxide as, P 7510*b*.
of beeswax-hydrocarbon mixts., Co resinate and Mn linoleate mixts. as, P 1990*a*.
of benzoin to benzil, Co, Cu, Fe and Ni salts as, 1368*b*.
of crotonaldehyde, P 5034*d*, P 5416*a*.
of cyclic ethers, P 2224*e*.
of cyclohexane to maleic acid, V oxide-silica as, P 7039*h*.
of 2,4 - dimethyl - 1,3 - pentadiene, 2080*g*.
of *p*-dioxane, $Co(OAc)_2$ as, P 7503*b*.
*in oxidation*, of ethers to aldehydes with steam, P 8398*d*.
of $C_2H_4$, Ag as, P 3446*a*.
of *p*-$EtC_6H_4OAc$, P 3461*g*.
of Fischer-Tropsch waxes, Mn as, 1200*h*.
of 2-furaldehyde, mixed oxides as, 3792*i*.
of furoin, Co or Cu salts as, P 690*f*.
of gasoline, amines, phenols or amino phenols as metal deactivators in suppressing, 5932*b*.
of glucose with $HNO_3$, 4644*d*.
of D-glucose, Pt as, P 7506*c*.
of GR-S rubber, excess antioxidants as, 2460*h*.
of hydrocarbons, 1711*d*, 6565*i*.
of hydrocarbons, HBr as, P 669*a*, P 2219*c*, P 5422*a*.
of hydrocarbons to hydroxy compds., $V_2O_5$ as, P 1805*f*.
of hydrocarbons, V oxide as, P 2236*g*.
of H-$CH_4$ mixt., 2403*e*.
of $H_2S$ in gas mixts., P 7212*h*.
of iso PrOH to acetone, Ag as, 5272*e*.
of ketones, P 6654*h*.
of lubricating oils, phenylenediamines in inhibiting Fe as, P 1179*f*.
of MeOH, Ag as, P 3791*i*.
of MeOH to $CH_2O$, 6971*g*.
of 2-methyl-2-pentene, 108*d*.
of nicotine, P 1811*b*.
of olefins, $Cu_2O$ as, P 2222*f*.
of olefins, HBr as, P 5409*h*.
of olefins to their oxides, Ag-$Ag_2O$ as, P 8399*c*.
of org. substances, deactivation of metal, P 4460*a*
paraffin oil, 2411*a*.
of paraffins to acids, 7428*h*.
of paraffins to unsatd. hydrocarbons, P 1433*b*.
of paraffin wax, 4000*h*.
of paraffin wax, naphthenates as, 4000*b*.
of petrolatum, 4000*e*.
of petroleum products, Ca salt Mn salt mixts. as, P 3186*i*.
of sulfides and thiols in alk. solns. from sweetening sour hydrocarbon oils, aromatic nitro compds. as, P 8664*e*.
of $SO_2$, deterioation of V, 2744*e*.
of $SO_2$, heating-up temp. of V, 8251*f*.
of thiols in alk. solns., indigo contg. aromatic ring as, P 7223*e*.
of thiols in natural gas, Fe oxides or Co oxides as, 7666*b*.
of 2,4,4-trimethyl 1-pentene, 1309*d*.
of unsatd. long-chain acids and esters, 3611*f*.
of uranyl sulfate, salts as, 3745*i*.
of vitamin C, 1016*i*, 8465*b*.
oxidation reduction, action of, 2079*h*.
in oxidation-reduction reactions of org. compds., Raney Ni as, 191*d*.
oxide, P 3576*g*.
oxide gel, P 3161*d*.
in oxygen compd. manuf. from olefins, CO and $H_2O$, Co and Ni compds. as, P 669*h*.
palladium, on $SiO_2$ gel, structure of, 6062*a*.
palladium or Pt, P 7609*h*.
palladium oxide, P 1160*c*.
in paper-pulp digestion with phenol, 8669*f*.
in petroleum formation, minerals as, 5920*f*.
petrolum-industry catalyst supports and, electron microscopy of, 7216*c*.
petroleum-industry uses of liquid, 8122*i*.
for petroleum refining, analyses and x-ray examn. of aluminosilicate, 840*i*.
in petroleum refining, sepn. from gas-solid dispersions of powd., app. for, P 2421*g*.
in petroleum refining, water-temp. correlation in regeneration of, P 7222*f*.
from phosphoric acid, P 3576*g*.
in phosphorus pentasulfide reaction with lubricating oil, $SiO_2$ compds. as, P 1562*b*.
photochem.—*see also* "sensitization to" under *Light*.
for photopolymerization of ethylenic compds., P 444*a*, P 2818*g*.
platinized C as, effect of heat-treatment on, 1249*e*.
platinum, high activity of, 475*c*.
poisons for, detoxification of, 1536*e*, 3407*e*.
poisons for, in electrodeposition of H and in electrolytic reduction, 8907*d*.
in polyhydroxy compd. manuf. from HCHO, CO and H, Co as, P 673*e*.
for polymerization, 8199*c*.
of butadiene, 1597*c*.
of butadiene with styrene, prepn. and removal of Na, 3645*i*.
*tert*-butyl hydroperoxide derivs., 6156*i*.
of cyanogen chloride, P 2381*a*.
of *p*,α-dimethylstyrene, P 5642*f*.
dispersion in thermosetting sirup, P 2034*f*.
of $C_2H_4$, P 3238*e*, P 5640*f*, P 8742*e*.
of $C_2H_4$ and $C_4H_8$, Co-activated C, P 2763*i*.
of $C_2H_4$ compds. azodisulfonic acid salts, P 5642*a*.
of $C_2H_4$ derivs., 3231*a*.
of $C_2H_4$ with monohaloalkane or olefins, P 5640*f*.
of ethylenic monomers with polyhydric alc. esters of α-olefinic dicarboxylic acids, P 906*e*.
of 1,5-hexadiene, P 3236*b*.
at low temps., P 2034*h*.
of olefins, P 1218*bf*, P 5641*b*.
of olefins, $TiO_2$ contg. silica, P 2764*f*.
of resin oils, from clays and org. acid, P 5641*h*.
sulfinic acids, P 6002*f*.
of vinyl compds. and malonic acid derivs., P 4897*d*.
of vinyl esters in emulsions, P 4895*h*.
in polymerization and polyesterification of soybean and linseed oil fat acids, 8699*b*.
for polymerization (mixed) of 1,3 butadiene and styrene, P 2815*i*.
in polymerization, of $C_4H_6$ and its derivs. to cyclic polymers, 6194*g*, 6202*i*.
of allyl and vinyl silicone rubbers, peroxy compds. as, 2018*e*.
of allyl esters, Cu as, P 8212*bh*.
of allyl esters, Ni salts as, P 8742*f*.
of anethole, 8828*g*.
of butadiene, 3345*i*.
of butadiene, alk. earth metals, org. compds. and peroxides as, 1597*b*.
of butadiene, creatine and creatinine as, P 6859*e*.
of butadiene, K and Na as, 1596*i*.
of butadiene to popcorn, $Bz_2O_2$, rusty Fe and water as, 1598*e*.
of butadiene with 2-methylpropene, double salt of $AlBr_3$ and AlOBr as delayed-action, P 5230*d*.
of butadiene with styrene, Fe pyrophosphates as, 5987*f*.
of butadiene with styrene, Na as, 1340*b*.
of butadiene with styrene, stopping agents in destruction of, 8727.
of butadiene with styrene with Fe pyrophosphate activators, peroxides as, 8725*c*.
of butenes and $C_4H_6$ to gasoline, Cu pyrophosphate as, 4839*d*.
of chloroprene, esters as, P 1601*f*.
Cu$^{++}$ with $PbMe_4$ or $PbEt_4$ as, 5732*e*.
of *p*,α-dimethylstyrene, fuller's earth as, P 5799*d*.
of drying oils, B oxy compd. systems with org. acids or anhydrides as, P 9484*d*.
of drying oils, metal halides as, P 9484*a*.
of drying oils with styrene and α-methylstyrene, $Bz_2O_2$ as, P 5608*b*.
of drying oils with styrene, $Bz_2O_2$ and $PbO_2$ as, 3212*h*.
of $C_2H_4$, $AlCl_3$ and chlorides as, 3814*f*.
of $C_2H_4$, Ca as, P 6001*b*.
of $C_2H_4$ derivs., azo compds. as, P 6002*g*.
of $C_2H_4$, esters as, P 8742*f*.
of $C_2H_4$, Grignard-type compds. as, P 9537*c*.
of ethylenic compds. 2569*c*.
of ethylenic compds., $H_2N_2O_2$ esters as, P 5641*b*.
of ethylenic compds., org. polyperoxides as, P 905*h*.
of 2-ethylhexyl vinyl ether, 6896*i*.
of ethynyl phenyl ethers, 6997*i*.
of glycol dimethacrylate with Me methacrylate, P 6468*a*.
of In, O as, 8819*a*.
of isoprene and isoprene-styrene solns., *tert*-Bu peroxides and $Bz_2O_2$ as, 8190*i*.
of isoprene with styrene, $Bz_2O_2$ and $K_2S_2O_8$ as, 2018*h*.
of Me methacrylate, $Bz_2O_2$ as, 8189*d*.
of 2-methylpropene, $BF_3$ as, 8829*g*, 8830*b*.

*polymerisation*, of 2-methylpropene, $H_2SO_4$ as, 5176*d*.
of 2-methylpropene with diolefins, $AlCl_3$ as, and its inactivation, P 5992*c*.
of 2-methylpropene with styrene to viscous oils, $BF_3$ as, P 8130*e*.
*N*-nitrosoacylarylamines as, 5629*h*.
of olefins, P 5939*b*.
of olefins, alkali and alk. earth metals as, P 5640*g*.
of olefins (di-) alone or with unsatd. compds., Co, Fe or Ni salts as, P 2025*h*.
of olefins (di-), HF as, P 3228*a*.
of olefins, $H_3BO_2F_2$ as, 8657*b*.
of olefins, HF solns. with P acids, anhydrides or esters as, P 5939*d*.
of olefins, imino compds. and nitrohydrocarbons as, P 8666*i*.
of olefins, lubricants from spindle oil and sludge from $AlCl_3$, P 6820*i*.
of olefins, metal halide as, P 3188*b*, P 3605*h*.
of olefins, Ni oxides as, P 5788*e*.
of olefins, oximes as, P 4514*i*.
of olefins, $H_3PO_3$-diatomite-$H_3PO_4$ as, P 3190*e*.
of olefins, solid phosphoric acids as, P 1559*e*.
perchloric acid as, P 2817*c*.
peroxides as, P 6465*f*.
peroxides of cyclic ethers as, P 1812*g*.
of polyester resins and of diallyl phthalate, org. peroxides as, 4891*g*.
of polyesters, peroxides promoted with trialkanolamines as, P 1220*c*.
of propene, $AlBr_3$-HBr as, 2496*h*
of propene, $BF_3$ compds. as, 1214*h*.
of resinous products with integral patterns and sheen, P 9525*h*.
of rosin, HBr- or HCl activated $CoBr_2$ or $CoCl_2$ as, P 1996*g*.
of rosin, HBr- or HCl activated salts of amphoteric metals as, P 1580*c*
of siloxanes, alkali metal derivs. of silanols as, P 7500*l*
of styrene, 2811*b*, 5754*d*.
of styrene, acid clay as, P 1605*h*.
of styrene by neutrons, EtBr as Szilard Chalmers, 6915*b*
of styrene, diacyl peroxides as, 7311*g*.
of styrene, $K_2S_2O_8$ as, 8199*b*
of unsatd. compds., iodoso diacylate as, P 5231*c*.
of unsatd. compds., peroxides as, P 9051*l*
of unsatd. compds., peroxydicarbonates as, P 5641*i*.
of unsatd. hydrocarbons, halides as, 7313*a*.
of vinyl alkyl ethers, $GaCl_3$ as, P 2469*i*.
of vinyl chloride, alkoxybenzoyl peroxides as, P 7753*e*.
of vinyl compd. mixts., biacetyl and lauroyl peroxide as, P 876*i*.
of vinyl compds., $Bz_2O_2$ as, 5272*b*.
of vinyl compds., peroxides as, 8201*i*
of vinyl compds., sepn. of metallic Na, from polymers, P 2469*i*.
of 4-vinylcyclohexene dioxide, perchloric acid as, P 2817*c*.
of 2-vinylfluorene, P 8740*g*.
of vinyl isopropyl ethers, $BF_3$ as, P 3228*h*.
from polymerization of hydrocarbons, alkyd resin manuf. from, P 5097*c*.
in polymerization of olefins and condensation of olefin polymers with aromatic hydrocarbons, $AlCl_3$ as, P 3190*g*
in polymerization (selective) of acetylenes in diolefins, P 662*f*.
polytetrafluoroethylene-bonded, P 9300*f*.
porosity of, activity and, 6336*b*.
porous, diffusion, flow and reaction velocity in, 7313*i*.
porous-glass, P 7162*h*.
for potassium peroxydisulfate decompn., allyl alc. and MeOH as, 6055*g*.
in protein detn. in feeding stuffs, 7158*g*.
in pyridine deriv. manuf., P 5426*i*, P 5427*a*.
in pyrolysis of 1,1-difluoroethane, P 6645*a*.
of 3,4-dihydro-2*H*-pyran, P 1795*e*.
of fatty acids to olefins, P 7034*i*.
of ketones, P 7496*h*.
of org. vapors, 2849*i*.
of resin oil, 9442*i*.
of rubber, active clay as, 5619*h*.
Raney Ni, kinetics of displacement reaction on, 928*c*.
Raney Ni, $Et_3N$ and $PtCl_4$ as promoters on, 6408*a*.
reaction rate and amount of, 2498*a*.
reaction rate on granular, effect of heat and material transfer on, 3698*g*.
in rearrangement of compds. of $SO_3$ with pyridines, P 696*i*.
recovery from vapors, P 7609*e*.
in reduction, of aromatic ketones, Pd-C as, 4241*g*.
of bromobenzene and 4-bromobiphenyl, 4242*f*.
of esters of fat acids, Raney Ni as, 5363*f*.
of esters of unsatd. fat acids, 5363*d*.
of 2-furaldehyde, Co as, P 1065*a*.
of lactic acid derivs. to glycerol, P 4290*g*.
of MgO by ferrosilicon, $CaF_2$ as, 4932*f*.
of oils to higher alcs., ores as, P 3835*e*.
of PhOH to $C_6H_6$, Mo oxides as, 2081*c*.
Se detection by its action as, 8961*c*
of $Na_2WO_4$ with polysaccharides, ultraviolet light as, 5704*a*.
of S-contg. nitro compds., Raney Ni as, 6179*b*.
of tartaric acid esters to erythritol, CuO-$CrO_3$ as, 8355*c*.
for reduction of C oxides, 8076*g*.
in reductive alkylation of $NH_3$ and amines, 2155*g*.
in reductive alkylation of *p*-phenylenediamine with ketones, $Cr_2O_3$-CuO-BaO mixt. as, P 4005*e*.
in reforming of gasoline, $Al_2O_3$-halogen-Pt mixts. as, P 8664*h*.
in reforming of gasoline, Zn spinel base mixts. or $MoO_3$ on charcoal as, P 389*g*.
for reforming of hydrocarbon mixts, P 9430*a*.
on refractory carrier, 8074*e*.
regeneration of, P 370*h*, P 2764*b*, P 5134*i*.
app. for, P 2764*c*, P 6819*gh*.
in fluidized beds, app. for, P 6873*g*.
regeneration of fluidized, P 1539*a*, P 9300*b*, P 8665*h*.
regeneration of moving-bed, P 3162*e*, P 6012*a*, P 6819*h*.
removal from alkylation mixts. and $Al_2O_3$-$SiO_2$ adsorbent as cracking catalyst, P 8666*a*.
al from hydrocarbon vapors or combustion gases, P 914*e*.
removal from vapors, cyclone for, P 7275*e*.
resinous deposit removal from metal, P 6763*d*.
in ring closure of *o*-allylphenol and of *o*-ethylphenol, 4252*i*
in rubber reaction with maleic acid or anhydride, $Bz_2O_2$ as, 1595*ag*, 1596*i*
salt oil-sol. compns. stabilized by alkyl phosphates, P 3216*a*, P 7240*d*.
in sapon., 8177*e*.
metallic soaps as, P 5612*g*.
sulfonated hydroxyaromatic-alicyclic compd. condensation products as, P 2793*h*.
for sapon., from $C_{10}H_8$ reaction with oleic acid, 882*i*.
in selenium and $SeCl_4$ reaction with chloroethylenes, $AlCl_3$ as, 2159*e*.
silica-gel, P 1506*a*, P 9299*d*.
effect on lungs, 4401*b*.
pore-size control with fluorides, 8076*f*.
silica-oxide hydrogel, P 7162*e*.
in silicon reaction with MeCl, Cu as, 2160*e*.
silver, reactivation of, P 9299*g*, P 9299*i*.
silver recovery from, P 6562*g*.
sodium, P 1932*c*.
specificity of, origin and, 4087*d*.
spherical gel pellets, P 3986*c*, P 5134*b*, P 8578*f*.
spherical particles of, drying and spraying app. for manuf. of, P 6013*e*.
stripping from vapors and regeneration of fluidized, P 4457*h*.
stripping gases or vapors from spent powd., app. for, P 2764*c*, P 7677*d*.
structure of, nuclear induction and, 8831*i*
structure of solid, valence induction and, 0897*e*.
in succinic acid ester manuf. from $\beta$-alkoxypropionic acid esters and CO, P 3451*i*.
sulfide, P 1932*f*.
in sulfide manuf. from alkyl halides and thiols, P 6646*c*.
in sulfonation of anthraquinone, suppression of Hg, 617*d*.
in sulfone resin manuf. from $SO_2$ and unsatd. compds., P 1217*cd*.
in sulfuration of fatty or mineral oils, aniline derivs. as, P 1178*c*.
in sulfuric acid monoester manuf. from alcs. and $H_2NSO_3H$, amides and cyanoguanidine as, P 3024*g*.
in sulfur removal from aryl-2-thioureas, HgO as, 2948*ae*.
from gases, $MnO_2$ as, P 4450*e*.
from gasoline, active C, $H_3PO_4$, $H_2SO_4$ and $ZnCl_2$ as, 8125*d*.
from pseudoureas in their reaction with guanidines, P 1059*f*.
in sulfuryl chloride reaction with $C_2H_4$, propene and vinyl chloride, pyridine and S chlorides as, 1249*a*.
surface properties of, kinetics of unimol. reactions and, 2498*d*.
in synthesis-gas manuf., P 4836*ab*.
from $CH_4$ and $CO_2$, 1944*fgh*, 4445*g*, P 7213*b*.
from $CH_4$ and $O_2$, 7200*c*.
in synthesis of org. compds., $HgCl_2$ as, 183*ag*, 184*c*.
in tar oil decompn., charcoal as, 7664*e*.
temp. in beds of, in tubular reactors, 6007*d*.
in terpene conversion to aromatic and cycloparaffinic hydrocarbons, bleaching clay as, 6185*a*.
in terpene reactions, P 6219*e*.
in tetraethyllead manuf., acetals as, P 8398*b*.
in tetrahydrofuran cleavage, P 4284*c*.
in thallium(I)–Tl(III) exchange, Pt black as, 8817*g*.
in thiol and sulfide manuf. from olefins and $H_2S$, P 664*h*, 1000*a*.
in thiol and thiophene manuf. from olefins and $H_2S$, P 691*g*.
in thiol formation from olefins and $H_2S$ in gasoline, $H_2SO_4$ as, 3601*d*
in thiol manuf. from alkyl halides and $H_2S$, P 6646*e*.
from diesters of 1,1-alkanediols and $H_2S$, P 5418*e*.
from olefins and $H_2S$, P 5790*i*.
from olefins and $H_2S$, $SiO_2$-$Al_2O_3$ gel as, 1715*h*.
in thiol reactions with unsatd. compds., 1321*b*.
in thiol removal from hydrocarbon-oil cracked vapors, purification of brucite or fuller's earth, P 1174*e*.
in thiophene formation from ethylene oxide and $H_2S$, $AlCl_3$ as, 1391*c*.
in thiophosphoryl chloride manuf., $AlCl_3$ as, 9394*h*.
titanium dioxide as, 8828*a*.
in toluene manuf. from bibenzyl, P 3454*a*.
in toluene manuf. from terpenes, P 1437*b*.
in *p*-toluidine reaction with $Cl_3CHCO_2H$, *o*-toluidine as, 1396*h*.
transfer systems for, P 1230*b*.
in *s* triazine deriv. formation from nitriles and HCHO, $H_2SO_4$ and $ClSO_3H$ as, 657*d*.
vanadium, sintering of, 7803*a*.
vapor sepn. from granular, P 914*f*.
in vinyl aromatic compd. manuf. from $C_2H_2$ and $C_6H_6$, $C_{10}H_8$, xylene, etc., HF and Hg fluoride as, P 5636*f*.
in vinyl ester manuf. from $C_2H_2$ and carboxylic acids, $Zn_3O(OAc)_6$ as, P 5036*c*.
in vinyl ester or ether manuf. from $C_2H_2$ and AcOH, Hg compds.-$BF_3$ as, P 3839*b*.
for vinyl fluoride manuf. from $C_2H_2$ and HF, P 3660*a*.
in vinyl formate prepn. from $C_2H_2$ and $HCO_2H$, 567*f*.
in vinyl polymer manuf. from $C_2H_2$ and alkylated benzenes, $BF_3$-ether complex, P 4051*d*.
for water-gas manuf., P 3599*a*.
in water-gas reaction, $Fe_2O_3$ and $Fe_2O_3$-$Cr_2O_3$ as, 1945*e*.
from zinc aluminate and Group VI metal oxides, P 7161*i*.
zinc oxide, P 6388*d*.
zinc spinel as support for, P 2384*b*.
zirconia-gel, P 5134*a*.
in zirconium dioxide conversion to monoclinic form, $Li_2O$ as, P 1580*b*.

**Catalyzers.** See *Catalysts*.
**Catamenia.** See *Menstruation*.
**Cataphoresis.** See *Electrophoresis*.
**Cataracts**, oxygen consumption by lens in, effect of amino acids on, 8044*f*.
therapy of, 2290*i*.
**Catatonia.** See *Mental disorders*.
**Catchup.** See *Catsup*.

**Catechin.** See *Catechol; Pyrocatechol.*
**Catechin red***, effect on histidine decarboxylase, 8464*c*.
**Catechol** (*catechin*). (See also *Epicatechol; Pyrocatechol.*)
as antioxidant in butter, 2337*d*.
in cacao beans, 8011*a*.
and derivs., from tea, 3394*a*.
*d*-, and pentaacetate, in chestnut shells, 1341*b*.
*d*-, effect on anticoagulant action of di coumarol, 3931*e*.
*d*-, effect on histidine decarboxylase, 8464*c*.
effect on sulfite pulping, 3195*e*.
isomers, adrenaline potentiation by, 5116*h*.
in rhubarb varieties, 9383*h*.
of tea leaf, condensation during oxidation, 728*e*.
*epi*-**Catechol.** See *Epicatechol.*
**Catecholase.** (See also *Tyrosinase.*)
measurement of activity of, in detection of black heart in pineapples, 9286*g*.
tyrosinase and, 9105*b*.
in tyrosine prepn., 9119*d*.
**Catechol oxidase.** See *Pyrocatechol oxidase.*
**Catechu** (*cutch*). (See also *Gambier;* and "bark" under *Mangroves.*)
in fish-net preservation, 8688*e*.
**Caterpillars,** control on cabbage, 6775*d*.
control on tomatoes, 3556*f*
**Cat flea.** See *Ctenocephalides felis.*
**Cathartics.** See *Purgatives.*
**Cathepsin,** in brain and liver after washing, 4707*a*.
effect of carbonyl group reagents on kidney, 9101*c*.
in gastric secretion of aphids, 323*a*.
from liver, action on casein and gelatin, 9089*c*.
in liver in infectious hepatitis, 3922*f*.
in neoplasms and tissues of neoplasm-bearing rat, 5108*b*.
sepn. from erepsin in liver slices, 9089*gh*.
as stomach protease constituent with pepsin and parachymosin, 9100*a*.
tenderizing meats with, P 1502*c*.
II, in kidney and liver of fed and fasted rabbit, 4752*c*.
**Cathode rays.** (See also *Beta-rays; Electrons.*)
effect on carotene and vitamin $B_2$, 9276*e*.
effect on niacin, 328*g*.
effect on niacin labeled with $C^{14}$, 8863*h*.
luminescence by—see "cathodo-" under *Luminescence.*
spectrum recording by means of, 7810*e*.
supervoltage, effect on nonenzymic browning reaction of dried fruits and on chem. compds. pertaining thereto, 5878*e*.
**Cathode-ray tubes.** (See also *Television.*)
cadmium phosphate phosphors for, P 7832*b*.
cathode for, P 1666*c*.
discoloration of screen support in, glass for prevention of, P 8290*g*.
fluorescent screens for—see *Fluorescent screens.*
fluorescent substances for—see *Fluorescent substances.*
fluoride phosphors for, P 7831*f*.
heating cathodes of, P 7359*f*.
history of, 1229*e*.
luminescent screens for—see *Luminescent screens.*
luminescent substances for—see *Luminescent substances.*
phosphorescent substances for—see *Phosphorescent substances.*
screens for, P 948*f*.
screens for, performance of, 4091*b*.
**Cathodes.** (See also *Electrodes; Filaments.*)
aluminum as, lecture expt. on, 6015*c*.
for aluminum manuf., P 6926*b*.
antimony-Cs, electron secondary emission from, 3704*g*.
energy-level structure of, 3705*c*.
optical and photoelec. properties of, 32*h*.
arc, vaporization of, 7356*f*.
for cathode-ray tubes, P 1666*c*.
cesium-O-Ag, optical and photoelec. properties of, 4557*c*.
copper (amalgamated), 6052*b*.
copper, potential of, in mixt. of $CdSO_4$ and $ZnSO_4$, 2874*e*.
in corrosion prevention—see *Corrosion.*
dark space—see *Electric discharge.*
depolarization of—see *Depolarization (electrolytic).*
depolarizer, for alk. dry cell, P 4155*a*.
effect on electrolytic reduction of 2-methyl-3-buten-2-ol and 2-methyl-3-butyn-2-ol, 994*f*.
effect on electrolytic reduction of nitroguanidine to aminoguanidine and nitrourea to semicarbazide, 4150*b*.
efficiency of, in electroplating baths, detn. of, 961*g*.
electron delayed emission from, in counter operating above plateau, 4945*h*.
electron-multiplier, of Sb-Cs, 482*d*.
electron-tube (oxide-coated, etc.), P 8921*b*.
alkali-metal alloys for, 4962*e*.
Ba (free) in, production of, 7323*g*.
Ba in, and evapn. from, 5679*t*.
barium orthosilicate interface of, elec. properties of, 8856*g*.
coated with metal, P 2104*g*.
coating for, from $BaCO_3$, P 8290*f*.
coating with alk. earth oxides, P 4154*e*.
conduction mechanism and electron emission of, 8856*t*.
elec. conductivity and work functions of, 2857*g*.
elec. properties of interface of, 4092*a*.
electron emission from, 4091*e*, 4095*d*, 4560*a*.
electron emission from, decay of, during space-charge-limited operation, 4095*d*.
electron emission from, in gaseous conduction devices, 4092*h*.
electron secondary emission from, 5660*h*.
electrophoretic deposition of carbonates and oxides on, effect of alcs. on, 8908*e*.
emission of neg. ions from, 8847*t*
energy levels in, 934*a*
evapn. of, 8286*d*.
ionic cond. of, 4084*a*.
for microwave tubes, P 4966*b*
optical pyrometry of, 1658*g*.
photoelec. effect in, 5678*f*.
pulse-emission decay phenomena in, 5660*f*.
rectification characteristics of interface of, 4092*a*.
resistance of, for pulsed emission, 2857*d*.
semiconducting properties of, 7353*g*
spectra of, 7324*h*.
standards for testing sleeves and tubing for, 4615*g*
thermodynamics in, 8838*c*
for electrooptical app., heating of, P 7359*f*.
for halogen removal from halogenated benzenes, 8908*f*.
hydrogen at, excited states of, 2874*h*
with hydrogen-evolution potential lowered 504*e*.
hydrogen liberation at Hg, from buffer solns., kinetics of, 6055*c*
iron, effect of pH, O and $K_2CrO_4$ on reactions at, 4620*h*.
for magnetron, P 7357*i*
mercury (dropping-), reduction of nitro compds. at, 5379*a*.
mercury, in reduction of org. compds., effect of continuous renewal of, 955*a*
metals as, 8287*f*, 8913*i*.
overvoltage on—see *Overvoltage.*
oxalic acid reduction at, 49*a*.
photoelec., of $Cs_2O$, photoelec. emission, thermionic emission and vapor pressure of, 7767*f*.
electron-microscopic investigation of microstructure of, 6074*a*.
I-sensitized, 1641*s*.
platinum, in syringe for measuring O tension in soln. and in respiratory gases, 8963*h*.
polarization of—see *Polarization, electrolytic.*
reduction at, mechanism of, 4587*c*.
refractory (hot), Hg-type arcs with, 2523*g*.
sputtering, etching of metals by, 5679*h*.
stainless-steel, for Mn recovery, P 8918*c*.
storage-battery, expander for paste for, P 5318*i*, P 5319*a*.
thoria, TiN and Zr nitride as conduction elements in, 3731*g*.
thoria-W, electron emission from sintered, 7323*e*.
**Cathodic reduction.** See "electrolytic" under *Reduction.*
**Cation-active substances.** See *Cleaning compositions; Surface-active substances; Wetting agents;* and "invert" under *Soaps.*
**Cationites.** See *Base-exchanging compounds.*
**Cations.** (See also *Bases; Ions, electrolytic.* For systematic detection or detn. of cations, see *Analysis.*)
absorption by clays, humic acid and soils, 7618*bdg*.
by plant roots, temp. coeff. of, and its dependence on salt concn., 7089*fh*.
by plants, soil factors influencing, 1835*i*.
adsorption of, by brown algae, 3068*c*.
effect on elec. properties of unimol film of palmitic acid, 6038*f*.
by rubber-latex particles, 7249*d*.
-anion balance in guayule leaves, 281*e*.
-anion balance in plants, 5449*t*.
catalysis by, of bromination of 2-carbethoxycyclopentanone, 3273*e*.
as catalysts in condensation of 2-furaldehyde with phenol, electrode potential and, 5226*b*.
compds. with nucleic acids, and effect of nucleic acids on their precipitability, 8416*b*.
in crystals, lattice energy relation to crystallochem. electronegativities of, 8788*c*.
detn. of total, 2658*c*, 8424*i*.
in sulfite waste liquor and lignosulfonates, 1182*i*
in water, 2715*h*.
diffusion of adsorbed, in suspensoid, 7777*h*.
distribution of heavy metal, in silicates contg. several ions of different size, 8782*c*.
effect on $CO_2$ removal from aconitic acid, P 1057*b*
on decarboxylation of oxalacetic acid, 5057*t*
on elec. cond. of Amberlite IR 10, 7785*f*
exchange and recovery of, P 3950*d*
exchange between metals and their, 6890*f*, 6891*b*
exchange capacity of adsorbed, 3687*i*
exchange in water purification—see also *purification of.*
exchange of, acid detn. in tan liquors by, 1205*f*.
bacterial control in, 9308*i*.
in cellulose derivs., P 5950*k*.
dynamics of, 3268*d*.
on mordenite, 5323*d*.
with phenolsulfonate resin, 8792*a*, 8793*a*
in purification of sugar solns., app. for, P 2798*e*.
by $AgMnO_4$-decompn. product, 4968*f*.
exchangers—see *Base exchangers, compounds.*
in glass, effect on He permeability, 9401
heat of hydration of, heat of wetting of soils in relation to, 7619*e*.
of heavy metals, effect on hygroscopicity of glass surface, 2069*e*.
hydration of, Debye Huckel theory and, 7302*a*.
hydration of, effect on chromatography, 8295*a*.
hydration of exchangeable, of clay minerals and synthetic resins, 9215*h*
mobility of, in membrane, 2069*g*.
phosphate soly. and, 1511*g*.
phosphorus adsorption by chernozem and, 7621*c*.
polycationic compds., 3306*e*.
in soils—see *Soils; Soils, analyses.*
in spinels, arrangement of, 6032*f*.
**Catnip oil.** See *Oils.*
**Catsup,** estn. of tomato content of tomato, 3116*a*.
vitamin C in, 3538*c*.
**Cattails,** use of *Typha angustifolia* and *latifolia*, 9501*i*.
**Cattle.** (See also *Feeding experiments; Metabolism, animal.*)
anaplasmosis in, 6775*d*.
cobalt toxicity to, 8534*b*.
insectifuges for, P 5899*d*.
parathion toxicity to, 3139*f*.
research on, 6775*b*.
toxaphene in tissues of, from alfalfa, 8600*g*.
**Cattle tick.** See *Boöphilus annulatus.*
**Cattleya.** See *Orchids.*
**Cauliflower,** amino acid content of, in relation to Mn and Mo, 7552*c*.
amino acids in, 3534*g*.
cabbage-maggot control on, 3136*i*.
carotene and vitamin C in, 3538*a*.
carotenoids in, during development, 5454*a*.

discoloration of, 9313*e*.
European-corn borer control on, phenylsemioxamazide compns. for, P 5530*b*.
frozen, cytological and microchem. characteristics of, 5878*h*.
hexachlorocyclohexane effect on, 5148*b*.
leaf meals from, nutritive value of, 4343*e*.
molybdenum in nutrition of, 5092*i*.
seed-crop-pest control on, 4416*g*.
soil-acidity effect on, 2349*i*.
vitamin $B_1$ in, and effect of cooking thereon, 6753*h*.
vitamin C in, 5511*b*.
**Caustic potash.** See *Potassium hydroxide*.
**Caustic soda.** See *Sodium hydroxide*.
**Caustobiolites**, polymer-contg., from petroleum well, 5350*a*.
**Cavitation**, 4540*h*.
corrosion and, 6962*a*.
reactions in, 3682*e*.
by ultrasonic waves—see *Ultrasonic waves*.
**CCH-358**, in blackroot control in sugar-beet seedlings, 7175*i*.
**CCH-358A**, in blackroot control in sugar-beet seedlings, 7175*i*.
**Ceará rubber.** See "from *Manihot glaziovii*" under *Rubber*.
**Cecidomyia**, control on pears, 9348*d*.
**Cecum.** See *Intestines*.
**Cedar oil.** See *Oils*.
**Cedars.** (See also *Cryptomeria; Junipers; Thuja*.)
copper and Zn in bark, twigs and wood of *Thuja plicata* in biogeochemistry, 3321*c*.
structural board from bark of, 6409*e*.
wood of—see *Wood*.
**Cedilanid.** See *Lanatoside C*.
**Cedrela toona**, plywood and veneer from, 2812*e*.
**Cepryn.** See "1-hexadecyl— chloride" under *Pyridinium compounds*.
**Ceiba pentandra.** See *Kapok*.
**Celadonite**, -like substance in calcitic limestone in Västanfjärd, Finland, 5345*i*.
**Celandine**, effect on bile secretion in liver, 5115*d*.
**Celerio euphorbiae**, phosphorus compds. in relation to metabolic rate in pupae of, 8561*b*.
**Celery**, aphid control on, 346*c*.
carotene and vitamin C in Pascal and bleached, 3536*b*.
compn. of Fla. grown, and effect of soils thereon, 9289*c*.
compn. of, soil effect on, 2722*h*.
control of root-knot and weeds in, 5145*b*.
cooling and disinfecting of, prior to nonrefrigerated storage, 9288*g*.
cracked-stem of, and its control, 1891*f*.
fertilizer expts. with, 4802*i*, 8083*i*.
fungus control on, 7178*a*.
germination of seed of, 2288*h*.
germination-stimulation by chloropicrin and weed control in, 3134*g*.
heteroauxin effect on yield of, 1839*c*.
oleoresin manuf. from, 8573*f*.
sodium detn. in, 8956*g*
vitamin $B_1$ in Italian, 6753*h*.
vitamin C in, 5511*b*.
**Celery cabbage.** See *Cabbage*.
**Celery leaf tier.** See *Phlyctaenia rubigalis*.
**Celestite** (*celestine*), from Alps (northern), 8313*d*.
compression of, 4917*b*.
from magnesites of Oberdorf, Austria, 3748*i*.
of Sicilian S mines, crystallography of, 3319*h*.
strontium carbonate manuf. from, 368*c*.
of Trinity River Tributary area in Okla and Tex., 4607*i*.
**Celiac disease**, fat absorption and dietary starch in, 8026*a*.
proteins in blood in, 8050*h*.
**Celite** (*diatomaceous earth*), mixts. with silicic acid, chromatographic properties of, 8945*i*.
mixt. with $Ca(OH)_2$ for chromatography, 2068*a*.
**Cellafilter**, as membranes for detn. of electrolytic $H_2O$ transference, 8245*c*.
**Cellfalcicula**, in cellulose degradation in soils, 5891*e*.
**Celliton dyes.** See *Dyeing*.
**Cellobiose**, β-, octanitrate, 5007*f*.
derivs., microörganism attack on, 7692*g*.
detn. and reducing power of, 7861*c*.
effect on growth of plant tissue, 4349*a*.
effect on [illegible]plasmin formation, 7194*h*.
formation by thermophilic cellulose-fermenting bacteria, 720*d*.
octaacetate, from cellulose, 3609*b*.
——, **octoamino-***, 7430*g*.
——, **octoazido-***, 7430*g*.
**Cellobioside, 8-hydroxy-1-anthraquinonyl**, and heptaacetate, 5019*h*.
——, **β-methyl**, heptanitrate, 5007*f*.
heptanitrate, vapor pressure of acetone over solns. of, 4928*c*.
——, (*p*-**phenylazophenyl**), heptaacetate, spectrum of, 6919*f*.
**Cellobiuronic acid**, chemoimmunological properties of, 4339*a*.
**Cellohexaose**, eicosaacetate, from cellulose, 3609*c*.
**Cellopentaose**, heptadecaacetate, from cellulose, 3609*b*.
**Cellophane.** (See also *Sheet materials; Transparent materials; Wrapping materials*.)
adhesion to polymers, 8133*f*, 8207*a*.
dye diffusion through, 7778*c*.
effect on drilling muds, 8652*g*.
and kraft paper laminate of, measurement of water-vapor permeability of, 5949*c*.
labels for application to, P 1188*g*.
manuf. of, 7681*g*.
membranes of—see *Membranes*.
molds from, effect on aging and tensile properties of rubber, 2023*h*.
permeability to KCl solns., selectivity const. and ratio of mobility of cation and anion in, 8702*g*.
purification for use as dielectric, P 3119*g*.
swelling and shrinkage of, 7680*f*.
waterproof coatings for, slip agents in, P 2471*b*.
**Cellosize.** See "hydroxyethyl ether" under *Cellulose*
**Cellosolve.** See *Ethanol, 2-ethoxy-*.

book: Physikalische Chemie der Zellen und Gewebe, 5815*d*.
chemotaxis of—see *Chemotaxis*.
cytoplasm, physiochem. behavior of, 6716*c*.
differentiation of, enzymic adaptation in, 1447*f*.
electrolyte distribution between surrounding media and, 7107*d*.
evolution (self-oriented) of, 8414*g*.
exudates of—see *Exudates*.
growth and metabolism of, 4710*g*.
growth substances for—see *Growth substances*.
kinetoclastic substances, properties common to carcinogens and, 8517*a*.
mitogenetic radiation from—see *Mitogenetic radiation*.
protoplasm of—see *Protoplasm*.
radiation action on, antidotes therefor, 5811*e*.
response to external reagents, denaturation and, 3050*d*.
staining of—see *Staining; Stains*.
structure of, lipides and liproproteins in, 9090*h*.
weight of, detn. of, 5438*c*.
**Cells, animal.** (See also *Eggs; Fibroblasts; Golgi's apparatus; Growth; Immunity; Metabolism, animal; Muscles; Tissue, animal;* and the cross references under *Cells*.)
acidophilic plasma and Paneth, in tissue bordering cancerous growths, 4362*h*.
activation of, change in osmotically inactive fraction produced by, 2256*f*.
activity of, bacteria in relation to, 9144*e*.
addn. complex between carcinogenic hydrocarbons and elements from, 3920*i*.
alpha-ray effect on, of brain and eyes of frog tadpole, 1445*b*.
amino acid detection in, and staining with acid dyes, reactions of nucleases on, 255*h*.
amino acid metabolism of, 3862*e*.
amplifier action of, 9099*i*.
books: Techniques of Histo- and Cytochemistry, 714*c*; Klinik und Pharmakologie des Urethans und anderer cytostatischer Stoffe, 9268*i*.
calcification of cultures of, in presence of embryo juice and mammalian serums, 8409*a*.
cancer, zinc detn. in, 2545*i*.
caryometric observations, 9246*c*.
as chem. factories, 4309*a*.
cytostatic substances, 8064*d*.
cytostatic substances, therapy with, 9268*f*.
desoxyribonucleic acid depolymerase action in living, 4713*b*.
deuterium oxide effect on, 3481*b*.
4-dimethylaminoazobenzene effect on compn. of liver and liver tumor, 4761*i*.
division of, in anterior pituitary after ovariectomy, effect of estrogens on, 4354*h*.
in brain of embryo chick, effect of acridine compds. on, 7135*g*.
in corneal epithelium in thiouracil treated and thyroidectomized rats, 7578*h*.
diphenylarsine chloride as poison of, 7576*d*.
effect of *p*-aminobenzoic acid and sulfanilamide on, 7143*f*.
effect of heparin on, 3529*f*.
effect of 1-(*p*-hydroxyphenyl)2-amino-3-butanone on, 5499*a*.
effect of mustard and N mustard on, 767*i*.
effect of mustard, ultraviolet and x-radiation and colchicine on, 770*f*.
effect of urethan on, 4380*i*.
inhibiting effect of aspidospermine on, 1427*g*.
inhibiting effect of quinones on, 1861*a*, 3526*f*.
inhibition of toxic effect of metal org. compds. on, 4773*b*.
inhibitor action against, 3526*b*.
inhibitors for, 8416*a*.
in liver, effect of thyroxine on incidence of, 1487*i*.
mercapto group uptake in relation to inhibition of, 2703*h*, 7591*b*.
prevention of poisoning of, 3478*i*.
production of multinucleated unsegmented triton eggs by substances inhibiting, 5873*f*.
in skin, in relation to sugar and phosphate, 7567*a*.
of small intestines, effect of spleen ext. on, 5103*d*.
dye effect on, oxidations and, 778*e*.
effector, adrenaline equilibrium with, 3101*f*, 5492*e*.
effector, reaction to chem. transmitters, 261*g*.
energy metabolism of, 3049*c*.
enzyme distribution in, 1852*e*, 3913*a*.
enzymes in nuclear membranes of, 704*g*.
enzyme systems of, 7064*b*.
epithelial, mutual adhesiveness of, 299*e*.
glucides, nucleic acids, nucleosides and nucleotides in, 3870*b*.
gonadotropic hormones in, 2299*i*.
growth of, biochem. and physiol. interrelationships between nucleus and cytoplasm during, 1851*b*.
growth of, during normal and pathological conditions, synthesis of hemoglobin in relation to, 750*h*.
inclusion bodies in, 4371*bc*.
in cicatrizing enteritis, 300*d*.
induced by Pb and Bi, acid-fastness of, 7539*f*.
of lymphocystis tumor in fish, osmophilic granules of cytoplasmic, 9230*g*.
iron demonstration in, 5850*f*.
karyolysis of, effect of mustard or N mustards on, 768*g*.
Kupffer, peroxidase in, 5054*i*.
liver, effect of vitamin $B_{12}$ on basophilia in, 5098*g*.
liver (normal and regenerating), $N^{15}$ in purines from nuclei and cytoplasm of, 4718*d*.
liver, particulate fractions of, 4315*d*.
liver (regenerating), 4355*f*.
malignant, effect of N mustards and penicillium exts. on, 9248*d*.
mast, in bone marrow, 3528*c*.
cytochrome oxidase and phosphatase in, 2649*c*.
as heparin source, 3915*i*.
in skin, reaction to org. chemicals, 3109*d*.
membrane of, in phosphate transfer, 5436*g*.
4-methyl-2-thiouracil effect on, 6307*i*.
mustard gas effect on, 319*d*, 2257*f*.
nerve, binding of dyes in relation to duration of stimulation of, 742*a*.
nuclear fragmentation of, by N mustards and mustard gas, 768*d*.
nuclear oligotherosome of, compn. of, 1815*h*.
nucleic acids in, absorption of ultraviolet light in relation to, 7981*e*.
nuclei of, desoxyribonucleic acid in, 2690*f*, 9093*b*, 9210*i*.

*nuclei of*, phosphatase action in, 2685*g*.
precursor of ribo- and desoxyribonucleic acids in, 5435*a*.
proteins of, 2652*e*, 4310*b*.
nuclei sepn. from liver, and detn. of their nucleic acids, 5073*i*.
nucleoprotein components from normal and cancerous, dehydrogenation of, 4304*i*.
nucleus (interphase) of cancerous and normal, 5856*a*.
nucleus (interphase) of, chromosomes in, 4715*i*.
oxidation in, flavoenzyme catalysis and, 1449*i*.
oxygen consumption by blocked and active embryonic, effect of phenylthiourea, urea, thiouracil and thiourea on, 3938*i*.
permeability to salicylates, effect of cation on, 3520*b*.
permeability to theophylline, 319*a*.
*Podophyllum* resin effect on, 5907*c*.
proliferation of, acceleration and inhibition by substances in blood serum during pregnancy, 5841*b*.
acceleration and inhibition by substances in normal and cancerous blood and urine, 4364*i*.
inhibition by urethan, 5488*d*.
vitamin $B_{12}$ effect on, 9195*i*.
by vitamin $B_{12}$, pteridine, etc., enzyme action on, 9196*b*.
proliferation rate of normal and neoplastic tissue and bone marrow, effect of pteridines on, 261*i*, 262*bc*.
protective action of Ca prepns. on, 5493*a*.
protein metabolism of, 9190*h*.
proton range-energy relations in, 6502*f*.
respiration of active and blocked embryonic, effect of diethyldithiocarbamate on, 2331*f*.
respiration of, effect of cold on, 5053*a*.
respiration of embryonic, effect of urethan on, 774*f*.
ribonucleic acid detection in, 4719*i*, 4720*b*.
sensory (campaniform), DDT effect on, of leg of cockroach, 3964*i*.
sensory, cholinergic nature of, 5842*a*.
of skins, 1203*e*.
staining of—see *Staining; Stains*.
virus combinations with host, effect of pH and electrolytes on, 1482*i*.
water movement in kidney, liver and pancreas, 3091*b*.

**Cells, electrical**. See *Cells, electrolytic; Cells, photoelectric; Cells, voltaic; Storage batteries*.

**Cells, electrolytic**. (See also *Electric condensers; Furnaces, electric; Rectifiers;* and "app. for" under *Electrodeposition, Electrophoresis, Electroplating*.) P 4588*c*, P 4966*a*.
for alkali manuf., P 3733*h*, P 3986*a*.
for allyl alc. manuf., P 3300*f*.
for aluminum manuf., 2871*d*.
anode app. for, P 5682*d*.
furnace bottom from C skull of, P 4587*g*.
for aluminum refining, P 4588*a*, 6089*e*.
for bromides and chlorides of alkali metals, P 6097*b*
for calcium manuf., 8899*d*.

books: Degradative Action of Acids and Alkalies on, 5950*b*; Spraying, 8680*f*, Les méthodes de la chimie de la, comprenant des méthodes de recherches sur les celluloses composées, 9445*d*; Physics and Chemistry of, Fibres, 9445*d*.
in burdock and carrot roots, 6287*d*.
butyrate acetate and propionate acetate, prepn. and hydrolysis of, 1962*g*.
butyrate acetates, detn. of acetate and butyrate groups in, 1289*e*
hot-melt water vapor-resistant coatings from, P 4028*f*.
nitrocellulose detection and detn. in films of, 8967*i*.
plasticizer effect on, 5944*g*, 5945*a*.
standards for molding compns. from, 4400*c*.
butyrate and propionate, manuf. of, P 6414*f*.
butyrate crotonate, P 2468*g*.
butyrate, lacquers from nitrilotriacetic acid esters and, P 5229*h*.
carbanilate, octamethylenedicarbamate and tetramethylenedicarbamate, 1563*g*.
carboxyalkyl ethers, manuf. of, P 7685*h*.
carboxymethyl and methyl ethers, effect on soil aeration, 6771*d*.
carboxymethyl and sulfoethyl ethers, 1819*t*.
carboxymethyl ether, P 4854*a*.
Al salt, P 9536*d*.
antacid prepn. contg. alkali salt and, P 8104*f*.
by products from manuf. of, improving detergency of soaps by, P 5978*a*.
desoiling properties of, 8711*c*.
effect on drilling muds, 8652*g*.
in increasing rot resistance, swelling tendency and water absorbency of textiles, P 418*a*.
manuf. of alkali salts of, P 7686*b*.
poly(hydrogen sulfate) Na salt, P 4013*e*.
polysulfates of, P 3978*h*.
Na salt, as water softener and dirt carrier, 5977*b*.
Na salt, effect on bentonite, 8652*g*.
Na salt, effect on suspending power o. soap solns., 8709*i*.
Na salt, in detergent solns., 4876*a*.
Na salt, in drilling mud for anhydrite, 3599*g*.
in sugar jelly formation, 2709*e*.
carboxymethyl ether Na salt, and methyl ether, hydrophilic properties of, 8609*b*.
carboxymethyl ether, Na salt, and methyl ether, manuf. and use of, 6408*d*.
carboxymethyl Me ether, P 9445*e*.
catalyst-contg., dispersion in thermosetting resin, P 2034*g*.
from cellulosic by-products, P 8680*g*.
in cell wall of *Valonia ventricosa*, 1961*d*.
from cereal straw, 7226*h*.
chain-length distribution of, 9435*g*.
chain length of, viscose filterability and, 2427*a*.
changes during storage of, 7227*g*.
chemistry of, 4857*e*.
chloroacetate acetate, (guanylmercapto)-acetate acetate and *p*-toluenesulfonate acetate, 3611*a*.
in coal and petroleum formation, 2409*d*.
complex formation with streptomycin and its reversal by salt, 5825*a*.
compns. with urea and HCHO, thermosetting, P 5232*b*.
Congo red absorption by, 4848*f*.
from coniferous and deciduous wood, compn. of, 5587*a*.
contraction and swelling of, 7679*i*.
contraction and swelling of, ion exchange in, 468*g*.
copper-ammonia deriv.—see *Copper-ammonia cellulose*.
in copper electrodepositions, 1269*a*.
from cotton husks, hydrolysis of, 7225*c*.
cross-linking of, P 8137*b*.
crystallinity of, 8132*h*.
crystallinity of, hydrolysis effect on, 8135*f*.
crystallite orientation in fibers of, 5954*f*, 6829*e*.
crystn. and mol. structural order of, phys. properties and, 6829*h*.
crystal structure of, from jute and ramie, 2429*c*.
cyanoethyl ethers, acetone-sol., P 404*h*.
cyanoethyl ether, structure of, 2839*f*.
decompn. of, by bacteria from intestines of porcupine, 4336*f*.
biochem., 3609*ce*.
by myxobacteria, 6700*h*.
in soils, 1891*e*.
decompn. products of, and their effect on soil structure, 8082*e*.
degradation of, 5587*c*.
during atm. exposure, 3608*e*.
by oxidation, 5587*f*.
in soils, 5891*e*.
soly. no. in measurement of, 8133*c*.
by sunlight, oxide effect on, 8133*h*.
during viscose process, 3611*b*.
density and diam. of fibers of, detn. of, 2069*b*.
depolymerization in $H_2SO_4$, 7800*c*.
derivs., cation exchange in, P 5950*c*.
combined with *N*-alkoxymethylpolyamide, P 3659*c*.
cyanine dyes for, P 7846*c*.
disazo dyes for, P 858*g*.
disulfide-cross-link synthesis in, 3610*g*.
in drugs and cosmetics, 1529*i*.
dyes for, P 8163*a*, P 8165*a*.
and fabrics coated therewith, P 9446*g*.
films of, for NaCl tablets, P 8619*h*.
as fixatives and thickeners in printing pastes, P 9473*i*.
halo nitro olefins as solvents for, P 6646*i*.
hollow bodies from, P 1187*h*, P 4899*g*
in laminated glass manuf.—see *Glass*
mixt. with alkyd resin and fungicid, coating textiles with, P 3208*h*.
oxidative stability of, 5943*adg*.
in paints, 1577*d*.
plasticizers and softening agents for, P 4301*i*.
soly. of, 1963*i*, 1964*bdf*.
sol. in dil. alkali, P 8138*a*.
solvation of, 6044*d*.
specificity of microörganism attack on, 7692*g*.
sponges and porous materials from, 2427*c*, P 6868*a*.
stabilization of, against heat degradation, P 849*e*.
steam treatment of, reduction of swelling by, P 8137*c*.
wrinkle-drying coatings from unsatd. oils and, P 2790*e*.
and derivs., spectra of, 8886*h*.
from desert plants, 6337*g*.
detection of, 5704*a*.
detn. of, P 3196*h*, 6411*eg*, 8677*i*.
in aspen wood, 1179*f*.
by dichromate oxidation, 9435*b*.
in feeding stuffs, 7152*i*.
in pimientos, 6329*e*.
in plants, 9438*f*.

*detn. of*, in wheat bran, 3532*f*.
detn. of cryst. and amorphous material in fibers of, 4461*a*.
detn. of β- plus γ-, in paper pulp, 4464*h*.
diffusion treatment of, app. for, P 9447*e*.
digestion of, by animals, bacteria in, 8574*g*.
in feeding stuffs, treatment with bacteria and chemicals to aid, 8574*h*
in rumen and in ruminal ingests of sheep, 2694*c*.
by silkworm larvae, 3529*c*.
dispersions of fibers of, measurement of fluidity of, 4787*e*.
dopes—see *Dopes*.
drying, sorting and washing of, app. for, P 6415*e*.
dye affinity and fastness in wet state on, dicyanodiamide-HCHO condensation products improving, P 7238*b*.
dyeing—see *Dyeing*.
dyes for—see *Dyes*.
effect on filterability of viscose, 397*a*.
electrokinetic potential of, 21*d*.
electron microscopy of, 3615*d*.
esterification of—see *Cellulose esters*.
etherification of—see *Cellulose ethers*.
ethylene oxide ether, urea as diluent of textile sizes from, 8687*c*.
ethyl ether, activation of solvents for, 6044*e*.
bearing strength of, measurement of, 4891*i*.
bis(allyl lactate) maleate as plasticizer for, P 2034*c*.
casting compns. of, P 5592*de*, P 9300*g*.
coalescence of, 4892*h*.
coating compn. from glyceryl succinate resin, urea-HCHO resin and, for silk, P 6834*c*.
coating for glass fibers from, P 3987*b*.
as coating material, 876*a*.
color stabilization of, P 5796*c*.
compn. with Me methacrylate polymer, P 8740*a*.
elasticity of, temp. and, 2027*g*.
elec. insulators from silicones and, P 4894*h*.
formation of, and ethoxyl detn. in, 4845*i*.
fractional pptn. of, 8672*h*.
gelation on heating of aq. solns. of, 3611*d*.
impregnating compn. from cetyl acetamide, coumarone indene resin and, P 2033*d*.
inorg.-salt effect on gelation of, 8134*f*.
light-polarizing sheets from, P 2820*a*.
mixts. with silicones as heat-insulating materials, P 4518*b*
nonmetallic armor from, P 4402*h*.
oil- and sunlight-resistant compns. from acrylonitrile-butadiene rubber and, P 4045*i*.
plastic from, P 2815*c*.
plasticizers for, P 3242*h*, P 4518*f*, 5627*h*.
prepn. from ethyl sulfate under vacuum, 6824*b*.
prepn. of, 4848*i*.
in shadow-cast replica techniques of electron microscopy, 8846*i*.
solns. in EtOAc, expansion on diln., 6044*i*.
stabilization of, P 6414*df*.
stabilizers for, P 4853*adf*.
structural viscosity in $C_6H_6$, 8235*i*.
testing of, 4399*b*.
in waterproofing fibrous material, P 9449*a*.
fermentation by *Cladosporum herbarum*, 6704*f*.
fermentation of, by thermophilic bacteria, symbiosis in, 6699*a*.
fibers—see also *Fibers*.
fibers, rendering anionic coating material adherent to, P 5643*h*.
films from, P 849*a*.
filtering, dewatering or washing of, app. for, P 9447*f*.
fireproofing of, aminoplast resin powder mixts. with chlorinated org. compds. for, P 3210*c*.
fireproofing or flameproofing of, with $Sb_2O_3$, P 3210*c*.
in flax fiber, detn., relation to strength and calcn. of chain length, 4858*d*
flocculation of fiber suspensions of, 1181*f*.
flour, effect of *Tribolium confusum* on,
formaldehyde-resin finishes on fibers of, identification of, 4017*g*.
formaldehyde treatment of fibers of, 4121*i*.
fungi decompg. (ref. should be vol. 19), 9456*f*.
from Palestine, 8444*e*.
in soil, effect of fertilizers on, 6350*i*.
fungus control on, P 1146*c*, P 1526*a*, P 1902*b*, P 7632*f*.
German industry of, 5949*g*.
growing process of fibers of, 1462*b*.
heat of combustion and compn. of, 7225*e*.
heat of sorption of water by, and entropy change of, 9433*i*.
heat of wetting and heat of absorption of water by, 1180*h*.
heat of wetting of, by org. liquids and water, 1638*e*.
hemicellulose relations to, 3609*g*.
of hemp bast fiber, effect of degumming and encrustant removal on degradation of, 4858*f*.
hydrate, transformation into native cellulose, 1962*bd*.
hydration of, and its derivs., 845*h*.
hydrolysis of, P 3616*g*, 4461*b*, P 5187*d*, 5941*di*, P 6414*i*, P 6415*b*.
hydrolysis of, app. for, P 3197*f*.
2-hydroxy-3-butenyl and 2,3,4-trihydroxybutyl ethers, P 1979*d*.
hydroxyethyl and hydroxypropyl ethers, manuf. of, P 5592*f*.
hydroxyethyl ether, amine salts derived from boric acid complexes of, P 1800*f*.
in coating paper, 7682*i*.
compn. from urea, HCHO and, P 5640*b*.
depolymerization by ultrasonic waves, 8780*a*.
reaction with *p*-toluenesulfonyl chloride, 3784*g*.
water-sol., P 9446*a*.
hydroxyethyl ether (dyed), and its use in textile dyeing, P 416*f*
and hydroxyethyl ether, paper manuf. from, P 5594*a*.
hydroxyethyl, methyl and Na carboxymethyl ethers, thickening latexes with, 6410*i*.
ignition and combustion of, effect of chemicals on, 4468*b*.
in invertebrates of Black Sea, 6746*c*.
iodine adsorption by, 9438*g*.
irradiation effect on polymerization of, 6407*i*.
isoamyl, isobutyl, sec-butyl and isopropyl ethers, prepn. of, 5942*h*.
from jute, structure of hydrated, 4009*e*.
lacquers—see *Lacquers*.
laurate acetate, manuf. of, P 3197*a*.
from lignin-contg. material, P 7685*c*.
losses of, detn. in processing of beech wood, 6407*c*.
manganese detn. in, 6824*e*.
manuf. in sugar factory, 6400*d*
of marine algae, 2285*i*
mech. properties and structural elements of, 3202*g*.
mech. properties of, and its derivs., 1961*h*.
mercerization of—see *Mercerization*
mercerized, hydration of, and its effect on crystal structure, 397*c*.
mercerized, NaOH absorption and fixation by, 7233*g*.
methane manuf. from, 5925*d*.
methylation of, 396*d*
methylation of native and regenerated, and of Na cupricellulose, 2770*h*, 2771*a*.
methyl ether—see also *Tyloses*.
methyl ether, adhesive tape for laminating from, P 7756*d*.
aq. solns. of, vs. cellulose suspensions, 7227*c*.
in control of onion smut, 9313*b*.
in diabetic prepns., 7638*i*.
effect on polarographic analysis, 4181*h*, 4930*a*.
incompatibility with polymers in aq. soln., 6460*e*.
insectifuge from pyridine and, P 5899*d*.
monograph for, 8103*b*.
plywood adhesive from PhOH, HCHO and, P 3650*c*.
rigidity of mols. of, 20*a*.
water-resistant materials from compns. contg., P 1980*b*.
methylethyl or Me glycol ethers and Na salt of carboxymethyl ether as emulsifying agents in fats and oils, P 6437*e*.
micelles in, x-ray scattering and, 6044*e*.
mixer and cooler for solns. of, P 6410*d*.
mol. wt. and other properties of wood, 1960*i*.
nitrates—see *Nitrocellulose*.
nitration of—see *Nitrocellulose*.
nitric acid (dil.) effect on, 1973*ab*.
nitric acid effect on Cu no. and α-cellulose content of cotton, 4847*g*.
noble, and its manuf., 5587*d*.
oxazolidine derivs., P 3196*i*.
oxidation (accelerated) of cotton, 8671*g*.
oxidation of, P 404*f*, 2425*f*.
with $HNO_3$, $HNO_2$ and N oxides, 6823*d*.
with $NO_2$, 9438*a*.
with NaOCl, vat-dye effect on, 8671*g*.
oxidized, and its salts in cement retardation, P 6389*a*.
oxy-, properties of acidic, 8672*a*.
papermaking properties of, 4011*c*.
from pear cell walls, 7679*f*.
-pectin complexes, decompn. during retting of coconut husks, 5953*f*.
pentosan detn. in, 6824*f*, 7228*b*.
pentosans in, 1975*g*, 1976*acegh*, 1977*acdfh*.
photochem. degradation of dyed and undyed, irradiated by Hg spectrum, 412*f*.
photographic films from—see *Photographic films*.
photolysis by ultraviolet light of cotton, 1563*c*.
photolysis of, in presence of tungstic acid, 1181*c*.
from *Pinus insignis* and *P. pinaster*, 4010*c*.
in plant membranes, effect of stage of development, temp., light and humidity on, 5454*g*.
plasticizers for, P 3658*h*.
plastics from, 4788*g*, 4789*b*.
elec. properties of, 5250*e*.
review on, 131*f*.
sound-recording belts from, P 6468.
polyuronic acids from, chemoimmunological properties of, 4338*g*.
preservation of, esters of unsatd. tricarboxylic acid for, P 7634*d*.
product manuf. from, P 4014*d*.
purification of, and its products, P 440*a*
reactions of, 4849*f*.
with diisocyanates, 1563*d*
with HCHO, 141*b*
with HCHO and HCHO compds., 1192*e*
with nitric acid, 1978*hi*.
reactivity of, uniform constitution of wood and, 7225*a*.
recent advances in chemistry of, 845*h*
regenerated, adhesive films from, P 3240*c*.
adhesive for sheets of, P 1221*c*.
anthraquinone dyes for, P 863*e*.
bonding material for, P 2037*c*.
coating (hot-melt) for, P 1222*g*
crystal structure of, 8134*b*.
degradation prevention by steam treatment of, P 8138*b*.
dielectric from, P 3119*g*
dyes for, P 857*g*, P 2782*a*, P 3204*h*, P 4478*bfg*, P 4480*a*, P 4482*g*, P 4867*bd*, P 6426*h*, P 6427*abde*, P 7235*f*, P 7703*a*, P 7705*g*, P 7706*b*, P 8156*ag*, P 8160*h*, P 8690*a*
effect of quaternary pyridinium salts of chloromethyl ethers of polyols on, 4010*b*.
films from, P 1567*d*, P 5640*c*, P 6415*f*
in globular particles, P 4854*c*
heat-sealable moistureproof film from, P 3664*a*.
membranes from, for osmotic pressure measurement, 7743*e*.
in particle form from viscose, P 6825*d*
sheets from, P 2774*e*.
NaOH effect on, 8132*g*.
regenerating baths for, clarification of, P 4014*c*.
regeneration of, from hydrazine-cellulose, 8131*i*.
review on, 4848*i*.
in rhubarb varieties, 9383*h*.
saccharification of, P 4014*a*, P 6825*gh*.
from cotton, with formic acid, 395*e*.
formic acid recovery in, P 405*a*.
sepn. from lignocellulose, supersonic vibrations in, P 404*i*.
sheet materials from—see *Paper; Sheet materials*; etc.
size distribution of mols. of, and its relation to soly., 9485*dc*.
softening agent for, 1-(*o*-ethoxyphenyl)-5-stearoylbiguanide methylated sulfonated guanamine, P 5216*g*.
softening agent for fibers of, supermethylated stearoylcyanoguanidine, P 9498*i*.

soly. in Schweitzer reagent and $CuSO_4$-$NH_4OH$ reagent, 5324*g*.
solns. (nongelatinizing) of, P 7228*g*.
solns. of, for coating textiles, P 2786*d*.
solns. of native or regenerated, nongelatinizing ZnO-contg., for textile finishing, P 7714*c*.
of sorghum cane, 9501*d*.
sorption and swelling of, 4009*b*.
spruce, ethylenediamine effect on, 3594*b*.
stearate acetate, manuf. of, P 5592*a*.
stearate acetate, self-sealing fuel tank laminated with, P 7668*h*.
strength of fibers of, orientation and, 4402*e*.
structure and polymolecularity of, 8670*i*.
structure and properties of fibers of, 5954*e*.
structure of, 3691*d*, 4460*i*.
app. for detn. of, 1961*f*.
cell wall in plants and, 4857*g*
in cotton fibers, polymerization degree and, 413*e*.
in electron-microscope range, 3607*d*.
heat effect on, 4849*f*.
small-angle x-ray scattering and, 4460*i*.
swelling and, 5587*g*.
water sorption and, 4849*i*
structure of fibers of, effect on chem. reactions, 4845*i*.
from stump wood, 6407*e*.
sugars from, P 1980*a*.
sulfate, antagonism to alexin, 1100*i*
sulfate, effect of streptomycin on reaction of, with alexin, 5485*b*
sulfate Na salt, P 4013*i*.
sulfite liquor—see *Sulfite liquor*.
sulfite 2-stage process for making, P 3197*g*.
sulfoacetate, 2431*f*, 2432*cde*
2-sulfoethyl ether and its salts, 396*g*, P 9446*d*.
2-sulfoethyl ether and polysulfate Na salt, P 2774*f*
(2-sulfoethyl) ether, neutralization curve of, 4083*b*.
surfaces of, 6407*e*.
surgical dressings contg., P 6792*i*.
swelling properties of, 9454*h*.
textile coating and impregnating with solns. of, P 4023*h*.
textiles of—see *Textiles*.
thermochemistry of reactions of, and its derivs., 1963*dfh*.
threads of—see *Threads*.
tubes from, P 5951*a*.
ultracentrifuge in study of, and its derivs., 3195*e*
ultraviolet irradiation of, effect of water vapor and O on, 5941*b*.
uniting, to rubber, P 3227*e*.
in vegetable foods and its alteration during digestion, 6753*e*.
from vine branches, P 8680*f*.
in viscose manuf., behavior of components of, 1564*h*.
viscose of—see *Viscose*
viscosity (Cu) detn. of, 6824*d*.
viscosity detn. of, 9435*i*, 9436*d*.
viscosity of suspensions of, app. for control of, P 5950*f*.
vulcanization of, 8130*e*.
washing of, P 6415*d*
washing resistance of, Al salt of guanylurea-$CH_2O$ condensation product for increasing, P 7726*f*.
waste lyes from, recovery of solids from sulfite, P 3617*h*.
wastes from, treatment of, 6768*e*
waterproofing of, with acyl peroxides, P 4023*e*.
in wheat, effect of extn. on distribution of, 6748*g*.
in wood, effect of lignin-destroying fungi on, 8131*g*.
in wood, fungus effect on, 8670*h*.
from wood of *Trichospermum ledermannii*, 1970*i*.
wool substitutes of—see *Wool substitutes*.
wrapping materials of—see *Wrapping materials*.
xanthates—see *Cellulose xanthates*.
x-ray scattering by oriented fiber of, 8272*d*.

**Cellulose, carboxymethyl-.** See "carboxymethyl ether" under *Cellulose*.
——, **6-deoxy-***, synthesis of, 9437*d*.
——, **iodotosyl-***, 9437*g*.
——, **sulfoethyl-**. See "sulfoethyl ether" under *Cellulose*.

**Cellulose acetates.** (See also *Lacquers; Photographic films;* etc.)
acetyl detn. in, 1977*i*.
adhesive-coated, P 3240*c*.
bearing strength of, measurement of, 4891*i*.
burning control on rocket propellants by, 7229*g*.
5-*tert*-butylsalicylic acid esters for modifying, P 4697*d*.
butyrate and propionate of, prepn. and hydrolysis of, 1962*g*.
butyrates of, detn. of acetate and butyrate groups in, 1289*e*.
hot-melt water vapor-resistant coatings from, P 4028*f*.
nitrocellulose detection and detn. in films of, 8967*i*.
plasticizer effect on, 5944*g*, 5945*a*
cellulose adhesion to tri-, 8133*f*.
cellulose sheets for making, drying of, P 9445*h*.
chloroacetate, (guanylmercapto)acetate, and *p*-toluenesulfonate, 3611*a*.
coalescence of, 4892*h*
compns. with nitrilotriacetic acid esters, P 5230*a*.
cross linking of, 8672*f*.
crystallinity of, 8132*i*.
density, dye affinity, surface area, swelling and water adsorption by, during deacetylation by NH₃, 6423*a*.
derivs., stabilization of, against heat degradation, P 849*e*.
dyes for, P 2781*i*, P 2783*hi*, P 2784*ab*, P 7694*b*, P 7695*h*.
effect on soil aeration, 6771*c*.
elasticity of, temp. and, 2027*g*.
elec. properties of plastics from, 5250*i*.
for films, P 4853*h*.
films and filaments from, P 6826*d*.
films, etc., from, of high tenacity, P 9476*g*
films from, phys. pretreatment and saponifiability of, 854*d*
films from, whitened by fluorescent benzimidazole derivs., P 9474*f*
finishes for, 7259*h*
gelation of, inorg.-salt effect on, 8134*i*
for glass laminates, P 9407*h*
heat of formation of, 1963*dfh*.
heat softening of, plasticizers in, 5944*d*.
hydration of, 845*i*.
laurate, manuf. of, P 3197*a*.
manuf. of, P 1187*g*, 2430*bdhi*, 2431*beii*, 2432*abcefg*, P 5592*g*, P 6414*f*.
manuf. of stable tri-, P 7685*g*.
membranes of, permeability to KCl solns., selectivity const. and ratio of mobility of cation and anion in, 8702*g*.
microwave absorption and dispersion in, 6019*d*.
mixts. with aldehyde - polycyanoacetamido compd. condensation products, P 6003*d*
molding compds. from cellulose acetate butyrate and, standards for, 4400*b*.
mol. size distribution of, detn. of, 4189*g*.
mol. wts. of, 3266*f*.
pigments for, yellow red azo pyrazolone, P 7746*e*.
plasticizers for, P 3242*h*, 5627*h*, P 9529*f*
from dialkylphenylphosphonates, P 7752*e*.
1,4-hendecanediol dicaproate as, P 6652*b*.
mixed esters of polyhydric alcs. as, P 1796*ad*.
pentaerythritol tetraacetate as, P 3656*e*.
plastics from, 2027*ef*, 9522*ef*.
polymers from Me methacrylate, casting of, P 8741*d*
prepn. of, 1963*a*.
cellulose crystal lattice modification in, 6061*a*.
from cotton by ketene, 5595*b*.
tertiary amines in, 2769*d*.
prepn. of tri-, and films therefrom, 6408*c*.
rayon of—see *Rayon*
recovery from fines from manuf. thereof, P 3197*d*.
resorcinol disalicylate in stabilization of, P 1979*g*.
silvering of, P 4520*e*.
soly. and structure of, oxalic acid effect on, 9436*f*.
soly. of, 1963*i*, 1964*bd*.
solvents for, activation of, 6044*e*.
spectrum of, 8887*a*.
spinning of, effect of solvent compn. on, 1965*a*.
stability (heat) of, 5943*g*.
stabilization of, P 7685*f*.
stabilization of, in anhydrous medium, P 2435*e*.
stabilizers for, P 4853*a*.
standards for molding compds. from, 4787*h*.
stearate, manuf. of, P 5592*a*.
molding hollow articles from, P 4899*h*.
self-sealing fuel tank laminated with, P 7668*h*.
strain-stress relations (anomalous) in, 4510*e*.
sulfuric acid formation in drying of, 2427*d*.
systems of, 5654*g*.
tubing of, for insulation, 8751*b*.
water absorption by, 9522*d*.
water-vapor permeability of, 8738*d*.
wood pulp suitability for making, detn. of, 6408*b*.

**Cellulose esters.** (*Entries here are general. For specific esters, see* Cellulose acetates; Cellulose xanthates; Nitrocellulose; *and* "butyrates," *etc., under* Cellulose. *See also* Photographic films; Rayon; *and* "derivs. of" *under* Cellulose.)
binding material from, P 9538*d*.
5-*tert*-butylsalicylic acid esters for modifying, P 4697*d*.
coating compn. from polysulfide polymers and, P 6001*h*.
coating compns. from synthetic resins and, for textiles, P 6834*b*.
as coating materials, 5202*f*, 5970*i*, P 6003*g*.
coatings from acyl, varnishing in predetd. areas using strippable, P 8705*d*.
compns. with resins and oils, P 4051*a*.
cross linking of, 8672*e*.
dyeing of, with dinitrophenoxazine or dinitrophenothiazine, P 4488*d*.
dyes for—see *Dyes*.
for films, P 4853*h*.
fluorescent, P 4013*d*.
fuel tank (self-sealing) laminated with, P 7668*h*.
glass-fiber body from, P 4824*c*.
of higher fatty acids, purification of, P 404*g*.
insectifuges from pyridine and, P 5899*d*.
lacquers—see *Lacquers*.
manuf. of, P 2468*d*, P 5592*a*.
manuf. of stable tri-, P 7685*g*.
nitrocellulose detection and detn. in films from, 8967*i*.
pigment-contg., P 7268*a*.
plasticized, P 4514*d*.
plasticized with ethyl 1-(carbethoxyethoxy)ethyl carbonate, P 2435*d*.
plasticizers for, P 1796*ad*, P 5631*b*.
*N*-(2-aminoethyl)formamide derivs. for manuf. of, P 3028*g*.
lactic acid derivs. as, P 676*b*.
plastic material from, printing with lin seed oil-C black resist and etching of, P 4030*d*.
prepn. and hydrolysis of mixed, 1962*g*.
purification of, P 4466*c*.
ripening and stabilization of, P 5592*bc*.
ripening of, P 3616*i*.
satd.-unsatd. mixed, P 1979*c*.
solns. of, in binary solvent mixts., evapn. of, 1964*h*.
stabilization of, P 7685*e*.
in anhydrous medium, P 2435*e*.
benzyl benzoate in, P 1979*e*.
stabilizers for, P 4852*i*.
for textile lamination, P 9477*f*.
water-sol., P 1187*g*.

**Cellulose ethers.** (*Entries here are general. For specific ethers see* "benzyl ether," "ethyl ether," "methyl ether," *etc., under* Cellulose. *See also* Tylose; *and* "derivs." *under* Cellulose.)
coating compn. from polysulfide polymers and, P 6001*h*.
coating compns. from synthetic resins and, for textiles, P 6834*b*.
coatings from, P 6003*g*.
as detergent protective colloids of "soil carriers," 6436*d*.
dyeing in solid form, soln. in alkali to form dye soln. and pptn. of dye on cloth by acid, 416*b*.
dyeing of, with dinitrophenoxazine or dinitrophenothiazine, P 4488*d*.
dyes for—see *Dyes*.
elec. insulators from silicones and, P 4894*g*.
of 3,4-epoxy-1-butene and their oxidation products, P 1979*d*.
fibers or filaments from—see *Rayon*.
floor and wall coverings from, P 2448*h*, P 2449*a*.
with glycolic acid—see "carboxymethyl ether" under *Cellulose*.
lacquers—see *Lacquers*.

manuf. of, P 5592*f*.
manuf. of, alkali neutralization in, P 9446*c*.
mixts. with silicones as heat-resistant insulating materials, P 4518*b*.
pigment-contg., P 7268*a*.
plasticized with ethyl 1-(carbethoxyethoxy)ethyl carbonate, P 2435*d*.
plasticizers for, P 1796*ad*, P 2034*b*, P 4514*e*.
lactic acid derivs. as, P 676*b*.
from petroleum-cracking fractions, P 6465*c*.
prepn. of, 2426*g*.
purification of, P 4466*c*.
review on, 5588*a*.
-rubber molding powders, P 2803*c*.
as sizing for paper for diazotype process, P 8294*f*.
sol., P 9445*i*.
soly. of, 1964*f*.
solns. in alkali metal zincate to increase dye and pigment fastness on textiles, P 6428*g*.
sponge substitute from, P 6868*a*.
stabilization of, P 1187*h*, P 4466*d*.
agents for, P 4852*i*.
bis(triethyl citrate) sulfite for, P 4466*g*.
tall-oil compn. with, P 2435*g*.
in textile industry, 6420*e*.
as thickening agents in textile-finishing paint, P 7713*d*.
water-sol., plasticized with cyclotetramethylene sulfone, P 6003*d*.

**Cellulose extract**. See *Tanning materials*.

**Celluloseglycolic acid**. See "carboxymethyl ether" under *Cellulose*.

**Cellulose hydrates**. See "hydrated" under *Cellulose*.

**Cellulose nitrates**. See *Nitrocellulose*.

**Cellulosexanthanilide***, 8135*e*.

**Cellulose xanthates**. (See also *Viscose*.)
chemistry of, 1181*g*.
copper-ion diffusion in gel of, 6048*f*.
detn. in viscose, 1566*g*.
manuf. of, 4848*a*.
app. for, P 8680*h*.
control in, 8685*f*.
oxidation of, 9439*d*.
prepn. of, 3611*a*, 9436*g*.
mechanism of, 8674*d*.
pentosan effect on, 1977*g*.
swelling of gels of, in salt solns., 4079*c*

**Cellulosexanthic anhydrosulfide**, 8135*d*.

**Cellulose xanthogen disulfide***, 9439*h*.

**Cellvibrio**, in cellulose degradation in soils, 5891*e*.

**Celtis**, oils of—see "hackberry" under *Oils*.

**Celtium**. See *Hafnium*.

**Cement**. See *Adhesives; Calking compositions; Cement, hydraulic or structural; Dental fillings; Mastics; Putty; Refractory materials; Sealing compositions*.

**Cement, hydraulic or structural**. (See also "hydraulic" under *Lime*.)
acid-compd. use in, P 6388*h*.
acidproof, coating from, P 6389*f*.
adhesive from casein, hydrated CaO and, P 6004*c*.
aggregates for oxychloride or portland, P 3990*a*.
alkali detn. in, 373*f*.
alkalies in, origin and behavior toward $H_2O$, 8633*f*.
alumina detn. in, 4441*i*.
alumina, in hot climates, 2393*c*.
aluminous or bauxite, 9409*h*.
analysis of, 1165*i*.
anhydrite, 832*f*.
from anhydrite and gypsum, 2377*di*.
from anhydrite and TETs cement or blast-furnace slag, P 9410*f*.
asbestos, fly ash and boiler slag in making, 2911*c*.
asbestos-, medical problems in industry of, 4826*h*.
from ashes, 1938*b*.
from ashes, $CaCl_2$, CaO and $MgSO_4$, P 6804*h*.
barium, P 8638*d*.
burning of, 1937*bd*, 8635*g*.
app. for, P 7276*a*.
app. for detn. of O in flue gas in, 8115*h*.
with coal or elec. heat and elec. arc, P 5318*f*.
heat transfer in rotary kilns in, 1545*e*.
intensifying work of rotary kilns in, 2752*b*.
phys. properties of cement mixes and, P 3165*b*.
in rotary kilns, 8115*i*.
of California (Kern Co.), 4607*e*.
carbon dioxide effect on hydrated, 2395*h*.
in chem. engineering, 8745*c*.
as chem.-engineering construction material, 1*b*.
chromium-Mn, 1935*g*.
clay minerals and, 3580*g*.
cleaning compns. for, 4255*b*, P 3640*c*.
clinker constitution, manuf. and structure of hydrated, 1165*h*.
clinker, detn. of free CaO in, 3987*h*.
clinker, increasing formation by fluorite, 2749*e*.
coal ash as hydraulic additive for, 1936*h*.
coarse-ground, and pozzolanic addns., 8635*c*.
coating chimneys with, against flue gas, 100*c*.
coatings for, from hydrocarbon resins, P 903*c*.
concrete from—see *Concrete*.
constitution of, 6387*c*.
contraction and expansion of mixts. contg., in humid surroundings, 4825*c*.
crushing, grinding and kiln-feed system in manuf. of, 831*h*.
for dams, 9410*a*.
dense products from, P 374*d*.
drilling-mud contamination by, and $NaH_2PO_4$ in its prevention, 5175*j*.
dusts, soly. of, 6335*g*.
expanding, 2394*h*, 2395*ab*, P 6388*i*
from argillaceous slags, blast furnace slag, slaked lime and anhydrite, P 3166*e*.
contg. Ca sulfoaluminate, P 4113*e*.
expansion of, 5565*i*.
expansion of Belgian, 2751*c*.
fibrolite manuf. from, 9409*b*.
fibrous, paste for manuf. of, P 1166*i*.
fineness of, detn. of, 5565*i*.
flue-dust use in, P 8116*h*.
fuel economy in manuf. of, 4825*f*.
gas adsorption by hydrated, and surface of, 4826*d*.
German industry of, 1938*cd*.
grinding of, dicarboxylic acids as aids in, P 9410*g*.
mill liners for, 3589*g*.
review on, 1166*g*.
gypsum, for oil wells, 7214*i*.
from gypsum hemihydrate, CaO and potash-production wastes, P 9410*f*
heat of setting of, 2395*g*
hydration of, 3587*i*, 6060*b*
hydration rate of, and its ingredients, 3589*b*, 8635*i*.
hydrochloric acid-insol. residue of, detn. of, 9407*i*.
hydrogen-chloride resistant, 5132*i*
industry in 1946, 2127*a*.
as jointing material, 8635*e*.
journal: Zement-Kalk-Gips, 3989*d*.
kilns for, dolomite brick in, 3581*d*
kilns or furnaces—for merely descriptive studies see *Kilns*.
kilns (rotary) for, P 8116*i*.
latex effect on, 2752*c*.
lightweight material from bentonite and, P 1939*c*.
lime (free) detn. in, 2749*i*, 5567*f*, 7860*d*.
lime-slag, hardening of, 831*f*.
lime-slag, manuf. of, 1546*f*.
limestone effect on, 2751*e*.
limestone for, flotation of, 1938*g*.
liquid phase in manuf. of, 7205*g*.
magnesia, P 5568*h*, 9393*i*.
from magnesia and $MgCl_2$, P 6389*e*
from magnesia and $MgSO_4$, 8633*g*.
magnesite, dolomite for, 5554*f*.
magnesium-oxychloride, Cu additive for, P 833*a*.
detn. of setting time of, 831*e*.
water-insol., P 3166*f*.
manuf. of, 1165*e*, P 5568*e*, 5919*f*.
manuf. of $Al_2O_3$, Fe, etc., and, P 6143*d*.
manuf. of $Al_2O_3$, Fe, $H_2SO_4$ and, 2395*e*.
manuf. of cast Fe and, 4825*i*.
manuf. of, in elec. rotary kiln, 3589*d*.
manuf. of special, in U.S.S.R., 1035*i*.
manuf. of $SO_2$ and, P 825*i*.
manuf. of $H_2SO_4$ and, 7650*h*
manuf. of $H_2SO_4$ and, from anhydrite and shale, 2343*d*.
marl as additive for, 1545*i*.
for masonry, 8115*g*.
for metal patching, P 3771*i*.
for Mexican reclamation work, 7659*b*.
microfiller-contg., 1937*i*.
mills for, 1936*g*.
minerals in, detn. of, 5919*g*.
mixts. with lime, expansive properties and soundness of, 1938*h*.
with slag, 8635*c*.
mixts. with soils, P 5568*f*.
molded articles from waste sulfite liquor and, P 4517*f*.
mortar—see *Mortar*.
paints for, stearates in water, 4492*g*.
particle size of, measurement of, 1938*a*.
phosphate, P 373*h*.
plasticizers for, rosin and abietic resin as, 7657*i*.
Plastiment use with, 2395*i*.
Polish industry of, 2394*d*.
pozzuolana, as concrete material, 2751*g*
mortar from lime and Segni, 2750*i*.
of Segni, Italy, 2750*g*.
properties of, glassy state and, 2394*e*
properties of, phys. properties of clays and, 828*i*.
raw materials for, activation of clays or kaolins, P 3166*g*.
$Al_2O_3$-manuf. residue as, P 4435*c*.
calcg. output of mills for, 1545*b*.
calcg. proportions of, 3589*h*.
calcn. of compn. of, 1546*b*.
control of compn. of, 4826*i*.
flotation of, 1546*e*.
low-grade coal and oil shale as, P 2753*a*.
reaction with aggregates, 831*i*.
refractory, P 4442*b*, 6384*g*, P 6388*i*, 7656*g*, P 7660*e*.
research on, 2395*i*.
reviews on, 1165*g*, 1935*i*, 4788*f*, 4789*a*.
for roads in Germany, 373*d*
Roman, improvement of, P 6389*e*
roofing tile from, 5915*d*
rosin soap use in, P 7660*f*.
rubber-latex compns. with, 7208*d*.
Scandinavian industry of, 2394*e*.
sea-water effect on, 1936*h*.
sepn. of slurries for, P 3249*e*.
setting of, accelerator for, P 7660*h*, accelerators and retarders for, 3165*e*
effect of added substances on, 8834*g*
shrinkage of, during setting and hardening, 2393*d*.
sieve analysis of, 2069*h*.
silica detn. in clinker and raw material for, 2749*g*.
slag, 3589*c*, P 3590*g*, P 6144*d*, 6803*g*, 8635*e*, 8636*g*
building materials from, P 9411*b*
drying conditions and, 2393*i*.
effect of heat on, 1546*h*
manuf. and use of, 8633*i*
manuf. from Hungarian bauxite, 9000*d*
slag (blast-furnace) use in, P 6388*e*
slow-setting, for oil wells, etc., P 6065, P 5920*i*, P 6389*a*.
slurries of, prepn. from chalk and clay in mixer and gyratory screen, 2749*d*
Sorel, P 1828*e*
from Sorel cement and pozzuolanic materials, P 3590*h*.
standards for, 1165*h*, 4397*h*, 5567*e*
sulfate attack on, 6387*d*.
sulfate effect on, and its prevention, 7657*g*.
sulfate resistance of, 2750*i*.
surface area of, 18*h*.
app. for measurement of, 1546*h*
detn. of, 1937*f*
tank linings of, 6761*e*
testing of, 1165*i*.
tetracalcium aluminate ferrate(III) formation in, temp. of, 3587*g*
TETs, effect on binding properties of calcium sulfate modifications, 9409*h*
thermal-insulating, air entraining, etc., standards for, 4785*f*.
from Tuff-breccia, $CaCl_2$ and $Ca(OH)_2$ in cement dust, P 6804*h*.
Vinsol effect on suspensions of, 1546*a*
of Washington, 6547*d*.
wastes from, decolorizing agents from, P 5982*b*.
water (nonevaporable) in hardened paste of, and its detn., 6387*e*.
water-permeability of, detn. of, 3987*i*
water-repellent coating or impregnant for materials contg., P 3600*h*
white, 2393*c*.
x-ray analysis of, 3588*i*.

complexes, 4969*i*.
exchange reactions between Ce(III) and Ce(IV) in, 8272*a*.
intermetallic, 7771*b*.
with magnesium, 9012*b*.
tannin complex, 8984*f*.
**Cerium fluoride,** phosphor of rare earth fluorides and, P 500*i*.

**Cerium glycerophosphates**, hydrolysis of, 4551*b*.
**Cerium hydrides**, heavy, formation of, 4122*e*.
$CeH_2$, formation in misch metal, 2840*i*.
**Cerium nitrate**, exchange between two oxidation states of, 6532*h*.
partition between hexyl alc. and $H_2O$, 8808*a*.
Raman spectrum of, 8887*g*.
**Cerium oxalatochromate(III)**, 4970*c*.
**Cerium oxides**, catalysts of $Al_2O_3$ and, in $C_2H_4$ and toluene manuf. from petroleum and its gases, 8061*c*.
films on glass for increasing reflection, 3161*h*.
$Ce_2O_3$, aluminum phosphate phosphor contg., P 1661*e*.
as catalyst in combustion of black rocket gunpowder, 9440*f*.
lanthanum silicate phosphor contg., P 4959*a*.
magnesium pyrophosphate phosphor contg., P 1662*c*.
phosphor contg., P 7832*g*.
$CeO_2$, as catalyst in dehydration and dehydrogenation of EtOH and HCOOH, 6497*i*.
catalyst of, and $SiO_2$ in alkylation of thiophene with olefins, P 691*d*.
ceramic materials contg. $TiO_2$ and, 4823*d*.
effect on spectral transmission of glasses, P 827*h*.
glass contg., 3577*g*, P 8290*h*.
in glazes (opaque), P 1166*c*.
magnetic susceptibility of, 2053*d*.
mixt. with $ZrO_2$, thermal expansion of, 8254*a*.
systems with $Pr_2O_3$, $Nd_2O_3$ and $Sm_2O_3$, 8782*b*.
trypsin adsorption by, 3864*d*.
**Cerium oxysulfide**, $Ce_2O_2S$, crystal structure of, 3709*i*, 6484*f*.
**Cerium perchlorates**, water oxidation in solns. of, rate of, 8815*c*.
$Ce(ClO_4)_4$, reduction of, in light, 7349*h*
**Cerium phosphates**
$CePO_4$, crystal structure of, 15*e*
$Ce_3(PO_4)_4$, light scattering by, during gel formation, 7785*d*.
**Cerium potassium fluoride**, $KCeF_4$, crystal structure data on, 3709*i*
**Cerium salts**, effect on reduced wool, 5955*g*.
magnetic resonance absorption by, 2053*g*
phosphates activated by, phosphorescence of, 6085*b*.
**Cerium silicide**, $CeSi_2$, crystal structure of, 6484*h*.
**Cerium sodium fluoride**, $NaCeF_4$, crystal structure data on, 3709*i*.
**Cerium sulfates**, catalyst contg., for coal bustion, P 4835*f*
oxidation potential of ceric cerous, 4585*b*.
$Ce_2(SO_4)_3$, Faraday effect for, 8242*i*.
**Cerium sulfides**, crystal structure of $Ce_2S_3$ and $CeS_2$, 3709*i*, 6484*e*.
**Cermets**, P 5565*h*, P 5918*d*, 8627*f*, 9402*b*.
sintering and testing of, 4438*e f*.
from titanium carbide, 8627*f*.
from titanium carbide and Co, Mo or W, 8628*a*.
turbine blades of, for aircraft power plants, 7654*h*.
**Cerotic acid** (*hexacosanoic acid*), in *Artocarpus elasticus* latex, 4041*i*.
ester, in *Artocarpus communis* latex, 4042*i*.
films (unimol.) of, evapn. of, 7767*d*.
mixts. with palmitic acid, crystal structure of, 5253*e*.
prepn. of, 3866*h*.
– –, γ-**oxo-**, and methyl ester, 3366*g*.
**Cerotoma ruficornis**, control of, 3067*d*.

on protoplasts, 5091*c*.
exchange of ions of, 464*i*.
exchange with phenolsulfonate resin, 8792*b*.
films of Sb and, electron diffraction by, and microscopy of, 2481*i*.
films of Sb and, optical and photoelec. properties of, 4092*a*.
gamma-rays of, energy of, 6075*i*.
gyromagnetic ratio and magnetic moment of, 4137*a*, 8262*g*.
gyromagnetic ratio of, 8865*c*.
hemolytic activity of, 5839*c*.
hydration of ion of, 8214*b*.
from iodine isotopes, 2861*e*.
ions (neg. gaseous) of, in CsCl vapor, 8868*i*.
isotope of mass 131, half-life of, 4120*f*.
isotope of mass 132, β-radioactivity of, 8268*c*.
isotope of mass 134, β- and γ-rays from, 8268*d*.
isotope of mass 134, γ-rays from, 1642*i*.
isotope of mass 135, from decay of $Xe^{135}$, 5296*g*.
isotope of mass 135, metabolism of, 6318*e*.
isotope of mass 137, β- and γ-rays from, 4949*f*.
β rays from, 8879*h*
data on forbidden β-decay of, 8860*b*
decay of, 3707*h*, 8266*i*.
instability of, 5288*c*.
magnetic moment and spin of, 8879*g*
quadrupole moment of, 8262*a*
isotopes of masses 136 and 137, from Ba by α ray action, 4127*b*.
isotope, in plant nutrition studies, 1079*f*.
magnetic moment of, 5303*d*.
minerals, Sr in, in caleg. geol. time, 2906*f*.
photocathodes with Sb and O on Ag, surface of, 6074*b*.
photocells—see *Cells, photoelectric*.
rectifier contg., 4094*g*.
in sediments and sea water, 5350*e*.
sorption of ions of, by glass, 2066*f*, 8233*h*.
spectrum of, 2509*g*, 6510*f*, 7338*b*.
system: O, 2884*i*.
toxicity to Myxomycetes, 8148*f*.
Zeeman effect in, 4953*g*, 7337*f*
**Cesium, analysis**. (See also *Alkali metals, analysis*.)
detection, 8966*c*.
detection in $Rb_2CO_3$, 5287*i*.
detn., 7307*i*
sepn. from U fission products, 4127*h*.
**Cesium acetate**, in acetic anhydride, behavior of, 2110*e*.
**Cesium arsenate**, $CsH_2AsO_4$, piezoelec. crystals of, P 3699*b*.
**Cesium barium copper thiocyanate**, $Cs_2BaCu_3(CNS)_7$, 5324*g*.
**Cesium barium silver thiocyanate**, $Cs_2BaAg_3(CNS)_7$, 5324*h*.
**Cesium bromide**, dielec. const. of, 3674*h*.
expansion in $H_2O$, 7298*f*.
vapor pressure of, 457*d*.

wettability of, effect of gases on, 2485*i*.
**Chalk**, cement manuf. from clay and, 2749*c*.
density (apparent) of powd., 3265*c*.
from Germany (Söhlde), 2136*g*.
of Kansas (Ft. Hays), 3753*a*.
manuf. of, P 4821*h*.
mixts. with cement, effect of humidity on, 4825*d*.
mixts. with rosin or stearic acid in foam-rubber manuf., gases evolved from powd., 6854*h*.
particle size of, measurement of, 4923*i*.
as pigment extender, 8704*a*.
**Chalkboards**. See *Blackboards*.
**Chalking**, of paints—see *Paint*.
**Chalybite**. See *Siderite*.
**Chamazulene**, partition between petr. ether and $H_2SO_4$, 5768*f*.
**Chamber process**. See "manuf. of" under *Sulfuric acid*.
**Chamois**. See *Leather*.
**Chamomile**. See *Camomile*.
**Chamosite**, crystal structure and mineralogy of, 8987*g*.
in ironstones of Northampton Sand, England, 5347*g*.
of Luxembourg, 2133*c*.
marine origin and transformations of, of Eastern Tataria and Western Bashkiria, 6951*i*.
**Chamotte**. See *Grog*.
**Champagne**. See *Wine*.
**Ch'ang Shan**. (See also *Dichroa febrifuga*.) active substances from, 1529*i*.
**Char**. (See also *Coke*.)
from animal or vegetable material—see *Charcoal*.
by fluid devolatilization of coal, 835*b*.
measurement of particle size and pore structure of, 7208*i*.
**Characteristic functions**. See *Proper functions*.
**Charcoal**. (See also *Carbon; Carbonisation; Norite*.)
acid-treated activated phosphate-impregnated, P 4452*d*.
activation of, 4922*d*, 5571*i*, 5572*acd*, 6396*c*.
adsorption and desorption by, of AcOH, 3686*i*.
adsorption by, 3686*g*, 7289*a*.
of AcOH and $BuNH_2$ from aq. solns., 2485*d*.
of aromatic hydrocarbons and reactivation by desorption, P 386*d*.
from cyclohexane mixts. with acetonitrile or $MeNO_2$, 461*e*.
in gas purification, 2744*b*.
gas selective, 8789*d*.
of Au and Ag from cyanides, P 5357*c*.
of hydrocarbon-gas, 6488*f*.
of HCl, 8796*h*.
of penicillin, 6789*d*.
in presence of gastrointestinal contents, 4767*c*.
of vapors, 4616*g*.
bone black and coconut-shell, reaction with O, 8839*g*.
bone black or animal, ash removal and decolorizing tests for, 8649*b*.
cooling of, 8649*i*.
detn. of carbonaceous residue in, 8648*d*.
drying app. for, 8649*g*.
pH of liquors filtered with, 8650*e*.
manuf. of, 8648*hi*, 8649*c*.
microstructure of, 8649*h*.
reaction of adsorbent, with O, 4546*h*
revivification of, tests for, 8650*b*.
standards for, 4398*f*.
for sugar industry, 4504*b*, 6445*g*.
trypsin adsorption by, 3864*e*.
briquets contg., for producer-gas manuf., P 4835*c*.
capillarity and surface area of, 6036*g*.
carbon black by grinding of, 1169*i*.
catalyst from, for polymerization of cyanogen chloride, P 2381*a*.
catalyst from Hg treated, P 1932*d*.
as catalyst in decompn. of coal light oil, 7664*e*.
as catalyst in dehydrogenation of cyclohexane, 7912*a*.
catalyst of $AlCl_3$ and activated, in isomerization of hydrocarbons, P 844*f*.
catalyst of HgO and, in fluorination of unsatd. hydrocarbons, P 2218*e*.
catalyst of $MoO_3$ and, in reforming cracked gasoline, P 389*g*.
catalyst of Pd and, in isomerization of morphine, 5786*e*.
cation exchangers from oxidation products of, 8076*c*.
coconut-shell, in adsorption of normal paraffins from mixts. with branched-chain paraffins, P 2215*i*.
catalytic value of, in chloromethylation of aromatic hydrocarbons, P 5583*e*.
reaction with $CO_2$, 3695*a*.
reaction with steam, 3694*f*.
sorption of $CCl_4$ and $H_2O$ vapors by, 4922*b*.
coking test for, 1947*e*.
deodorizer from, P 5516*i*.
flow through bed of, 7288*c*.
in foam prevention on lubricating oils, 6816*b*.
graphitization of, 4072*f*.
heat of adsorption of $Me_2O$ and heat of wetting of, 8835*e*.
heats of adsorption of $NH_3$ and $C_2H_4$ by, 4930*d*.
ignition and combustion of, effect of chemicals on, 4468*c*.
ignition temp. of, 7668*c*.
journal: Proceedings of the Technical Session on Bone Char, 9418*i*.
manuf. and analysis of wood, 2407*c*.
manuf. of active, P 4838*c*, P 7672*b*.
manuf. of, stainless-steel in, 8120*d*.
medicinal, and its adsorption capacity, 3974*e*.
oxygen complexes on, 2840*d*.
peat, 9414*a*.
peat, as gas-producer fuel, 2407*e*.
in phenol recovery from wastes, 1948*h*.
phosphine adsorbed by, oxidation of, 6898*a*.
picric acid adsorbed by, titration of, 6883*c*.
from pine-wood carbonization, 6392*f*.
potential between Zn and, in Zn salt soln., 4586*i*.
powd. manuf., by fluidized-wood distn., 1950*c*.
powd., mixer and grader for, P 9019*d*.
sepn. of acetone and BuOH from fermented mash by, P 6782*a*.
sorption by, of AcOH, 1238*e*.
of Br and O, 6038*b*.
of $NO_2$-$N_2O_4$, 6035*a*.
sorption in flow through activated, 6872*i*.
sorptive capacity of activated, measurement of, 4536*d*.
in sugar manuf.—see *Sugar manufacture*.
swelling of, by adsorption, 6881*i*.
from waste wood, kiln for making, 837*f*.
in water treatment—see *Water, purification of*.
wine decolorization by, testing of, 8606*i*.
zinc oxide reduction with, 6060*i*.
**Chard**, *p*-nitrobenzamide *N*-deriv. effect on, 2357*g*.
*m*-nitrobenzamide *N*-deriv. toxicity to Swiss, 7182*b*.
oxalic acid and vitamin C in Wyoming, 9273*f*.
phenolases in, 2287*b*.
phthalimide *N*-deriv. toxicity to Swiss, 7182*e*.
**Charging apparatus**. (See also *Feeding apparatus; Stokers*.)
for glass-melting furnaces, P 6386*d*.
for GR-S rubber manuf., 5986*h*.
for GR-S rubber materials for continuous polymerization, 1209*g*.
for liquids with gases, P 4058*a*.
for open-hearth furnaces, P 9018*h*.
for pilot plant, 4522*c*.
for reagents to reactions *in vacuo*, 3636*i*.
**Charles law**. See *Laws*.
**Charlock** (*Brassica arvensis*), control in oats, P 6778*d*.
3,5-dinitro-*o*-cresol penetration into leaves of, 9337*c*.
**Charlock oil**. See *Oils*.
**Chars**. See *Char*.
**Chaulmoogric acid** (*13-(2-cyclopenten-1-yl)tridecanoic acid*), bacteriostatic action of, 1322*e*.
**Chavibetol** (*5-allyl-2-methoxyphenol*), in *Ocimum kilimadjarum*, 8617*d*.
**Chavicol** (*4-allylphenol*), methyl ether—see *Estragole*.
——, 2,6-dimethoxy-, 1029*c*.
and 3,5-dinitrobenzoate, 7451*h*.
x-ray study of, 4818*d*.
**Chayotes**, carotene and vitamin C in, 3536*b*.
**Chebulinic acid**, and derivs., 1341*f*.
**Cheena**, digestible nutrients of, for fowls, 6292*h*.
as manganese source in poultry feeding stuffs, 6331*c*.
proteins of, biol. value of, 6330*h*.
**Cheese**, adjustment of fat content of milk for manuf. of, 3533*a*.
amino acids in American, 3534*g*.
analytical and organoleptic findings on, 6747*d*.
bacteria and mold inhibition in, P 7606*f*.
bacterial count, tyramine content and quality score of American Cheddar and stirred curd, made with *Streptococcus faecalis* starter, 8570*f*.
biacetyl in, changes during manufg. and curing, 8068*f*.
calcium detn. in, 9283*h*.
calcium tartrate crystals in processed, 3534*c*, 3944*c*.
Cheddar, acid effect on development of lipolytic flavor defects in, 6750*e*.
amino acid effect on, made from pasteurized milk, 9284*d*.
biacetyl in, flavor and, 8068*d*.
effect of heat on inactivation of phosphatases of, 779*d*.
effect of radio-frequency heat pasteurization on, 9284*e*.
effect of ripening temp. on tyramine content and flavor of, 4782*e*.
fat oxidation in, 327*c*.
colored casings for melted, P 7605*d*.
cultures or starters for, fatty acids in, effect of temp. on, 1497*b*.
detn. of casein and lactalbumin in, 3533*h*.
dried, P 330*c*.
fermentation (harmful) of, review on, 327*d*.
fermentation in hard and soft processed, bacteria and, 5877*g*.
**Fontina**, 8570*i*.
**Limburger** (mild), 9330*c*.
microörganism growth in cheese spread and, 3-acetyl-6-methylpyran-2,4-dione and its salts in control of, P 6758*d*.
milk pasteurization for manuf. of, 9283*h*.
from milk preserved with HCHO and bisulfites, 8568*b*.

Minas, manuf. of, 8571*a*.
niacin, pantothenic acid and riboflavin in, 8570*b*.
nitrogenous compd. detn. in, 9284*a*.
nutritive value of, 8568*a*.
oat proteins in production of melted, 7601*e*.
paraffin coatings for, 9283*i*.
penicilliosis in, effect of merthiolate on, 2337*c*.
phosphatase test for, sensitivity of, 8570*d*.
phosphatase test in, $Na_2CO_3$-$NaHCO_3$ buffer systems for, 9284*c*.
Prato, fermentation of, 1497*a*.
preservation for phosphatase test, 3042*d*.
production from milk of silage fed animals, growth-factor content and, 3894*a*.
ripening of hard rennet, 4394*d*.
ripening of, zymogens and acceleration of, P 330*a*.
sampling of, and fat and moisture detn. in, 7154*e*.
sampling of, for water detn., 8943*h*.
from sheep milk, 9283*i*.
storage (low-temp.) expts. with, 1875*d*.
streptococcal bacteriophage in, 7154*d*.
Swiss, milk quality and yields of, 9284*b*.
from vegetable rennet, 3944*a*.
as vitamin B source, 5509*h*.
vitamin $B_1$ in processed, stability of, 9276*b*.
whey as source of Fe in, 3534*c*.
whey sepn. from, centrifuge for, P 3540*c*.
wrapping materials for, P 2470*c*, P 5640*f*.

**Cheese mite**, control of, 7186*h*.

**Chelate compounds**. See *Chemical compounds*.

**Chelation**, amino acids as agents for, 2536*b*, 8049*b*.
in aromatic compds., 4627*e*.
in calcium soap stabilization in shampoos, 5533*f*.
conjugation and, in ketones, effect on spectra, 4575*d*.
coördination, covalency and, 8941*g*.
effect on deacylation of acetamides contg. $NO_2$ in *o*- or *p*-positions, 2186*i*.
in 4-glycosidaminopyrimidine derivs., 3423*a*.
in 2'-hydroxy-2-biphenylsulfonic acid and derivs., 4249*b*.
intermol., between 2-furaldehyde and phenol, 8888*d*.
in $N^4$ - (phenylguanylguanyl)sulfanilamides, 2179*c*.
spectra and, of β-amino-α,β-unsatd. ketones, 7820*b*.
stability of flavones and, 5396*b*.
thermodynamics of, 1243*a*, 7300*h*.

**Chelidamic acid** (*1,4-dihydro-4-oxo-2,6-pyridinedicarboxylic acid*), dimethyl ester monohydrate, 1409*h*.

——, 1-(*N*-**acetylsulfanilyl**)-, 2597*i*.

——, **1-methyl-**, and dimethyl ester, 1409*h*.

——, **1-sulfanilyl-**, 2597*i*.

**Chelidonic acid** (*4-oxo-1,4-pyran-2,6-dicarboxylic acid*), detection of, in tinctures, 4426*a*.

**Chelidonium**, identification of tinctures of, 4426*b*.

**Chellin**. See *Khellin*.

fibrillar and globular form of proteins and polyamides in relation to, 3050*c*.
fluorescence and, 7820*a*.
fluorescence and, of anthracene derivs., 498*b*.
fungicidal action and, of dithiocarbamates, 9335*d*.
fungistatic action and, 4803*g*.
fungistatic action and, of triphenylmethane dyes, 8435*g*.
growth activity and, of phenoxyacetic acid derivs., 8017*f*.
growth inhibition by methionine derivs. and homologs in relation to, 3499*h*.
halochromism and, of ketonic compds., 7911*c*.
heat capacity and, 4089*c*, 7316*h*.
heat of vaporization and, 2833*h*.
histaminelike activity and, 3520*i*.
hydrogenation and, of acetylenic glycols, 3783*a*.
of benzene nucleus, 2964*b*.
of unsatd. ketones, 5015*g*.
hydrogen transfer and, in styrene polymerization in hydrocarbons, 5713*h*.
hydrolysis and, of amides, 3781*d*.
of dehydropeptides, 258*b*.
of tertiary alkyl chlorides, 6968*e*.
hyperconjugation, electronic structure and, 41*f*.
indicator properties and, of azo dyes, 3309*a*.
insecticidal action and, 143*i*, 345*c*, 1335*a*, 1895*h*, 4414*i*, 6991*c*, 8086*g*.
of DDT and related compds., 3137*e*, 7028*f*.
of halo hydrocarbons, 5894*c*, 9331*h*.
of org. compds., 7625*h*.
of insulin in relation to its blood persistency, 8533*g*.
ionization and, of hydrocarbons, 8259*c*.
ionization const. and, 2074*i*.
ionization constants and partition coeffs. in relation to, of phenols, 7789*a*.
larvicidal action and, of amides, 1144*f*.
laxative action and, of triphenylmethane derivs., 2319*c*.
leukopenic action and, of urethan derivs., 3107*b*.
lipase acceleration by bile acids and, 6267*e*.
lipide phosphorylation stimulators and, 6291*c*.
lubricating properties and, 4451*f*.
lubricating properties and, of alkyl naphthalenes, 4454*h*.
luminescence and, of crystal phosphors, 5670*e*.
magnetochem. studies in, 4167*e*, 6165*i*.
magnetooptic rotation and, of hydrocarbons, 8838*i*.
melting points and, of branched-chain fatty acids, 3780*f*.
melting points and, of dicarboxylic acids and, 3792*h*.
miotic action and toxicity and, of fluophosphoric acid esters, 8350*h*.
miscibility and, 6817*b*.
c-mitotic activity and, 4347*d*.
nervous-system effect of quinoline compds. and, 9267*b*.
octane nos. of gasolines and, of $C_8H_8$-deriv. antiknock agents, 7674*c*.
octane values and oxidation resistance in relation to, of org. compds., 3997*h*.
odor and, 9387*f*.
of essential oils and aromatic chemicals, 1531*e*.
of steroids, 6788*h*.
olefin elimination reactions and, 3347*fh*, 3348*i*, 3349*a*, 3350*f*.
olfaction and, of perfumes, 4356*a*.
optical rotation and, 609*i*, 610*cf*, 4680*d*.
of pregnane derivs., 6215*c*.
of steroids, 242*g*, 1428*a*, 4680*c*, 6210*e*, 7492*h*.
oxidation-inhibiting activity and, of polycarboxylic acids and polyhydric alcs., 882*d*.
oxidation (nuclear) and, of flavones, 3823*h*.
oxytocic action and, of *N*-phenethyl-β-alanine derivs., 5766*f*.
parasiticidal activity and, 224*f*, 2623*f*, 3793*g*, 7142*h*.
pharmacol. or physiol. action and, 3096*i*, 6736*f*.
of amidone derivs., 191*h*.
of antibiotic lactones and analogs, 1110*c*.
of anticonvulsants, 2326*a*.
of antihistaminics, 4382*b*.
of azobenzene derivs., 4379*a*.
of barbituric acid derivs., 9258*a*.
of bis[trimethylammonium compds.], 6737*d*.
of biuret derivs. and related compds., 5369*g*.
of chlorinated tertiary amines, 1861*d*.
of chloro derivs. of diethanolamine and triethanolamine, 2700*b*.
of β-chloroethylamines, 4381*d*.
of choline derivs., 4385*h*.
of cholinergic drugs, 8526*f*.
of compds. related to thyroxine, 2327*c*.
of cyclics transposable to isoteric cyclics, 7545*h*.
of DDT and related compds., 2359*g*.
of diamidophosphoryl fluoride *N*-derivs., 1314*g*.
of diatropine derivs., 3929*b*.
of flavones, 1154*f*.
of flavonoid compds., 5116*g*.
of fluophosphoric acid esters, 1 1*e*.
of glycerol derivs. with muscle-relaxing action, 4774*c*.
of growth substances, 6707*c*.
of hydroxymethylanthraquinones, 4765*a*.
of 4-hydroxymethyl-1,3-dioxolane derivs., 1866*b*.
of hydroxytyramine compds., 317*c*.
of nicotinic esters, 6316*f*.
*pharmacol. or physiol. action and*, of pentagonal heterocyclic compds., 7585*i*.
of phenethylamine *N*-derivs., 7585*f*.
of polymethylene bis[quaternary $NH_4$ salts], 2703*d*.
of quaternary N ions, 8502*d*.
of sexogens, 6716*h*.
of steroids, 8512*b*.
of sympathicomimetic amines, 316*e*, 9250*f*.
of tetrazole derivs., 1865*a*.
of triphenylethylene derivs., 199*f*.
of uracil derivs., 4309*d*.
phosphorescence and, of phenols, 4957*i*.
photographic properties and, of org. addn. agents for emulsions and developers, 7361*c*.
phys. properties and, 2185*c*, 2589*e*, 2955*dg*, 2956*adg*, 2957*a*.
of alkyl β-ethoxypropionates, 1322*g*.
of alkyl naphthalenes and 1,2,3,4-tetrahydronaphthalenes, 1370*f*.
of fatty acid esters, 2164*i*.
phys. properties, biol. action and, of aliphatic acids, 6251*c*.
phytohormonal activity and, 2676*d*.
plasticization and, of polyvinyl chloride, 5028*d*.
plasticizing action and, 4885*e*.
polymer-liquid interaction and, 2461*f*.
racemization and, of *N*,2,4-trimethylsuccinanilic acid 6-derivs., 1343*g*.
Raman spectra and, of naphthalene derivs., 494*f*.
reactivity and, 6495*c*.
of ethyl chloro carboxylates in Friedel-Crafts reaction with benzene, 4638*e*.
of org. compds., 5731*e*.
reducing power and $Cu_2O$ production in relation to, of reducing sugars, 7861*d*.
refraction by paraffins and, 5243*a*.
ring cleavage of 3,3-dialkylphthalides and, 7925*g*.
ring closure and, of α-(α-alkoxybenzhydryl)-α-chlorobutyric acids, 1395*a*.
ring closure and, of *N*-phenethyl amides, 5025*i*.
sapong. power and, of alkanesulfonic acids, 8707*g*.
sapong power and, of alkylnaphthalenesulfonic acids, 8707*f*.
soly. of caffeine in aq. solns. of Na salts of org. acids and, 8803*d*.
sound velocity in hydrocarbons and, 6879*a*.
spectra and, 3715*c*.
of aldehyde derivs., etc., 1655*b*.
of alkylbenzenes, 2174*i*.
of amides, 6250*b*.
of amino-substituted unsatd. ketones, 7820*a*.
of anthracene derivs., 42*b*.
of 9,10-anthracenediamine *N*, *N'*-diaryl derivs., 7823*h*.
of benzene derivs., 1349*h*, 2868*d*, 8890*i*;
of cyclohexene and cyclohexadiene derivs., 7416*f*.
of 4-(4-diethylamino-1-methylbutylamino)quinolines, 2209*f*.
of disubstituted naphthalenes, 2864*d*.
of Gustavson's hydrocarbon, 991*e*.
of heterocyclic compds., 1655*c*, 7818*c*.
of methylpyridine derivs., 3292*f*.
of olefin reaction products with sulfur, 9976*b*.
of olefins, 383*a*.
of org. compds., 2923*e*.
of org. N compds., 6984*d*.
of peroxides, 3724*g*.
of phenanthrene alkyl derivs., 8274*f*.
of phenyl alkyl sulfides, 7820*d*.
of phosphorus compds., 1004*h*.
of polyenes, 1264*f*.
of purines, pyrimidines and 1*H*-*s*-triazolo[*d*]pyrimidines, 1425*b*.
of pyrimidines, 5307*c*.
of *p*-quinones, 5665*g*.
spectra (infrared) and, of quinones and their derivs., 2094*a*.
stabilizing and tanning effects on collagen in relation to, of glycoldialdehydes, 7735*i*.
of stand oil, 1577*i*.
styrene polymerization in presence of thiols and, of thiols, 1340*g*.
δ-sultone formation and, of unsatd. ketones, 1391*h*.
surface phenomena and, 2845*f*.
surface tension of aq. α,β-dihydroxy-γ-aryloxypropanes and, 5655*f*.
sweetness and, 7450*h*.
synergism and, 5525*g*.

taste and, of acylamides of sulfonic acids, 120*f*.
taste and, of zingerone derivs., 7001*i*.
thermodynamic properties and, 6068*i*.
toxicity and, of barbiturates and xanthines, 7591*d*.
toxicity and, of insecticides, 4806*g*.
toxicity and, of org. F compds., 2932*i*.
toxicity to plants and, of oximes, 2276*f*.
trypanocidal action and, of *p*-phenylenediguanidine derivs., 5014*g*.
urea inhibition and, of org. anions, 4707*i*.
urography and, of iodo-sugar derivs., 150*d*.
viscosity and, of alkyl naphthalenes, 9424*f*.
viscosity-temp. no. and, of hydrocarbons, 3602*a*.
vitamin A activity and, 7437*c*.
vulcanization acceleration activity and, 2022*i*.
of alkyl derivs. of tetraalkylthiurams and salts of dialkyldithiocarbamates, 5987*b*.
of org. accelerators, 3647*i*.
wilting action of amino acids and peptides on plants and, 4643*e*.
x-ray sensitivity and, of nitrogenous compds., 4133*b*.

steel history and, 8327g.
world food supply and, 3113g.
**Chemists' Club,** books: Fifty Years of History of, 3701b.
**Chemoreceptors.** See *Receptors*.
**Chemorheology.** See *Flow*.
**Chemotaxis.** (See also *Chemotropism; Phagocytosis.*)
in Fucaceae, 1081h.
**Chemotherapy.** See *Therapeutics*.
**Chemotropism.** (See also *Chemotaxis.*)
of plants, 7553b.
of pollen tubers, 8020e.
**Chenodesoxycholic acid*,** in bear bile, 6298a.
in bile of patients with choledochostomy drainage, 7572d.
**Chenopodium,** *album*—see *Lamb's-quarters*.
*bonus*, histamine in, 3070a.
*murale*, effect of boric and phenylboric acids on growth of seedlings of, 6704a.
effect of phenylboric acid on germination of, 5831h.
*quinoa*, cultivation, uses and nutritional properties of, 1121i.
**Chenopodium oil.** See *Oils*.
**Cheracol,** folic acid addn. to, 355i.
**Cherimoya,** melanin-forming oxidase in, 277i.
**Chernozem.** See *Soils*.
**Cherries.** (See also *Kirschwasser.*)
calcium chlorosis and metabolism in, 730g.
canning of, alc. from fermentation of wastes of, 9358i.
control of *Prunus pensylvanica*, 4414a.
fungus control on, 7177d.
gums from trees, chromatography of sugars in hydrolyzates of, 1290c.
mineral deficiencies in, 2353b.
respiration of, during ripening, 8015a.
size of Montmorency, effect of oil-wax emulsion sprays on, 1461i.
syrup of, folic acid prepn. contg., 355i.
vitamin B changes in, during growth, 8461f.
vitamin $B_1$ in, 6753i.
wines from, in Pacific Northwest, 8606f.
**Cherry casebearer.** See *Coleophora pruniella*.
**Cherry leaf spot,** control of, 6775f, 9329c.
**Cherts,** of California (Santa Maria Dist.), 2903g.
in limestones of Okla., 2136g.
of Missouri (Pearl Pb-Zn deposit), 6950i.
**Chessylite.** See *Azurite*.
**Chest.** See *Thorax*.
**Chestnut oil** See *Oils*.
**Chestnuts.** (See also *Horse chestnut.*)
choline forms in seedlings of, during growth, 8457c.
cotia, oil cake of, 8700f.
ext., condensation products for drilling-fluid degelling and viscosity reduction, P 8662c.
penicillin production by *Penicillium* grown on culture medium prepd. from, 4340e.
starch of *Castanea vesca*, 4036e.
-tanned leather, bound water in, 2799a.
tanning ext. from, 8720c.
astringency and tanning behavior of natural and sweetened, 9500i.
corrosion resistance of alloys and metals to, 9506g.
degree of dispersion and properties of sweetened, 9507b.
fixation of com. and purified, 8183f.
mellowing of, and effect of borax or $Na_2SO_3$ on penetration of, 8183h.
nomograph for nontannins in powd., 4037h.
nontannin in, 8182i.
surface tensions of, 4503g.
tanning with, phase equil. in, 9509e.
tannins of, 1341b.
detection of, 4503i.
equil. with collagen in aq. org. solvents, 4040e.
polarography of buffered solns. of, 4037i.
tannins (sweetened) from, in Italy, 5617d.
vitamin $B_1$ in, 6753i.
vitamin C in, 1454i, 5511b.
**Chetomin,** compn. and functional groups of, 7544b.
——, **desthio-*,** 7544c.
**Chewing gum,** base for edible, P 6004f.
base for, from polystyrene, etc., P 5232i.
flavoring substance for, goldenrod oil as, 2372d.
motion-sickness, P 3982b.
silver-bactericide-contg., P 8107c.
**CH Factor.** See *Growth substances*.
**Chhola.** See *Chick-pea*.
**Chickens.** (See also *Eggs.*)
estrogen effect on, and its persistence in the edible flesh, 8031i.
feeding expts. with—see *Feeding experiments*.
meat—see *Meat*.
pullorum-typoid complex in, 6775d.
**Chickling vetch.** See *Lathyrus sativus*.
**Chick-pea** (*Bengal gram, chhola, Cicer arietinum*), growth-limiting essential amino acids of, 9186g.
Hawaiian, 9292f.
nutritional value of, 4738f.
proteins of, 3537b.
vitamin $B_1$ in, and effect of cooking thereon, 6753g.
**Chickweed.** (See also *Stellaria.*)
maleic hydrazide Cu or Zn deriv. effect on, 6776b.
**Chicory.** (See also *Chondrilla; Crepis.*)
antibacterial and antifungal substances from, 3885c.
fructose-sirup manuf. from rhizome of, 888c.
photosynthesis by, 2281i.
respiratory system of, 729a.
thrips control on, (3,4-methylenedioxyphenyl)propylene compds. for, P 1903d.
vitamin $B_1$ in, 6753h.
vitamin C in, 5511b.
**Chiggers,** control of, 1518e, 8599g.
control of, agents for, 9349b.
repellents and toxicants for, 7181d.
**Childrenite,** unit cell and space group of, 8986a.
**Chili, Chilli.** (See also *Capsicum frutescens.*)
vitamin C in green, in Mexico, and effect of prepn. thereon, 1121g.
**Chili sauce,** vitamin C in, 3538c.
**Chilomonas,** *paramecium*, C and N metabolism of, kinetics and energetics of, 3881i.
*paramecium*, growth in mass cultures, 3881g.
**Chilo simplex** and(or) **Asiatic rice borer.** pyrethrin toxicity to larvae of, 5898d.
**Chimneys,** corrosion by flue gases, 100b.
**Chimonanthus praecox,** pigments in flowers of, 8449f.
**China.** (See also *Porcelain.*)
firing of Dresden, 7655g.
**China asters.** See *Asters*.
**China clay.** See *Kaolin*.
**China grass.** See *Ramie*.
**China wood oil.** See *Tung oil*.
**Chinch bug.** See *Blissus leucopterus*.
**Chinese,** book: Atomic Energy. A glossary and technical terms, 7831a.
**Chinese cabbage.** See *Cabbage*.
**Chinese vegetable tallow.** See *Fats*.
**Chiniofon.** See *Yatren*.
**Chionaspis furfura** and(or) **Scurfy scale,** control of, 5897i.
**Chironomidae.** (See also *Chironomus.*)
larvae, control in concrete reservoirs, 2717d.
**Chironomus thummi,** salivary glands of, intranuclear pH of cells of, 3532c.
**Chitin,** 4857e.
adsorption of DDT and its analogs by, 2254g.
in invertebrates of Black Sea, 6740c.
of *Limulus*, 6746h.
from silkworm pupae, P 8417h.
utilization of, 578d.
**Chitosamine.** See *Glucosamine*.
**Chlamydomonas,** *agametos*, copulation-inhibiting substance of, 5832b.
isolation of rutin, quercetin, isorhamnetin and *trans*-crocetin dimethyl ester from gametes of mutants of, 4728a.
noncopulating cells of, 5831i.
**Chlophen.** See "chloro derivs." under *Biphenyl*.
**Chloracetic acid.** See *Acetic acid, chloro-*.
**Chloral.** (*Owing to the use of chloral in biological literature to designate both trichloroacetaldehyde and its hydrate, both chloral proper and chloral hydrate have been entered here.*)
and acetals, P 5412g.
analgesic properties of, and its combination with dial and $MgSO_4$, 7141e.
anesthetic effect after hepatectomy, 7590i.
bis(*p*-chlorobenzyl) mercaptal, P 6358h.
decompn. by NaOH, kinetics of, 25g.
detn. of, in presence of alkali, chlorate and chloride, 3745b.
effect on functional structure of reflexes, 763h.
on leucocyte motion, 9263d.
on seeds, 4733i.
on uterus, 7141c.
ethylene cyclic acetal—see *1,3-Dioxolane, 2-(trichloromethyl)-*.
folic acid prepn. contg., 356c.
freezing point of, 6065c.
incompatibilities with MgO, diuretin, etc., 817e.
as insecticide, 2359h.

manuf. of, P 2632*a*, P 5412*cf*.
multinucleated unsegmented triton eggs produced by, 5873*f*.
narcotic action of, in relation to action on cholinesterase in blood, 7142*e*.
oxidation and reduction in tissue, 4769*c*.
pharmacology of bromal and, 1862*a*.
prepn. of, 2575*c*.
purification of, P 6650*c*.
reaction products with sulfonamides, P 6359*a*.
reaction product with 5,5-dimethyl-1,3-cyclohexanedione, alk. splitting of, 2964*i*.
reactions of, 6604*i*.
with amines, P 7499*d*.
with anisole, 6187*a*, P 9085*d*.
with aromatic nitriles, 2967*c*.
with biphenyl, 2979*e*.
with halo phenols, 1754*d*.
with morpholine, 1780*c*.
with phenylhydrazines, 1324*c*.
with thiocyanic acid esters and with PhNCS, 4657*f*.
with thiophene and with its derivs., 627*c*.
reduction to $Cl_3CCH_2OH$, 2570*e*.
systems: BuOH–, EtOH–, iso-PrOH–, and MeOH–, mol. wts. in $C_6H_6$, 1252*e*.
trimethylene cyclic acetal—see *m-Dioxane, 2-(trichloromethyl)-*.
waking action of sympathomimetic amines in respect to, 7141*g*.
**Chloralic acid***, *α-* and *β-*, 973*h*.
**Chloralic aldehyde***, *α-* and *β-*, 973*h*.
**Chloralimines**, as insecticides, P 5153*f*.
**Chloralose** (*glucochloralose*), anesthesia by, effect on sphincter of Oddi, 5867*g*.
detection and detn. of *α-* and *β-*, 973*e*.
effect on gastric secretion, 5871*i*.
on gastric secretory response to insulin, 8538*i*.
on temporal summation of epileptogenic stimuli, 3101*b*.
**Chloramide** (*chloramine, $NH_2Cl$*), bactericidal action against anthrax spores, 7999*h*.
base strength of, 8822*a*.
complex $[Pt(NH_3)_4(NH_2Cl)]Cl_2$, 1673*h*.
as convulsant, 3106*c*.
detn. in water, 3545*b*, 7165*e*.
effect on miracidia of *S. histosoma mansoni*, 4333*e*.
formation of, kinetics of, 6896*e*.
**Chloramine.** See *Chloramide*.
**Chloramine-B**, blackening of Cu and Cu alloys with, P 7404*f*.
as germicide, 1573*b*.
polymers with $C_2H_4$, P 6001*a*.
reaction with thio ethers, 172*d*.
**Chloramines.** (See also *Chloramide; Chloramine B; Chloramine-T;* and "chloro-" under *Amines*.)
for food-utensil sanitation, evaluating, 323*e*.
in water purification—see *Water, purification of*.
**Chloramine-T** (*chloramine, chlorasene, gansil, mianine, tochlorine, tolamine*), bacteriostatic action of, in emulsion, 3561*i*.
in bleaching cotton, 3622*b*.
disinfectant action of, 4811*e*.
poisoning by, formation of cyanogen compds. from amino acids in, 5114*h*.
polymers with $C_2H_4$, P 6001*a*.
reaction with thioethers, 172*d*.
**Chloramphenicol.** See "D-*threo*-" under *Acetamide, α,α-dichloro-N-[β-hydroxy-α-(hydroxymethyl)-p-nitrophenethyl]-*.
**Chloranil**, in cereal-seed disinfection, 7180*b*.
in cottonseed disinfection, 803*f*.
in cowpea-bacterial-canker control, 6775*e*.
detection on seeds, 803*a*.
dioxazine dye from 1-methyl-2,3-diphenylindole amino deriv. and, P 5965*d*.
in downy-mildew control on Lima beans, 3959*i*.
dust of, sepn. into particles of uniform size, 2357*b*.
effect on polymerization of allyl and methacrylate compds., 8199*h*.
effect on respiration of germinating seeds, 802*f*.
in ergot control, 3959*g*.
formation of, during chlorination of sulfosalicylic acid, 2972*f*.
as fungicide, 7178*a*.
in gladiolus-storage-rot control, 3961*g*.
in pine-root-disease control, 7179*f*.
as polymerization inhibitor and initiator in isoprene, 5621*e*.
as polymerization retarder in butadiene-vinylidene compd. mixts., P 2806*a*.
reaction (photochem.) with Et orthoformate, 6515*e*.
in smut control on sorghum, 2355*f*.
soybean-seed disinfection with, effect on nodulation, 3133*a*.
spectrum of, 5665*g*.
**Chlorantine Light dyes.** See *Dyes*.
**Chlorantinlichtbraun BRLL**, in analysis of textile auxiliary agents, 1585*b*.
**Chloraquine.** See *Quinoline, 7-chloro-4-(4-diethylamino-1-methylbutylamino)-*.
**Chlorates**, candles from, for O generation, P 5886*c*.
chlorine dioxide exchange with, 8821*a*.
chlorite detn. in, 8966*i*.
detn. of, in presence of alkali, chloral and chlorides, 3745*b*.
effect on acid production, growth and proteolytic properties of lactic acid bacteria, 4340*i*.
elec. conductivity of, 1630*d*.
manuf. of Cl and $ClO_2$ from, P 6377*f*.
oxidation of, on thermobalance, 7307*g*.
poisoning by, 5864*b*.
poisoning by, relation to chlorite poisoning, 5115*f*.
reaction with bromides, kinetics of, 1248*e*.
reaction with $SO_2$, P 3159*h*.
in weed control—see *Weed control*.
**Chlorauric acid.** See *Chloroauric acid*.
**Chlorazene.** See *Chloramine-T*.
**Chlorazol Fast Pink**, antagonism of curare by, 3102*h*.
**Chlorazol Sky Blue FF.** See *Dyes*.
**Chlorbutanol.** See *Chloretone*.
**Chlorbutol.** See *Chloretone*.
**Chlordan** (*1,2,4,5,6,7,8,8-octachloro-2,3,-3a,4,7,7a-hexahydro-4,7-methanoindene*), P 5796*i*.
in acarid control in orchards, 1523*b*.
in alfalfa-insect control, 1521*e*.
in alfalfa-snout-beetle control, 8599*d*.
in ant control, 9330*d*.
in aphid control on celery, 346*e*.
in black-fly control, effect on fish, 9352*h*.
in black-fly-larva control in Alaskan streams, 6354*c*.
in cabbage-caterpillar control, 3137*a*.
in cabbage-maggot control, 3136*i*.
carbon dioxide-propelled, toxicity of residues from, 6353*h*.
in cattle-grub control, 1520*e*.
in chinch-bug control in lawns, 5896*i*.
chlorinated, effect on livestock, 1520*a*.
in citrus-blackfly control, 3555*h*.
in clover-root-borer control, 8599*d*.
in cockroach (German-) control, 1519*h*.
in coleopterous larva control on peanuts, 1897*d*.
in Colorado-potato-beetle control, 5897*e*.
in confused-flour-beetle control, 2361*d*.
in control of cockroaches, flies and mosquitoes, 1518*h*.
of corn earworm and fall armyworm in corn, 3136*c*.
of DDT-resistant flies, 3965*e*, 6355*e*
of fall armyworm and green June beetle, 1899*a*.
of house and stable fly, 5895*g*.
of Japanese and oriental beetles in turf, 9345*i*.
in corn-flea-beetle control, 4416*i*.
in cotton-insect control, 1142*i*, 3137*b*.
detection in oil sprays, 347*f*.
effect on bacteria and yeast, 3885*f*.
on flies, 3965*e*, 6355*e*.
on kalanchoe, 1898*b*.
on soil microörganisms, 1896*i*.
on wildlife, 1524*a*.
emulsions of, toxicity of, 1899*g*.
in European-corn-borer control, 6354*e*.
in fall-armyworm control on corn, 3136*i*.
in fire-ant control, 1897*e*.
in fly control, 7629*f*.
in fly control and its toxicity to man, 8601*e*.
in grasshopper control, 3135*i*, 3136*b*, 4806*c*, 6353*f*, 7185*ef*.
in harlequin-bug control, 1897*c*.
in horn-fly control, 3135*g*, 5895*h*, 9342*e*.
in horn-fly control, effect on milk, 6355*g*.
in horse-louse control, 1520*c*.
as insecticide, 1139*g*, 6353*c*, 6775*c*.
for alfalfa and clover, 346*b*.
residual toxicity of, 5146*i*.
in Japanese-beetle control, 2730*b*.
in Japanese-weevil control, 7628*e*.
in leaf-miner control on asters, 1522*g*.
in lepidopterous-larva control, 2726*e*.
mixt. with ethylene dibromide in control of Japanese beetle on plant balls, 2361*i*.
in mosquito control, 808*f*, 2360*e*, 9345*f*.
in onion-thrips control, 1143*e*, 5897*a*.
in orange-tortrix control on berries, 5148*i*.
in peach-borer control, 8088*e*.
in peach-cat-facing control, 8088*d*.
in peach-insect control, 4417*a*.
in peach-scab control, 2356*f*.
in periodical-cicada control, 1899*c*, 7629*i*.
in plum-curculio control, 1143*g*, 3139*h*, 6777*c*.
in plum-curculio control on peaches, 5527*c*, 9348*g*.
in potato-flea-beetle control, 8599*f*.
in red-banded-leaf-roller control on apples, 7628*c*.
in red-harvester-ant control, 7627*f*.
reviews on, 9353*ah*.
in root-knot control, 809*c*.
in seed-corn maggot control on beans, 5896*h*.
in sheep-tick control, 8599*a*.
soil treated with, effect on palatability of potatoes, 7157*d*.
in southern-corn-rootworm control in peanuts, 7183*a*.
in sweet-clover-weevil control, 8599*c*.
in sweet-potato-weevil control, 7183*c*.
in termite control, 6356*g*, 7628*d*.
in tobacco-flea-beetle control, 5895*d*
in tobacco-stalk-borer control, 5147*f*.
toxicity to citrus mite and greenhouse thrips, 3138*c*.
to flies resistant to DDT, etc., 8600*e*
to honeybees, 9349*h*.
to man, 8600*f*.
toxicology of, 2705*e*, 4411*h*, 7627*h*.
in turf-insect control, 9346*g*
in two-spotted spider-mite control, 1522*i*
in velvetbean-caterpillar control, 1521*i*
in wireworm control in soils, 9346*e*
**Chlorella**, aging effects in, 5005*d*
amino acids in, 8456*i*.
chlorophyll in, Mg protoporphyrin as precursor in, 2282*a*.
compn. of, effect of environmental conditions on, 2289*e*.
photosynthesis in, intermediates in, 6287*e*.
photosynthesis in, quantum yield of, 8011*c*.
*pyrenoidosa* and *vulgaris*, gaseous losses of N from, 282*e*.
*pyrenoidosa*, carbon and N balance of, 2289*b*.
fatty acids of, 2679*c*.
light effect on respiration of, 9169*a*
metabolic conditions in, 2285*e*
metabolism of, effect of starvation on, 4734*a*.
nitrate reduction and assimilation in, 2285*c*.
phosphate metabolism in, 4727*d*
P metabolism in, in relation to photosynthesis, 1829*c*.
spectrum of, and role of carotenoids in photosynthesis by, 2281*d*.
*vulgaris*, carbohydrate formation by, 6361*g*.
glycine utilization by, 3494*a*
surface tension and chlorellin accumulation in, 1465*h*.
**Chlorellin**, accumulation in *Chlorella vulgaris*, surface tension and, 1465*h*
**Chloremia**, after frontal-lobe lesions, 3925*b*
**Chlor-ethamine.** See "dihydrochloride" under *Ethylenediamine*.
**Chloretone** (*1,1,1-trichloro-2-methyl-2-propanol*), effect on adhesion of epithelium to stroma in cornea, 7695*b*.
heart respiration and failure after treatment with, 1862*ef*.
in identification of procaine solns. in operating room, 3563*c*.
manuf. of, P 3836*b*
narcotic action of, in relation to action on cholinesterase in blood, 7142*e*.
soln. of, 3971*h*.
vanillate, 4242*a*, 7455*g*.
**Chlorex.** See *Ether, bis(2-chloroethyl)-*
**Chlorguanide.** See *Paludrine*.
**Chloride of lime.** See *Bleaching powder*.
**Chlorides.** (See also *Alkali metal chlorides; Alkaline earth chlorides; Alkyl chlorides; Chlorine, analysis; Chlorine compounds; Halides; Sulfonyl chlorides*.)
acid, acylation with, 7000*i*.
*O*-alkyloximes of *α*-oxo, P 5422*c*.
app. for prepn. of org., 5740*h*.
of aryl derivs. of aliphatic acids, ring closure of, 4659*i*.
compds. with amines and with pyridine, diacylation of $H_2O$ and of $H_2S$ with, 8353*a*.

*acid*, of β-halo acids, P 3444*e*.
manuf. of, from sapond. oils, P 2223*g*.
of phosphonic and thiophosphonic acids, P 7499*e*.
polymerized, reaction products with chlorinated paraffins and naphthalene, for lubricant improvement, P 5585*e*.
quaternary compds. from amines, aliphatic nitriles, $CH_2O$ and, as softening agents, P 2786*a*.
reaction of org., with Mg and $MgI_2$, 5388*i*.
reactions with aromatic compds. in the presence of $HgCl_2$, 1836.
reaction with alcs. and $H_2O$, rates of, 6057*d*.
reaction with biguanide, P 1814*c*.
reaction with $CH_2N_2$ in presence of tertiary amines, 5761*g*.
reaction with diazo paraffins, 1743*g*.
reaction with fatty acid nitriles, paraformaldehyde and tertiary amines, water repellent by, P 3628*f*.
reaction with $PhAsCl_2$ and with $Ph_2AsCl$ in the presence of $AlCl_3$, 6178*b*.
reaction with triethylphenylsilane in presence of $AlCl_3$, 2177*i*.
reduction of, by $NaBH_4$, 2570*d*.
reduction to aldehydes, review on, 2155*i*.
solvolysis in abs. $HNO_3$, 6495*h*.
adsorption of ions of, on $Al_2O_3$ chromatographic columns, 8271*d*.
anil addn. products with metallic, 4227*h*.
in aqueous humor, 5485*f*.
balance of premature infants on diet of evaporated milk, 5100*i*
binding by lactoglobulin and serum albumin, electrophoretic study of, 3860*i*.
in blood—see also *Chloremia*; *Hypochloremia*.
in blood after renal resection, 3086*f*.
in blood and urine after corticotropin, 7567*h*.
in blood, blood sugar and, 1114*b*.

as catalysts for condensation of 2-furaldehyde with phenol, 5224*i*.
as catalysts in soln. of Cu, 6496*f*
catalysts of $ZnCl_2$ and metal, in isomerization of butene, P 2216*e*.
in cerebrospinal fluid after injection of nicotinic acid, 2296*h*.
chlorine dioxide exchange with, 8821*a*.
condensation of fatty acid, with peptides and analysis of products, 3217*f*.
corrosion in solns. contg., prevention of, P 5359*d*.
corrosion of metals by, P 992*b*.
in cotton, N source effect on, 8017*i*.
crystallochem. electronegativity of, 8231*b*.
dechlorination of org., 2194*d*.
decompn. potentials in molten $AlCl_3$–NaCl, 8915*d*.
dehydration of hydrates of, with carbonyl chloride or thionyl chloride, 2533*b*.
detn. of, 2892*c*, 4599*a*, 5337*i*.
in bakery products and bread, 4392*d*.
in blood, 5819*d*.
in blood corpuscles and plasma, collection of blood for, 8427*a*.
in dil. solns., 5337*k*.
for manuf. control in fish industry, 5878*b*.
in meat products, effect of heating on, 1876*b*.
in milk, 7597*f*.
org. liquids in argentometric, 8947*f*.
in petroleums, 2758*c*, 5175*e*.
in presence of alkali, chloral and chlorate, 3745*b*.
in presence of chlorate, chlorite and hypochlorite, 3316*c*.
in solns. contg. salts of molybdic and tungstic acids, 5338*c*.
titration with $Hg(NO_3)_2$ with Na nitroprusside as indicator in, 6942*e*.
in water, 1886*a*, 5889*e*.
detn. of, alone and in mixts. with iodides, 8967*c*.
dialkylaminoalkyl, liberation of, from their hydrochlorides, 6976*g*.
dicarboxylic acid, reaction with sulfanilamides, 2597*ei*.
effect on anodic oxidation, 4149*d*.
on catalase, 2566.
on eggs of *Limnaea stagnalis*, 5507*d*.
on electrokinetic potentials of sulfates, 4924*e*.
on gelling and viscosity of solns. of gelatin, 4540*f*.
on glass melting, 3577*f*.
on ionization of AcOH and MeOH, 6053*c*.
on isoelec. and isoionic points of serum albumins, 3690*b*.
on passivity of stainless steel, 6139*f*.
on photolysis of peroxydisulfate, 4144*i*.
on polymerization of $C_2H_4$ to lubricants, 384*e*.
on protoplasts, 5091*c*
on setting time of Ca tartrate gels, 6889*b*.
on spectra of $CuCl_2$ solns., 3278*b*.
on suspensions of clays, 4538*e*.
elec. cond. in various solvents, 7301*f*.
electrode potentials in fused, 8898*h*.
exchange across fiber membrane of frog sartorius, 3940*e*.
exchange on Amberlite IRA-400, 6489*f*.
excretion by hens, 2291*b*.
as fertilizers for sugar beets, 5142*i*, 6350*i*.
in food material as it moves along alimentary tract of hen, 2291*c*.
formation from oxides and $SOCl_2$, 2885*i*.
in goldfish, physiol. adjustments in, 1116*f*.
heat of hydration of, 7318*c*.
heat of transport of, 8835*d*
hemolytic activity of, 5839*c*
hydration of, 8244*b*.
activity and, 7302*a*.
electroösmosis and, 22*a*.
hydrolysis and ethanolysis of allylic, 2849*d*.
in irrigation water, and their detn., 3951*d*.
lattice energies of, 8230*g*.
magnetic susceptibility of, 7278*b*.
manuf. of anhyd., app. for, P 826*b*, P 4820*d*.
methane effect on, 5734*e*.
mixts. with nitrates, nitrate detn. in, 7374*a*.
in nutrition of beets, 1133*b*.
in patellar cartilage and intervertebral disks during degeneration, 9237*i*.
in pecan leaves, effect of fertilizer on, 2287*e*.
pentosan extn. by solns. of, 628*h*.
in perspiration, 8481*h*.
in petroleum bearing strata and waters, 1951*f*.
platinum-anode polarization by solns of, 2100*eg*, 3727*i*.
purification of volatile, P 6374*e*.
radioactive, in detn. of its transcapillary exchange, 8512*i*.
reaction with Fe, effect of carbonates, chromates and nitrites on, 9005*a*
removal from acetates and fluoroacetates, 4976*e*.
removal from $TiCl_4$, P 7652*e*.
removal of, and oxychlorides, from ad sorbents, P 5887*f*.
renal clearance of, urine formation and, 1490*c*.
retention by hen, effect of dietary level of Ca on, 2291*e*.
in saline soils, 7619*a*.
sodium-H exchange on carbonaceous ex changers in contact with, 2848*b*.
in soils, movement of, 1509*d*.
in soils of India, 9311*c*.
as soot removers, 3117*i*.
in sorghum during growth, and its relation to chinch bug injury, 4346*e*.
in tobacco, 9328*h*.
tonicity-vol. relations for systems contg. red cells and, 3087*b*.
transference nos. of, moving through colloidal membranes, 7290*g*.
urinary clearance in rabbits, 4764*b*.
in urine, Arakawa reaction of milk and, 5844*a*.
in anoxia, 1072*c*.
of castrated rats during recovery from fasting, effect of testosterone propionate on, 3090*d*.
of desert mammals, 298*i*.
in detection and treatment of dehydration with salt depletion, 1473*a*.
effect of yakriton on, 5843*i*.
in Recklinghausen disease, 8523*g*.
in schizophrenia, effect of insulin-shock therapy on, 2312*h*.
*in urine*, after surgical operations, 5487*c*.
**Chloridization**. See *Chlorination*.
**Chlorimid***, bactericidal action of, 7999*h*.
**Chlorimide** (*dichloramine*, $NHCl_2$), as convulsant, 3106*c*.
**Chlorination**. (See also *Chlorinolysis*; *Halogenation*; *Heat of Chlorination*; and "reaction" under *Chlorine*.)
of acetaldehyde, P 3027*h*.
of acetaldehyde and its homologs, 2575*b*.
of α-acetylbutyrolactone, P 6225*e*.
of acrylonitrile, 2574*d*.
of acrylonitrile alkyl derivs., P 7498*g*.
of aliphatic carboxylic acids, P 6650*g*.
of aliphatic compds., effect of substituents on, 4627*h*.
of alkyd resin, P 2031*c*.
in alkyl benzene sepn. from its mixts. with paraffins and naphthenes, P 3844*f*.
of allyl alc. and its esters, 1321*f*.
of amines, 6570*d*.
of anthraquinone derivs. and of indanthrene, 3399*e*.
app. for, P 6012*ab*.
of aromatic aldehydes, 9049*h*.
of aromatic compds., P 5900*d*.
of aromatic hydrocarbons, P 1437*b*.
of benzal chloride, kinetics of, 1246*h*.
of benzene, P 1436*g*, P 4295*gh*, P 5040*h*, P 5799*a*.
of benzene and derivs., P 7041*f*.
of benzene and toluene, 9413*c*.
of benzene, app. for, P 6658*c*.
of bis(2-chlorovinyl)mercury isomers, 560*d*
of bis(perfluoroalkyl) benzene derivs, 6173*e*
of butane, 5362*a*.
of *tert*-butylbenzene, 3377*i*.
of carbon, effect of activation on, 5572*d*.
of 1-chlorobutane, P 5048*a*.
of 1-chloro-1,1-difluoroethane and 1,1-difluoroethane, P 3023*i*.
of (1-chloroethyl)benzene, P 680*f*.
of chloroethylene in presence of Fe, P 7035*f*.
of δ-chlorovaleric acid, 6615*c*.
of cresols, P 7045*b*.
of cyclohexane, P 8090*e*.

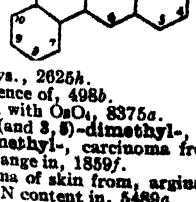
of 1,2-dichlorobutane, 6567*i*.
of 1,4-dichloro-2-ethylbenzene, P 688*b*.
of 1,4-dichloro-2-ethylbenzene and PhEt, P 2636*h*
of 3,4-dichlorotetrahydrothiophene 1,1-dioxide (attempted), 5775*g*.
of 1,1-difluoroethane, P 5789*i*.
of 2,5-dihydrofuran, P 5425*a*.
of 1,5-dihydroxynaphthalene derivs., 200*c*.
of 2,6-dimethyl-3(2*H*)-pyridazone, 3006*e*.
of diphenylacetylene, 1755*e*.
disinfection by—see *Disinfection*.
of ethane, P 2217*h*.
of ethers (unsatd.), P 4083*a*.
of ethyl alcohol, P 5412*eg*.
of ethylene, P 1433*e*.
of ethyl ether, 2159*b*.
in fluidized beds, heat removal in, P 6478*c*.
of foots oil, P 5185*b*.
of furan, P 3041*c*.
furnaces for, 2475*h*.
of gas oil (Fischer) in synthesis of lubricants, 1952*i*.
of hexamethyldisiloxane, 563*d*.
of hydrocarbons, 5361*b*, P 7950*h*.
of 1-hydroxy-2-acetonaphthone and 3-hydroxy-2-naphthoic acid, 7010*e*.
of α-2-hydroxyethylacetoacetic acid γ-lactone, P 2224*d*.
of isophthaloyl and terephthaloyl chlorides, 609*e*.
of lignin, 5630*b*.
of magnesia, P 826*c*.
of methane, 2155*i*, 6154*a*.
of methane with melts contg. Cu chlorides, 1714*df*.
of methylcyclopentane, 2171*e*.
of methylcyclopentenes, 2172*c*.
of methyl silanes, P 3441*e*.
of methyl sulfide, bis(dichloromethyl) sulfide and $Cl_3CSCl$, 4629*a*.
of 1,4-naphthoquinone, 1371*i*.
of olefins, mechanism of, 1714*i*, 6149*g*.
of org. liquids, P 5409*f*.
of paper pulp—see *Paper pulp*.
of paraffins with $HgCl_2$ vapor, P 2217*f*.
of paraffin waxes, 3644*e*.

of paraffin wax, textile lubricants by, P 855*i*.
of pentachloroethylbenzene, 3377*f*.
of pentane and toluene, app. for, P 3726*e*.
of phenol, P 7045*b*.
of phenols with *N*-chloroacetanilide 6992*i*.
of phenoxyacetic acid, P 7509*i*.
of phenoxy fatty acids, P 2233*i*.
photochem., of acetylene in ultraviolet light, P 2870*f*.
of benzene to benzenehexachloride, P 5798*a*, 8601*e*.
of 1,2-cyclopentanedione, 6987*d*.
of gaseous hydrocarbons, app. for, P 2518*b*.
of hydrocarbons, P 6644*e*, P 7497*a*.
of methyl chloroformate in $CCl_4$ soln., 8896*d*.
of methyl silanes and siloxanes, P 3441*d*.
of propane, 5361*e*.
of propane or propene, P 6644*b*.
of phthalic anhydride, P 3463*hi*.
of polymers, P 1608*c*.
of polythene, P 2039*b*.
of polyvinyl chloride, P 8397*d*.
of 1,3-propanediol diacetate, 5367*g*.
of pyrazine, P 5809*g*.
of 8-quinolinol, 7484*i*.
of 3-retenol, 2985*d*.
of rubber—see *Rubber*.
of selenides, 2159*f*.
of sewage—see *Sewage*.
of soybean oil and Me esters of soybean fatty acids with *tert*-butyl hypochlorite, 5204*f*.
of soybean oil polymers in rubber synthesis, 1596*h*.
of starch, P 428*c*.
of sulfamic acid, 55*g*.
of sulfides, 7409*d*.
of swimming pools—see *Swimming pools*.
temp. effect on, of aromatic compds., 7471*d*.
of 1,1,1,2-tetrachloropropane, P 8397*c*.
of tetraphenylethylene, 7005*i*.
of thiophene, 624*d*.
of 2-thiophenecarboxylic acid, 5775*d*.
of toluene, mechanism of, 4644*d*.
of trichloromethylsilane, 563*b*.
of $\alpha,\alpha,\alpha$-trifluorotoluene, P 4693*f*.
of *s*-trithiane, 6070*e*.
of unsatd. ketones and quinones, 1633*a*.
of vinyl ether polymers, P 5585*b*.
water treatment by—see *Water, purification of*.
of wool, 7233*e*, 7691*i*.
effect on flotability from Vinyon, 6421*c*.
effect on scales and anti-scale and with-scale friction, 4858*a*.
shrinkproofing by, 9457*c*.
of xylenes in the Me groups, P 681*g*.



**Chlorine.** (See also *Chlorides; Chlorination; Dissnfection; Halogens.*)
absorbent for, P 8578*c*.
absorption of, rate of, 23*i*.
accumulation by thyroid, 5471*f*.
adsorption by active C, 5572*abd*.
by Cr powder and steels, 6139*g*.
by Hg electrode, 2523*a*.
in air, max. allowable concn. of, 4401*b*.
alumina purification with, 1922*i*, 1923*ac*.
aqueous humor-plasma ratios in rabbits, dogs and human beings, 2665*a*.
atom, effect on chlorination of aliphatic compds., 4627*i*.
effect on halochromism of quinoline derivs., 8391*e*.
effect on stability of arylazochloroacetic acids, 4259*c*.
phys. consts. of, 2590*h*.
and atomic Cl, partition functions of, 8838*h*.
balance in intoxication by N mustards, 3112*c*.
bleaching—see *Bleaching; Bleaching agents*.
in blood—see also *Chloremia; Hypochloremia*.
in blood and tissue during breathing of air rich in $CO_2$, 8542*a*.
in blood and urine after loading, 1858*i*.
in blood in benzene poisoning and effect of adrenaline thereon, 2316*e*.
in blood in eczema and erythrodermias, 4364*d*.
in blood plasma in brain in extracellular electrolyte depletion and its relation to electroshock seizure threshold, 5849*b*.
in blood plasma of fresh water and terrestrial invertebrates, 4388*e*.
in blood serum in typhus fever, 2304*c*.
bonds of, with Sb, As, C or P, elec. moments of, 5241*a*.
with B and Si, 8231*g*.
with C, force const. of, 2478*i*.
with C, free energy of, 3276*i*.
with C, Ge and Si, in $CH_3Cl$, $GeH_3Cl$ and $SiH_3Cl$, 8275*f*.
with Cl, energy of, 8763*b*.
molar sound-velocity increments of, 6025*b*.
with Pt, magnetic susceptibility of, 7278*b*.
cell with NaCl and Na amalgam, 8907*f*.
combustion of, in gaseous mixts., 7663*d*.
covalent and packing radii of, relation between, 10*a*.
decompn. of aq. solns. of, by light, 6515*g*.
diet free of, 1471*i*.
disinfectants contg.—see *Disinfectants*.
dissocn. of, 1630*e*
effect on Joshi effect in Br, 7322*i*.
on plants, 6284*h*.
on poliomyelitis virus, 9305*i*.
on velocity of dehydrochlorination of chlorinated hydrocarbons, 7407*g*.
on wool, 1572*b*.
energy levels, spectrum, ionization potentials and magnetic splitting factors of, 8883*f*
exchange with $ClO_2$, 8821*a*.
explosion of liquid, during reaction with synthetic rubbers, 405*h*.
formation of active, solid mixts. for, P 8110*cd*.
in gastric diseases, 5853*i*.
in grasses, and herbs of hay plots, 1347*i*.
gyromagnetic ratio of, 8865*b*.
hazards (industrial) of, 3947*i*
in hydrogen removal from Mg, 5356*b*
in inhibition of oxidation of CO, 3592*i*
as inhibitor of C combustion, 9417*b*
ions (neg. gaseous) of, in CsCl and RbCl vapors, 8868*f*
of, chr ratio of, 8848*a*
isotope of mass 36, $\beta$-rays from, 8870*b*
half-life of, 8870*c*.
max. positron to-negatron ratio in decay of, 4118*f*.
quadrupole moment and spin of, 8870*b*
spin and $\beta$ rays from, 8870*d*
isotope of mass 37, neutron capture cross section of, 6506*a*
isotope of mass 38, "cross over transitions" for $\gamma$-rays in, 1119*b*.
data on forbidden $\beta$ decay of, 8860*a*
decay to A $^{38}$, recoil energy in, 7810*d*.
mass value of, 8869*f*.
isotope of mass 39, radioactivity of, 8869*h*
Joshi effect in, 4101*h*, 8280*a*.
under full-ozonizer and semiozonizer excitation, 7323*a*.
under high pressure, 1641*e*.
kinetics of development of, 2085*e*.
spectral sensitivity of, 4555*g*
labilization of trans group in complex by, 2854*g*.
in lactones of *o*-hydroxy diphenylacetic acids, effect on hydrolysis rate with NaOH, 2496*c*.
in lemon-post-harvest-decay control, 3134*b*
liquefaction of, 1536*b*.
liquid, gas removal from, 8622*g*.
liquid, impenetrability radius of, 8794*e*.
lyoparachor of, 2834*d*
magnetic moment and gyromagnetic ratio of, 5303*f*.
manuf. of, 2378*f*, P 4588*g*, P 8918*g*.
cell for, 2097*g*, P 4588*bh*, P 6926*d*, P 8289*d*.
from chlorates, P 6377*f*.
corrosion of brine-carrying app. in, 2743*h*.
diaphragms for cells for, P 8290*d*.
electrolyzer for, P 2880*g*, P 3300*e*.
from fused NaCl, P 50*i*.
from HCl, P 1160*f*, P 4964*h*.
from $FeCl_2$ liquors, P 7358*b*.
from sea water, P 6926*b*, P 7840*b*, P 8110*b*.
from NaCl from sea water, P 5317*g*.
in Southwest, 368*g*.
in western U.S., 8577*b*.
manuf., production and uses of, 1158*i*.
metabolism of, effect of adrenocorticotropic hormone on, 8040*i*.
mixt. with $(NH_4)_2S_2O_8$, $Bz_2O_2$ and $KBrO_3$ in flour, effect on dogs, 2707*g*.
mixt. with NaClO, effect on holocellulose yield from beechwood, 6407*a*.
in muscles and skeletal tissue in degeneration of cartilage and bound to casein and tissue proteins, 9288*a*.
neutron absorption by, 8854*i*.
neutron binding energy of, and energy of $\gamma$-rays emitted on neutron capture by, 8861*b*.
neutron-bombarded, $S^{35}$ from, 8266*b*.
neutron cross section of, 3282*h*, 6909*d*.
oxidation of, by $KBrO_3$, effect of concn., temp. and time on, 6942*i*.
oxy ions of, bond lengths in, 4910*f*.
in oyster muscle, 3939*g*.
in paper-pulp manuf.—see *Paper pulp*.
poisoning of potatoes by, diagnosis of, 2675*f*.
proton resonance energy of, 4115*c*.
purification of, P 4822*f*.
radioactive, petroleum-well-bore logging by, P 3603*h*.
radius of bonded atoms of, 3252*c*.
in rain, snow, etc., 6876*c*.
reaction of O and, with $CCl_2$:$CCl_2$ in presence of $Bz_2O_2$, P 7954*d*.
reaction of $SO_2$ and, with alkyl halides, 6569*d*.
with hydrocarbon oils, app. for effecting, P 3726*e*.
with satd. aliphatic hydrocarbons, P 5033*c*.
with $Na_2SO_4$, P 9396*f*.
reaction with acetylenic glycols, 130*a*.
with aromatic sulfides, 2599*g*.
with $HCO_2H$, kinetics of, 2495*i*.
with $H_2S$, 7709*a*.
with $H_2S$, periodic pts. from, 7788*g*
with H, surface in, 474*b*.
with Hg vapor, 6054*a*
with metals, app. for, P 4820*d*.
with oximes, 6569*b*.
with primary, secondary and tertiary H atoms in hydrocarbons, rates of, 5270*c*.
with wood waste, P 3618*b*.
removal from chlorinated compds. by enzymes, 1815*i*.
from 1 chlorocyclohexyl cyclohexyl ketone, 5010*h*.
from 1,2-dichloro-2,2-difluoroethane, 2465*c*.
from org. chloride with Fe powder, 2194*d*.
removal from chlorodinitrobenzene and reduction of its nitro groups, P 4691*f*
renal excretion of, effect of intravenous Ca salts on, 8557*f*.
replacement in $C_6Cl_6$ by OH, $NH_2$ and $CH_3$ groups, 7803*h*.
-resistant app., P 6387*b*.
resorption by kidney in hypochloruria in kidney disturbances of pregnancy, 8517*c*.
in rhubarb varieties, 9383*h*.
in rocks of Aulanko area, Finland, 3323*i*
in saliva, 4356*h*.
in sediments and sea water, 5350*e*.
sepn. from $SO_2$, P 4822*h*.
in sewage purification—see *Sewage*.
in star $\gamma$ Pegasi, 2509*f*, 5301*e*.
substitution in inorg. compds., 2495*k*
system Cl-$Cl_2$-Br-$Br_2$-BrCl, 5265*g*
thermochor of, 8220*e*.
thermodynamic properties of, 2057*d*.
transport through frog skin, 4715*a*.
treatment of fruits and vegetables with, prior to nonrefrigerated storage, 9288*g*.
in urine, in cardiac decompensation, 4758*c*.
in eczemas and erythrodermias, 4364*e*.
effect of hypo- and hypertensors on, 8052*a*.
effect of mercurial diuretics on, 3519*g*
in vegetables, 3537*e*, 8572*d*.
water free from demand for, prepn. of, 333*f*.
in water purification—see *Water, purification of*.
x-ray absorption in, 4132*e*.
in zinc sulfide blue-fluorescent phosphors, 3294*h*.
zinc sulfide phosphor contg., 8278*g*
zinc sulfide phosphor contg., fluorescence of, 8279*a*.

**Chlorine, analysis.** (See also *Chlorides.*)
chromatographic sepn. from Br, I and CNS on paper and detection, 8972*h*
detection of active Cl, 5700*f*.
detn., 3316*d*, 6539*g*, 8059*f*.

plasticizers for elastomers from unsatd. dehydrochlorinated, P 8732*f*.
polarography of org., 8916*g*.
polychloropolyenes, 3346*c*.
polymers from org., P 7753*b*.
polymers, stabilization of, P 2031*c*.
prepn. of polychloro, 5361*h*.
**Chlorine e.** See *Chlorine es.*
**Chlorine es.** (See also *Bacteriochlorine es; Mesochlorine es.*) P 7648*b*.
**Chlorine fluorides**, 6793*d*.
ClF, heat of formation of, 6500*e*.
$ClF_3$, Raman spectrum, symmetry and thermodynamic properties of, 8887*d*.
spectra (infrared and Raman) of, 7821*d*.
**Chlorine oxides.**
ClO, identification in gas-phase combustion, 7663*d*.
$ClO_2$, in bleaching paper pulp, 3614*a*.
chlorite manuf. from, P 2380*c*, P 3159*h*
exchange with chlorite ion and Cl in other oxidation states, 8821*a*
in flour bleaching, 1495*d*, 6325*e*.
in flour, effect on dogs, 2707*g*.
flour treated with, feeding tests with, 5101*g*
manuf. of, P 1928*i*, 1929*c*, P 3159*fg*, 3575*c*, P 3575*g*, P 5556*b*, P 6377*f*, P 8107*i*.
manuf. of, and bleaching fats and oils with, P 6844*a*.
microwave absorption by, 8888*h*.
mixt. with NaOCl, in bleaching paper pulp, 847*h*.
pectin contg.-material treatment with, P 7610*f*.
in shrimp treatment, P 3541*a*.
sporicidal properties of, in water treatment, 7613*g*.
in treatment of wheat, rye, etc., P 8071*g*
in water purification, 1127*f*, 1508*a*, 2716*e*, 3545*f*, 5522*c*, 7165*b*.
**Chlorine preparations**, in water treatment —see *Water, purification of.*
**Chlorines.** See *Chlorine es.*
**Chlorinolysis.** (See also *Chlorination.*)
of butane, 5362*a*.
of cyclic compds., P 4296*d*.
of perchlorinated unsatd. hydrocarbons, 4231*h*.
of propane, 5361*e*.
**Chloris.** See *Grasses.*
**Chlorite** (*the mineral*), -amphibole-biotite schists of Co **fahlband mineralization** of Modum dist., Norway, 8816*f*.
chem. constitution and crystal structure of, 524*d*.
chromiferous, from Mt. Albert, Quebec, 4606*g*.
of diabases of Timan, U.S.S.R., as magmatic residual formations, 6120*h*.
-epidote vein formation in hornfels at Suyama-Mura, Japan, 6549*d*.
formation from albitites, 6130*c*.
from clay minerals and salt rock, 8995*a*.
from montmorillonite, 6121*a*.
of France (Sauvage), 8318*b*.
petrography of, of eastern Himalaya, India, 1692*i*.
schists of Colombia, 525*f*.
**Chlorites.** (See also *Alkali metal chlorites; Alkaline earth chlorites; Bleaching agents.*)
activation of solns. of, P 1160*def*.
detection and detn. of, 8972*f*.
detn. of, in presence of chlorates, 8966*i*.
exchange with $ClO_2$, 8821*a*.
manuf. from $ClO_2$, P 2380*b*, P 3159*h*.
oxidation with, P 1160*d*.
poisoning by, relation to chlorate poisoning, 5115*f*.
**Chloritoid**, from Quebec (Megantic Co.), 8987*f*.
schists near Zvánovice, Czechoslovakia, 4191*g*.
**Chloroaluminates**, structures of, 960*c*.
**Chloroamines.** See *Chloramide;* and "chloro-" under *Amines.*
**Chloroantimonic(V) acid**, aryl derivs. ($ArSbCl_4H$), pyridine salts, 602*b*.
**Chloroauric acid**, toxicity and excretion of, effect of 2,3-dimercaptopropanol on, 4765*d*.
**Chlorobacterium**, nitrogen fixation by, 9155*d*.
**Chlorobutanol.** See *Chloretone.*
**Chlorocadmates**, formation of, 4595*d*.
instability const of $CdCl_4^{--}$, 923*h*.
**Chlorocarbonic acid.** See *Formic acid, chloro-.*
**Chlorocarbonyl group** See *Chloroformyl group.*
**Chlorocobaltates(II)**, bonds in, 8764*a*.
in ethyl alc. solns., 4970*i*.
spectra of, 520*a*, 7817*i*, 7818*b*, 8273*i*.
**Chlorocobaltic(II) acid**, spectrum of ion of, 5305*a*.
**Chlorocuprates(I)**, formation of, 3307*d*.
**Chlorocuprates(II)**, 5324*c*.
stability of, 4971*a*.
**Chlorocyanogen.** See *Cyanogen chloride.*
**Chloroethylation**, of benzene derivs., P 681*b*.
**Chloroferrates(III)**, of meotinamides, P 3471*b*.
**Chloroferric(III) acid**, $HFeCl_4$, extn with $(iso\text{-}Pr)_2O$, 2489*g*.
**Chloroform**, -activated protease, assay of, and detn. of activity against, 708*i*.
adsorption by charcoal as measure of solvent power for bitumen and pitch, 4841*f*.
-anabasine distribution between water and, 6789*a*.
anesthesia by, effect on sphincter of Oddi, 5867*g*.
anesthesia by, effect on thrombin inactivation, 8548*d*.
as azeotrope former for naphthenes, P 3670*d*.
azeotrope with $SiCl_4$, 1716*g*.
benzene chlorination in presence of, P 1436*g*.
catalysts of Br and, in alkylation of paraffins, P 5181*h*.
cellulose acetate soly. in solvents contg., 1963*i*.
compd. with 1,2-dichloro-1,1,2,2-tetraphenylethane, 7005*i*.
compd. with sarothamnine, 5543*d*.
compression and freezing under pressure, 4067*f*.
in dairy-product preservation for phosphatase test, 3942*c*.
decahydronaphthalene peroxide ester rearrangement in, 6188*i*.
dehalogenation by liver exts., 1816*a*.
detection and detn. in air and organs, 974*a*.
detn. in air, autometer for, P 3249*h*.
detn. in gastric juice, 7191*g*.
diffusion in polystyrene, 5654*g*.
effect on adhesive power of soybean protein, 1604*e*.
on fibrinolysis, 2684*d*.
on fluorescence of anthracene solns., 3295*f*.
on gastric passage and intestinal absorption of glucose solns., 4767*g*.
*effect* on heart and intestines, effect of methemoglobin on, 316*h*.
on ionic exchange in red blood cells in relation to narcotic action, 7143*h*.
on liver, 3527*c*.
on onions and onion roots, 9171*e*.
on soap action on bacteria, 9143*f*.
on soly. of compds. in aq. alc., 6889*h*.
on surface activity, 3687*g*.
on syneresis of Na oleate gels, 4080*b*.
on tropokinesis in onion meristems, 4346*i*.
emulsions with nitrile polymers, P 7263*a*.
evapn. rate of, 6048*c*.
extn. of aq. solns. with, 2474*e*.
fat reaction with diphtheria bacteria produced by, 1830*c*.
fluorination of, sepn. of products of, P 661*g*.
folic acid prepn. contg., 355*i*.
formation from chlorination of bis(dichloromethyl) sulfide, 4629*b*.
health hazards of, 787*h*.
heart action of, effect of ephedrine, isoamyl nitrite, $NaNO_2$ and nitroglycerin on, 758*i*.
heat capacity of, 30*c*.
heat of reaction with $AlBr_3$, 2851*f*.
1-hexadecanol sorption from, by MgO, 17*b*.
as inhibitor of C combustion, 9417*b*.
liver injury from, glucose in treatment of, 2699*c*.
lyoparachor of, 2834*a*.
metallic soap soly. in, 1998*b*.
microwave absorption by, 2514*h*.
mixts. with $C_6H_6$, dielec. properties of, 6019*b*.
with EtOH, distn. of, 2060*h*.
with org. vapors, adsorption by active carbons, 16*g*.
muscle contracture by, 1861*c*.
narcotic action on blowfly larvae, 4416*f*.
necrotizing action of urethan and, 7135*a*.
penetration into *Ascaris lumbricoides*, 9270*b*.
polarography of, 8916*h*.
prepn. of, 2156*g*.
prepn. of, from $CCl_3CO_2H$, 5361*g*.
preservation of, used in vitamin A detn., 9129*f*.
reaction (photochem.) with $Ph_2Hg$, 8895*b*.
reaction with aldehydes, P 664*d*, P 4284*h*.
with CO and $SO_2$, 9031*d*.
with chlorotrifluoroethylene, P 661*e*.
Schwartzman phenomenon inhibition by, 2320*i*.
soly. in Na xylenesulfonate solns., 1242*e*.
as solvent for *N*-vinylpyrroles, for film formation, P 2035*c*.
sorption by porous substances, 1240*e*.
spectrum of, 42*d*.
surface tension of, 4531*g*.
system: dioxane–, 1637*c*.
system: perfluoromethylcyclohexane–, 3267*a*.
tetraphenyl arsonium perrhenate soly. and extn. from Mo mixts. by, 8304*g*.
thermal cond. and viscosity of, 4065*c*.
toxicity of, nutritional factors affecting, 733*h*.
ultrasonic velocity in, 1232*g*.
ultrasonic velocity in, temp. and, 7283*i*.
vapor-d. distribution over surface of, 7282*i*.
vapor pressure of, temp. and, 8775*a*.
ventricular fibrillation from adrenaline and, 313*b*.
ventricular fibrillation from adrenaline and, protective action of various agents on, 4768*c*.
vibration frequencies of, 5307*i*.
vinyl acetate chain-transfer coeff. in, 5271*e*.
viscosity (dilatational) of, 5249*g*, 8780*a*.
**Chloroform, bromo-.** See *Methane, bromotrichloro-.*
**——, nitro-.** See *Chloropicrin.*
**Chloroform-d**, vibration frequencies of, 5307*i*.
**Chloroformic acid.** See *Formic acid, chloro-.*
**Chloroformyl group**, effect of, in chlorination of aliphatic compds., 4627*i*.
**Chlorogenic acid**, adrenaline potentiation by, 5116*i*.
effect on protein of sunflower seeds, 2335*d*.
oxidation of, to viridinic acid, 3116*g*.
in plants and its distribution, 4342*h*.
**Chlorogenin**, and derivs., 1788*h*.
**Chlorogenine.** See *Alstonine.*
**Chlorogenone***, reaction product with $N_2H_4$, 1788*i*.

**Chloroguanide.** See *Paludrine.*
**Chlorohemins.** See *Hemins.*
**α-Chlorohydrin.** See *1,2-Propanediol, 3-chloro-.*
**Chlorohydrins,** manuf. of, P 4687*b.*
manuf. of, from starch, P 428*d.*
reaction with cyanides, P 3446*f.*
of tertiary acetylenic alcs., 2182*b.*
**Chloromanganates(IV),** orbital electron configuration in, 3672*c.*
**Chloromercurates(II),** formation of, 6892*i.*
formation of, from Co complexes in EtOH solns., 4970*i.*
**Chloromethylation,** of anthracene derivs. and phenanthrene and derivs., 7013*c.*
of 1-(2-chloroethyl)-4-nitrobenzene, 646*c.*
of dehydroabietic acid, P 6665*f.*
of Sovasol No. 75 to trimethyl benzyl chlorides, P 5583*e.*
of thianaphthene, 1395*h.*
of thiophenes, 5781*e.*
of veratrole, 2970*d.*
**Chloromethyl group,** cleavage from polysiloxanes, P 3238*b.*
effect of, in chlorination of aliphatic compds., 4627*i.*
parachor of, 2057*f.*
**Chloromycetin.** See "D-*threo*-" under *Acetamide, α,α-dichloro-N-[β-hydroxy-α-(hydroxymethyl)-p-nitrophenethyl]-.*
**Chloropalladates(II),** reduction by $H_2$ and H, 2854*g.*
**Chlorophaeite,** chem. constitution of, 2899*d.*
**Chlorophora excelsa,** wood of, chlorophorin of, 5388*b.*
**Chlorophorin,** and derivs., 5388*b.*
——, **tetrahydro-,** and tetramethyl ether*, 5388*c.*
**Chlorophosphoric acids,** esters of $H_2PClO_3$ and $HPCl_2O_2$, 6166*f.*
o-methoxyphenyl esters of $H_2PClO_3$ and $HPCl_2O_2$, 6178*e.*
**$H_2PClO_3$,** dialkyl esters, hydrolysis of, 1314*h.*
2,2-dimethyl-1,3-dioxolan-4-ylmethyl Ph ester, stereoisomers, 6166*f.*
esters, 590*f*, 8350*i.*
**$HPCl_2O_2$,** 2-fluoroethyl ester, 6163*i.*
**Chlorophyceae.** See *Algae.*
**Chlorophyll-hemin***, effect on oxidation-reduction systems, 4713*e.*
**Chlorophyllis.** (See also *Protochlorophyll.*)
a and b, in leaves, 1837*a.*
a and b, in lettuce, effect of N feeding and illumination on, 8012*i.*
a, b and c, in diatoms, 2281*e.*
in apple varieties, 278*h.*
in *Aucuba japonica* and *Euonymus japonicus,* 3890*g.*

**Cholanic acid.** (See also *Allocholanic acid; Bisnorcholanic acid; Norcholanic acid.*)
manuf. of, P 7509*f*.
——, 3(α)-acetoxy-11(and 12)-keto-*, methyl ester, spectra of, 3019*g*.
——, 3,3-bis(*p*-acetamidophenylmercapto)-7,12-diketo-*, 7033*i*.
——, 3,3-bis(carboxymethylmercapto)-7,12-dihydroxy-*, 7033*i*.
——, 3,3-bis(carboxymethylmercapto)-7,12-diketo-*, and tri-Me ester, 7033*h*.
——, 3(α),12(α)-diacetoxy-7-keto-*, methyl ester, spectrum of, 3019*g*.
——, dihydroxy-, in bile of patients with choledochostomy drainage, 7572*c*.
—, 3(α),6(α)-dihydroxy-. See *Hyodeoxycholic acid.*
——, 3(β),12(α)-dihydroxy-*(?), methyl ester diacetate, 1790*h*.
——, 3(β),12(β)-dihydroxy-*, spectrum of, 3018*i*.
——, 3,12-dihydroxy-11-keto-*, isomers, and derivs., 4679*d*.
——, 3(α),12(α)-dihydroxy-7-keto-*, spectrum of, 3019*g*.
——, 7,12-dihydroxy-3-oxo-, bis(carboxymethyl mercaptal), 7033*i*.
——, 3,12-diketo-*, methyl ester, spectrum of, 3019*g*.
——, 7,12-diketo-3,3-bis(phenylmercapto)-*, 7033*i*.
——, 7,12-diketo-3-(carboxymethylene)-*, and diethyl ester, 1431*c*.
——, 7,12-diketo-3-(cyanocarbethoxymethylene)-*, ethyl ester, 1431*c*.
——, 3,6-diketo-12(α)-hydroxy-*, methyl ester acetate, 1790*e*.
——, 12-dimethylamino-3(α)-hydroxy-*, ethyl ester, methiodide, degradation of, 9076*h*.
——, 3(α),9(α)-epoxy-11-keto-*, methyl ester, spectrum of, 3019*g*.
——, 3(α)-hydroxy-. See *Lithocholic acid.*
——, 3-hydroxy-7,12-diketo-3-(carbethoxymethyl)-*, ethyl ester, 1431*d*.
——, 3(α)-hydroxy-11(α),12(α)-epoxy-*, spectrum of, 3018*i*.
——, 3-hydroxy-12-keto-*, methyl ester benzoate, reduction of, P 7509*g*.
and 3-succinate (acid), P 702*a*.
——, 3(α)-hydroxy-11-keto-, 4679*d*.
methyl ester, spectrum of, 3019*g*.
——, keto-*, derivs., reaction with Et bromoacetate and Et cyanoacetate, 1431*b*.
——, 3-keto-4-bromo-12(α)-hydroxy-*, methyl ester acetate, 1790*d*.
——, 7-keto-3,12-dihydroxy-*, ethyl ester, reduction of, P 7509*h*.
salts, effect on gram-pos. protein complexes, 269*d*.
——, 3(α),7(α),12(β)-trihydroxy-. See *Cholic acid.*
——, 3,7,12-triketo-. See *Dehydrocholic acid.*
**Cholan-24-ol-11-one, 3(α),9(α)-epoxy-24,24'-diphenyl-***, spectrum of, 3019*g*.
**Cholanthrene,**

derivs., 2625*h*.
fluorescence of, 4986.
reaction with $OsO_4$, 8375*a*.
——, 3,4(and 3,5)-dimethyl-, 2626*a*.
——, 3-methyl-, carcinoma from, Ca-ion exchange in, 1859*f*.
carcinoma of skin from, arginase activity and N content in, 5489*a*.
from cholesterol by pyrolysis, 7573*i*.
and compd. with 1,3,5-trinitrobenzene, 2625*h*.
effect on bone-callus formation, 9239*f*.
on embryo, 3516*e*.
on mutability of *Drosophila melanogaster*, 9271*f*.
on papain action, 5054*d*.
on skin transplantability, 7135*a*.
on viscosity of paramecium, 2311*a*
fluorescence of, 4986.
mutagenicity of, 3530*b*.
photodimer, 7012*c*.
prostate tumors from, 305*f*.
reaction with maleic anhydride, 2199*g*.
reaction with $OsO_4$, 8375*a*.
sebum as vehicle for, 5956*c*.
solubilization in assocn. colloids, 4363*e*.
tumors of alimentary tract after feeding, in mineral oil, 8046*d*.
$\Delta^{4\ 20,22}$-Cholatriene, 3-keto-24,24-diphenyl-*, P 3475*a*.
$\Delta^{9,11,20,22}$-Cholatriene, 3(β)-hydroxy-24,24-diphenyl-*, and acetate, P 3475*a*.
$\Delta^{1,3,5}$-Cholatrienic acid, 3-hydroxy-1-methyl-10-normethyl-*, and *p*-nitrophenylazo deriv., 7494*f*.
**Cholecystectomy,** fecal fat excretion after, 740*f*.
**Cholecystokinin,** assay of, 5538*e*.
**Choleglobin,** legume, biliverdine formation from, 4729*h*.
**Cholelithiasis.** (See also "biliary" under *Calculi.*)
polysaccharides in blood serum in, 9230*d*.
**5-Cholen-24-al, 3(β)-hydroxy-***, and derivs., 3433*a*.
$\Delta^5$-Cholene, 3(β),24-dihydroxy-*, and esters, 3432*g*.
——, 3(β),20-dihydroxy-24,24-dimethyl-*, and 3(β)-acetate, 6638*c*.
——, 3(β)-hydroxy-24-keto-24-(*p*-methoxyphenyl)-*, and oxime, 3433*f*.
——, 3(β)-hydroxy-24-keto-24-phenyl-*, and derivs., 3433*f*.
$\Delta^{7}$-Cholene, 3(α),12(α)-dihydroxy-22-bromo-24,24-diphenyl-*, diacetate, P 3474*h*.
——, 3(β)-hydroxy-5-chloro-24,24-diphenyl-*, acetate, P 3474*i*.
**4-Cholene, 3,24-diketo-24-phenyl-***, 3433*e*.
**5-Cholene-3(β),24-diol, 24-phenyl-***, isomers, and derivs., 3433*b*.
**Cholenic acid.** (See also *Norcholenic acid.*)
$\Delta^{4}$-Cholenic acid, 3-keto-*, P 2244*d*.
——, 3-keto-6-bromo-12(α)-hydroxy-*, methyl ester acetate, 1790*e*.
——, 3-keto-12-hydroxy-*, methyl ester, and its 2,4-dinitrophenylhydrazone, 4282*h*.
——, 3-keto-12(α)-hydroxy-*, methyl ester acetate, 1790*d*.
$\Delta^{9,11}$-Cholenic acid, 3(α)-acetoxy-*, spectrum of, 3018*i*.
——, 3(α)-acetoxy-12-keto-*, and methyl ester, spectra of, 3019*g*.
——, 3(α),12(α)-dihydroxy-*, derivs., 3434*b*.
——, 3(α),12(β)-dihydroxy-*, and derivs., 3434*ab*.
spectrum of, 3018*i*.
——, 3(α)-hydroxy-*, methyl ester, 3433*h*.
spectrum of, 3018*i*.
——, 3(α)-hydroxy-12-keto-*, and derivs., 3433*f*.
——, 3(α)-hydroxy-12(α)-methoxy-*, methyl ester, 3434*d*.
——, 3(α)-hydroxy-12(β)-methoxy-*, spectrum of, 3018*i*.
$\Delta^{11}$-Cholenic acid, 3(α)-acetoxy-*, methyl ester, 9076*h*.
——, 3(α)-hydroxy-*, spectrum of, 3018*i*.
——, 3-keto-*, methyl ester, P 3980*b*.
and methyl ester, P 3980*c*.
$\Delta^{20,22}$-Cholenic acid, 3,21-dihydroxy-*, lactone and its 3-acetate, P 7976*d*.
**5-Cholenic acid, 3(β),12(α)-dihydroxy-***, and derivs., 1790*c*.
——, 3(β)-hydroxythiol-*, esters, desulfurization of, 3432*e*.
**23-Cholen-3(β)-ol, 5-chloro-24-phenyl-***, acetate, 4282*a*.
$\Delta^{23}$-Cholen-11-one, 3(α),9(α)-epoxy-24,24'-diphenyl-*, spectrum of, 3019*g*.
**Cholera,** fowl, sulfaquinoxaline treatment in, 8002*a*.
fowl, treatment of, 7589*f*.
preventive for chicken, P 1913*d*.
**Cholera vibrios.** See "cholera" under *Vibrio.*
**Choleresis.** See "secretion of" under *Bile.*
**Choleretics.** (See also *Cholagogs.*) 5493*f*.
effect on bile compn. in dog with permanent biliary fistula, 2318*f*.
effect on excretion of pigment and bromosulfalein in bile, 1869*i*.
nicotinamide and Na nicotinate as, 9256*d*.
review on, 320*a*.
7,8,14-trihydroxyabietic acid, P 1913*i*.
trithio-*p*-methoxyphenylpropene as, 1489*a*.
$\Delta^{3,5}$-Cholestadiene, 243*h*, 1784*e*.
as cholesterol pyrolysis product, 7578*i*.
reaction with $HClO_4$, 7494*c*.
$\Delta^{5,7}$-Cholestadien-3(β)-ol*, acetate, spectrum of, 3018*i*.
**4,6-Cholestadien-3(β)-ol***, and acetate, 3020*d*.
$\Delta^{1,4}$-Cholestadien-3-one*, 7494*i*.
2,4-dinitrophenylhydrazone, 4282*d*.
——, 6-bromo-*, 7495*a*.
$\Delta^{3,5}$-Cholestadien-7-one*, from liver of cattle, 1818*g*.
spectrum of, 3019*g*.
$\Delta^{4,6}$-Cholestadien-3-one*, 3021*e*, 3022*a*.
2,4-dinitrophenylhydrazone, 4282*d*.
and semicarbazone, 7494*i*.
spectrum of, 3018*i*.
**Cholestane,** from cholesterol by pyrolysis, 7574*a*.
from hydrogenation of 2,3-oxidocholestane, 3831*g*.
spiro derivs. of, 659*b*.
——, 3-acetoxy-4(α),5-oxido-*, isomers, 6640*i*.
——, 3(α)-chloro-*, 246*a*.
——, 3(α),5-dihydroxy-*, 6641*b*.
and esters, 1784*a*.
——, 3,4-dihydroxy-*, epimers, and derivs., 1785*b*.
——, 3(β),5-dihydroxy-*, and acetate, 5408*g*, 6641*b*.
and esters, 1784*b*.
——, 3(β),6(β)-dihydroxy-*, and diacetate, 5408*h*.
——, 3(β)-hydroxy-6,7-diketo-*, compd. with MeOH, 246*f*.
——, 6-keto-*, derivs., 245*h*.
——, 7-keto-3(β)-acetoxy-*, 246*d*.
——, 3-keto-5-hydroxy-*, and oxime, 1784*h*.
——, 2(α),3(α)[and 2(β),3(β)]-oxido-*, 3831*e*.
——, 4,5-oxido-*, derivs., 6640*i*.
**6-Cholestaneacetic acid*, γ-lactone***, 3430*d*.
**Cholestane-6[7-dicarboxylic acid, 3(β)-acetoxy-***, 9077*f*.
——, 3(β)-hydroxy-*, and derivs., 246*a*.
**2,3-Cholestanediol,** and esters, 3831*g*.
**3,4-Cholestanediol,** spectrum of, 3018*i*
**3(β),5(α)-Cholestanediol***, 3021*d*.
**3,4-Cholestanedione,** 7495*c*.
**3,6-Cholestanedione,** 247*g*.
reaction product with $N_2H_4$, 1788*i*.
**3,5,6-Cholestanetriol,** sulfonation of, 5028*g*.
**3(β),6,7-Cholestanetriol,** and tris(*p*-nitrobenzoate), 9077*e*.
**Cholestanol,** chromatographic sepn. of epicholestanol and, 2894*f*.
effect on carcinogenic potency and elimination rate of benzopyrene, 307*e*.
α glucoside, tetraacetate, P 5428*b*.
——, 5,6-dibromo-, acetate, reaction product with $SbCl_3$, spectrum of, 5307*g*.
——, 6-keto-*, acetate, reaction product with $SbCl_3$, spectrum of, 5307*g*.
——, 7-keto-*, acetate, reaction product with $SbCl_3$, spectrum of, 5307*g*.
***epi*-Cholestanol.** See *Epicholestanol.*
**2-Cholestanol, α-, and β-, configurations of,** and derivs., 3831*e*.
**3(α)-Cholestanol***, acetate, spectrum of, 3018*i*.
**3(β)-Cholestanol***, and acetate, spectra of, 3018*i*.
and formate, 243*e*.
**Cholestan-3(β)-ol-6-one***, 245*i*.
spectrum of, 3018*i*.
**Cholestan-3(β)-ol-7-one***, benzoate, 243*d*.
**Cholestanone,** dialkyl mercaptoles of, P 1532*f*.
methyl(2,4-dinitrophenyl)hydrazone, 4282*i*.
in oxidation-reduction reactions in the presence of Raney Ni, 191*e*.
reaction product with $SbCl_3$, spectrum of, 5307*g*.
——, tribromo-, bromine detn. in, 968*i*.
**2-Cholestanone,** and oxime, 3832*e*.
**3-Cholestanone,** 243*e*.
diethyl mercaptole*, P 1532*h*.
2,4-dinitrophenylhydrazone, 4282*e*.
and oxime, 244*a*.
spectrum of, 3018*i*.
——, 2-acetoxy-*, 2,4-dinitrophenylhydrazone, 4282*e*.
——, 2-bromo-, P 366*f*.

*antagonism* to atropine in action on sphincter muscle of iris, 4381*b*.
to *N*, *N*-dimethyl-3-cyclopentylidene-3-phenylpropylamine, 8359*f*.
to drugs in effect on blood vessels, 2704*g*.
to vitamin $B_1$ in action on heart, 1093*i*.
barium chloride action and, 5505*h*.
in blood, 1851*e*.
in gastro-duodenal ulcers, 3514*d*.
in labor and child bed in relation to serum cholinesterase, 9201*d*.
in brain tissue, forms of, 7106*c*.
bromide, effect on cholinesterase in blood serum, blood sugar and, 2311*c*.
in carotid sinus and *carotis communis*, 5842*a*.
in cerebrospinal fluid in craniocerebral trauma and epilepsy, 8519*fh*.
in cerebrospinal fluid in psychotics, 9234*i*.
chloride, detection and detn. as iodide with Bi and Sb, 357*d*.
chloromanganate, pharmacology of, 7129*f*.
in cholinergic fibers, synaptic fatigue and, 9260*h*.
cholinesterase action on, free-energy change in, 9124*i*.
as convulsant, 6744*i*.
convulsive activity and, 9260*h*.
depressor-drug quant. relation to, 5872*d*.
diisopropyl fluophosphate and thujone effect on body, 8535*g*.
effect on adenosinetriphosphatase activity of myosin prepns., 3053*b*.
on adenosinetriphosphate action on blood vessels, 8482*b*.
on adhesion of epithelium to stroma in cornea, 769*c*.
on adrenaline release from chromaffin tissue, 7128*e*.
on aortic pressure, 4776*a*
on auricle, 4385*e*
on autolysis of animal tissue, 1071*f*
on axonal conduction and synaptic transmission, 9261*h*.
on blood pressure and respiration after intracisternal injection, 7130*c*
on carotid body, effect of NU 683 on, 7134*c*.
on carotid body, effect of tetraethylammonium on, 321*f*.
on Cl and water excretion and on blood pressure, 8052*b*.
on circulation and gaseous metabolism, 3936*e*.
on contractile activity of uterus, 1488*d*.
on convulsions from elec. shock, 2327*h*.
on coronary blood flow, 8539*a*
on excitability of fatigued muscles, 2685*b*.
on fast and slow muscles, 5872*h*.
on ileum in relation to survival time, 761*i*.
on medullar excitability, 7578*a*.
on muscle fibers, 5863*f*.
on nerve chronaxia, effect of vitamins on, 6293*b*.
on neuromuscular action of 2,4-di chlorophenoxyacetate, 2329*f*.
on pancreas and its respiratory activity, 7146*h*.
on permeability of hemoencephalic barrier, 9203*f*.
on pulmonary circulation, 9248*b*.
on smooth muscle of elasmobranch and teleost, 4763*d*.
on NaCl in tears, 9214*c*.
on spinal cord of frog, 316*c*.
on stomach muscle, 4771*b*.
on unimol. films of lecithin, 7526*e*
on ventricle of turtle and frog, 1117*b*
electrocardiographic changes produced by, 1489*c*.
epilepsy-neuronal activity and, 9232*b*.
esterase—see *Cholinesterase*.
ether-sol. form of, in central nervous system, 7106*e*.
in heart, 2686*i*.
heart response to, in cephalopods, gastropods and molluscs, 3528*h*.
compared with intermediate products of carbohydrate metabolism, 5865*c*.
effect of adrenaline, Na oleate and tetraethyl-ammonium on, 8056*f*.
effect of hydrastinine on, 3102*f*.
effect of morphine and its derivs. on, 3102*c*.
effect of NU 683 on, 7134*f*.
effect of thiaminase on, 4767*h*.
*heart response to*, in relation to its synthesis, 4383*b*.
hydrolysis rate of, 3271*h*
-inhibiting compds., 8546*a*.
interaction with other autonomic drugs on intestines, 3097*i*.
intestinal response to, 7565*a*.
effect of tetraethylammonium ion on, 1110*g*.
paralyzed by phlorizin, 5872*e*.
intestinal spasms from, effect of antihistamines and other substances on, 3934*e*
intracranial hypertension from, 765*e*.
in iris, effect of tetanus toxin on, 4764*e*.
liberation of, during anaphylactic shock, 1478*a*.
by heart after electrical stimulation, 7118*d*.
by stimulation of vagus, 3083*h*.
lysolecithin effect on pharmacol. action of, 311*d*.
muscle contraction by, effect of gravitol on, 8543*d*.
muscle sensitivity to, 8056*d*.
effect of acetone on, 3478*c*.
effect of isotonic glucose on, 1853*b*
effect of vitamin $B_1$ and its phosphorylated derivs. on, 291*f*
after removal of tendon, 766*c*.
muscle stimulated by, effect of detergents on, 2330*h*.
as nerve-impulse transmitter of cutaneous vasodilator nerves, 8504*a*.
in nettle plants, 8455*a*.
in organs of fish, and effect of eserine thereon, 8560*h*.
in organs of *Helix pomatia*, effect of physostigmine and prostigmine on, 353*d*
pharmacodynamic action of, 8526*c*
pharmacol. action of, 4753*b*, 9259*i*
physiology of, 4753*a*.
in placenta, abortion and, 8479*i*
in placental metabolism, 8509*b*
salts, stability of, 9374*g*.
in sauerkraut juice, effect on bactericidal effectiveness, 6277*g*.
sensitivity to, cholinesterases and cholinergic symptoms in relation to, 4305*a*
sensitization of ventricle of *Helix pomatia* and leech muscle to, by local anesthetics, 1107*ef*
shock from, ocular tension and retinal arterial pressure in, 6723*a*
sparteine effect on, 8542*e*.
in stimulus transfer in afferent nerves, 4749*c*.
stimulus transmission from nerve to muscle and, 5469*i*.
sweating from, 2323*c*.
synaptic transmission in spinal cord and, 7102*a*.
synthesis in brain, 7130*h*.
in brain at low O tension, effect of succinic acid on, 756*e*.
in central nervous system, 747*h*.
tachycardia from, 7576*e*.
thephorin effect on action of, 4764*a*.
vasomotor properties of, effect of papaverine, atropine and tetraethylammonium on, 7134*a*.
zinc sulfate effect on action of, compared with that of vitamin $B_1$ and other substances, 3903*a*
—, **acetyl-β-methyl-***, chloride, bronchospasm from aerosol contg., protective action of diphenylhydramine and aminophylline in, 1861*f*.
chloride, effect on convulsant response to drugs, 9260*i*.
chloride, effect on heart, 8058*g*
effect on adrenaline toxicity, 311*b*
effect on heart arrested by paludrine, 2704*b*.
spasms in intestines from, effect of antihistamines and other substances on, 3934*e*.

from phosphates in elec. furnace, P 4964*g*.
reduction in stages, 1295*a*.
from wastes, P 8345*a*.
**Chromium acetates**, in acetic anhydride, behavior of, 2110*g*.
condensation with dicyandiamide and HCHO, dye-fixing agent by, 3620*h*.
**Cr(OAc)$_3$**, effect on catalyst in hydrogenation of CO, 2399*h*.
**Chromium alloys.** (See also *Discaloy; Elinvar; Hastelloy-C; Inconel; N155 alloy; Ni-chrome; Nimonic; Ni-resist; Refractaloy; Refractaloy 26; Silchrome; Stellite; Vitallium; Worthite*; "system" under *Chromium*; and "chromium" under *Steel*.)
aluminum-C-Fe-Mn-Si-Ti-, cold-rolled strip of, 4206*a*.
aluminum-, coating steel pipes with, 2916*e*.
aluminum-Co-Cu-Fe-Mn-Ni-Si-Ti-, P 7404*e*.
aluminum-Fe-, Fe-, Fe-Ni-, Fe-Si-, and Ni-, oxidation resistance of, 2150*a*.
aluminum-Fe-Mn-Mo-Si-Sn-Ti-V-, P 6563*g*.
aluminum-Fe-Mn-Si-W-, and Fe-Mn-Si-Ti-W-, magnetic, P 6966*g*.
aluminum-Mg-, P 5000*g*.
aluminum-Mg-Si-, corrosion of, under tension, 549*b*.
aluminum-Mg-Zn-, 91*e*, P 4626*d*.
aluminum-Ni-, prevention of corrosion of electrodes of, in salt baths, P 4153*g*.
aluminum-Ni-Ag-, P 8348*h*.
aluminum-Ni-, with or without Fe, elec. resistors of, P 2878*g*.
aluminum-W-, magnetic, P 5358*d*.
antimony-Mn-, magnetic interactions and magnetic susceptibility of, 4911*g*.
beryllium-B-Co-Ni-W-, P 5358*c*.
boron-, $Al_2O_3$ wetting by, 4438*c*.
ceramic-molded-bodies contg., P 5566*a*.
coating of, with black oxide glaze, P 8346*b*.
cobalt-Cb-Fe-Mn-Mo-Ni-W-, for gas-turbine rotor disks, 3331*c*.
cobalt-Cu-Fe-Mn-Ni-, age-hardenable, P 9020*g*.
cobalt-Cu-Mo-Ni-, heat- and stress-resistant, P 2922*c*.
cobalt-, corrosion resistance to body fluids, 1303*f*.
cobalt-Fe-, as mirror support, P 4441*e*.
cobalt-Fe-Mn-Mo-Ni-W-, for turbosupercharger buckets, P 3341*b*.
cobalt-Fe-Mo-Ni-Si-, as weld-rod material, P 3771*f*.
cobalt-Fe-Ni-W-, for hard-facing valves, P 9021*b*.
cobalt-W-, for turbines, 7392*c*.
copper-, and Cu-Ni-, elec. resistance of, effect of pressure and temp. on, 5679*b*.
copper-Fe-Mo-Su-, magnet from, P 5000*i*.
copper-Ni-Ag-, oxidation-resistant, P 6147*a*.
corrosion of, 6140*c*.
corrosion underground, 6141*b*.
elec. resistors of, insulation of, P 6098*f*.
iron-, and Fe-Ni-, color metallography of, 79*i*.
iron-, and Fe-Ni-, in ceramic industry, 2748*i*.
iron-, and Fe-Si-, low in C, 2553*h*.
iron-, anodic oxidation in NaOH, 8912*a*.
C detn. in, 1283*h*, 1285*d*.
Cr detn. in, 965*bc*.
$(Cr,Fe,Mn)_7C_3$ trigonal crystals in, 1686*a*.
elec. resistance and magnetic properties of, 6961*d*.
flux for welding of, P 3344*b*.
hardening and softening of, 4618*h*.

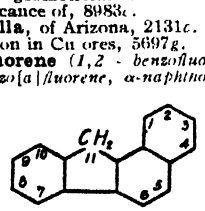
identification of $Cr_7C_3$ and $Cr_{23}C_6$ in steels, 1685*i*.
$CrC_4$, detn. in steel, 6111*b*.
$Cr_7C_3$, in steel, 3764*b*.
**Chromium carbonate**, $Cr_2(CO_3)_3$, effect on catalyst in hydrogenation of CO, 2399*h*.
**Chromium chlorides**. (See also *Chromyl chloride*.)
basic, resin-exchange studies on complex, 6851*b*.
$CrCl_3$, as absorbent for O in gas analysis, 4599*gh*.
dehydration of hydrate with $COCl_2$ or $SOCl_2$, 2533*c*.
as reductor in Fe detn., 5698*d*.
$CrCl_4$, aging, constitution and turbidity during increasing basicity, 1591*b*.
effect of salts on complex formation and tanning action of, 6851*f*.
effect on bread doughs, 4781*g*.
interaction with silicic acid sols, 8237*d*.
volatility of, 4068*c*.
**Chromium compounds**, P 3983*i*.
acetato, $Cr(HCrO_4)(OAc)_2$, 7419*a*.
with aluminum, $Al_7Cr$, structure of, 7886*i*.
ammines, P 3158*a*.
ammino, contg. oxidizing groups, explosive properties of, 5187*e*.
ammino, formation of $Cr(NH_3)_6(NO_3)_3$ from $Cr(NH_2)_3$, 6101*e*.
analysis of, ion exchangers in, 7863*a*.
with antimony, As, N, O, P, Se, Si, S and Te, magnetic properties of, 6018*c*
basic, effect of complex-active acid radicals on constitution and complex formation by, 6851*e*.
as catalysts in oxidation of cyclic ethers, P 2224*e*.
complexes, 4969*i*, 4970*ac*.
Cr thermal exchange in solns. contg., 4967*c*.
conductometric study of formation of, 8939*d*.
formation of, with additives in Al sulfate and chrome alum tanning solns. and analysis with ion-exchanging resins, 9508*e*.
formation of, with formates and oxalates and analysis with ion-exchanging resins, 9507*g*.
with heterocyclic N bases, 2534*c*.
with heteropoly acids and amines, 1672*a*.
induced dissymmetry and optical activity of, 2538*f*.
with salts of α-hydroxy and weak org. acids, 8183*i*.
structure of, 6102*g*.
complexes from dibasic acids and their salts and, 6102*i*, 6103*a*.
corrosion-inhibiting, and their mixts., P 102*f*.
with dyes, (*Patents*.) 857*g*, P 1574*h*, 1987*h*, 2441*f*, 3626*d*, 4482*cdef*, 5598*b*, 5600*efg*, 7695*d*, 7698*ad*, 7699*a*, 8150*g*, 8155*fh*, 8691*abe*, 9459*e*, 9460*ef*, 9461*c*.
as fungicides for cotton fabric, 8085*f*.
with iron in Fe ores and assocd. rocks in Sweden, 5710*b*.
with iron in sediments from Tyrrhenian Sea, 4610*f*.
in leather, coördination reactions with Na salt anions, 9510*f*.
in leather from 1- and 2-bath tanning, 6450*ce*.
with nitrilotriacetic acid, 2888*c*.
org., as polymerization activators, 8727*g*.
with 1,1′-*m*-phenylenedibiguanide, 8941*d*.
polarography of complex, 4037*i*.
with 8-quinolinol, 8953*c*.
salicylate org. complex, for chroming dyes, P 6427*g*.
sexivalent, properties of, 8785*a*.
tanning with—see *Tanning; Tanning materials*.
as termite repellents, 9341*e*.
with tetrakisazo dyes, P 8161*g*.
**Chromium fluoride** ($CrF_3$), catalysis by, in esterification of fatty acids with glycerol, 4031*a*.
catalyst from, P 9300*f*.
as catalyst in $CF_4$ manuf. from C halides and HF, P 3437*a*.
as catalyst in dehydrofluorination of polyfluoro paraffins, P 3437*c*.
effect on catalyst in hydrogenation of CO, 2399*h*.
magnetic absorption by, 4141*h*.
magnetic susceptibility of, 4060*g*.
as wool preservative, 3622*i*.
**Chromium halides**, Curie point, pressure and, 8784*a*.
**Chromium hydrides**, crystal structures of, 3260*i*.
**Chromium hydroxide** ($Cr(OH)_3$). (See also *Chromium oxides*.)
colloidal, 8801*a*.
formation and temp. limits for weighing of, 8953*a*
formation from $CrCl_3$ soln., aging and constitution of α- and β-, 1591*c*.
ignition temp. of analytical ppt. of, 2543*c*.
**Chromium iron tungsten carbide**, $(Cr,Fe,W)_3C_2$, crystal structure of, 2914*b*, 6958*b*
**Chromium lithium sulfate**, 4172*i*.
**Chromium magnesium sulfate**, 4172*i*
**Chromium manganese sulfate**, 4172*i*.
**Chromium nitrates**, as catalyst for condensation of 2-furaldehyde with phenol, 5226*b*.
as catalyst in nitric acid oxidation of cellulose, 1978*i*.
$Cr(NO_3)_3$, effect on catalyst in hydrogenation of CO, 2399*h*.
effect on dil. nitric acid reaction with cellulose, 1973*b*.
in polymerization of vinyl aromatic compds. in mol.-wt. control, P 8743*a*.
**Chromium nitride**. (See also "hard" under *Alloys*.)
$Cr_2N$, formation from $Cr(NH_2)_3$, 6101*f*.
**Chromium ores**. (See also *Chromite*.)
of Alaska (northwestern), 8314*i*.
concn. of, 77*h*, P 5726*h*.
ferro-Cr production from oxide ores, P 2152*c*.
flotation of chromite, P 4998*d*.
iron removal from, P 103*f*, P 6143*d*.
in stainless steel production, P 1307*e*.
of Tanganyika Terr. (Njombe district), 5347*f*.
of Turkey, 1291*g*.
of world, 5708*e*.
**Chromium oxides**. (See also *Chromium hydroxide; Pigments*.)
catalysts contg., in dehydrogenation of $C_4H_{10}$, P 1175*a*.
in manuf. from low-grade fuel, P 4836*g*.
in S removal from coal and synthesis gas, 3169*i*.
as catalysts for Cl manuf. from HCl, P 1160*f*.
catalysts of $Al_2O_3$ and, in $C_6H_6$ and toluene manuf. from petroleum and its gases, 8661*c*.
in 1,3-butadiene manuf. from EtOH, P 5410*d*.
in dehydrogenation of 1,1-diaryl paraffins, P 2235*f*.
catalysts of $Al_2O_3$ or $SiO_2$, Ti or Zr and, in oxidation of high-mol. paraffins, P 1433*b*.
catalysts of Al and Mo oxides and, P 1930*f*.
catalysts of Ca Ni phosphate and, P 2382*i*.
catalysts of Cu and, 6062*i*.
catalysts of Cu oxide or sulfide and, in S removal from fuel gas, P 380*c*.
coating with, on Cr-alloy wire, P 8918*f*.
coating with, on Mg or Mg alloy, P 8734*e*.
colloidal, catalyst from, P 8161*d*.
detn. of $CrO_3$ and $Cr_2O_3$ in paints and pigments, 1195*e*.
effect on cellulose degradation by light, 8133*i*.
formation of $CrO_3$ from $Cr_2O_3$, 8296*f*.
glass surface treatment with, P 1934*i*
as indicators in silicate melts, 5322*g*.
systems: CaO-$Cr_2O_3$ and CaO-MgO-$Cr_2O_3$, and formation of 9CaO·$Cr_2O_3$·$Cr_2O_3$, 2110*a*.
**CrO**, 5322*b*.
**$Cr_2O_3$**, abrasive from $Al_2O_3$ and, P 1936*d*
in alkali removal from glass, 5163*e*.
as catalyst in combustion of black rocket gunpowder, 9449*f*.
in dehydration and dehydrogenation of EtOH and HCOOH, 6497*i*.
in dehydrogenation of butene, 1635*c*
in dehydrogenation of cyclohexane and decahydronaphthalene, 4551*d*
in dehydrogenation of cycloparaffins, kinetics of, 1732*a*.
in dehydrogenation of hydroaromatic compds., kinetics of, 1731*f*.
in dehydrogenation of indan, 6608*h*
in steam oxidation of ethers to aldehydes, P 8398*d*.
catalysts from, for dehydrogenation, P 7610*b*.
catalysts from, specificity of, 4087*d*
catalysts of $Al_2O_3$ and, 6897*e*.
in aromatization, P 3453*i*, P 7047*c*
in dehydrogenation of $C_2$-$C_5$ hydrocarbons, P 5030*e*.
in isomerization of unsatd. hydrocarbons, 6153*h*.
catalysts of $Al_2O_3$, CuO and, in dehydrogenation of 2-o-tolyl 2-butene, 5012*d*.
catalysts of BaO, CuO and, in alkylation of *p*-phenylenediamine with ketones, P 4005*e*.
catalysts of Co and, in hydrogenation of $C_6H_6$, PhMe and xylene, 6172*d*
catalysts of $Co(OH)_2$ and, in oxidation of *p*-$EtC_6H_4OAc$, P 3461*g*.
catalysts of Co oxide or $Fe_2O_3$, an alkali compd and, for dehydrogenation, P 5410*a*.
catalysts of CuO and, in hydrogenation of 2-furaldehyde, 1719*ad*.
catalyst of Cu, ZnO and, in MeOH synthesis, 3352*a*
catalysts of $Fe_2O_3$ and, in water-gas reaction, 1945*f*.
catalysts of MgO and, in oxidation of hydrocarbons, 6566*h*.
catalysts of Ni and, in hydrogenation of seal fat, 877*g*.
catalysts of NiO and, in hydrogenation of unsatd. aldehydes, 5363*g*
catalysts of $SiO_2$ and, in aromatization of gasolines, 3997*d*.
catalysts of $ZnAl_2O_4$ and, for aromatization and reforming, P 3188*f*.
catalysts of $ZnAl_2O_4$ and, in aromatization of naphthenes or paraffins, P 3605*f*
cement contg., 1935*g*.
as coloring principle in blue halloysites, 6122*a*.
effect on $Al_2O_3$ reaction with $BaSO_4$, 6894*i*.
effect on catalyst in hydrogenation of CO, 2399*h*.
elec. cond. of, 4533*i*, 7285*e*.
formation and temp. limits for weighing of, 8953*a*.
on Hastelloy, 1299*g*.
neutron cross section of, 4558*h*
reaction with 2 - (cycloalkylalkyl) - 1,4 naphthoquinones, 1-substituted cycloalkanols and 1-substituted cycloalkenes, 3365*g*.
reduction of, 4988*f*.
removal from glass vessels, 6876*c*.
system: CaO-MgO-, 9405*a*.
**$CrO_2$**, 7363*c*.
**$CrO_3$**—see also *Chromic acid*.
as catalyst in oxidation of oleic acid and its esters, 3611*g*.
catalysts contg., in hydrogenation of coal, 5171*b*.
catalysts of CuO and, in reduction of tartaric acid esters, 8355*d*.
catalysts of Zn spinel and, in reforming of cracked gasoline, P 389*g*.
elec. resistors from, P 8920*b*
in oxidation of alkyl side-chains in 3-alkyl 2-hydroxy - 1,4 - naphthoquinones, 5773*g*.
properties of, 8785*a*.
reaction with heterocyclic N bases, 2534*c*.
soly. in anhyd. $HNO_3$, 5265*a*.

soln. in $Ac_2O$, deflagration in oxidation with, 3199*c*.
vapor pressure of satd. soln. of, 8840*a*.
**Chromium oxychloride.** See *Chromyl chloride.*
**Chromium phosphate** ($CrPO_4$), formation and temp. for weighing of, 8953*b*.
ignition temp. of analytical ppt. of, 2543*c*.
**Chromium phosphide,** $Cr_2P$, systems: $Cu_3P$–, $Fe_3P$–, $Mn_3P$–, and $Ni_3P$–, 5719*b*.
**Chromium potassium sulfate,** 4172*i*.
**Chromium rubidium sulfate,** 4172*i*.
**Chromium salts.** (See also *Tanning; Tanning materials.*)
basic, aging and constitution of, 1591*a*.
magnetic resonance in, 4568*d*.
manuf. of, P 6794*e*.
in polymerization of vinyl aromatic compds. in mol.-wt. control, P 8742*i*.
removal from leather waste, P 4506*a*.
spectra of, 8883*c*.
titration (conductometric) of, app. for, 7270*i*.
**Chromium selenide,** $CrSe_2$, compd. with $KCrSe_2$, crystal structure of, 919*c*.
**Chromium sodium sulfate,** 4172*i*.
**Chromium steel.** See *Steel.*
**Chromium sulfates,** basic, resin-exchange studies on complex, 6851*b*.
complexes from, 6102*gi*, 6103*a*.
polarograms of $Cr_2(SO_4)_3$ and $CrOHSO_4$ solns., 4037*h*.
reaction of nonbasic, with salts of α-hydroxy acids and of basic sulfate with Na salts of weak org. acids, 8184*a*.
**$CrSO_4$,** oxidation of fatty materials with, and electrolytic regeneration of, P 884*a*.
**$Cr_2(SO_4)_3$,** aging, constitution and turbidity fate on rendering basic, 1591*i*.
compd. with nicotine sulfate, 8297*a*.
light transmittancy of, 5305*e*.
manuf. of, P 6794*e*.
**Chromium sulfides,** as catalyst in hydrogenation of nitro compds., P 682*a*
catalysts from copper oxide or sulfide and, in S removal from fuel gas, P 380*c*.
elec. conductivity of, 1621*c*
**Chromium sulfite,** $Cr_2(SO_3)_3$, magnetic absorption by, 4141*h*.
**Chromium telluride,** CrTe, elec. resistance in magnetic field, 7278*i*.
**Chromium vanadate (V),** $CrVO_4$, crystal structure of, 6033*b*.
**Chromizing,** of steel, 986*a*.
**Chromobacterium iodinum,** structure of pigment of, 3057*i*.
**Chromogenesis.** See *Color(s).*
**Chromogens,** with max. absorption at 545 mμ, and light-sensitive derivs., 157*i*.
**Chromone** (*1,4-benzopyrone, γ-benzopyrone*),



derivs., 9066*i*.
——, **3-acetyl-6,7-dimethoxy-,** and 2,4-dinitrophenylhydrazone, 7461*f*.
——, **3 - acetyl - 6,7 - dimethoxy - 2-methyl-,** and 2,4-dinitrophenylhydrazone, 7461*e*.
——, **2,3-dihydro-.** See *4-Chromanone.*
——, **5,7 - dihydroxy - 2,8 - dimethyl-,** and diacetate, 6622*b*.
——, **5,7-dihydroxy-2-methyl-,** and diacetate, 1775*h*.
——, **6,7-dimethoxy-,** 7461*d*.
——, **5,7 - dimethoxy - 2,6(and 2,8)-dimethyl-,** 6622*c*.
——, **6,7-dimethoxy-2-methyl-,** 7461*e*.
——, **6,7 - dimethoxy - 3 - (3,4 - methylenedioxystyryl)-,** 7461*e*.
——, **3 - hydroxy - 6,7 - dimethoxy - 2-methyl-,** and acetate, 7461*g*.
——, **5 - hydroxy - 7 - methoxy - 2,6-dimethyl-,** eugenitin and, and derivs., 6621*i*, 6622*c*.
——, **5 - hydroxy - 7 - methoxy - 2,8-dimethyl-,** isoeugenitin and, 6622*bc*.
——, **7-hydroxy-2-methyl-,** nitration of, 9067*a*.
——, **7 - hydroxy - 2 - methyl - 6,8 - dinitro-,** 9067*a*.
——, **7 - hydroxy - 2 - methyl - 8 - nitro-,** and acetate, 9067*a*.
——, **7-methoxy-2-methyl-,** nitration of, 9067*a*.
——, **7 - methoxy - 2 - methyl - 6,8-dinitro-,** 9067*a*.
——, **7 - methoxy - 2 - methyl - 8 - nitro-,** 9067*a*.
——, **6-methoxy-2-styryl-,** 2621*e*.
——, **2-(*m*-nitrostyryl)-,** 2621*e*.
——, **2-phenyl-.** See *Flavone.*
**Chromono(7',8',6,5) - α - pyrone.** See "lactone" under *1,4-Benzopyran-8-acrylic acid, 7-hydroxy-4-oxo-.*
**Chromophores** or **Chromophoric systems,** 1-alkenyl thiolacetates, 7418*b*.
of azines and dianils, 5756*a*.
direction in oriented silk fibroin and, 6422*c*.
interaction of several, in same mol., 8855*h*.
**Chromophyllins,** in photosynthesis, 6517*a*.
**Chromoplastin,** from tomatoes, 2286*b*.
**Chromoplasts,** carotene bodies and, 731*d*.
**Chromosmon.** See *Methylene blue.*
**Chromosomes,** aceuaphthene effect on, 9170*e*.
acriflavine action on, 5080*i*.
amino acid constituents of *Drosophila,* 7152*a*.
components (variable and const.) of, 7522*g*.
diploid and tetraploid, of yeasts, nicotinic acid in, 1147*e*.
effect of absorbed radio P on, 4732*g*.
effect of atomic bomb radiations on, 277*e*.
effect of radiations from radioisotopes on, 4732*i*.
fixative for root-tip, HCl as, 5450*h*.
fragmentation of, from hexachlorocyclohexane, 6702*g*.
heteroploidy of drug plants, 5547*i*.
in interphase nucleus, 4715*i*.
lampbrush, morphological and biochem. study of, 7150*a*.
mustard gas effect on, 2257*g*.
nitrogen mustards and, 7523*b*.
nucleic acids in, of normal and leukemic mouse spleen, 2306*e*.
nucleic acids of salivary gland, degree of orientation of, 9092*g*.
nucleoproteins of, accumulation of trypaflavine by, 7525*d*.
nutritional requirements of yeast in relation to, 6273*d*.
polyploid, in aspens from normal and x-rayed pollen and their effect on compn., 5831*d*.
in *Crepis capillaris,* from colchicine, 3889*d*.
effect on compn. of *Sinapis* seeds, 8459*a*.
effect on soybeans, 1079*b*.
from gammexane, 9170*f*.
from hexachlorocyclohexane, 6702*g*
in *Lilium longiflorum,* from colchicine, 4350*a*.
in medicinal plants, 4347*c*.
osmotic pressure of, 1834*d*.
in sugar beets, 3069*g*.
ribonucleoproteins of, enzymic degradation of, 4717*a*.
sensitivity to irradiation at different miotic stages in oöcytes of *Sciara,* 6325*b*.
sodium ribonucleate action on, 1841*c*.
structure of, 3050*e*.
tetraploid, of *Taraxacum kok-saghyz,* 1086*f*.
ultrasonic-wave effect on, 5094*h*.
Y-, nucleic acids in *Drosophila* eggs in relation to, 4387*g*.
**Chromosphere.** See *Sun.*
**Chromotropic acid.** See *2,7-Naphthalenedisulfonic acid, 4,5-dihydroxy-.*
**Chromyl chloride,** reaction with glycols, 7418*h*.
**Chronaxia,** in acid-base imbalance, antagonistic or synergistic effects of vitamins on, 288*c*.
alc. action and, 5499*i*.
in anaphylactic shock, 2696*g*.
effect of acids, vitamins and other substances on, 1092*g*.
effect of anaphylactic shock and histamine on, vitamins antagonizing, 3901*h*.
effect of $CaCO_3$ and NaCl on, 777*g*.
effect of cholesterol and Na oleate on, and effect of nicotinamide, pantothenic acid, methionine, etc., on, 1092*e*.
effect of histamine and its antagonists on, 7130*a*.
effect of nicotinic acid and nicotinamide on vestibular, 4351*i*.
muscle, effect of iboga and ibogaine on, 4772*e*.
in rachitic and scorbutic pigeon, 2290*h*.
vitamin B effect on vestibular, 4740*g*.
vitamin E effect on muscular, 1842*g*.
vitamin effect on, antagonism of, 284*b*.
in vitamin studies, 3496*d*.
**Chronometers,** registering electro-, for detection and detn. of ions, 959*i*.
**Chronometry.** See *Time.*
**Chrozophora,** oils of—see *Oils.*
**Chrysalis oil.** See *Oils.*
**Chrysanthemum.** (See also *Pyrethrum.*)
*cinerariaefolium,* pyrethrins in flowers of, 3148*f*.
*frutescens,* effect of C compds. on growth of crown gall tissue from, 4348*h*.
fungus control on, 7178*e*.
insecticidal-aerosol effect on, 1523*f*.
insecticides for, Se as, 2357*f*.
pest control on, with Se, 1141*f*.
pest control on, with $Na_2SeO_4$, 1142*a*.
**Chrysanthemum aphid.** See *Macrosiphoniella sanborni.*
**Chrysanthemumic acid.** See *Chrysanthemummonocarboxylic acid.*
**Chrysanthemum lace bug.** See *Corythucha marmorata.*
**Chrysanthemum midge,** control with $Na_2SeO_4$, 1142*a*.
**Chrysanthemummonocarboxylic acid** (*chrysanthemumic acid, 2,2-dimethyl-3-(2 - methylpropenyl)cyclopropanecarboxylic acid*), 3-(butenyl)-4-methyl-2-oxo-3-cyclopenten-1-yl esters, 1335*a*.
esters with 2-alkyl-4-hydroxy-3-methyl-2-cyclopenten-1-ones, 5752*a*.
and piperonyl ester, P 2732*h*.
——, **dihydro-.** See *Cyclopropanecarboxylic acid, 3-isobutyl-2,2-dimethyl-.*
**γ - Chrysanthemummonocarboxylolactone, hydro-δ-hydroxy-*,** 812*d*.
**Chrysanthemum thrips.** See *Thrips nigropilosus.*
**Chrysarobin,** 4814*c*.
effect on conjunctiva, 756*c*.
**Chrysazin** (*1,8 - dihydroxyanthraquinone*), 3401*b*.
glycosides of, 5019*g*.
spectrum of, 7341*h*.
in termite control, 6356*f*.
zinc lake, as termite repellent, 6856*f*.
——, **4,5-dinitro-,** reaction with amines, P 9468*c*.
——, **3 - (hydroxymethyl)-(*aloe emodin*),** incompatibilities with MgO, diuretin, etc., 817*c*.
polarography of, 2521*a*.

**6-Chrysenamine,** *N*-1-anthraquinonyl-†, dye from, P 7711*e*.
——, *N* - [4(and 5) - benzamido - 1 - anthraquinonyl] - 12 - bromo-†, dyes from, P 7711*h*, P 7712*a*.
**Chrysene,**

as cholesterol pyrolysis product, 7573*i*.
in coal tar, pitch and pitch distillates, 6809*d*.
derivs., P 5428*c*, P 7055*bcef*, 7926*e*.
from 3(β),17-dihydroxy-13-nor-D-homoandrostane, 7942*c*.
electron cloud distribution and reactivity of, 6905*i*.
metabolism of, 9207*h*.
reaction (attempted) with maleic anhydride, 2199*g*.
scintillation counting with, 4111*h*.
spectrum and structure of, 4589*g*.
spectrum of, 7818*f*.
synthesis of, and its derivs., 3402*e*.
**Chrysene, 6,12-dibromo-,** dye from, P 7711*h*.
——, **6,12-diethoxy-,** 3402*g*.
——, **11,12-dimethyl-,** reaction with $OsO_4$, 8375*a*.
——, **4b,5,6,10b,11,12-hexahydro-,** *cis-* and *trans-,* 3402*f*.
——, **4b,5,6,10b,11,12 - hexahydro-2,8-dimethoxy-,** 3402*h*.
——, **1-methoxy-,** 9207*h*.
**6,12 - Chrysenediamine,** *N* - (4 - benzamido - 1 - anthraquinonyl) - *N'*-(5 - benzamido - 1 - anthraquinonyl)-, dye from, P 7711*g*.
——, *N, N'* - bis(5 - acetamido - 1 - anthraquinonyl)-, dye from, P 7711*g*.
——, *N, N'* - bis(4 - benzamido - 1-anthraquinonyl)-, dye from, P 7711*f*.

——, *N,N'* - **bis(5 - benzamido - 8-methoxy - 1 - anthraquinonyl-)**, dye from, P 7711*f*.
——, *N,N'* - **bis(5 - cinnamoylamino-1-anthraquinonyl)-**, dye from, P 7711*h*.
——, *N,N'* - **di - 1 - anthraquinonyl-**, dye from, P 7711*d*.
**6,12-Chrysenediol**, and diacetate, 3402*f*.
——, **2,8-dimethoxy-**, diacetate, 3402*h*.
**Chrysenedione**, effect on polymerization of styrene, 8735*a*.
**6,12 - Chrysenedione,4b,5,10b,11 - tetrahydro - 2,8 - dimethoxy-**, 3402*h*.
**Chrysenequinone**. See *Chrysenedione*.
**α-Chrysenic acid**. See *Benzoic acid, o-2-naphthyl-*.
**1-Chrysenol**, in feces, 9207*i*.
**3(2 *H*) - Chrysenone, 1,11,12,12a - tetrahydro-**, and oxime, 6609*f*.
**Chrysin** (*5,7-dihydroxyflavone*), and derivs., 638*h*.
oxidation of, 636*i*.
——, **6-methoxy-**. See *Oroxylin*.
——, **3,4',8-trimethoxy-**, 227*a*.
**Chrysoberyl**. (See also *Alexandrite*.)
origin of, in quartz-sillimanite veins in Nigeria, 6117*i*.
system: corundum-, 2535*d*.
twins, geometrical and structural significance of, 8983*c*.
**Chrysocolla**, of Arizona, 2131*c*.
detection in Cu ores, 5697*g*.
**Chrysofluorene** (*1,2 - benzofluorene, 11 H-benzo[a]fluorene, α-naphthofluorene*),

**7-Chrysofluorenol**, 2059*g*.
**11 - Chrysofluorenone, 7 - methoxy-**, 2059*g*.
**Chrysoidine** (*4 - phenylazo - m - phenylenediamine*), effect on benzidine-peroxidase color, 7521*e*.
germicidal action of, effect of supersonic waves on, 1461*a*.
reaction with $NaHSO_3$, 2596*c*.
——, **4'-ethoxy-**. See *Serenium*.
——, **2'-methyl-†**, hydrochloride, P 6434*c*.
——, **4'-nitro-†**, color reaction with Mg, 597*d*.
——, **4'-sulfamyl-**. See *Prontosil*.
*allo*-**Chrysoketone**. See *7 H-Benzo[c]fluoren-7-one*.
**Chrysolite**. See *Olivine*.
**Chrysomela menthastri**, control of, 9344*f*.
**Chrysomphalus aonidum** and(or) **Florida red scale**, control of, 9349*e*.
control of, effect of DDT control of mosquitoes on, 7631*b*.
**Chrysophanic acid** (*1,8 - dihydroxy - 3-methyl anthraquinone, chrysophanol*), in rhubarb varieties, 9383*i*.
**Chrysophanol**. See *Chrysophanic acid*.
**Chrysophenine G**. See *Dyes*.
**Chrysoprase**, light transmittancy of, 5305*d*.
**Chrysotile**, of Alaska (Kobuk River deposits), 4190*d*, 8318*h*.
colloidal, electron microscopy of, 6040*g*.
decompn. by heat and compn. of, 4606*e*
of France (Upper-Maurienne) (*C. A.* has chrysolite by mistake), 8992*d*.
x-ray diffraction by, 38*c*.
**Chufa**. See *Cyperus esculentus*.
**Chyle**, lecithin in, during fat absorption, 9198*b*.
**Chyme**. See *Stomach contents*.
**Chymosin**. See *Rennin*.
**Chymotrypsin**, action on acetyl-L-tyrosinamide, effect of methanol on, 9112*i*.
action on adhesion of epithelium to stroma in cornea, 7690*b*.
on fertilization in *Pomatoceros triqueter*, 7768*h*.
on intercellular cohesion in corneal epithelium, 8514*e*.
on placental transplants, tumors and Jensen sarcoma, 7124*a*.
on sea-urchin egg, 7748*h*, 7755*e*.
α and γ-, sedimentation studies on, 7067*h*.
crystn. of, 2258*a*.
electrophoretic homogeneity and isoelec. point of, 2247*c*.
esterase and peptidase activities of, 5055*i*.
gelatin digestion by, effect of pH and buffer on vol. during, 6263*f*.
hydrolysis of tyrosylglycinamide derivs. and isomers by, 5056*g*.
inhibition by structural analogs of specific substrates, 7531*a*.
inhibitor in blood serum in health and disease, 6676*c*.
inhibitor in Lima beans, 8477*h*.
isopropyl fluorophosphate effect on, 6670*i*, 6680*a*.
in malignancy treatment, 6734*c*.
mercapto-compd. effect on, 2254*f*.
spectrum of, 5665*d*.
substrates for, structural requirements of, 7989*i*, 7990*a*.
**Chymotrypsin B**, electrophoresis and soly. of, 9118*a*.
**Chymotrypsinogen**, crystn. of, 2258*a*.
electrophoretic homogeneity and isoelec. point of, 2247*d*.
mercapto compd. effect on, 2254*f*.
sedimentation studies on, 7067*h*.
spectrum of, 5665*d*.
**Chymotrypsinogen B**, electrophoresis and soly. of, 9118*a*.

esterification of, 1319f.
and esters in *Eucalyptus citriodora*, 1155d.
propionate, phys. properties, soly. and application to flavors and perfumery, 2372g.
spectrum and structure of, 1657a.

**——, dihydro-**. See *l-Octanol, 3,7-dimethyl-*.

**Citron oil**. See *Oils*.

**Citrulline** (*δ-ureidonorvaline*), chromatography on starch columns, 5818e.
detn. in proteins, 8423g.
effect on *Treponema pallidum*, 9144h.
effect on urea formation during low-protein diet, 9209f.
formation of, glutamine and α-ureidoglutaric acid in, 7113i.
by liver homogenate, effect of glutamine and *N*-carbamylglutamic acid on, 1848h.
from ornithine, $CO_2$ fixation in, 1816c.
in metabolism by *Neurospora crassa*, 2278c.
urea formation in glutamate, aspartate and α-ketoglutarate systems with, 6250h.

**Citrullus**, *vulgaris*—see *Watermelons*.

**Citrus**. (See also *Grapefruit; Lemons; Limes; Oranges*.)
acetylesterase from, inhibition by diisopropyl fluophosphate and tetraethyl pyrophosphate, 258h.
antioxidant for animal fats from peel, pulp or albedo tissue of, P 3948e.
book: Products—Chem. Compn. and Chem. Technology, 4402b.
calcium, Mg and P in, K effect on, 8018c.
canker control on, 5143f.
canning and by-product research at Fla Expt. Sta., 1121c.
citrus-snout-beetle control on, 5149e.
control on, of aphids, mites and thrips, 1518c.
control on, of dicky-rice weevil, leafroller and mealy bug, 7185b.
DDT deposits on, prevention of decompn. of, 5148c.
DDT effect on, in mosquito control, 7631a.
decay of, control of, P 4419g.
2,4-D effect on seedlings of, 9338h.
drying app. for peel, pulp or juice of, P 9295b.
2,4-D use on, for drop control, 1518c.
fertilization of, 3131f.
fertilizer expts. with, with K, 1132c.
flavones from, 3822i.
fumigation of, nylon tents for, 1524h.
fungus control on, 7177h.
grasshopper control in groves of, 3136a.
hull, leaves or pulp, use in resinous products, P 9526i.
insect control on, parathion in, 9349e.
insect control on, with DDT, 1522c.
irrigation of, 9317e.
juices, Al and Al alloy containers for, $SO_2$ and, 1877g.
citric acid detn. in, 8977e.
feed yeast production from, 2708g.
scale in evaporators for, 9295g.
$SO_2$ in, 5129b.
long-tailed-mealy-bug control on, 4805d.
*maxima*, availability of vitamin C in, 2298c.
melanose of, control of, 3553g.
molasses from, 9504c.
molybdenum deficiency of, 7551b.
oils from—see *Oils*.
oxygen supply in nutrient soln. and, 6702b.
peel, pectin from, P 1502g.
peels, for use as supplemental therapeutic food, P 3151e.
potassium deficiency in leaves of, 1132h.
pulp, compn. of feeds from, 3538i.
quality of, production conditions and practices in relation to, 1135d.
respiration in, during development, 4731c.
respiratory gas exchange in, and its role in stability of fruit, 8453e.
root system, soil moisture and, 9317b.
salt in soil and, 4803c.
seed, maintaining viability in storage, 1515i.
snail control on, 4414e.
soils, effect of fumigation, fertilization, etc., on, 3130c.
soils in Florida, 9314e.
storage of fruit, effects of 2,4-D and 2,4,5-T on, 1517a.
sulfur burn of, 9336c.
termite control on, 5147d.
*trifoliata*, heteroside of, 4669h, 6582g.
waste from, acetylesterase from, P 2340f.
feed from, P 1503a, P 5512b, 8573c
submerged combustion in processing of, 9287f.
treatment by ion exchange, 6441g.
yeast manuf. from, 9295f.
waste waters from processing of, stream pollution control activities and, 8079i
waste waters from, treatment of, P 5881i.
weed control in, 6352g.
wrapping materials for, impregnation of paper for, 5591b.

**Citrus blackfly**. See *Aleurocanthus woglumi*.

**Citrus mealybug**. See *Pseudococcus citri*

**Citrus red mite**. See *Paratetranychus citri*.

**Citrus scales**. See *Coccus pseudomagnoliarum; Icerya purchasi; Lepidosaphes*.

**Citrus snout beetle**. See *Sciobius grandis*.

**Citrus thrips**. See *Scirtothrips citri*

**Civetol, dihydro-**. See *Cycloheptadecanol*

**Civetone**, in perfumery, 1909i.

**——, dihydro-**. See *Cycloheptadecanone*

**Cladding**, of cooking utensils, P 6561h
of iron or Fe alloys with Cu or Cu alloys, P 2154b.
powd. metal in, P 2020b.
with precious metals, P 6966b
of soft steel with hard, P 6966f
stainless steel Ni plating for, 4148i
of steel, 940d.
of steel with stainless steel, P 3770e

**Cladonia**, *alpestris*, usnic acid from, 1455i
*cristatella*, production of didymic, rhodocladonic and usnic acids by fungus component of, 9143g.

**Cladophora**, *fracta*, peroxidase in, 1837e
nucleus of, reaction with polyphenol 1837i.
*rupestris*, biochemistry of, 3495f.

**Cladosporium**, control on tomatoes, 9128
*herbarum*, action on cucumbers, 6704i
butterfat treated with, fatty acid produced by, 8560f.
catalase, invertase and protease activities of, grown in cold, 5825g
humus formation from, 7617i
toxin production by, 8002c.
in soils, 1513a

**Cladothrix**, and its relation to Fe and Mn, 7080d.

**Claisen condensation**, in acylation and carboxylation of lepidine, 2-picoline and quinoldine, 7022d.
mechanism of, 4525i.
resonance and, 6206h
so-called internal, in β-diketone prepn from esters of o-hydroxyacetophenones 2620i.

**Claisen rearrangement**. See *Rearrangements*.

**Clams**, adenosinetriphosphatase activity of myosins from *Mya arenaria*, 9123e
lipolytic and proteolytic enzymes in stomach juice of giant, 2332e
shells, increasing adhesivity of asphalt to, P 5168h.

**Clapeyron, Benoit Paul Émile**, biography, 915e.

**Clarain**. (See also *Durain; Fusain; Vitrain, Vitrinite*.)
adsorption by, color reactions in, 6035e
low-pressure carbonization of, 1948b
swelling properties of, 377f.

**Clarification**. (See also *Filtration; Sedimentation*.)
app. for—see also *Centrifuges; Filters*
app. for, P 4406h, P 6011a.
app. for, controlling removal of sludge from, P 915a.
of beer—see *Beer*.
of emulsions—see *Emulsions*.
enzymes for, 261f, 3855b.
of protein-contg. solns., by plant juices 6749a.
of sewage—see *Sewage*.
in sugar analysis—see *Sugars, analysis*.
in sugar manuf.—see *Sugar manufacture*.
of wastes—see *Wastes*
in water treatment—see *Water, purification of*.
of worts—see *Worts*.

**Clarite**. See *Clarain*.

**Clarke, Hans Thacher**, biography, 2825c.

**Clary sage**. See *"Salvia sclarea"* under *Sage*.

**Classification**, decimal system for chem. engineering, 6876b.
of inorg. compds., graphic methods in, 6996c.

of methods in quant. chem. analysis, 7762*c*.
of org. compds., 105*i*.
**Classifiers.** See *Ores, treatment of; Separators.*
**Clasterosporium carpophilum,** control of, S in, 5143*e*.
**Clastics,** the term, 5676*b*.
**Clathrate compounds.** See *Chemical compounds.*
**Clausilia.** See *Snails.*
**Clausius-Clapeyron equation,** derivation and application of, 8774*i*.
**Clavacin.** (See also *Patulin.*)
effect on heart, 7138*h*.
expansin identity with, 8003*h*.
spectrum of, 9386*g*.
toxic action on heart, 1110*d*.
**Clavatol.** See *Acetophenone, 2,4-dihydroxy-3,5-dimethyl-.*
**Claviceps.** See *Ergot.*
**Claviformin.** (See also *Clavacin; Clavatin; Patulin.*)
identity with expansin, 8003*h*.
**Clays.** (See also *Bentonite; Bleaching agents; Bricks; Ceramic industry; Ceramic materials; Ceramic ware; Fuller's earth; Gumbrin; Laterites; Montmorillonite; Refractory materials; Slips.*)
acid-treatment and drying of, P 9300*a*.
activated, detection of, 1287*i*.
activated, in bleaching of oils by adsorption, 3635*c*.
activation for cement, P 3166*g*.
adsorbent, 977*c*.
adsorbent, drying of, P 6476*h*.
adsorption (interlamellar) by, 5254*i*.
adsorption of Ra and Th isotopes by red, of deep ocean, 7386*h*.
in alkali removal from glass, 5163*e*.
alumina extn. from—see *Alumina.*
alumina-high, of Irwinton dist., Ga., 6952*g*.
alunite, heat effect on, 9404*c*.
analysis of, 8628*d*.
in asphaltic bitumens, 5178*f*.
backlash in plastic, 2389*f*.
base-exchange capacity of, 9316*a*.
bentonite, in porcelain manuf., 3581*b*.
beryllium detn. in, 61*i*.
in bleaching and refining of mustard- and rape seed oils, 2000*g*.
bleaching, as catalyst in terpene conversion to aromatic and cycloparaffinic hydrocarbons, 6185*b*.
bleaching, glass-contg., in upper Bavarian Molasse formation, 4985*g*.
blue Cambrian, 8111*i*.
books—The Clayworker's Handbook, 8632*k*, Kaolin, and Their Industrial Uses, 9407*c*.
of Brazil (Amapá State), 4609*c*.
of Brazil (Paraná), 2136*d*.
for bricks, testing of, 9404*f*.
of California (Kern Co.), 4607*c*.
of California (Napa Co.), 2901*f*.
casting properties of, 4437*a*.
as catalyst carrier in hydrogenation of CO, 2398*i*, 2399*c*.
as catalysts, 6035*g*, 6799*a*, 8251*e*.
in alkylation of thiophene with olefins, P 691*d*.
in dehydration of α-methylbenzyl alc., 502*a*.
in depolymerization of butene polymers, 1311*a*.

in 2-methylpropene reaction with nitrosyl halides, P 7950*g*.
in petroleum formation, 5929*g*.
in pyrolysis of rubber and in cracking of distd. oil, 5619*i*.
in styrene polymerization, P 1605*f*.
in synthesis gas manuf. from hydrocarbons, P 7213*b*.
catalysts from, P 7162*a*.
by activation with mineral acids, P 4004*d*.
for cracking of hydrocarbon oils, activation by two $H_2SO_4$ treatments, P 8602*i*.
for hydrocarbon conversion, descent of, through gaseous reactants, P 843*h*.
regeneration of, after use in cracking of petroleum, 3181*d*.
catalysts from activated, for cracking petroleum hydrocarbons in vapor phase, P 6403*g*.
catalysts from activated, for cracking, pore-size distribution of, 5575*c*.
catalysts from $AlCl_3$ and, P 3162*c*.
catalysts from $AlCl_3$ and, in condensation of chlorinated paraffin wax with $C_6H_6$, 2416*h*.
catalysts from org. acids and, polymerization of resin oils with, P 5641*g*.
cement contg., P 6388*h*.
as cementing substances for sands, 6550*d*.
cement manuf. from chalk and, 2749*c*.
ceramic-body drying and, 1163*a*.
ceramic railroad ballast and constructional aggregates from, 2391*d*.
chem. and mineral compn. and geology of, of the Margreteberg, Sweden, 7382*c*.
chem. constitution, dehydration rates, thermal analyses and x-ray diffraction patterns of Egyptian, 6121*b*.
china—see *Kaolin.*
clinker from lime and, for refining sugar, P 890*a*.
coatings on paper, $TiO_2$, $TiO_2$-$CaSO_4$ and $CaSO_4$ pigments in, 8696*i*.
colloidal properties of western, 2070*a*.
complexes with org. compds., 463*c*.
of Condroz Basin, 3163*b*.
consolidation of, 1163*a*.
copper content and absorption capacity of, effect on Cu in sedimentary rocks, 978*h*.
copper in, in coal deposits of Ural-Volga petroleum region, 2138*h*.
in cracking and refining of coal tar, 7667*h*.
crystal forms of, 1129*c*.
crystal structure of, error from neglecting refraction in detn. of, 2863*f*.
dehydration of, kinetics of, 6799*c*.
demand and supply of, for pulp and paper manuf., 5948*h*.
deposition of, in deep-sea deposits, Ra content in detg. rate of, 5298*i*.
detn. in molding sands, app. for, 4613*f*.
detn. in soils in Palestine, 8590*b*.
diatomaceous, of S. Africa, 1692*g*.
drilling fluids contg.—see *Drilling fluids.*
drying and firing at mine, 5559*g*.
drying and grinding of bentonite-type, effect on drilling muds, 2409*f*.
drying of, 7204*i*.
drying of, vapor pressure-capillarity relations in, 2748*c*.
effect on elastic behavior of Buna S, 4045*d*.
of Efreminsk, 1163*d*.
elec. conductivity of, and ion diffusion in, 1542*c*.
electrophoresis of, 6091*f*.
exchange capacity of, effect on Ca and Na uptake by barley and pea roots, 8010*a*.
fire or refractory, anatase in, 4605*d*.
cordierite-type mineral from casting-pit refractories from, 5705*f*.
effect of C and graphite on, 8112*a*.
impregnation by fused FeS, 3257*d*.
mullite from, 3580*a*.
in Paris Basin, 8902*a*.
in Raniganj and Jharia coalfields of India, 8091*i*.
from Shis Mt. in Caucasus, 977*d*.
standards for, 4397*i*.
from Uchkeken, U.S.S.R., halloysite character of, 4187*d*.
firing of, heat for, 2391*i*.
of Florida, 6126*e*.
of Florida for ceramic ware, 9295*g*.
formation of, soil type and, 6770*h*.
fractionation and properties of, from soils of Pearman and Maury series, 795*c*.
of France (eastern), 3162*i*.
for Fuller's earth, 7651*d*.
gases in black, of Asov Sea region, 5711*c*.
glass-surface treatment with, P 1934*f*.
grog of—see *Grog.*
gypsum, waterproofing materials from, 7205*h*.
of Hawaii (Oahu), compn. and lithification of, 2136*i*.
hydration of exchangeable cations of, 921*h*.
of Illinois (southern), 2902*a*.
of India, 6798*i*.
of India (Jodhpur State), 6547*e*.
industry in 1946, 2127*a*.
ion absorption by, 7618*b*.
iron and P in pyrite-contg., in genesis of delvauxite-like mineral, 2898*h*.
iron oxide-contg., hydraulic classification of, and refined brown pigments from, 7716*i*.
iron removal from, for catalysts, P 4843*a*.
iron removal from Maine, 8318*i*.

weathering of, 3127*c*, 3957*g*.
x-ray powder photographs of, 6544*g*.
mixts. with $SiO_2$, reheat shrinkage of, 828*i*.
mixt. with $CaSO_4$ and $H_2SO_4$ as electrolyte for Pb battery, P 4590*e*.
montmorillonitic, as catalyst in acylation of thiophene, P 2643*h*, P 2644*e*.
of multicolored sediment beds of Don Basin, 6130*fg*.
nodules in oil-bearing layers of Apsheron peninsula, U.S.S.R., 978*e*.
of Pacific Northwest, ceramic tests on, 5559*a*.
for paper fillers, 4011*a*.
particle size of, measurement of, 4923*i*.
of Pennsylvania, 4434*i*.
in petroleum hot-water sepn. from bituminous sand, 9421*f*.
plasticity and thixotropy of, adhesion of inorg. binders and, 828*h*.
polyhalite secondary formation in salt, 8995*d*.
purification with HCl, P 1166*b*.
radioactivity of, 7331*h*.
radioactivity of, in sedimentary sands, 1261*f*.
radium and U contents, seasonal deposition and geol. age of varved, of Hartford, Conn., 2552*i*.
relaxation time in, 7590*a*.
review on, 5559*g*.
as rubber filler, measurement of activity and electronmicrography of, 6454*d*.
rubber pigmentation and reinforcement by, 1593*d*.
rubber viscosity and, 7251*c*.
salt detn. in ceramic, 9404*a*.
in salt rocks, quartz crystn. in formation of, and reactions of salts with clay minerals, 8904*i*.
sedimentation of absorbent, in lubricating oils, effect of surface-active constituents on, 3183*a*.
shrinkage of, 8630*c*.
silicon manuf. from, P 5358*g*.
soils—see *Soils.*
in soils, phosphate adsorption by, 9315*c*.
Spanish, 8590*c*.
stokers in industry of, 2392*a*.
stress-strain hysteresis loops of bars of, 2389*e*.
structure of, 4072*g*.
surface area of, measurement by neg. adsorption, 6799*b*.
suspensions of, calcium and potassium ions in, activities of, 1133*a*.
effect of pH on properties of, 4538*i*.
effect of particle shape on properties of, 4436*g*.
gas sampling from, app. for, P 5179*g*.
filtration of, app. for detn. of rate of, 3665*d*.
fire-fighting value of, 1570*a*.
flow of, 5259*e*.
structure formation in, and thixotropy of, 5257*i*.
ultrasonic dispersion in, 4538*b*.
swelling of, NaOH solns. for prevention of, P 6817*i*.
system: quartz–, 3582*dh*.

tech. properties of, colloid chemistry and, 5915*h*.
thermal analysis curves for, 8987*h*.
thixotropy of, measurement of, 794*h*.
titanium detn. in, and clay products, 1285*a*, 5699*bc*.
uses of, 2380*a*.
Utah ancient, 5708*f*.
Washington pottery and refractory, 6547*d*.
of West Virginia, 74*h*.
white, of India, 5559*e*.
whiteware, deposit in Fergus County, Mont., 4436*i*.
of Wilcox formation of Eocene series in southern U.S., 977*h*.

**Clay ware.** See *Ceramic ware*.

**Cleaning.** (See also *Detergency; Laundering; Washing;* and specific things cleaned.)
app. for—see also "app. for" under *Precipitation, electric*.
app. for, P 4525*c*.
book, 1585*g*.
of kettles, pipeline, warm-$H_2O$ installations, etc., 7399*g*.
marine electro-, app. for, P 7839*h*.
of textiles—see *Textiles*.

on sewage purification, 5140*e*.
on shrinkage rate of wool shirting, 6423*f*.
efficiency of surface-active, concn., time of scouring and force in relation to, 2002*h*.
elec cond., foaming, pH, opacity and surface tension of solns. of, effects of concn. on, 6435*d*.
in emulsion breaking, 3178*g*.
from esters of hydroxycarboxylic acids and cycloaliphatic alcs. and anion active wetting agents, P 8714*b*.
from esters of unsatd. dicarboxylic acids with *N*-hydroxyalkyl amides of fatty acids, Na salt, P 4500*e*.
from ethylene oxide reaction with fatty acids from oxidation of paraffin wax, nonionic, 5213*f*.
ethylene (poly-) glycol, detn. of, 8710*e*.
evaluation of alkali, 2451*g*.
fatty acid chloride condensation products with peptides, analysis and prepn. of, 3217*f*.
fatty acid sulfoaryl hydrazides, P 251*i*.
films of, on salt solns., 7776*h*.
foam formation on solns. of, 8795*g*.
foam-fractionated, surface tensions of solns. of, 3087*e*.
foaming and wetting agent-contg., from borax, $Na_2CO_3$, etc., P 4877*f*.
for food-plant cleaning, 4497*d*.
free flowing granular mixts. with alkali metal polyphosphates, P 9495*c*.
in fur industry, 5213*e*.
for furs and textiles, montmorillonite clays as, 977*c*.
for glass, 8180*d*.
glycerol monococonut oil monosulfuric acid ester Na salt, P 9495*d*.
from grapevine exts. and $Na_2CO_3$.2Na-$HCO_3$, P 6844*i*.
for heat exchangers in petroleum refining, 3179*h*.
hemolysis and increase in capillary permeability by, in comparison with sperm lysin and leucotaxine, 3112*g*.
from 2-heptadecylbenzimidazole Na sulfonate reaction with chloroacetic acid, P 886*d*.
history of, 4875*i*.
hydrazine monocarboxyacylated deriv. reaction products with saccharides, P 9497*g*.
from hydrocarbon-oil emulsification with peat ext., P 3220*h*.
from hydrochloric acid and org. N bases, noncorrosive, P 6439*a*.
*N*-(hydroxymethyl)stearamide-Na sulfamate reaction product, P 7726*e*.
influenza-virus complexes with cationic, 3051*b*.
insecticidal, P 7634*h*.
for laundering in sea water, evaluation of, 2003*b*.
laundering with—see *Laundering*.
lubricant detergents—see *Lubricants*.
manganese dioxide suspension in solns. of, 3688*h*.
manuf. in western U.S., 8577*c*.
manuf. of "Dreft" from dodecanol, lab expt. on, 2477*h*.
Mersolat-contg., prepn. for spray drying 5211*e*.
for metals, 1705*a*, P 3772*f*, P 6147*g*, 6439*b*, P 7163*e*.
health hazards of, 787*e*.
Na silicates as, 3766*e*.
of metals—see *Metals*.
for milk-fat detn., 8067*i*.
mixts. with imidazole compds., fluorescence-generating optical bleach, 6429*h*.
2-naphthalenesulfonic acid derivs. for textile, P 7969*cd*.
org. synthesis in industry of, 3636*b*.
palmitolyl-*o*-tolylhydrazide Na sulfonate P 4498*e*.
in parasitology, 6699*g*.
for pectin removal from textile plants, P 4022*e*.
petroleum products in making, 839*g*.
pharmacology of, 4774*d*.
polyhydroxynaphthalene sulfonate-contg., P 2795*h*.
from polyoxyethylene esters of tall oil or rosin and sulfonates, P 6438*f*.
protein complexes with, in solubilization, 9492*b*.
quaternary ammonium compds., P 7729.
quaternary ammonium compds., effect on milk quality, 8575*h*.
quaternary ammonium nitrates for, P 667*c*.
for radiators of automobiles, 5214*a*.
rancidity prevention in, P 886*g*.
removal from sewage, 7168*g*.
Renex nonionic, effect on detergency of sulfonates and soap in hard water, 5976*a*.
reviews on, 882*i*, 2793*c*, 4788*f*, 4789, 5612*d*, 6843*c*.
scouring, of U.S. and United Kingdom, 8180*d*.
for silicone lubricants on glass app., 1226*d*.
silicosis and tuberculosis from dust of, 4497*b*.
for skin for mineral-oil removal, 3543.
for skin, from paraffin wax mixts., sulfonates, etc., P 2452*i*.
from soap grinding with fuller's earth or kaolin, P 4877*hi*.
soap *vs.* synthetic, 2451*f*.
for soda saving, 6435*g*.
from sodium or K hexametaphosphate of pH 9.2-10 for household use, P 6438*e*.
from sodium polyphosphates and Na metasilicates, water-softening non-caking, P 6438*g*.
from sodium silicates, 6335*c*, 6435.
from sodium silicate, $Na_2CO_3$ and NaOH, P 8712*b*.
solubilization by, 3688*c*.
solubilization by, concn. and, 7780*d*.
solubilization of *trans*-azobenzene, dimethylaminoazobenzene and Orange OT in, and crit. concn. of, effect of electrolytes on, 4876*c*.
solns. of disks of, app. for, P 7242.
sponge (synthetic rubber) exuding, P 4890*e*.
for stain removal—see *Stains*.
from stearamide reaction product with crotonaldehyde and $NaHSO_3$, P 5078*f*.
from stearic acid hydrazide-acetonesulfonic acid condensate reduction product, P 7729*d*.
from stearic acid hydrazide-Na benzaldehydedisulfonate condensate reduction products, P 7730*a*.
for steel (pickled), 1304*d*.
sulfated and(or) sulfonated, P 886*c*, P 4877*e*, P 6844*h*, P 9496*i*.
ethanolamides, P 2004*d*.
fatty acid-alkanolamine condensation products, analysis of, 8705*g*.
for impregnating metal-wool pads, P 9497*b*.
improvement by fatty acids or their esters, P 4034*a*.
increasing apparent d. with moistening agents, P 9495*h*.
manuf. of aryl-, from olefins, P 2469*c*.
noncaking and nondusting, P 4034*c*.
protein dispersion in aq., P 2785*b*.
rancid odor inhibition in mixed stored alkylaryl, P 6845*ac*, P 6846*a*.
stearoyldimethylphenylbiguanide, 4879*c*.
Tipral, 4861*i*.

*sulfated and(or) sulfonated*, from whale-brain oil, P 6844*g*.
from sulfite (alkyl) alkali salts, P 7037*b*.
sulfites or sulfonates on carrier having abrasive, adsorbent, detergent or solvent properties, P 4877*e*.
sulfonated alkyl benzenes, P 9495*i*.
sulfonated alkyl-substituted aromatic hydrocarbons as, P 6232*ei*, P 6657*i*.
sulfonated amides and Na salts, P 2004*a*.
sulfonated anisole reaction product with $(ClCH_2)_2O$-stearamide reaction products, Na salt, P 1588*f*.
sulfonated castor oil $Na_2CO_3$-aromatic solvent paste, P 8712*c*.
sulfonated 3-heptadecyl-5-methyl-1-phenyl-1,2,4,1 *H*-triazole, P 7730*c*.
sulfonated hydroaromatic-substituted aromatic hydrocarbons as, P 1562*i*.
from sulfonated hydrocarbon, hydrocarbons and oxalic acid, for painted surfaces, etc., P 3640*b*.
sulfonated phenol condensation product with $(ClCH_2)_2O$-stearamide reaction product, Na salt, for textiles, P 1588*d*.
from sulfonates and $Na_2SO_4$, evaluation of ternary mixts. with soaps and electrolyte builders, 3635*i*
sulfonation products, P 9408*f*.
from sulfuric acid esters, sulfonic acids or their salts, P 7242*b*.
sulfuric acid esters with guanidine derivs., P 4499*b*.
surface-active-material detn. in, 8791*g*.
surface tension and wetting powers of, 8711*b*.
synthetic resin fillers in, skin compatibility with, 7197*b*.
tasteless, for dentifrices, mouthwashes, etc., P 3151*d*.
from tetrahydronaphthalenesulfonamide-Na formaldehyde-bisulfite reaction product with 6 (chloromethyl-1,2,3,4-tetrahydronaphthalene, for textiles, P 7726*d*.
tetrahydrothiophene-3-ol 1,1 - dioxide esters, P 1441*e*.
in textile industry, 5976*e*.
for textiles, 8710*b*.
unsatd. acids for, P 7502*g*.
and their use, 5976*a*.
for wooden floors, P 3640*c*.
for wool, affinity and antibacterial activity of, 4017*f*.
in wool scouring, evaluating effectiveness of, 5976*h*.
nonionic, 7690*a*.
petroleum derivs. as, 2151*g*.
from stearic acid-*N*-methylolamide reaction with Na $\beta$-hydroxyethanesulfonate, P 5218*a*.
zein in aq., 3090*e*.
**Cleavage** See *Decomposition; Degradation, Hydrolysis; Saponification;* etc.
**Clematis**, *flammula*, aphrogenic principle of, 6306*d*.
*recta* and *vitalba*, pharmacology of, 9380*d*
*virginiana*, antibacterial and antifungal substances from, 3885*c*.

fire hazards and prevention in plants applying flammable, 870*b*.
fire-protection system for plants making, 875*i*.
fire-retardant, P 1126*g*, P 6763*g*, P 6764*a*, 8177*b*.
for fish nets treated with bactericides, 8688*l*.
flatting agents in, 5202*b*.
flatting agents in clear, transparent extender pigments as, 5606*a*.
for flocking of fibers, 1199*e*.
of flowers, foliage and biol. specimens to preserve color and form, P 3950*i*.
of fluorescent lamps with silicones, P 7840*f*.
for fluorescent object of same color in visible and ultraviolet light, P 2517*c*.
for foods and food packages, gelatin-base fat-resistant, P 8576*c*.
for foods, lecithin-gum, P 5881*a*.
for fruit, antisticking, P 7605*e*.
for fruits and vegetables, fungicidal wax, P 5900*e*.
fungicidal, Cu 8-quinolinolate-contg., 1993*d*.
from furfuryl acrylate polymer with Me acrylate, P 2035*b*.
of galvanized Fe with org. finishes, 873*g*.
on galvanized sheets, detn. of wt. of Zn, 2893*h*.
from gasoline (cracked) polymer and mercaptide, P 8349*d*.
on gas pipes for natural gas, 99*a*.
on gas-turbine brass separator, Ag as, 6559*d*.
with germanium, P 3340*b*.
of glass—see also *Mirrors*.
for glass-cloth food-container seals, P 1935*b*.
in glass-fiber dyeing, 2775*i*.
on glass-fiber making equipment, reducing contamination by Pt, P 4440*g*.
for glass fibers, P 3987*b*.
for glass, from allyl halosilanes, P 5999*g*
from hydroxyethylcellulose, HCHO and urea, P 5640*c*.
of miner's lamps, 5914*i*.
to prevent mirror formation, P 3120*e*.
from $Cl_3SiH$ and rubber, P 8194*d*.
on glass, increasing mech. strength of Al, P 7657*ef*.
of glass substitutes, P 5952*a*.
of glass thread with Al, P 3988*b*.
of glass with powders, P 7657*b*.
of glass with quartz, P 1935*e*.
from glycerol α-allyl ether polyesters with phthalic and succinic acids, 9480*g*.
glycerol and alkyd resins in, 2446*f*.
from glycerol mixed esters of monocarboxylic acids, P 877*a*.
from glycidol ether autocondensation polymers, P 904*d*.
of grain products, for mineral and vitamin enrichment, P 8071*f*.
from grapeseed oil-linseed oil mixts., elasticity of, 7241*b*.
from guanamine-aldehyde condensation products, P 3662*f*.
of gypsum (molded) with water-impermeable layers, P 6389*d*.
hammer-finish synthetic-resin, 876*b*.
hardness of org., measurement of, 3632*b*, 7239*c*.
on heat-resistant alloys, high-temp attack of ceramic, 541*d*.
from hydrocarbon resins, P 903*ac*, P 5630*h*.
hydroxy compd. waxy ether esters for, P 886*g*.
inorg. particles with C black, for filling rubber, etc., P 7745*c*.
on insulator caps of temper coatings, 6139*b*.
of ion chambers with B, 4560*g*.
on iron and steel, corrosion protection by metallic, 3766*f*.
on iron and steel, corrosion protection by plastic, 6962*h*.
of iron anodes with Pb for hard Cr baths, P 3734*b*.
for iron, Fe alloys and(or) steel, scuff-resistant, 7392*b*.
of iron, Fe alloys and(or) steel with V, P 6564*f*.
with Cr, P 7404*i*, P 7405*b*.
with Cu, P 6564*g*.
with metals, P 555*g*.
with metals from solns. of salts, P 7895*e*.
with soln. contg. Zn salt and/or $Cr_2(SeO_4)_3$, P 6967*e*
with Zn or Zn alloys, P 3342*d*
on iron, rust films as paint-holding, 5202*h*
of iron, with Al, P 2154*e*.
with Cu, P 9022*d*.
with Pb, P 2155*b*
by "thermoxyd" method, 956
from isocyanate polymers, 1601*i*
journal Revêtement et protection 5886*b*.
from ketenes, P 1494*e*.
from lactic acid lactate condensation products with drying oils, P 1996*a*
lapping bronze, Fe and steel with SiC contg. metals, 3766*h*.
with lead or Pb alloys, precleaning castings for hot-dip, P 2154*h*.
of lead photoconductive electrodes with PbSe, 4962*c*.
for leather, 1204*g*, 8198*h*.
for leather, casein and nitrocellulose pigmented, 9510*g*.
for leather, paper and textiles, emulsions of alkyd and melamine-HCHO resin mixts. for use as, P 6434*e*.
for leather, paper, textile and wood from complex acetates, P 7606*f*.
of leather (suede) with thermoplastics to prevent dye cracking, P 9512*c*
of litharge particles with red Pb, P 826*e*
on magnesium, 3334*e*.
of magnesium alloys, 7399*gh*.
from dichromate solns., P 8348*e*.
with $MgF_2$, 2148*d*.
with $H_2SeO_3$-dichromate soln., 4206*f*
of magnesium $NH_4$ phosphate with ceresin to prevent decompn., 7796*g*.
of magnesium and Mg alloys, P 2567*g*, P 4211*d*.
with chromate, P 992*a*.
with oxides of Cr or Mn, P 3734*e*.
in powder form, P 2152*i*.
on magnesium, effect on ignition of pyrotechnic compns., 2108*h*.
from magnesium oxychloride, P 3948*i*.
for magnesium, types and application of org., 876*b*.
on magnetic sheets, P 4402*d*.
for masonry and like surfaces, from aq K silicate, etc., P 3214*e*.
for meats (fresh frozen), P 3540*f*.
from melamine-HCHO resins, plasticized with polyesters, P 9527*d*.
from melamine or urea resin mixts. with alkyd resins, 2446*i*.
melamine or urea resin use in, 3632*g*.
from melamine-urea-alc.-HCHO resin, P 5999*c*.
from mercapto dicarboxylic acid polyesters with dihydric alcs., P 3633*b*
metallic, corrosion of, 7399*h*.
sprayed, 985*i*, 7888*e*.
structure of sprayed, 7888*e*.
with metal-powder dispersions, P 8346*d*.
from glycidol ether autocondensation polymers, P 904*d*.
of grain products, for mineral and vitamin enrichment, P 8071*f*.
from grapeseed oil-linseed oil mixts., elasticity of, 7241*b*.
from guanamine-aldehyde condensation products, P 3662*f*.
of gypsum (molded) with water-impermeable layers, P 6389*d*.
hammer-finish synthetic-resin, 876*b*.
hardness of org., measurement of, 3632*b*, 7239*c*.
on heat-resistant alloys, high-temp attack of ceramic, 541*d*.
from hydrocarbon resins, P 903*ac*, P 5630*h*.
hydroxy compd. waxy ether esters for, P 886*g*.

from silicones, Al powder-pigmented heat-resisting, 875*b*.
silicon org. compds. for, P 3657*d*, P 8211*f*.
from siloxane polymers, P 440*f*, P 3237*d*, P 5635*a*, P 7262*f*.
from siloxanes, P 442*e*, P 3237*g*.
with siloxanes, P 7610*i*.
with silver, by spraying, 545*i*.
from soap gels in paraffin wax, stabilization against sepn. on heating, P 5643*e*.
of soap particles to reduce dusting, P 1587*a*, P 6438*a*.
soaps (Al) for, P 2452*f*.
of sodium chloride tablets with cellulose derivs., P 8619*h*.
of sodium polyphosphate with $Na_2CO_3$ or Na polyphosphate, P 6438*g*.
from sodium silicates and sea water, fire- and water-resistant, P 6764*c*.
solvents for org., 4028*c*.
solvent-vapor control in, 2342*e*.
soybean oil in, 1577*i*.
special-effect, 420*b*.
for special requirements, formulation of org., 5202*f*.
on spinnerets for collagen solns., basic N compds. as, P 7248*e*.
of spinnerets for rayon with polyorganosiloxane, P 5188*c*.
of spinneret with condensation product of ethylene oxide and sorbitan monolaurate, P 5593*c*.
from S-polymers, 5988*f*.
spray booth, 5970*i*.
stearates in, 4492*f*.
of steel bearings with In, P 4211*e*.
on steel, blister failure in water-immersion tests, 4872*e*.
impact tester for alkyd-resin and baked-phenolic, 3653*f*.
$Mg(OH)_2$ as corrosion-preventive, 6141*g*.
$HNO_3$ resistance of ferrosilicon, 545*h*.
in prevention of corrosion-fatigue failures, 6560*e*.
Sn under-, for anti-corrosive and -fouling paints, 4492*e*.
for steel, contg. half-ester of styrene-maleic anhydride copolymer, P 1711*b*.
steel exhaust stacks with high-temp. ceramic, in bombers, 6559*e*.
of steel panels with asphaltum-impregnated felt and weatherproofing resins, P 6148*b*.
for steel, petroleum-base, 4996*g*.
of steel pipes with blown asphalt, 5720*h*.
of steel pipes with Cr and Cr-Al alloys, 2916*e*.
of steel with Al, 7888*d*, 8335*a*.
with Al, effect on catalytic oxidation of $SO_2$, 5910*h*.
with Al phosphates, P 6565*a*.
with Cu, 3337*i*.
with Cu-Ti alloy, 8331*c*.
with Pb, etc., P 9022*g*.
with metals, 550*i*.
with polythene by flame-spraying, 6962*a*.
with Sn, oils for, 2762*e*.
with Sn, selective process for, P 2568*b*
with Zincilate, 4207*b*
steel with Al, corrosion resistance of, 2151*d*.
steel with metal, brazing, soldering and welding of, 6561*d*.
for stencils—see *Stencils*.
of stringed instruments with gelatin soln., P 4494*f*.
from styrenated drying oils, 1577*i*, 3212*g*, 4871*f*, 8701*b*.
from styrene polymers, oilproof, P 1605*f*
plasticized with $p,\alpha$ dimethylstyrene polymers, P 5642*g*.
with polyhydric alc. mixed esters, P 4051*f*
stripping, 875*a*.
stripping brass, bronze, Cu and Ni, from scrap, 3297*b*.
from sulfide (poly-) polymer, P 6001*f*.
for suppositories, P 8621*d*.
from synthetic drying oils, P 876*gh*.
from synthetic resin compns. contg. citrus and pineapple products, P 9527*a*.
from synthetic resins, 875*e*.
emulsified, P 1611*c*.
emulsified nonskinning water-insol., P 1995*a*.
from fuel oil or gas oil, P 4008*h*.
from synthetic resins (fatty acid-modified alkyd), wrinkle-finish, P 5206*a*.
synthetic resins for—see *Phenol condensation products; Resinous products; Vinyl compounds;* and "condensation products" under *Urea* and *Urea, thio-*.
from synthetic resins (oil-modified chlorinated alkyd), P 2031*b*.
from synthetic resins, slip-proof, solvent-resistant, P 4050*i*.
from synthetic resins (styrenated alkyd), 4492*h*.
on terne plate, A.S.T.M. standards for, 4202*g*.
from terpene polymers, P 3236*a*.
testing, 418*i*.
testing of, at low temps., app. for, 1578*d*.
from tetraallylsilane polymers, P 5637*f*.
1,1,2,2-tetrafluorocyclobutane unsatd. deriv. polymers for, P 4295*f*.
with tetrafluoroethylene polymers, P 2037*d*.
from tetramethylethylene oxide polymers, P 2038*f*.
for textile-covered aircraft, fire-retardant, 8074*g*.
for textiles, amide polymer fraction for, P 7266*g*.
from amide polymers, P 2034*b*.
from 1,3-butadiene polymers with diallyl chloromaleate, P 6866*c*.
from castor oils, flexible wrinkle-finish, P 2447*h*.
from cellulose esters or ethers, alkyd resins and melamine or urea resins, P 6834*b*.
cellulose solns., P 2786*d*.
cellulosic derivs., P 9446*g*.
$C_2H_4$-polymer emulsion, P 4869*f*.
from halogenated polyethylene and polyhaloprenes, P 4508*e*.
Hycar-terpene resin base and Neoprene-Hycar-chlorinated polyethylene finish, P 2786*d*.
from plastic materials, 8687*a*.
from polymeric acids, water-resistant, P 3240*b*.
from urea-HCHO resin, P 2466*a*.
of textiles—see also *Leather substitutes*.
of textiles with alkyd resin-cellulose deriv.-fungicide compn., P 3208*g*.
with cellulose solns., P 4023*b*.
with elec. conductor, P 6528*e*.
with $C_2H_4$ polymer-metal naphthenate mixts., P 4023*a*.
with hydrophobic transparent material for translucent fabric, P 9478*f*.
with phenolic varnishes, P 2033*d*.
with polyvinyl chloride resin, P 4870*g*.
with Rubrax for doubling, P 5200*b*
with vinyl plastisols, 7693*b*.
textiles with, from condensation products of S or polysulfides and org. dihalides, impermeable to chem. war materials and solvents, P 4489*k*.
by thermite reaction, P 3772*a*.
with tin, P 9022*c*.
from tin, chem. resistance of, 502*d*.
from tin, detg. thickness of, 2893*g*, P 6148*a*.
with tin, flux for, P 4212*b*.
of titanium by cyanidation, P 1709.
titanium compd., 9027*a*.
from titanium ester-modified oils and phenolic resins, 2787*b*.
of tractors, 7716*b*.
of tungsten (porous) with Ag oxide, P 3770*a*.
from urea-HCHO resins and alk. earth hydroxides, P 8739*b*
of valves, alloy for, P 9021*b*.
vehicles for, 1125*c*
of vinyl acetal polymers with metals, 2029*e*.
from vinyl acetal resins, P 2814*a*
vinyl acetate polymer treated with poly basic acids for, P 1141*i*.
from vinyl acetate resin and conjugated double-bonded oil, wrinkle finish, P 9485*c*.
from vinyl alc. (poly-), P 1670*f*
from vinyl alc. (poly-), gelling of, P 1670*e*
from vinylaromatic compd. polymers with olefinic acids, drying oils or their fatty acids, polyhydric alcs. and poly basic acids, P 6433*e*.
from vinyl butyral acetal polymer, P 5634*c*.
vinyl butyral-polymer dispersions, P 2038*d*.
from vinyl chloride-haloethylene resin and fatty oil acid glycerides, P 9485*a*
from vinyl chloride resins, P 3233*c*.
corrosion prevention by, 2028*e*.
stain-resistant, P 1222*e*.
from vinyl chloride-vinyl acetate polymers, plasticizer effect on, 5627*f*
from vinyl compd.-monocarboxylic olefinic acid-drying oil (or fatty acid) interpolymers, P 5972*d*.
from vinyl ester partially hydrolyzed polymers, P 1610*b*.
from vinyl formal polymer, P 2037*c*.
from vinyl halide polymers, emulsified, P 5635*e*.
from vinylidene chloride polymer, prevention of discoloration by light, P 2037*h*.
from vinylphenoxathiin polymers, P 9057*b*
from vinyl polymers, P 2470*i*, P 3242*b*, 4052*a*, 4510*i*, P 4894*i*, 8735*c*.
from 2-vinylthiazole polymers, P 2805*h*
vitreous, P 5168*a*.
for wallpaper, clays as, 2380*a*.
of water-distribution systems with corrosion-preventing coats, 4795*d*.
waterproofness of, elec. testing of, 8577*h*
water-sensitive, agents for uniting to org.-sol. base materials, P 5636*a*.
wax, on paper—see *Paper*.
weathering of, evaluating test results in, 2787*c*.
for weatherproofing of pictures, P 5614*b*.
for welding rods, P 2156*c*, P 6763*e*, P 7406*c*.
on welding rods, function of, 1707*c*.
for welds, from silicone resins, P 7896*e*.

white, optical properties of, 6431*f*.
for wire, corrosion-preventing multipigmented, P 9488*b*.
for wire, from chlorosilane resins, P 6464*g*.
on wires, testing of Zn, 4619*h*, 5354*b*.
of wire with Pb, 4583*g*.
wire with nonferrous, P 9020*a*.
for wood, antiseptic, P 7188*f*.
fire-retardant, and their testing, 4492*i*.
resistance to corrosive chemicals of bituminous, cashew shell oil, creosote and phenolic, 3632*d*.
wood-grain reproduction by, 1578*i*.
of wood with spray gun, 1993*f*.
with wrinkle finishes by electrostatic spraying, 874*g*.
wrinkle formation in alkyd or wood oil, prevention of, 3631*c*.
yarns with plastic, 1571*c*.
of zinc alloys with phosphates by electrolysis, P 4589*d*.
from zinc, bending quality of hot-dip, 2564*c*.
from zinc, chromic acid effect on, 546*c*.
of zirconium by heating in air, N and O, 8910*h*.

chromium-W-, for turbines, 7392*c*.
coating of, with black oxide glaze, P 8346*b*.
copper-, effect of magnetic field on crystn. of, 5718*g*.
forgeable, 4203*i*.
gold-, elec. resistance of, effect of pressure and temp. on, 5679*d*.
gold-Ru-, for elec. contacts, P 5357*e*
iron-, and Fe-Ni-, magnetic properties of, 7394*b*.
iron-, and Ni-, emissivity-temp. curve for, 83*a*.
iron-, effect of magnetic field on recrystn. of, 8768*b*.
**hardening and softening of**, 4618*h*.
**magnetic properties of sintered**, 536*b*.
**order-disorder transformation in**, magnetostriction and, 4060*b*.
**spectral emissivity of**, 941*d*.
W-carbide binding with, P 4822*d*.
**iron-V-**, magnetic and mech. properties of, 8338*a*.
**machining** (hot-spot) of, 7393*h*.
**metallography** (color) of, 80*b*.
**molybdenum-W-**, P 5358*e*.
**nickel detn. in**, 8955*g*.
**nickel-**, electrodeposition of, 4148*a*, 6923*h*.
**nickel-**, high-temp. strength and melting temp. of, 90*f*.
**nickel-Pd-**, and their electrodeposition, P 4588*g*.
**platinum-**, ordering rate in, 3260*f*.
**platinum-**, ordering reaction in, 9011*f*.
**tungsten-**, electrodeposited, 7834*b*.
**tungsten-**, electrodeposition from citrate bath, 45*g*.
**Cobalt amide**, $Co(NH_2)_2$, decompn. by **heat**, and its conversion to hexammine Co(II) nitrate, 2887*d*.
**Cobaltammines**. See *Cobalt compounds*.
**Cobalt ammonium sulfate**, $CoSO_4 \cdot (NH_4)_2SO_4$, mixt. with $K_2Cr_2O_7$, color **standards** for methyl yellow and methyl orange from, 1280*d*.
**Cobalt antimonides**, $CoSb_2$, bonds and interat. distances in, 2052*c*.
**Cobalt borate**, **as feeder drier** in controlling **drying time of inks**, 7717*b*.
**Cobalt bromide** ($CoBr_2$), in acetic anhydride, **behavior of**, 2110*f*.
**as catalyst in polymerization of rosin**, HCl- or HBr-activated, P 1996*g*.
**humidity indicator from**, P 2714*d*.
lattice energy of, 2829*f*.
**Cobalt carbides** detn. in **steels**, 4181*c*.
$Co_2C$, decompn. in carburized Fischer-Tropsch **catalyst**, 6064*c*.
**Cobalt carbonates**, **effect on aging and drying time of inks**, 7717*c*.
**$CoCO_3$**, **adsorption and desorption of N** and stearic acid by, 6897*h*.
as catalyst in decarboxylation of **2-furanacrylic acid**, 2615*d*.
**Cobalt carbonyls**, **as catalyst** in ester manuf. from CO and alcs. or ethers, P 3443*c*.
**as catalyst in reaction of olefins**, CO and $H_2O$, P 669*h*.
catalyst of **active C and**, in reaction of **olefins**, CO and $H_2O$, P 670*i*.
manuf. of, P 9398*b*.
solns. of, P 9397*d*.
**$Co(CO)_3$**, **complex with $Ph_3P$**, as catalyst for trimerization of $C_2H_2$ and its derivs., 6202*e*.
**$Co(CO)_4$**, manuf. of, P 8107*i*.
**Cobalt chlorides**, exchange between $Co(NH_3)_6Cl_3$ and, 6508*f*.
**$CoCl_2$**, **activity and osmotic coeffs** of, 22*d*.
antiferromagnetism of, 11*a*.
**as catalyst** in Grignard coupling of *p*-(1-bromopropyl)anisole, 3812*f*.
in polymerization of acrylonitrile with butadiene, P 2025*i*.
in polymerization of rosin, HCl- or HBr-activated, P 1996*g*.
decompn. potential in molten $AlCl_3$-NaCl, 8915*e*.
dehydration of hexahydrate of, with $COCl_2$ or $SOCl_2$, 2533*c*.
**effect on antibiotic properties of penicillin**, 1458*i*.
**effect on bactericidal action of Ceepryn**, 9147*f*.
**humidity indicator from**, P 2714*f*, 5516*i*.
hydration of, activity and, 7302*b*.
lattice energy of, 2829*f*.
mixts. with $Na_2Cr_2O_7$, color standards for $C_2HCl_3$ detn. from, 2122*i*
permeability of larval cuticle of *Phormia regina* to, 8561*h*.
reaction with $BrF_3$, 3739*f*.
**Cobalt chloroiodate(III)**, $Co(ICl_2)_3$, ammoniates of, 8298*b*.
**Cobalt compounds**, with aluminum, structure of $Co_2Al_9$, 1235*i*.
ammino, 2887*d*, P 3158*a*.
**chromatography of**, 8295*b*.
contg. oxidizing groups, explosive properties of, 5187*e*.
detn. of $NH_3$ in hexammine and pentammine, 5701*g*.
drying or ignition temp. limits for $[Co(NH_3)_6]TiCl_6$, 63*h*.
exchange of di- and trivalent Co ions in, 6508*e*.
polarography of, 2520*b*.
reduction by $H_2$ and H, 2854*h*.
spectra of, 5305*a*.
sulfate detn. with $[Co(NH_3)_5]Br_2$, and formation of $[Co(NH_3)_5BrSO_4$, 3316*b*.
thermochemistry of, 2855*a*.
unstable, 7364*b*.
with antimony, As, N, O, P, Se, Si, S and Te, magnetic properties of, 6018*d*.
with 4-aryl-2,6-dinitrosoresorcinols, 3810*e*.
with biguanide derivs., 7365*f*.
as catalysts in oxidation of cyclic ethers, P 2224*e*.
as catalysts in reforming of hydrocarbons, P 9430*a*.
chelate, 7364*e*.
chelate complexes with $\beta,\beta',\beta''$-triaminotriethylamine, stability of, 8812*e*.
colors and magnetic properties of, electron arrangement and, 2092*g*.
complexes, in EtOH soln., 4970*g*.
in exchange and Szilard effects, 7364*c*.
with heteropoly acids and amines, 1672*a*.
induced dissymmetry and optical activity of, 2538*f*.
stability of, 4960*c*.
thermochemistry of, 7805*g*, 7806*e*.
cyanide complexes, polarography of, 5676*e*.
**as driers for oils in chamoising**, 1592*e*.
formation of $[Co(NH_3)_5][InCl_5]$ and its use in detn. of In, 8952*h*.
four- and six-coördinated, inversion of Stark patterns of, 2479*h*.
**as fungicides for cotton fabric**, 8085*f*.
halogen complexes, spectra of, 520*a*, 7817*ei*, 8273*h*.
with histidine, 4968*i*.
with histidine, other amino acids and O, 7856*ce*.
with hydroxynaphthaldehyde and [ethylenebis(nitrilomethylidyne)]dinaphthol, 1678*g*.
with 3-hydroxy-2-naphthoic acid and pyridine, 2538*g*.
intermetallic, 7771*c*.
with iron in Fe ores and **assocd. rocks** in Sweden, 5710*b*.
with iron in sediments from Tyrrhenian Sea, 4610*f*.
of nicotine salts, P 8605*b*.
with nitrilotriacetic acid, 2888*c*.
org., antiseptic and fungicidal, P 363*i*
oxygen-carrying, 6932*e*.
with 1,1'-*m*-phenylenedibiguanide, 8941*d*
$[Ph_3P]Co(CO)_3$, as catalyst for trimerization of $C_2H_2$ and its derivs., 6202*e*.
phthalocyanines, P 3214*g*, P 3215*b*.
with protein hydrolyzates, 5432*e*.
purification of, P 8107*f*.
with silicon, bonds in $(CoSiO_4)$, 8764*a*.
with sodium 2-formyl-1-phenol 4-sulfonate, 1678*d*.
with tetrachlorophthalic anhydride and urea, green pigment, P 5607*g*.
tri-*o*-phenanthroline oleate, effect on mol.-wt. changes, O absorption rate and peroxide formation in paints, 6836*e*.
**Cobalt copper chloride**, $3Cu(OH)_2 \cdot CoCl_2$, 8929*g*.
**Cobalt cyanide**, $Co(CN)_2$, heat of formation and lattice energy of, 2830*a*.
**Cobalt cyanoplatinate(II)**, $CoPt(CN)_4$, prepn. and reduction to PtCo, 3260.
**Cobalt ferrates(III)**, 5354*i*
**$CoFe_2O_4$**, 7315*c*.
formation, crystal structure and magnetic properties of, 3304*f*.
magnetic properties and solns. of, 6017*e*
**Cobalt ferricyanide**, $Co[Fe(CN)_6]$, detection of, 8966*e*
**Cobalt ferrocyanides**, detection of, 8966*e*
as toner for photographic film in detn. of x ray intensities, 1650*h*.
**Cobalt fluorides**.
**$CoF_2$**, antiferromagnetism of, 11*a*
catalysis by, in esterification of fatty acids with glycerol, 4030*g*.
in fluorination of $\alpha,\alpha,\alpha$-trichlorotoluene, 8364*h*.
heat of formation and lattice energy of, 2829*i*.
**$CoF_3$**, polycyclic hydrocarbon fluorination with, P 4301*b*.
prepn. of, 6793*d*.
**Cobalt formate**, $Co(HCO_2)_2$, heats of formation and soln. in HCl, and lattice energy of, 2830*a*.
**Cobalt halides**, Curie point, pressure and, 8784*a*.
**Cobalt hydroxides**, mixt. with kieselguhr, in S removal from water gas, 2401*i*
**$Co(OH)_2$**, catalyst of, and $Cr_2O_3$ in oxidation of *p*-EtC$_6$H$_4$OAc, P 3461*g*.
lattice energy of, 2829*f*.
in system $CoSO_4$-CoO-$H_2O$, 2403*a*
**$Co(OH)_3$**, exchange with cobaltous ion effect of $H_2O_2$ on, 8820*i*.
**Cobalt iodate**, $Co(IO_3)_2$, equil. with its hydrate and their satd. solns., 5267*a*
**Cobalt iodide** ($CoI_2$), in acetic anhydride, behavior of, 2110*f*.
decompn. potential in fused $AlI_3$ or NaAlI$_4$, 6519*g*.
electrolysis in $Ac_2O$, 2876*h*.
humidity indicator from, P 2714*g*.
lattice energy of, 2829*f*.
mixt. with molten NaI, decompn. potential of, 4582*g*.
**Cobaltite**, compression of, 4917*b*.
of Ontario (Gowgandu), 2549*i*.
**Cobalt mercury thiocyanates**. (See also *Cobalt thiocyanatomercurate* (II).)
antifouling properties of, 3964*a*.
**balt molybdates**, manuf. of, P 5160*b*.
**balt nitrates**, as catalyst for condensation of 2-furaldehyde with phenol, 5226*b*.
as catalyst in oxidation and hydrolysis of cellulose by nitric acid, 1979*a*.
**$Co(NO_3)_2$**, activity and osmotic coeffs. of, 22*d*.
catalysts of, in reforming of hydrocarbons, P 9430*b*.
chromatography on soil minerals, 3549*h*.
color of solns. in EtOH and HCl, and elec. cond. of alc. solns., 4970*g*.
lattice energy of, 2829*f*.
**Cobalt nitrides**, 5322*e*.

**CoN**, formation from $Co(NH_2)_2$, 2887*d*.
**Cobalt ores**, arsenide minerals from, 2895*i*.
copper-Ni-, of Vest prospect, Va., 6545*i*.
flotation of Cu-Au-Ag-S-, 1693*d*.
nickel-, of Hosanger Mine, Norway, 6545*h*.
of Norway (Modum dist.), petrography of fahlband, 8316*d*.
prospecting for, by compn. of plants and soils, 3549*f*.
of world, 5708*e*.
**Cobalt oxalate**, as hydrogen cyanide stabilizer, P 1536*i*.
**Cobalt oxides**, as catalyst in ester manuf. from CO and alcs. or ethers, P 3443*c*.
as catalyst in oxidation of mercaptans in natural gas, 7066*c*.
in purification of fuel gas, 3173*a*.
in toluene manuf. from bibenzyl and H, P 3454*b*.
catalyst of $Cr_2O_3$, an alkali compd. and, for dehydrogenation, P 5410*a*.
catalysts of $Al_2O_3$ and, in dehydrogenation of 1,1-diaryl paraffins, P 2235*f*.
catalysts of $SiO_2$ and, for acylation of thiophene, P 2643*g*.
effect on $Fe_2O_3$ catalysts for reduction of esters, 5363*d*.
magnets contg., P 3770*d*.
oxygen exchange with CoO and $Co_3O_4$, 8821*i*.
in waterproofing resins from aniline, HCHO and di-, tri-, tetra- or pentaglycol dichloride, P 2033*b*.
**CoO**, antiferromagnetism of, and its solid solns. with MgO, 11*a*.
catalysts of $Al_2O_3$, $Cr_2O_3$ and, in dehydrogenation of 2-*o*-tolyl-2-butene, 5012*d*.
formation of, thermodynamics of, 2907*e*.
hydrate, effect on aging and drying time of inks, 7717*c*.
reaction with $Fe_2O_3$, 3304*h*.
reaction with O and $SO_2$, 6931*g*.
system: $CoSO_4$-$H_2O$-, pH in, 2493*a*.
system: $Fe_2O_3$-, 5355*a*, 7314*i*.
system: $SiO_2$-, 2909*h*.
**Cobalt perrhenate**, $Co(ReO_4)_2$, 5688*e*.
**Cobalt phosphate** ($Co_3(PO_4)_2$), as catalyst in dehydrochlorination of chlorinated fatty acids or their esters, P 7502*f*.
humidity indicator from, P 2714*e*.
**Cobalt phosphides**, formation of $Co_2P$ and CoP and crystal structure of $Co_2P$, 2064*e*.
**Cobalt phosphomolybdate**, $Co_3(PO_4)_2 \cdot 12MoO_3)_2$, 7366*a*.
**Cobalt phosphotungstate**, $Co_3(PO_4)_2 \cdot 12WO_3)_2$, 7366*a*.
**Cobalt potassium ferrocyanides**, formation of $5Co_2Fe(CN)_6 \cdot K_4Fe(CN)_6$ and $4Co_2Fe(CN)_6 \cdot 3K_4Fe(CN)_6$, 961*a*.
**Cobalt salts**, catalysts in bleaching paper, P 9448*a*.
catalysts in oxidation of benzoin to benzil, 1368*b*.
in oxidation of furoin, P 690*f*.
in polymerization of butadiene hydrocarbons, P 2025*i*.
with 3,5-diiodo-4-oxo-1(4*H*)-pyridineacetic acid, 5780*f*.
effect on protoplasm, 8015*b*.
of grapeseed-oil acid, as drier for linseed oil, 8699*f*
magnetic resonance in, 4005*i*, 4568*cd*.
**Cobalt selenide**, $CoSe_2$, bonds and interat. distances in, 2052*c*.
**Cobalt sodium iodide**, $NaCoI_3$, in acetic anhydride, behavior of, 2110*f*.
**Cobalt sulfates**, transmittancy of solns. of, and of its mixts. with Cu sulfate, 8275*g*.
$CoSO_4$, compd. with nicotine sulfate, 8297*a*.
entropy, heat capacity and magnetic properties of, 8766*g*.
formation and vapor pressure of, 6931*h*.
humidity indicator from, P 2713*e*.
sepn. from $CuSO_4$ and $Fe_2(SO_4)_3$ by chromatography, 2070*i*.
spectrum of, 3293*c*.
system: CoO-$H_2O$-, pH in, 2493*a*.
system: $K_4Fe(CN)_6$-$H_2O$-, physicochem. analysis of, 960*i*.
**Cobalt sulfides**, in carbon monoxide oxidation, 2076*i*.
as catalyst in reaction of CO with S and $H_2O$, 2532*i*.
as catalyst in toluene manuf. from bibenzyl and H, P 3454*b*.
as catalysts in hydrogenation of org. S compds. to thiols, P 2630*c*.
oxygen in pptd., as $HOCo_2S$, 2108*i*.
pptn. of CoS and $CoS_2$, 2531*i*.
**CoS**, as catalyst in reaction of alkyl disulfides with olefins, P 1794*d*.
oxidizability of pptd., 5700*i*.
soly. of pptd., in acid, 2074*a*.
**$Co_2S_3$**, as catalyst in manuf. of thiols from diesters of 1,1-alkanediols and $H_2S$, P 5418*e*.
**$CoS_2$**, bonds and interat. distances in, 2052*c*.
**Cobalt telluride**, $CoTe_2$, bonds and interat. distances in, 2052*c*.
**Cobalt thiocyanate** ($Co(CNS)_2$), heat of formation and lattice energy of, 2829*i*.
humidity indicator from, P 2714*g*.
**Cobalt thiocyanatomercurate(II)** ($Co[Hg(CNS)_4]$). (See also *cobalt mercury thiocyanate*.)
crystal structure of, 5325*a*, 6482*g*.
mol. wt. of, 8764*i*.
system: $Cd[Hg(CNS)_4]$-, and $Zn[Hg(CNS)_4]$-, 7803*i*.
**Cobalt vanadate(III)**, $CoV_2O_4$, 6519*d*.
**Cobalt vanadate(V)**, $Co(VO_3)_2$, prepn. and soly. of, 8247*f*.
**Cobefrin**. See *Norephedrine, 3,4-dihydroxy-*.
**Cobra venom**. See *Venoms*.
**Coca**, norecgonine ext. from, 5544*b*.
**Cocaine**, adulteration of, 5544*h*.
anesthetic action of, 1111*a*.
detection and detn. of, 7191*c*.
detection in foods, 9273*h*.
detn. of, 8094*h*.
dosage of, detn. of, 3110*c*.
effect on heart, 1489*h*.
on intestine, 7589*i*.
on penicillin activity, 4772*d*.
on respiration of brain, 8056*g*.
fluorescence of, 5341*a*.
heart failure from, 1862*f*.
hydrochloride, effect on cholinesterase, 702*f*.
identification of, 1151*g*, 1529*d*, 7190*h*.
identification of, for use in operating room, 3563*e*.
local anesthetics resembling, 7642*h*.
manuf. of, 8100*h*.
as mitosis inhibitor, 8416*a*.
sensitization of ventricle of *Helix pomatia* and muscle of leech to acetylcholine by, 1107*f*.
**Cocarboxylase**, biol activity of, 3003*d*.
in blood and urine of healthy and sick children, 4749*f*.
in blood and urine, vitamin $B_1$ and, 1480*d*.
in blood corpuscles (red and white), in health and disease, 1841*i*.
in rat and man, 736*f*.
vitamin $B_1$ supply and disease in relation to, 5102*d*.
in blood in tuberculosis, 8465*b*.
dephosphorylation and synthesis of, effect of atebrin and chloraquine on, 5057*g*.
in diabetic coma treatment, 8060*h*.
effect on heart, 1860*f*, 5865*d*.
on muscle sensitivity to acetycholine, 291*g*.
on tone of thyroxine-treated intestine, 7578*g*.
formation from vitamin $B_1$ by yeast, 9159*d*.
metabolism in typhoid fever, 2294*c*.
in metabolism of cockroach muscle, 2333*c*.
phosphatase (urinary) action on, 6265*d*.
prepn. of, 9122*c*.
urinary, in thiamine deficiency, 8475*g*.
**Cocarcinogenic substances**, action of, 2695*c*.
**Coccell acid**, in lichens, 5077*c*.
**Coccl**, anticoccoid compds., thiazole derivs., P 3978*e*.
of Gorini—see *Streptococcus faecalis*.
**Coccidioidin**, sensitivity to, pulmonary calcification and, 3513*g*.
**Coccidiosis**, chick cecal, hypo- and hyperthyroidism and, 9330*b*.
control of cecal, in chickens, 9314*c*.
drug for treatment of, P 7592*i*.
halogenated benzenearsonic acids and salts for control of, P 9388*h*.
4-hydroxy-3-nitrobenzenearsonic acid and salts for treatment of, P 368*a*.
nitrofurazone in treatment of, 5869*c*.
sulfaguanidine in control of, 9290*b*.
sulfaquinoxaline in control of, 321*g*.
sulfasuxidine in control of, 4375*e*.
treatment of, 8061*h*.
**Coccus** (*bacteria*). See *Cocci*.
**Coccus caoti**. See *Cochineal*.
**Coccus pseudomagnoliarum** and(or) **Citricola scale**, control of, 4805*a*.
**Cochineal**, detection in wine, 8092*a*.
**Cochineal insect**. See *Dactylopius coccus*.
**Cochlea**. See *Ears*.
**Cocklebur oil**. See *Oils*.
**Cockleweed, seeds**, dextrin manuf. from, P 1590*b*.
seeds, starch manuf. from, P 1590*c*.
**Cockroaches**, azo-dye effect on *Blatella germanica*, 8089*c*.
control of, P 6358*d*.
halogen-P compds. in, 9353*f*.
parathion in, 4806*b*, 9349*b*.
smokes of DDT or hexachlorocyclohexane in, 9342*c*.
control of *Blatella germanica*, 1519*h*, 2360*g*.
control of *Blatella germanica* and *Periplaneta americana*, chlorinated org. compds. in, 1518*g*.
DDT effect on *Blatta orientalis*, 6355*c*.
DDT effect on motor and sensory structures in leg of *Periplaneta americana*, 3964*i*.
insecticide testing with *Periplaneta americana*, 1139*i*.
mite control in lab. rearings of *Periplaneta americana*, 1899*f*.
muscle of *Periplaneta americana*, metabolism of, 2333*a*.
nutritional studies with *Blatella germanica* reared under aseptic conditions, 7152*a*, 8564*i*.
requirement of *Blatella germanica* for choline and related compds., 3939*h*.
toxicity of DDT and related compds. to German, 7628*f*.
toxicity to *Periplaneta americana*, of azobenzene and related compds., 2727*c*.
vitamin C absorption by *Blatella*, 8561*e*.
vitamin requirements of *Blatella* and *Periplaneta*, 8066*b*.
**Cocks**. See *Stopcocks; Valves*.
**Cock's comb**. See *Combs*.
**Cocoa**. (See also *Cacao; Chocolate*.)
chemistry in industry of, 8573*h*.
mixt. with sugar sirup, P 3541*d*.
theobromine detn. in, app. for, 2709*d*.
for use without heating, P 7606*d*.
**Cocoa butter**. See *Cacao butter*.
**Coconut**. (See also *Copra*.)
charcoal from, as catalyst in chloromethylation, P 5583*e*.
dried, research on, 5880*b*.
feeds from, compn. of, 3538*i*.
fibers—see *Fibers*.
flavoring materials from levulinic acid, 784*d*.
husks, retting of, 1985*d*, 5953*e*.
soils of Madagascar, 1509*g*.
**Coconut cake**, antioxidant activity and vitamin A of copra, 424*g*.
**Coconut leaf roller**. See *Omiodes blackburni*.
**Coconut meal**, analysis of, 6842*a*.
**Coconut oil**, absorption of, 1842*e*.
acids of, condensation with acetone-sulfonic acid and hydrazine, wetting agent by, P 5216*i*.
dodecyl ester, hydrogenation of, 6063*a*.
Et ester, 881*e*.
hydrogenation of Me esters to alcs., 5208*d*.
reaction product with cyanoguanidine, ethanolamine and glycidol or ethylene oxide, sulfuric acid esters, as textile aids, P 7727*c*.
reaction with $C_2H_4O$, textile assistants by, P 7727*a*.
surface-active agents from, P 4499*c*.
amides of acids of, pharmaceutical carriers for, P 2375*d*.
reaction products with crotonaldehyde and mercaptoacetic acid, surface-active, P 7242*d*.
reaction products with crotonaldehyde and $NaHSO_3$, P 8712*g*.
reaction with crotonaldehyde and mercaptoacetic acid, detergent by, P 5978*h*.
amine (alkyl mixed) from, condensation with Me acrylate and hydrolysis of condensate to surface-active Na amine salt, P 5978*b*.
anilide of fatty acids from, condensation product with chloro-*N*-(hydroxymethyl)acetamide sulfonic acid, P 886*b*.
Bellier no. of, 8178*h*.
compn. of copra, 881*c*.
cracking of, under reduced pressure, 424*b*.
detn. of fusion point of mixts. contg., 6327*g*.
distn. of hydrogenated, *in vacuo*, cacao-fat substitute from residue from, 5610*h*.
effect on yield and compn. of butterfat, 1874*g*.

esterification with glycerol, monoglycerides by, P 6843*i*.
esters (mono-) with glycerol and $H_2SO_4$, Na salts, P 9495*e*.
foaming of, and its blends with vegetable oils in frying, 5612*b*.
hydrazide and *N*-(hydroxymethyl)amide of, reaction products with $NH_4$ salts or salts of primary amines and paraformaldehyde, P 1434*g*.
hydrazides of fatty acids from, condensation with glucose, wetting agents by, P 4499*e*.
hydrazides of fatty acids of, reaction with glucose, foaming and wetting agents by, P 9497*i*.
hydrolysis of, 2580*a*.
hydrolysis of, velocity of, and effect of metals thereon, 8706*f*, 8707*a*.
*N*-(hydroxymethyl)amides of acids from, as textile assistants, P 8712*e*.
*N*-(hydroxymethyl)amides of acids of, reaction products with ethylene oxide, P 8713*d*.
lipase action on, formation of partial glycerides during, 9121*a*.
mixt. with glycerol, polyesters with mercaptosuccinic acid, and coatings therefrom, P 3633*d*.
reaction of sapond., with $COCl_2$, P 2223*g*.
reduction (Bouveault-Blanc) of, P 3835*g*.
sapon. of, with water in autoclave, and glycerol in unsplit fat, 9487*d*.
stabilizers for, 5127*g*.
surface tension of, 6878*i*.
**Coconut rhinoceros beetle.** See *Strategus quadrifoveatus*.
**Cocoons,** silkworm—see *Silkworms*.
**Cocopeat,** the name, 4412*c*.
**Cocos.** See *Coconut*.
**Coco yam.** See *Taro*.
**COC-S** (*C-O-C-S spray*). See "basic, basic sulfate" under *Copper chlorides*.
**Cod,** acidity of muscle of red and ling, effect on bacteria and $Me_3N$, 5128*e*.
oil from—see *Cod-liver oil*.
protein extn. from, P 9390*e*.
protein from meal of, 4790*c*.
sodium nitrite addn. to fillets of, effect on bacteria and formation of trimethylamine, 6751*gi*.
**Codecarboxylase,** detn of, 9135*a*.
1-ethoxy-1,3-dihydro-6-methylfuro-[3,4-*c*]pyridin-7-ol 7-dihydrogen phosphate with activity of, P 6672*b*.
identity of, 6680*c*.
**Codehydrase.** See *Codehydrogenases*.
**Codehydrogenase I** (*coenzyme I, cozymase*), in amino acid synthesis from $NH_3$ and keto acids by bacteria, 5084*e*.
in blood in typhoid fever, 5110*f*.
breakdown by nervous tissue, 9105*d*.
decompn. and synthesis by bacteria, 2670*e*.
degradation by enzymes in living organisms, 5432*g*.
detn. of, in tumors, 2303*h*.
detn. or assay of, 2265*e*, 2659*h*.
hydrogen transfer from ascorbic acid to, by chlorophyll, 8410*c*.
in *Lactobacillus arabinosus*, 6278*a*.
in polyploid aspen, 5831*e*.
reduced, reaction with MeI and $Me_2SO_4$, 7525*g*.
reduction by $NaBH_4$, 2249*b*.
synthesis of, 2649*h*.
**Codehydrogenase II,** in blood in typhoid fever, 5110*f*.
**Codehydrogenases,** in liver in infectious hepatitis, 3922*f*.
**Codeine.** (See also *Opium alkaloids.*)
alc. detn. in infusion of, 9370*i*.
analgesic action of, evaluation of, 1487*d*.
detection in foods, 9273*h*.
detn. in tablets, 2368*i*.
effect on blood flow, 4382*b*.
effect on succinic oxidase system, 3521*c*.
fluocolumbate(V), 5786*a*.
in opium from Greece, 2372*e*.
in opium tinctures, 2368*c*.
phosphate, folic acid prepn. contg., 355*i*.
sensitization of heart and muscle to acetylcholine by, 3102*c*.
sepn. from morphine, P 3572*d*.
**Codeine, dihydro-,** degradation of, 4280*b*.
**Codeinone, dihydro-,** detn. of, 2126*e*.
**———, dihydrohydroxy-.** See *Eucodal*.
**Codling moth and (or) Carpocapsa pomonella,** control of, 807*c*, 810*f*, 3965*b*, 6354*f*, 7630*b*, 9347*a*.
control of, on apples, 804*b*.
nitrobenzamide *N*-derivs. in, 1144*i*, 4997*g*.
control of, testing insecticides for, 7181*h*.
**Cod-liver oil.** (See also "fish-liver" under *Oils.*)
bacteriostatic action of, and its distillate, 4726*i*.
effect on development of rabbit, 3078*h*.
on milk and fat production, 3896*e*.
on milk stability, 3941*e*.
on nicotinic acid synthesis from tryptophan in animal organism, 9180*g*.
on reproduction capacity in vitamin E deficiency, 9190*g*.
on tocopherols in blood of sheep, 758*f*.
11-eicosenoic acid from, from *Gadus callarias*, 4220*a*.
fat acid extn. from, and soly. diagrams in EtOH and MeOH, 7724*b*.
hydrogenation of, conservation of carotene and vitamins A and D in selective, 6841*i*.
isomerization of, 9380*g*.
nutritional hindrance from diet rich in, 8021*h*
odor and taste removal from, P 5158*c*.
surface tension of, 6878*i*.
vitamin A and carotenoid storage by chicks fed, 2291*g*.
vitamins A and D in, 9380*b*.
**Coefficient of expansion, etc.** See *Expansion*, etc.
**Coenzymes.** (See also *Cocarboxylase; Codehydrogenases;* and "pyridine" under *Nucleotides*), 9110*d*.
A, as growth stimulant for *Acetobacter suboxydans*, 6699*e*.
in liver, effect of dietary protein restriction on, 9195*d*.
pantothenic acid liberation from, 3047*e*.
in rat and duck tissues in pantothenic acid deficiency, 293*d*.
of alk. phosphatase, 7989*a*.
in biol. oxidation-reductions, 595*c*.
for diamine oxidase in legumes, 6706*f*.
glucose phosphates as, 2258*h*.
I—see *Codehydrogenase I*.
of phosphoglucomutase, 1070*g*, 3477*i*, 7528*h*.
review on, 9122*h*.
II—see *Codehydrogenase II*.
**Coercive force,** of cobalt-Fe-V alloys, 8338*b*.
of hard metal alloys, evaluation by, 1298*a*.
theory of, 8767*i*.
**Coffea.** See *Coffee*.
**Coffee.** (See also *Caffeine.*)
analysis of coffee exts. and, 1498*f*.
analytical and organoleptic findings in, 6747*d*.
caffeine detn. in, 1689*f*, 1878*d*.
caffein recovery from green, P 6371*c*.
caffein removal from, P 5882*i*.
drying of, 1013*e*.
effect on longevity, 3893*a*.
effects in sports, 8543*a*.
exts. (concd., powd., sol., etc.), P 1124*f*, P 4398*c*, P 5512*h*, P 5513*a*.
decaffeinated, P 6334*d*.
identification of, 361*c*.
preservation of aroma of, P 5514*a*.
fertilizer expts. with, 9314*d*.
flavor components of, 8574*a*.
roasting of, effect on flavor, 8574*a*.
viridic acid formation in raw, through insect action, 3116*g*.
wastes from, effect of tannins in, on dissolved O detn., 6770*a*.
**Coffee substitutes,** analysis of, 1498*f*.
from cacao-bean waste, P 332*c*, P 3118*b*.
preservation of odor of, P 5884*a*.

detection and detn., 7858*h*.
detn., 57*c*, 950*h*.
detn. in alloys, 8050*i*
in ferrotantalum, ferrocolumbium and steels, 2119*b*.
in minerals, ores, etc., 2543*d*.
in presence of Ta and Sn, 6106*g*.
in presence of Ti, 4177*c*.
in presence of Ti and W, 2543*g*.
in steel, 4177*e*, 4597*h*, 8965*c*.
sepn. from Ta, etc., and detn., P 976*bc*.
sepn. from W and detn. in steel, 5335*e*.

**Columbium alloys**, chromium-, and Ni-, oxidation resistance of, 3331*h*.
chromium-Co-Fe-Mn-Mo-Ni-W-, for gas-turbine rotor disks, 3331*c*.
chromium-Fe-Ni-, minor phases in, 540*h*.
iron-, analysis for Cb and Ta, 2119*b*.
hardening and softening of, 4618*h*.
H soln. in liquid, 2490*a*.
mech. properties of, diagram of state and, 1299*g*.
iron-Ni-, for glass sealing, P 6145*i*.

**Columbium boride**. (See also "hard" under *Alloys*.)
$CbB_2$, 8933*a*.

**Columbium bromide**, $CbBr_5$, boiling point, melting point and vapor pressure of, 7851*i*.

**Columbium carbides**, detn. in steel, P 522*h*.

**CbC**, crystal structure and systems with other carbides, 3163*e*.

**Columbium chloride** ($CbCl_5$), boiling point, melting point and vapor pressure of, 7851*h*.
Raman spectra and mol. structure of, 2513*i*.

**Columbium halides**, 7851*h*.

**Columbium hydrides**, in uniting metals to nonmetals, 6561*c*.

**$CbH_2$**, formation in Cb Fe alloys, 2490*e*.

**Columbium nitride** (CbN), bolometers, 2044*d*.
bolometers, effect of $\alpha$-ray-bombardment on, 8851*a*.
properties of, at radio frequencies, 1957

**Columbium oxides**, magnetic susceptibility of, 2053*c*.
precipitation of, pH of, 4083*c*.

**$CbO_2$**, free energy and heat of formation of, 9006*h*.

**$Cb_2O_5$**, reaction with $SOCl_2$, 2886*a*

**Columbium salts**, for analytical uses, 4597*h*.

**Columbo**. See *Calumba*.

**Columns**. (See also *Absorption apparatus; Distillation apparatus; Extraction apparatus*.)
flow through randomly packed, 6475*f*
mass transfer in wetted-wall, 6053*f*

**Colza oil**. See *Rape oil*.

**Coma**, diabetic—see *Diabetes*.

**Comandra chromosa**, selenium in, 3800*f*

**Comanic acid, 5,6-dihydro-**. See *1,2-H Pyran-6-carboxylic acid, 3,4-dihydro-2-oxo-*.

**Combs**, estrogen effect on, of birds, 8031*f*
growth-promoting hormones and growth tests—see *Androgenic hormone, Androsterone*.
masculinization of capon, antagonistic effects of adrenaline and thyroxine in, 6717*b*.
methyl testosterone effect on, 262*f*

**Combustibility**. (*Only entries of general interest, e.g., methods of measurement, are entered here. For values of combustibility of specific materials see* Wood; *etc. See also* Inflammability
measurement of, of liquids, 4532*d*
measurement of, of treated wood, 4780*i*
reducing—see *Fireproofing*
of solid fuels and its detn., 1939*g*, 5921*h*

**Combustibles** (See also *Coal, Coke, Fuels*; etc.)
detection of gaseous, app. for, 4522*f*
with low upper limit of flame propagation, prevention of explosions in gases by, 7230*i*.
production of, evolution of org. chem industry in relation to, 2155*f*

**Combustion**. (See also *Firing, Flames, Heat of combustion; Ignition; Oxidation; Thermoregulators*.)
of aluminum in O, 4593*h*.
in analysis—see *Analysis*.
of blast-furnace and coke-oven gas, detn. of excess air used in, 4445*i*.
books: Spectroscopy and, Theory, 1170*c*; Thermodynamic Charts for, Processes, 3174*f*; Propagation des, dans les melanges gazeux, 8140*d*, Theory of—Vol. II. Turbulent and Heterogeneous Combustion [in Russian], 8140*e*; Mekhanizm Okisleniya Goreniya Vodoroda, 8250*f*.
of 1,3-butadiene with He-O and N-O mixts., rates of, 5268*c*.
calcn. of volumes for burning oil fuel, 2419*e*.
of carbon adsorbents, detn. of time required for, 8648*f*.

durability of, and use of reactive aggregate, 4827*a*.
effect of air entraining and dispersion promoting agents on mixing and properties of, 2751*h*.
effect of air-entrainment, C black and coloring on, 9409*f*.
expansion of, control of, 5567*g*.
flow (plastic) of, in relief of high-load stress concns., 6387*i*.
foamed, gas-expanded, and concrete with light limestone aggregate, 6387*g*.
frost-resistant, P 7662*a*.
gunite, as lining in petroleum tanks, 4622*a*, 5929*h*.
haydite aggregate for, 5560*a*.
heat of setting of, 2395*g*.
hydrogen sulfide from sewage effect on, 2340*h*, 3547*e*.
insecticide films on, 9330*g*.
lime (free) detn. in, 5567*f*.
from magnesia and $MgCl_2$, P 6389*c*.
manuf. of, 5567*g*.
masonry, covering and filling for joints in, P 5633*d*.
materials for, in Union of South Africa, 8115*g*.
microfiller-contg., 1938*a*.
mixes for, control and design of, 1546*i*.
paints for, from Pliolite S-5, 5606*f*.
paints for, rubber-contg., P 1200*b*.
Plastiment use with, 2395*i*.
from pozzuolana cement, 2751*g*.
prestressed, 9410*a*.
refractory, 6384*g*, 6385*b*, 7656*g*.
refractory, from vermiculite and Ca aluminate cement, P 5168*g*.
reinforcements for, A.S.T.M. standards for, 4202*dh*.
research on, 2395*i*.
for roads in Germany, 373*c*.
siliceous admixt. for, of Davis Dam, 3165*f*.
slag (blast-furnace) for, P 1167*a*.
from Solvay lime sludge, portland cement and pulverized scrap glass, P 6804*i*.
standards for, 4785*g*.
strength of, age and, 3988*h*.
Vinsol effect on, 1546*d*.
water mains of, reinforced with steel, 551*d*.
water (nonevaporable) in, and its detn., 6387*e*.
water-permeability of, detn. of, 3987*f*.
x-ray attenuation in, 4132*d*.

**Concretions.** (See also *Calculi.*)
agate and quartz, in tuff from Templeton, Calif., 2899*a*.
of *Ficus elastica*, 5830*g*.
formation of, 7297*a*.

**Concussion,** buffering capacity of brain after, 9212*d*.

**Condensation, chemical.** (See also *Claisen condensation; Dieckmann condensation; Polymerisation; Reactions; Ring closure.*) 4248*b*.
of acetylene compds., 6167*g*.
of acetylene compds. with esters, 6168*f*.
of acetylenic halides with α,β-unsatd. ketones, P 5798*b*.
of alcs., acyclic hydrocarbons by, 5003*e*.
of alcs. with aromatic compds. with $AlCl_3$, 164*a*, 1369*f*.
in aldehyde (α-ethylenic) reduction, 4253*i*.
of aldehydes and ketones, P 2632*b*, 6159*i*.
of aldehydes (aromatic), 9049*h*.
of aldehydes with amides, 2600*gh*, 6182*b*.
with 2 amino 1,3-propanediol derivs., P 2633*g*.
with 3,4-dihydro-1(2 *H*)-naphthalenone, 2971*g*.
aldol, 4526*e*, P 5415*h*, 5756*c*.
by alkali metal amides, 629*g*, 4253*g*.
of alkyl cyanoacetates with HCHO, P 6222*f*.
of alkyl (higher) esters of α-amino acids, 4640*i*.
of amines (tertiary) with carboxylic acid halides, mechanism of, 4240*g*.
of α-amino acid derivs., 575*b*.
of α-amino amides with 1,2-dicarbonyl compds., 3009*e*.
of ammonia to hydrazine, elec.-discharge app. for, P 6096*g*.
of aralkyl hydrocarbons with ketones, P 2036*h*.
of aromatic acid halides with fatty acid halides, P 5586*b*.
of aromatic hydrocarbons with olefin polymers with $AlCl_3$ catalysts to oils, P 3190*h*.
arsenic-contg. arylsulfonic acid solns. in, P 2636*f*.
of basic ions in hydrolysis of Al and U nitrates, 7308*a*.
of basic ions in the hydrolysis of Pb salts, 472*e*
of basic Pb ions, 2073*i*, 8277*a*.
of benzene with chlorinated paraffin wax with $AlCl_3$-active clay catalysts in lubricating oil prepn., 2416*gi*.
of benzyl benzoate, dimethylaniline and HCHO with activated clay catalysts, lubricant antioxidants by, P 2424*e*.
of biacetyl with phenols, 8370*d*.
of biacetyl with primary aromatic amines, 4234*e*
of α-carbethoxy-γ-butyrolactones with amidines and with guanidine, 6172*i*.
of chlorinated paraffin wax with $C_{10}H_8$ and diisobutylene, P 7680*d*.
of 4-chloroquinaldine with compds. contg. an active $CH_3$ group, 228*i*
of chlorotrifluoroethylene and of $C_2F_4$ with unsatd. compds., P 4293*g*.
of coconut fatty acid anilide with *N*-methylol chloroacetamide Na sulfonate, P 886*b*.
of crotonaldehyde with cyclic compds. and their conversion to aromatic compds., 5376*h*.
of cyclohexene and epichlorohydrin with phenols, 6173*g*
of diaminopyrimidines with benzil and benzoin and their dimethoxy derivs., 3010*b*.
of 2,4-dimethyl-2-cyclopenten-1-one with dienes, 1333*h*.
of esters, 7022*d*.
of esters, agents for, 6170*g*.
of ethylene oxide, explosive polv-, catalyzed by acids and bases, 8138*f*
of formaldehyde, aroylcarbinols as catalysts for, review on, 6159*h*.
with PhOH, kinetics of, 8737*a*
with sugars, mechanism of, 148*i*.
with urea, catalyst for, P 4512*h*
with urea, kinetics of, 1247*a*.
of furfuryl alc., P 6464*a*.
of furfuryl alc. polymers with phenols, P 2037*a*.
of guanidine with diesters of phthalic acid, 6170*e*.
of hexachlorocyclopentadiene with trichloroethylene, 4231*b*.
hydrogenation and, of CO with $C_2H_4$, 4829*f*.
in inorg. chemistry, 1669*h*, 5685*d*.
intermol., of alkyl derivs. of aromatic hydrocarbons, P 1440*b*.
of β-ionone and homologous ketones with oxalic acid esters, 2587*d*.
of isothiocyanates with oximes, 4232*e*
of ketones (unsymmetrical), 643*g*.
of ketones with phenolic ethers, 2970*e*.
of lignin in paper-pulp digestion, 8675*i*
macromol. compds. by, 5262*f*.
of 2′-methyl-3′,5′-dinitrochalcone with di-Et malonate, 4239*b*.
of methyl 2(1 *H*)-pyridones, 6627*f*.
of molybdate $MoO_3$ anion in molybdic acid titration, 4182*g*.
of olefins on $Al_2O_3$ catalysts, 1250*e*.

of vitrified ceramic ware, 9403*i*.
of water, mol. complexity and, 475*h*.
in water vapor detn. in air, 1288*c*.

**Conductivity cells.** See "measurement of, cells for" under *Conductivity, electric.*

**Conductors, electric.** (See also *Cables; Copper; Copper alloys; Insulation, electric; Insulators, electric; Wire.*)
aluminum-Mg alloy for, P 9020*e*.
bearings, P 7895*g*.
ceramic refractory, P 5919*d*.
coatings, measuring porosity and thickness of, 9481*h*.
coating with, on refractories, etc., P 3587*f*.
equation of state of, 4916*c*.
fabric, P 6528*e*.
from fabrics and fibrous and porous materials, P 6528*f*.
flexible, P 4589*e*.
insulated, P 5518*f*.
insulated tinsel, P 5518*f*.
insulated with silicone compd. and polytetrafluoroethylene tape, P 2040*e*.
laminated panel contg. C black, P 2526*f*.
rubber, 1207*h*, 8722*h*.
sealing compns. for spot-welded joints, P 7896*d*.
for sealing to glass, P 1274*f*.
semi-, 5659*g*.
bombarded by deuterons, 4095*g*.
bombarded by neutrons, 8858*b*.
cond.-pressure-temp. relations in, 4095*h*.
Cu phthalocyanine and phthalocyanine as, 3731*h*.
corrosion through, 8340*a*.
dyes as, 1272*g*.
elec. conduction and photoelec. effect in, 2083*f*.
electronic, 2083*e*.
Ettingshausen and Nernst effects in, 4066*i*.
Ge as, 2877*f*.
liquids, 8780*d*.
$Mg_2Sn$ as, 475*a*.
oxides and spinels as, 4534*c*.
photoconductivity of infrared-irradiated PbTe, effect of room-temp. radiation on, 4140*d*.
photoeffect (external) in, 482*d*, 8846*c*.
photoeffect (internal) in, effect of dyes on, 7349*d*.
photoelec. emission and contact potentials of, 1256*h*.
physics of, 1641*g*.
rectifiers, theory of, 8910*h*.
temp. dependence of resistivity of, 5280*h*.
temp. dependence of work function of, 4555*d*.
temp. dependence of work function of, effect of surface states on, 4555*f*.
variation of Hall effect and thermoelec. power with vapor pressure of, 4555*c*.
sepn. from nonconductors, P 4906*h*.
silver bromide as, 2071*a*.
standards for, 4202*h*, 4203*b*, 4615*d*.
super-, effect of current magnitude on bolometer of, in transition region, 2044*c*.
heat capacity of, 6069*f*.
high-frequency of, 8771*f*.
intermediate state and magnetization of, 4069*ad*.
magnetic field penetration in, 3673*f*.
thermal cond. of, 5250*c*.
of V, crit. fields of, 4067*a*.
temp. effect on resistance of, 2501*c*.
water-impermeable, coating for, P 2104*i*.

**Conduits.** (See also *Gas pipes; Pipes; Water pipes.*)
for corrosive fluids, P 3669*cf*.
flow of fluidized solids in, 6475*h*.
paper, resin-impregnated, P 9448*i*.

**Condurango,** identification of fluidext. of, 9371*h*.

**Conessi.** See *Holarrhena antidysenterica*

**Conessine,** detn. in kurchi bismuth iodide, 3564*g*.
irritant action of, compared with isoconessine and neoconessine, 2327*d*.
pharmacology of, 1868*h*.
and its use in treatment of amebiasis, 8101*a*.

**Confectionery,** chemistry in industry of, 8573*h*.
colored casings for melted hard, P 7605*d*.
fat detn. in caramels, etc., 6433*g*.
flavoring material for, goldenrod oil as, 2372*d*.
flavoring materials for, 8573*f*.
flavoring of, 8573*g*.
from inulin-contg. tubers or roots, P 6334*d*.
marshmallows, waterproofing of, P 6759*f*.
milk (powd.) compn. with wheat germ for use in, P 329*i*.
mint use in, 8573*c*.
prepn. of sugar candy in presence of $MnSO_4$, 2005*f*.
raw materials for, from cacao, P 6759*c*.
from seed of *Cucurbita pepo*, 9285*i*.
vitamin $B_1$ in, stability of, 9276*a*.
wastes from, lactose manuf. from, 1119*d*.

**Configuration.** See *Chemical constitution;* and "structure of" under *Molecules.*

**Confused flour beetle.** See *Tribolium confusum.*

**Congelation.** See *Crystallization; Solidification;* etc.

**Conglomerates,** deformation of quartz, in Norway, 76*f*.
of Nova Scotia (Gays River), 5347*d*.
of U.S.S.R. (Ufa, Tataria), 6954*c*.

**Congo blue.** See *Trypan blue.*

**Congo esters.** See *Copals.*

**Congoic acid,** and methyl ester, 9052*a*.

**Congo red,** absorption by cellulose, 4848*f*.
adsorption by starch, 8715*g*.
as adsorption indicator in argentometric titrations, 61*a*.
antagonism to curare, 3102*g*.
cornea tolerance to, 3110*g*.
disappearance from blood serum, effect of persiston on, 6311*h*.
effect on hyaluronidase and staphylocoagulase, 3855*h*.
effect on lysozyme, 3855*g*.
prepn. of, electrolytically, 4961*f*.
sepn. from malachite green by paper chromatography, 8777*b*.

**Congo violet,** precipitation of serum proteins with, 9236*e*.

**Congress of Utrecht,** 7761*i*.

**Conhydrine,** *d*-, and *l*-, and their salts with *d*- and *l*-6,6′-dinitrodiphenic acids, 7937*b*.

**Coniferaldehyde, methyl-*,** 1181*i*.

***p*-Coniferaldehyde.** See *Ferulaldehyde.*

**Coniferin,** hydrolysis (alk.) of, 5763*i*.
in plants, 2283*b*.
as substrate in lignin formation by oxidases, 2282*d*.

**Conifer needles.** (See also *Pine needles.*)
alcs. (polyhydric) in cellulose prepn. from, 7227*a*.
copper and Zn in, in geochemistry, 3321*d*.
extn. of active substances from, P 6371*f*.

**Conifers,** classification of, 9440*e*.
copper and Zn in cones of, in geochemistry, 3321*d*.
heartwood exts. from, 7679*e*.
oils of—see *Oils.*
resin acids of, 6185*d*.
tracheid of, fine structure of wall of, 2676*g*.
wood—see *Wood.*

**Coniferyl alcohol** (*3-(4-hydroxy-3-methoxyphenyl)-2-propen-1-ol*), color reactions of, 1181*i*.

**Coniferyl series,** constitution of, 2600*f*.

**Coniine, *d*-, identification of,** 8365*e*.

**Coniophora cerebella,** control of, components of coal-tar oil in, 4417*h*.

**Conium maculatum.** See *Hemlock (poison).*

**Conjugase,** of chicken pancreas, specificity of, 9111*b*.
in liver, effect of pteroylglutamic acid on, 5098*d*.

**Conjugation.** (See also *Double bonds;* and "diene" under *Synthesis.*) 3373*f*.
bromination and, in olefins, 109*i*.
color and, in β-carotene, 493*e*.
conjugated systems, 9059*h*, 9060*d*.
detn. of, in drying oils and their fatty acids, 4025*h*.
diene, triene and tetraene, in dehydrochlorination of chlorinated soybean oils, 5204*h*.
electronic structure and, 3713*ab*, 5302*i*, 6512*c*.
electronic structure and interaction of two conjugated systems, 8223*h*.
electronic structure, color and, in hydrocarbons contg. a double bond, 4569*g*.
electron transfer in compds. contg. double bonds and, 1012*b*.
energy of, of bonds, 8885*i*.
free radical reaction with ethylenic double bonds and, 5733*b*.
hyper-, 556*i*, 6583*e*.
autoxidation of olefins and, 5733*d*.
chem. properties and, in diolefins, 5733*d*.
in cyclohexene and cyclohexadiene derivs., 7416*f*.
electronic structure, chem. constitution and, 41*f*.
halochromism and, of Me groups, 8392*b*.
of Me groups in aromatic heterocyclic nuclei, effect on diamagnetism, 8767*f*.
of org. sulfides, 7410*e*.
in reaction of alkyl bromides with $Hg(NO_3)_2$, 557*h*.
in ketones, effect on spectra, 4575*d*.
of linoleic acid during autoxidation, 9488*e*.
of olefinic bond with aromatic nucleus, 165*g*, 1756*i*, 2181*e*.
phys. properties of compds. with, 2501*i*, 2592*a*.
Raman spectra and, 7345*i*.
scintillation property and, 4111*e*.
spectra and, of polyenes, 1264*f*
of sulfones, 7411*b*.
tetraenoic and trienoic, of arachidonic acid and of oxidation products of linolenic and linoleic acids during alkali isomerization, 5974*d*.

**Conjunctiva.** See *Eyes.*

**Conjunctivitis,** vernal, urinary 17-keto steroids in, 7126*g*.

**Conopia exitiosa.** See *Sanninoidea exitiosa*

**Conorhynchus mendicus,** control on beets, 9346*h*.

**Conotrachelus nenuphar** and(or) **Plum curculio,** control of, 3139*h*, 6777*i*, 9329*h*.
control of, on apples, 804*c*.
effect on parasitization of oriental fruit moth, 1144*a*.
on peaches, 1143*g*, 4417*a*, 5527*i*, 7630*g*, 9348*g*.

**Conquinine.** See *Quinisine.*

**Conserves.** (See also *Food, Jelly, Marmalades.*)
analytical and organoleptic findings on, 6747*d*.
ash detn. in jams, 2547*h*.
cans for, testing laquers for, 6432*e*.
coatings of cans for, detn. of Sn in, 9275*c*.
grape, DDT residues in, 6328*h*.
pectin effect on cranberry and red currant, 3536*h*.
prepn. of, 5507*g*.
reducing sugar detn. in, 7153*b*.
strawberry, measurement of solid content of, with hand refractometer, 5879*g*.
strawberry, reduction of color loss in, 1500*i*.
vitamin C in orange and tomato, 3538*c*.
vitamin C retention in fruit, 2709*b*.
water-insol. solid detn. and, 8572*a*.

**Consistency.** (See also *Viscosity.*)
measurement of, of aircraft lubricating [illegible]
of coatings, 873*f*.
of incendiary gels, 4015*a*
of paints and enamels, 4
of petrolatum and waxes,

**Consistometers.** (See also *Viscometers.*)
for rennet curd, 4393*i*.
**Constantan,** elec. resistance of, effect of pressure and temp. on, 5679*b*.
**Constants.** (See also *Bonds; Dielectric constants; Fine-structure constants;* etc.)
atomic and nuclear, values of, 8842*h*.
atomic, changes and additions in consistency diagram of, 4948*c*.
atomic, formulas of interpolation for detn. of, 7815*d*.
book: **Tables de constantes et données numériques. T. 2. Constantes sélectionées physique nucléaire,** 948*c*.
electrochem., effect of new elec. units on, 2101*f*.
**Constitution.** See *Chemical constitution.*
**Contact angles,** hysteresis of, 1239*f*, 1240*a*.
imaginary, Jones-Ray effect and, 8234*f*.
measurement of, of chromate cleaning mixt. contg. HF against glass, 4599*f*.
of small drops, 17*f*.
surface structure and, 1239*d*.
of tritolyl phosphate on calcite, Cu and quartz, 8234*f*.
of water and water vapor with leather, 3639*i*.
of water with Fe or Zn coated with adsorbed org. compds., 28*e*.
with metals or sulfides, effect of gases on, 2485*h*.
with paraffin wax, 1239*c*.
**Containers.** (See also *Ampuls; Bags; Barrels; Bottles; Cans; Ceramic ware; Cylinders; Enameled ware; Flasks; Glass; Hollow articles; Kettles; Packaging; Tank cars; Tubes.*)
bacterial growth in water stored in glass, 1328*f*.
for baking bread, coatings for, P 4396*f*.
for bituminous substances, coatings for, P 907*f*.
book: **Vorschriften und Regeln der Technik fur Druckgefässe,** 5648*g*.
bottle caps—see *Bottle caps.*
calcium sulfate and $Cr_2O_3$ crusts on glass, removal of, 6876*c*.
cells, for spectroscopic examn. of volatile liquids, 6472*i*.
from cellulose acetate, 9522*e*.
closures for, P 8744*f*.
cork compn for, P 4518*i*.
from peptized plasticized rubber compns., P 2025*c*.
concrete storage tanks for refrigeration plants, deterioration of, 8637*c*.
decoration of metal, 871*i*.
for dyeing—see *Dyeing apparatus.*
for feeding stuffs, effect on bleaching and aroma of contents, 1880*a*.
for fermentation—see *Fermentation.*
fiberboard, effect on storage life of army biscuits, 778*e*.
flow from tanks, nomographs for, 4906*b*.
for foods, coatings for, P 2813*f*, P 8576*e*.
cornstarch size as allergen in, 1122*g*.
gelatin base coating for, P 8576*d*.
heating rates of food, 1491*i*.
inks for printing on waxed, 4870*i*.
rodent urine detection on, 323*h*.
for fruit juices, 8571*g*.
for fruit juices, from Al and Al alloys, 1877*f*.
for fuels and oils for aircraft, coated or lined with polyamide mixts. with rubberlike polymers, P 6457*b*.
for fuels, fitting compn. for, from butadiene-acrylonitrile elastomer and phenolic resin, P 2807*c*.
interliners for, P 6466*e*.
for rockets, 9449*i*.
ghee storage in, 6327*f*.
glass for, 2748*b*.
glass for, effect of rinsing on chem. durability of, 3578*i*.
for hydrocarbons, self-sealing, P 7668*g*.
for hydrogen peroxide, 5553*g*.
for insecticides for aerosols, 7625*c*.
insulating materials for, 6761*g*.
leaks in—see *Leaks.*
level of material in—see *Level.*
lining(s)—see *Lining(s).*
oil tanks—see *Petroleum.*
for petroleum liquefied gases, 2412*d*.
for pickling—see *Pickling.*
from plastic sheets, formation of, 6862*c*.
pressure, creep in design of, 8216*a*.
prestressed shells for, 8215*i*.
standards of A.S.T.M. for, 4202*bdi*.
with thick walls, 7271*g*.
reaction—see "app. for effecting" under *Reactions.*
for rubberlike tacky materials, P 1212*d*.
salt-bath, 4990*i*.
sampling app. for—see *Sampling apparatus.*
sealing of—see *Sealing compositions; Seals.*
for shipping, standards and definitions of terms for, 4787*f*, 4788*c*.
sodium hydroxide preservation from contamination in metal, P 1882*i*.
for sodium (purified), 8762*a*.
for standard electrode, P 6097*f*.
standards for, 4399*i*.
stoppers for—see *Stoppers.*
tanks for brine and ammoniacal liquor, 99*h*.
thermal insulation of process vessels, expansion and, 5236*a*.
tin plate for—see *Tin plate.*
vacuum—see *Vacuum containers.*
for water—see also *Water, potable and industrial.*
waterproofing of, with rubbers, 4884*h*.
water tanks, cathodic protection of, anodes for, 6141*g*.
water tanks, degreasing of, P 6966*i*.
**Contarinia pyrivora** and(or) **Pear midge,** control of, 9348*c*.
**Contraceptives,** aliphatic hydroxy compds., P 4818*i*.
**Contractin,** from muscle exts., 2258*e*, 6253*h*.
**Contraction,** of cellulose, 7680*f*.
of cement mixts., 2393*d*.
on calcination, 3165*b*.
humidity and, 4825*c*.
of fibers, ion exchange and, 468*g*, 8237*g*.
of gels, 922*f*.
of gels of polymeric acids by ionization, 8803*b*.
of hardboard, 8079*i*.
of liquid mixts., foam formation and, 8779*c*.
of magnesia during calcination, 3156*e*.
measurement of, of molded plastics, 4787*i*.
measurement of, of synthetic resins during hardening, app. for, 1213*a*.
of multivalent filamentous mols. with ionization, 8812*e*.
of polymers (oriented), 2810*e*.
of protein fibers by heat, 468*c*.
of refractories during heating, 3163*d*.
in sintering of metals, 7391*b*.
of wood and paper and their control, 5941*b*.
**Contractometer,** for electrodeposit stress, 5315*c*.
**Contrainsulin.** See "hormones of anterior lobe of" under *Pituitary gland.*
**Contrast media.** See *Radiography.*
**Control apparatus.** (See also *Thermoregulators,* etc.)
analytical instruments in automatic, 8213*b*.
for electroplating, 7352*e*.
for high pressure valves, 4523*f*.
infrared gas analyzer, 4054*g*.
for liquid level—see *Level.*
for object stage in electron microscope, P 3669*a*.
photoelec., 6871*i*.
for pickling systems, 7399*f*.
using infrared spectrometry, P 6873*d*.
in water and sewage plants, maintenance and repair of, 6344*c*.
**Convallaria,** identification of fluidexts. of, 3145*h*.
identification of tinctures of, 4426*b*.
*majalis* (*lily of the valley*), active principles from, 3976*d*.
cardiotoxins of, effect on *Daphnia,* 8616*f*.
concentrate of, P 6371*f*.
sodium α-naphthylacetate effect on life of cut, 5092*b*.
**Convallatoxin,** cardiotonic properties of, 5116*e*.
isolation from *Convallaria majalis,* 3976*d*.
triacetate, 1431*a*.
**Convallatoxin acid*,** triacetate and its Me ester, 1431*a*.
**Convalloside,** 818*c*.
**Convection.** See *Flow; Heat.*
**Conversion.** See *Heat of conversion;* for internal conversion, see *Gamma-rays.*
**Conversi-Pancini-Piccioni effect,** 34*c*.
**Converters.** (See also *Electric converters;* and "catalytic, app. for effecting" under *Reactions.*)
flow in side-blown, 7878*f*.
lining compn. for, P 3988*d*.
for nitrogen-low steel, 3327*e*.
**Conveyers.** (See also *Belts; Charging apparatus.*)
for catalysts through hydrocarbon cracking zone, P 3187*i*.
disperse-system movement in screw, 6872*b*.
for heat-treated shells, etc., P 8*f*.
**Convulsants.** (See also *Anticonvulsants; Antispasmodics.*)
coramine and metrazole actions as, locus of action of, 7137*d*.
effect on carbonic anhydrase, 5865*f*.
**Convulsions,** acetylcholine and, 6744*i*, 9260*h*.
acid-base changes and, 308*c*.
from ammonium chloride injection, 2302*g*.
audiogenic, effect of anticonvulsants on, 2699*h*.
carbon dioxide effect on, 4770*d*, 9261*f*.
effect on cortins and ketosteroids in urine, 9235*h*.
electrically induced, decamethonium iodide in controlling, 6739*i*.
effect of acetylcholine, amyl nitrite, benzedrine and prostigmine on, 2327*h*.
effect on water metabolism in psychotic patients, 9234*g*.
elec. patterns in, production of, 5122*e*.
elec. shock, effect of anticonvulsants on threshold for, 3101*b*.
epileptic, and convulsions from phenolic compds., 305*c*.
flour producing running, in dogs, 2707*g*.
insulin, 9247*b*.
lactates, phosphates and pyruvates in brain in, 9202*e*.
metrazole, action of, 8553*c*.
from nitrogen chloride, effect of $CO_2$ on, 3106*d*.
potentials of, effect of anoxia, asphyxia and $CO_2$ on, 9260*d*.
production of unilateral epileptiform, by benzedrine, 1865*i*.
proprioception and, 7134*g*.
running fits in dogs, brain in, 8047*f*.
from strychnine, atropine antagonism and, 314*f*.
effect of adrenaline and pitressin on, 315*h*.
effect of prostigmine on, 2327*h*.
temporal and spatial distribution of changes in brain during, 9238*g*.
threshold for, with and without diphenyl hydantoin, effect of vasomotor drugs on, 4765*e*
of epileptics and nonepileptics, 9231*g*.
in normal and desoxycorticosterone-treated animals, cations in blood plasma and brain in relation to, 7146*a*.
**Cooking,** of beef, effect on protein biol. value, 5510*b*.
of cabbage, effect on vitamins, 9288*c*.
of chili peppers, effect on vitamin C, 1121*h*.
of corn, effect on vitamin content, 9288*c*.
of cowpeas, effect on vitamin content, 1121*e*.
effect on vitamins $B_1$ and C in Lima beans and soybeans, 1121*f*.
of eggs, effect on folic acid content, 4782*i*.
with electronics, effect on food nutritive value, 4779*e*.
of foods of the Punjab, effect on vitamin $B_1$, 8565*e*.
hydrolysis of vegetable proteins due to, 8572*g*.
of mangos and papaya, effect on vitamin C, 9276*h*.
of milk, effect on acid formation in curd, 9283*c*.
of peaches, effect on carotenoids and vitamin C, 3535*h*.
of potato pancakes, fat losses during, 6754*f*.
with radar energy, 1493*a*.
of rice, effect on vitamin $B_1$, 6755*b*, 7595*c*, 8065*i*.
of sausage meat, effect on vitamin content, 9285*b*.
of soy grits, effect on proteins and vitamins, 1495*b*.
of spinach, effect on vitamin content, 9288*f*.
vanilla flavor (synthetic) for, P 332*b*.
of vegetables (Italian), effect on vitamin $B_1$, 6753*i*.
**Cooking utensils.** (See also *Enameled ware.*)
cladding of, P 6564*h*.
coating of, with silicones, P 5634*d*.
effect of Al alloy, on vitamin C in foods, 5125*e*.
of silicates, raising fire-resistance of, P 5166*f*.

silicone-grease compns. for coating, 3544*e*.
stainless steel, effect of org. acids on, 2707*a*.
for starchy and similar materials, P 6448*f*.
**Cooling.** (See also *Refrigeration;* and "low" under *Temperature.*)
of absorbers for hydrocarbons from natural gas, 7220*ef*.
of absorption oils, $C_3H_8$ in, 382*g*.
of adsorbent beds, 1253*g*.
of anode flame in C arc, 4145*d*.
antifreeze substances for—see *Antifreeze substances.*
of blast-furnace hearths, 4612*ef*.
of bone char, 8649*i*.
of butadiene and butadiene-styrene polymers, 8191*e*.
of butter, effect on quality, 5877*g*.
of camptonites from Tyan-Shan, U.S.S.R., 6128*g*.
of ceramic ware, swelling during, 4823*e*.
of coke—see "quenching" under *Coke.*
of cows with mist, effect on body temp. and milk production, 6775*b*.
curves—see also *Thermal analysis.*
curves, accuracy of, 9001*e*.
curves, app. for detn. of, 8754*g*.
effect on elasticity of rennet curd, 4394*c*.
of flue gases in regenerating catalysts from conversion of hydrocarbons, P 1956*c*.
of fluidized solid reactor beds, P 6478*a*.
of fruits and vegetables prior to nonrefrigerated storage, 9288*f*.
of fuel vapors in cylinder, increased antiknock effect by, 7674*f*.
of gases on mixing, 8773*c*.
of gas (fuel), spray scrubbers in, 8119*g*.
in gas-mixt. fractionation and purification, P 3176*d*.
of glass—see *Glass.*
of glass tanks by air, 9399*c*.
of lead chambers for manuf. of $H_2SO_4$, P 6793*h*.
liquids for, P 661*g*.
of engines, fuel knock-limited performance of, 839*i*.
for machining metals, P 6819*b*.
stabilization of halogenated-hydrocarbon, P 5887*h*.
of lubricating grease in enclosed system, P 5940*e*.
from magnetization of ferromagnetic alloys, 3673*d*.
of metals, P 6144*a*.
of milk (powd.) *in vacuo*, P 1124*a*.
in petroleum cracking, solar oil in, 3601*g*.
rate of, effect on lubricant properties at low temp., 7675*c*.
rate of, of basaltic magmas, crystal size and distance from cooling wall in relation to, 6127*g*.
of reactors, 2823*g*.
rocket-motor, 4619*h*.
of rubber (reclaimed), refining mill with compressed air, P 6459*a*.
of steel wire with compressed air in patenting, 8335*d*.
sub-, of liquid metals, 8776*h*.
subzero metal treatment by—see *Metals.*
super—see *Supercooling.*
of tea oil (hydrogenated Chinese), 5207*d*.
of tools for cutting water-sol. crystals, P 2343*g*.
water for, control of pH in, 3184*h*.
in nuclear-fission operations, purification of, 8079*f*.
phosphate detn. in, 1887*c*.
treatment of, 7169*d*, 8584*c*.
water systems for, prevention of scale formation with liquid $SO_2$, 8584*b*.
**Cooling apparatus.** (See also *Condensers; Refrigerating apparatus;* and "-exchange app." under *Heat.*) P 2048*d*.
for butadiene and butadiene-styrene polymers, 8191*e*.
for cellulose solns., P 6416*d*.
for coke—see "quenching" under *Coke.*
for electromagnetic app., P 6874*d*.
engine—see *Engines; Radiators.*
frost adhesion to, compn. for preventing, P 3949*f*.
for fruits and vegetables, 9288*g*.
for gases, P 8758*d*, P 8759*b*.
for glass—see *Glass.*
for hydrochloric acid manuf., 9391*f*.
multi-stage evaporative, 1616*g*.
scale formation in, 3952*h*.
scale removal from, 792*d*.
for sulfuric acid, 2743*c*.
towers, app. for injecting HCl into make-up water of, P 3250*g*.
calcn. of size of, 4902*c*
towers, maintenance of, 1128*g*.
**Coördinated compounds.** See *Chemical compounds.*
**Coördination.** (See also *Bonds; Valency.*)
chelation, covalency and, 8941*g*.
**Coördination compounds.** See *Chemical compounds.*
**Coördination number,** of bismuth in airol and dermatol, 1354*d*.
of cadmium complexes, 5692*a*.
in heteropoly acids, 8938*d*.
relation to heat capacity of solids, 6499*h*.
**Copalquin,** bark ext., opium adulteration with, 8616*c*.
**Copals.** (See also *Dammar; Resins;* etc.)
adhesive from, P 7756*c*.
Congo, 9051*h*.
formation, classification, properties and uses in varnishes of Congo copal and, 1198*g*.
jelutong, acid nos., ester nos., formation and varnishes of, 1198*i*.
kauri—see *Kauri.*
Manila—see *Resins.*
phenolated, adhesives from Neoprene-AC and, 7743*i*.
running or thermal processing of, 6837*g*.
**Copiapite,** magnesium-high, from Vedrin, Belgium, 72*h*.
**Copper.** (See also *Sprays.*)
absorption by clays and soils, 7618*e*.
absorption by humic acid and soil, 7618*d*.
adhesive for, 9521*d*.
adsorption by $Fe(OH)_3$, 2544*b*.
alpha-ray stopping power of, 4124*i*.
amalgamation by Hg-salt solns., 6520*e*.
annealing of, antioxidant for, P 6966*a*.
annealing of, in protective gas, 3757*d*.
annealing twins in, 7887*f*.
anodes of, contg. S, anodic behavior of Pd in, 2519*c*.
anodic and cathodic behavior of, 8913*i*.
anodic behavior of, 47*a*, 7792*f*.
anodic soln. in $H_3PO_4$, texture and, 5677*c*.
anodic soln. of textured, potential of, 6523*c*.
anthocyanin formation in *Spirodela oligorrhiza* and, 7550*g*.
arsenical, of Aegean region, 2825*h*.
atomic wt. of, 8764*h*.
bactericidal action on *Vibrio cholerae,* etc., 9154*h*.
in beer, 1147*d*.
biogeochemistry of, 3321*c*
bismuth-contg., working behavior of, 83*e*.
bismuth embrittlement in deoxidized, elimination by Li, 5718*f*.
bismuth embrittlement of, 6555*d*.
blackening of, P 3311*g*, P 7404*f*.
in blood, of *Brucella* immune and normal, rabbits, 9228*e*.
of children, 5475*g*.
in Grave's disease, 7571*c*.
in kala azar, 3923*f*.
of protein deficient and Fe-deficient swine, 2292*c*.
during sexual cycle of *Torpedo marmorata,* 8560*h*.
bond with C, stability of, 8940*i*.
book: Electro plating and Anodising, 956*d*.
bound by protein in biuret reaction, 4305*i*.
in brain, 6719*h*.
in butter, and effect of washing thereon, 8568*i*.
in calcium gluconate prepn., 8614*h*.
in carboxypeptidase from pancreas, 3859*h*.
catalysis by, deactivators for, 6063*c*.
catalysis by, of bromination of $AcCH_2CO_2Et$, 4642*d*.
as catalyst alone and with Cr in hydrogenation of bis(alkenyl-2-alkoxyphenyl) carbonates, P 4299*b*.
as catalyst in bromination of 2-carbethoxycyclopentanone, 3273*e*.
in Cannizzaro reaction, 4651*e*.
in chlorination of methyl silanes, P 3441*e*.
in chlorite manuf., P 3159*i*.
in decarboxylation of 2-furanacrylic acid, 2615*d*.
in decompn. of $NH_3$, 8827*f*.
in decompn. of $H_2O_2$, 5553*h*.
in decompn. of oxalacetic acid, 5839*d*, 6497*b*.
in dehydration of EtOH, 2498*d*.
in dehydrogenation and racemization of *sec*-BuOH, 1249*c*.
in dehydrogenation of alcs., 1635*c*.
*as catalyst* in dehydrogenation of benzaldehyde oxime, 5760*f*.
in dehydrogenation of $Et_2N(CH_2CHMeNH_2)$, 133*f*.
in dehydrogenation of piperazine, 1813*d*.
in diolefin manuf. from monoölefin, P 7950*c*.
in ester-exchange manuf. of esters of secondary and tertiary alcs., 7951*f*.
in esterification of EtOH, 8252*e*.
in hydrogenation of 2-furaldehyde, 1719*a*, P 7049*a*.
in hydrogenation of org. compds., 2218*i*.
in H-atom recombination, 8251*d*
in isomerization of dichlorobutenes, 663*f*.
in isomerization of β-hydromuconic nitrile, P 6647*f*.
in oxidation of gasoline, deactivation of, 5932*c*.
in oxidation of MeOH, 8074*c*.
in oxidation of org. substances, deactivation by amino aldehyde-amine condensation products, P 4460*a*.
in oxidation of paraffin oil, 2411*b*
in oxidation of vitamin A in soupfish shark-liver oil, 9379*h*.
in polymerization of allyl esters, 8212*bh*.
in purification of fuel gas, 3172*i*.
in reaction of Ge with MeCl, P 2631
in reaction of Si with alkenyl chloride P 6220*e*.
in reaction of Si with MeCl, P 1051 2160*e*.
in reaction of Si with MeOH, 6647*d*.
in steam oxidation of ethers to aldehydes, P 8398*d*.
catalyst pellets of, P 1161*c*.
catalysts contg., P 7609*f*.
in dehydrogenation of isobutane 5382*e*.
in dialkyldihalosilane manuf., 4286*h*.
for hydrogenation of CO, P 48[illegible]
in hydrogenation of furan and derivs., P 4301*i*.
catalysts of $Al_2O_3$ and, in picoline manuf. from allyl alc. and $NH_3$, P 5426*i*
catalysts of $Al_2O_3$, Cr and, in dehydrogenation of 1,1-diaryl paraffins, P 2[illegible]
catalysts of Al, Fe and, in nitration of paraffins, P 4285*c*
catalysts of $H_3BO_3$, Fe, Mn and, alkali and temp. effect on hydrogenation of CO by, 2397*h*.
catalysts of Ca, chromite and, in hydrogenation of coal, 2404*d*
catalysts of Cr and, hydrocarbon oxidation on, 927*e*
catalysts of Cr, Co and, in hydrogenation of mixts. contg. higher alcs., P 5032*e*
catalysts of chromium oxide and, 6062*e*
catalysts of $Cr_2O_3$, ZnO and, in methane synthesis, 3352*a*.
catalysts of Co, $ThO_2$ and, in hydrogenation of CO, 2406*h*
catalysts of CuO and, in dehydrogenation of 2,3-butanediol, P 3811*h*
catalysts of Fe, kieselguhr, Mn and, in gasoline synthesis, CO adsorption by, 2413*e*.
catalysts of $PbCrO_4$ or $SnCrO_4$ and, in hydrogenation of $C_2H_2$ to $C_2H_4$, P 3833*i*.
catalysts of Pb, Zn and, in dehydrogenation of alcs. to aldehydes or ketones, P 4287*f*.
catalysts of Mg and, for hydrogenation and dehydrogenation, P 9430
catalysts of $H_3PO_4$ or $H_2SO_4$ and, in dehydration of hydracrylic acid, P 6221*i*.
catalysts of Si and, for reaction of hydrocarbon halides with Si, P 5517*b*.
catalysts of synthetic zeolite and, P 4791*i*.
catalysts of Zn and, in $NH_3$ reaction with aldehydes, P 1433*g*.
catalysts of Zn and, in hydrogenation of acetylenic alcs., 6969*i*
cathodes, chloropicrin reduction at, 8915*h*.
current growth and cathode spot in arc discharge with, 3704*e*.
in electrolytic reduction of 2-methyl-3-buten-2-ol and 2-methyl-3-butyn-2-ol, 994*g*.
hydrogenation and reduction on, 5677*b*

*cathodes*, in oxalic acid reduction, 49*e*.
in reduction of nitroguanidine or nitrourea, 4150*e*.
cation-exchanger dynamic activity toward, 3268*f*.
ceramic-molded-bodies contg., P 5566*a*.
in chem. engineering, 1*c*, 8745*c*.
chromatography on $Al_2O_3$, 8293*i*.
cladding with, on Cr-Ni alloys, P 6564*i*.
cladding with, on iron or iron-alloys, P 2154*b*.
in clays and sedimentary rocks of the Apennines, Italy, 978*h*.
cleaning antique, 3335*i*.
cleaning of, before electroplating, 95*b*.
cleaning of, from heavy-metal compds., P 7405*c*.
in coal, 1941*d*, 8639*e*.
-coated iron, in cladding Be-Cu alloys with precious metals, P 6966*b*.
-coated steel, brazing, soldering and welding of, 6561*d*.
coating of, P 1710*i*.
with Cr, Mo or W, 8903*h*.
with Pb alloys, P 556*c*.
with Ni, P 7893*c*.
coatings for, from glycerol α-allyl ether phthalate and succinate, 9480*h*.
coatings from, on electron-tube cathodes, P 2104*g*.
sprayed, 546*c*, 986*a*.
stripping from scrap, 3297*b*.
coating with, on ferrous metals, P 6564*g*.
on Fe and steel, P 555*h*, P 7895*f*.
on Fe particles, P 9022*d*.
on Ni alloy, P 5732*b*.
on nonconductors, P 1274*c*.
on plastics for electrodeposition, 8901*b*.
on steel, 3337*i*.
by vacuum evapn., P 104*d*.
coins, 3335*h*.
colloidal, in org. solvents, 6886*d*.
in coloring horizons of multicolored Permian sediments of Don Basin, 6130*d*.
coloring of, 4148*i*, 5352*h*.
color reaction of ions of, with azo dyes, 597*f*
complexes with conalbumin and siderophilin, 9211*d*.
with pyridine and benzoic, salicylic and acetylsalicylic acids, 70*b*.
with respiratory inhibitors, 8561*i*.
compression of, 4917*a*.
in concn. cells, 8286*g*.
corrodibility of foils of, 8327*f*.
corrosion inhibitor adsorption by, 6139*h*.
corrosion in metallic systems contg., inhibitors for, P 8349*c*.
corrosion of, 5722*g*, 5723*i*.
in $Ac_2O$ and glacial AcOH, temp. and, 6111*f*.
by butyl oil, 813*f*.
and its control in starch-sirup manuf., 889*b*.
detn. of rate of, 7401*c*.
by engine exhaust, 9016*i*.
by hydrocarbons and oxygenated org. compds., and effect of water thereon, 8128*d*.
by microorganisms, 98*d*.
in refrigerating app. by lubricating oils, 5177*h*
by S, anthraquinone as inhibitor in, 4207*h*
in $SO_2$, 101*g*.
by S in hydrocarbon oils, prevention by *tert*-butyl hydroperoxide, P 5582*f*.
underground, 6141*a*.
by water, 6343*h*.
corrosion of solder-coated, 4622*a*.
corrosion resistance to HCl, 550*a*
corrosiveness of S in motor fuels to, testing, 9426*b*.
couple with Sn, pectin gelation by, 3266*g*.
creep of, 4615*i*, 6555*f*.
in crops and soils and long-term fertilizing expts. of Cu, 4410*f*.
crystallochem. electronegativity of ion of, 8231*a*.
crystal orientation of cold-rolled and annealed strip, 2558*c*.
crystals (single) of, Co deposition on, 6063*a*.
$Cu_2O$ formation on, 2003*h*.
electron scattering by, 6907*g*.
crystal structure of, 6482*g*.
crystal structure of films of, 4066*a*, 5053*c*.
crystal structure of films of, on galena, 6483*e*.
deactivators for, P 3840*a*.
deficiency of, in acid soils and effect on Mn toxicity, 2349*i*.
effect on rate of wool growth and nature of fleece of Merino sheep, 4850*c*.
in oat nutrition, 2352*h*.
in plants, soil condition and, 7618*i*.
in strawberries, 9329*h*.
in subterranean clover, 4801*h*.
in tung trees, 3552*e*.
deformation and recrystn. of, 6956*d*.
deformation and stress of, 82*e*.
deformation (plastic) of, 83*c*.
depolarization (cathodic) of, 1663*e*.
deposits in boilers, effect on corrosion, 4995*g*.
destruction of, detn. of resistance to, 1299*c*.
deuteron bombarded, Mn from, 8266*h*.
deuteron bombardment of, angular distribution of neutrons from, 8866*d*.
deuteron bombardment of, neutrons from, 8866*h*.
diffusion between brass and, 1622*h*.
diffusion const., diffusion current and half wave of reduction of, 5327*b*.
diffusion in Al-Cu-Mg alloys, detection of, 9011*e*.
in galena, 6483*i*.
in Fe, 8334*f*.
in suspengel of bentonite, 7777*h*.
diffusion of ions of, in cellulose xanthate gel, 6048*f*.
diffusion of radioactive, during oxidation of Cu foil, 2851*b*.
in *Digitalis purpurea* leaves, 6703*i*.
displacement from soln. by Raney Ni catalyst, kinetics of, 928*c*.
displacement of ion of, by Ni and Cu removal from Ni-plating bath, 7796*i*.
drilling of, effect of liquids on, 7889*g*.
dust from S and, in *Sclerotinia sclerotiorum* control on beans, 2355*g*.
dust from S and, peanut treatment with, and Cu content of peanuts, 9322*f*.
effect on adrenaline and insulin, 742*c*.
on alcoholysis of penicillins, 1455*d*.
on Al-Mg-Zn alloys, 3333*h*.
on Alyce clover, crimson clover and soybeans, effect of liming on, 8593*c*.
on amino acids in legumes, 342*a*.
on bush beans, oats and potatoes on peat soils, 7623*a*.
on cast Fe, 2559*b*, 6553*i*.
on cast Fe bearings, 5716*i*.
on catalase inhibition by vitamin C, 1449*c*.
on catalyst in hydrogenation of CO, 2397*i*, 2398*b*, 2400*a*
on cell respiration, 6707*d*.
on corrosion resistance of Al-Cr-Mg-Si alloys, 549*b*.
on corrosion resistance of plated Duralumin, 2918*a*.
on creep in Pb alloys, 2563*a*.
on detn. of Cr, Mn and Ni in steel, 4598*f*.
on discoloration of canned fish, 8069*b*.
on dyeing of wool with chrome dyes, 5953*c*.
on forging, rolling and die-stamping of steel for bearing balls, 532*c*.
on grain growth in cast Al, 2143*c*.
on graphite form in cast Fe, 7395*a*.
on high-C Cr steel, 532*e*.
on high-Si cast Fe, 536*a*.
on intestine, 310*h*.
on Fe-Mn alloy for welding electrode, P 3344*c*.
on light sensitivity of AgCl, 6927*f*
on metabolism of Cu and P by milking cows, 9313*a*.
on *Mycobacterium smegmatis*, 5441*c*.
on Ni detn. in steel, 1284*c*.
on Ni plating solns., 2098*g*.
on oxidation of ferrous ions inhibited by sulfide, 1246*d*
on oxidation of molten Pb, 7881*g*.
on oxidation of Ni, 4619*f*.
in photometric detn. of Fe, Mo and Ni, 8298*f*.
on pig Fe castings, 1296*e*.
on plants in South Australian soils, 8590*i*, 8591*d*.
on plastic deformation of Al, 2557*h*.
on polarographic drop time, 1270*h*.
on *Proteus vulgaris* and *P. X19*, 1455*f*.
on reduction ability of whole and skim milk and cream, 9278*i*.
on AgBr emulsions, 4155*e*.
on spectrum of Al, 7338*d*.
on steel, 7397*e*.
on steel by powder metallurgy, 3755*i*.
on steel contg. Cr, Al and Si, P 3770*h*.
*effect* on steel corrosion by $NH_4NO_3$ solns., 5722*c*.
on steel resistance to tap water, 1301*d*.
on steel-wire patenting, 2558*c*.
on stress corrosion of Hy 43 and Igedur, 6961*f*.
on stress-corrosion resistance of Al-Mg-Zn alloys, 92*c*.
on vegetables, 1134*e*.
on velocity of hydrolysis of coconut oil, 8707*a*.
on viscosity of Al, 1701*i*.
effects of feeding to growing foals, 8467*a*.
in egg and its distribution during development of embryo, 3531*c*.
elastic and structural properties of, 9001*g*.
elastic consts. of, 2482*h*.
elasticity of, 3332*i*, 8864*e*.
at low temps., 7398*a*.
temp. and, 5715*c*.
elec. skin effect for, 5679*g*.
electrodeposition of, baths for, 2872*g*.
on chalcopyrite, galena and pyrite, 4146*d*.
colloids in, 1269*a*.
from cyanide solns., effect of pressure on efficiency of, 46*c*.
effect of addn. agents on polarization in, 950*e*.
from fluoborate baths, 8908*a*.
output and work of, 3725*h*.
from slightly sol. salts, 8905*d*.
from solns. contg. complex ions, 8901*b*.
on steel in test for cleanliness, 8899*g*.
electrodeposition of Ge and, 2876*b*.
electrodeposits (disperse) of, 5674*h*.
electrodeposits of, stresses in, 4147*f*.
electrodes in $Na_2SO_4$ soln., effect of org. compds. on capacity of, 5316*c*.
electroforming, P 8918*b*.
electroforming, rough and streaky deposits in, 7353*a*.
electron-bombarded, x-rays from, 1262*c*.
electron bombardment of, 4120*i*.
electron d. of, 31*g*, 4100*f*.
electroplating on, racks for, 8907*g*.
electroplating with, 2098*e*, P 2103*b*, P 4152*h*, P 6094*g*.
on Al aircraft components, 7833*f*.
on Al and Al alloys, P 4588*d*, 7833*h*.
analysis and control of cyanide solns. for, 7352*e*.
on bearings, P 7896*a*.
on Be-Cu alloy, 3727*h*.
carbonate removal from cyanide solns. for, 6520*h*.
on Cr-alloy wire for sealing to glass, P 8918*f*.
on Cr-Ni resistance wire, P 4153*f*.
destruction of cyanides from, by electrolysis, 6924*c*.
diaphragm tanks for, 8899*g*.
effect of high-frequency currents on, 2872*i*.
on fabric and fibrous or porous materials, P 6528*h*.
on ferrous metal, P 2878*h*.
H embrittlement in, 8903*e*.
by internal electrolysis, 8285*a*.
on piezoelec. crystals, P 1666*g*.
pitting prevention in, P 4152*bd*.
on powd.-brass parts, 6924*h*.
with reversing current, P 956*e*.
from Rochelle soln., 4147*g*.
on rotary-printing cylinders, P 7358*h*.
on steel wire, 4583*h*.
wastes from, effect on fish, 3125*b*.
wastes from, effect on sewage-treatment process, 3125*d*.
on Zn-base die castings, 3727*a*.
electroplating with brass and, P 4151*i*.
equation of state for, 4916*c*.
erosion (bridge) of contacts of, 1235*c*.
exchange between Cu ion and, 6890*g*.
films of active, 6531*i*.
films of, elec. resistance and optical properties of, 2830*c*.
films on ZnS, crystal growth in, 7286*a*.
flake and powders, pigment extenders for, in antifouling paints, 7715*c*.
fluorescent screen contg., P 7832*d*.
in foods, 323*d*.
in food, toxic effects and allowable limits of, 2705*i*.
friction between In and Zn and, 5273*c*.
friction (internal) in, and its systems with Al, Au, Sn and Zn, 3258*e*.
in fruits and vegetables, 9289*a*.
fungicides—see *Fungicides*.
galvanized-steel corrosion by, in hot-water system, 8334*a*.

gamma-ray absorption by, 1647*a*, 8867*a*.
gamma-ray-bombarded, neutrons from, 4116*b*.
gamma-ray bombardment of, thresholds for reactions in, 4115*g*.
gamma-ray cross section of, 3283*f*.
gamma-ray scattering by, 8266*a*.
gamma-rays from, after neutron capture, 5282*b*.
gas removal from, with N, 5715*d*.
glass coloration with, 8111*f*.
glass contg., luminescence of, 5671*h*.
glass surface contg., P 1934*g*.
grain coarsening in, 2558*a*.
grape court-noué and, 803*b*.
in graphite (Acheson), 8276*c*.
in grasses and herbs of hay plots, 4347*i*.
halite (blue) color from, 6116*i*.
hardening of, by cold-working under influence of surface-active substance, 2144*g*, 2145*g*.
heat transfer by radiation to surface of, 4039*b*.
hexadecane spreading on, effect of fatty acids on, 4055*b*.
hollow ware of, refinishing of, 5676*a*.
hydraulic fluid for use with, P 5519*c*.
hydrogen overvoltage on, in HCl contg. MeOH, 503*e*.
hydrogen overvoltage on, in MeOH solns., 4585*e*.
hypoglycemia from, 3515*g*.
industry in 1946, 2127*b*.
insecticides—see *Insecticides*.
ions of, as catalyst in the decompn. of DDT by bases, 3697*e*.
iron or steel cementation with, 2146*e*.
isotope of mass 61, γ-rays from, 935*b*.
isotope of mass 64, absorption of, after administration of high doses and after pretreatment with Cu or Fe, 3098*g*.
angular distribution of 2 annihilation photons from, 8869*c*.
annihilation radiation from, 4948*b*.
β-rays from, 3280*g*, 4119*h*, 4563*f*.
biol. action of, 1445*d*.
electron-positron ratio of, 1259*f*.
measurement of *K*-capture radiation from, 4131*c*.
measurement of concn. in organs, 1445*c*.
from $Zn^{64}$ by neutron action, 8266*b*.
from $ZnCl_2$ by neutron action, 2089*b*.
isotope of mass 65, packing fraction difference between $Pt^{196}$ and, 8869*d*.
isotopes of masses 61 and 64, decay of, 7329*i*.
isotopes of, natural abundance of, 1649*g*.
isotopes (radioactive) of, as indicators, 1452*c*.
in nutrition studies, 1841*i*.
in organs after administration in pregnancy, 9208*c*.
laccase action and, 6247*i*.
lead adsorption by, active centers and, 6028*c*.
lead sheet contg., P 6563*a*.
in leaves of forest vegetation, 725*f*.
liners for gas pipes, 3330*h*.
lining tubes of, with Sn, P 5730*a*.
liquid, limit of soly. in liquid $Cu_2S$, 3319*b*.
lithium treatment of, 3764*d*.
in liver, Co-deficiency ailment and, 8463*c*.
in liver of fetal and newborn lambs, 4361*c*.
luminescent materials contg., decay after cathode-ray excitation, 5670*c*.
luminescent prepns. contg., 5670*i*, 7347*e*.
magnetic moment and gyromagnetic ratio of, 5303*f*, 8262*g*.
magnetic properties of pure, cold-working and, 80*h*.
magnetic steel contg., P 6966*gh*.
magneto-optical rotation of cupric ion, 5244*a*.
mass photoelec. absorption coeff. of, 4834*d*.
in melanose control on grapefruit, 3553*g*.
metabolism inhibition by, mechanism of, 8063*g*.
metabolism of, during childhood and its relation to schizophrenia, 9237*c*.
effect of Mo on, 9187*e*.
in infancy, 8520*f*.
radioactive tracer studies in, 3098*e*.
metal crystn. on, 3684*g*.
in metallo-aromatic compd. prepn., 2592*d*.
minerals, blue colors of, 8982*f*.
of India, 525*c*.
minerals, of Kern Co., Calif., 4607*e*.
of Siskiyou Co., Calif., 2901*f*.
molds from, effect on aging and tensile properties of rubber, 2023*h*.
native—see *Copper ores*.
in Neoprene aging, 894*d*.
neutron absorption by, 8854*i*.
neutron binding energy of, and energy of γ-rays emitted on neutron capture by, 8861*c*.
neutron bombardment of, excitation functions for, and for production of $Cu^{64}$ from $Zn^{64}$, 4117*i*.
neutron cross section of, 3282*h*, 6506*a*, 6909*d*.
neutron scattering cross section and resonance levels of, 5286*c*.
in nutrition of sheep, 4354*e*.
in nutrition of tung tree, 1462*g*.
in ophiolitic rocks of Leghorn and serpentines of Tuscany, 6954*b*.
orange blemish from sprays contg., 9353*h*.
in orange leaves, phosphate fertilizers and, 9324*b*.
in orange (Valencia) leaves, effect of rootstock on, 3491*g*.
in org. chemistry, 2923*f*.
organotropism for lungs, nucleoproteins and, 3927*i*, 6732*h*.
oxidation of, 2851*a*, 4546*b*.
by air at high temps., 8930*h*.
by air, rate of, 8916*c*.
to CuO, 6063*e*.
theory of, 3272*g*.
oxidation of single-crystal film of, 6880*f*.
for oxychloride cement, P 833*a*.
oxygen-free high-cond., P 8345*g*.
in paints (antifouling), loss of, under raft and service conditions, 3631*i*.
in paints (antifouling), toxic and corrosive action of, 3963*h*, 8695*h*.
peanut-hay residue, effect on livestock, 9329*g*.
penetration into luminescent ZnS crystals, 7348*b*.
in perspiration, 4739*f*.
in petroleum, 2139*a*.
in petroleum, age and, 8654*h*.
phosphor of CdS and ZnS activated by, luminescent screens contg., P 1267*b*, P 1268*c*.
phosphor of CdS and ZnS activated by, temp. effect on cathodoluminescence of, 8280*a*.
phosphors contg., 1265*f*, 3723*c*.
Lenard, 8280*g*.
quenching of, 7347*c*.
stimulating action of exciting light in, 5668*f*.
temp.-stability of luminescence of, 3723*e*.
in phosphorus removal from steel, P 5729*d*.
photographic images of, in glass, 4965*g*.
in pigmentation of mammals, 3084*c*.
pigments, prepn. from roasted Cu pyrites, 2443*h*.
in plants and soil, 6772*b*.
polarization in sulfate solns. contg. oxidants, 47*e*.
polarography of, 504*c*.
effect of org. compds. on, 5316*a*.
in fused salts, 5314*i*.
polishing (electrolytic) of, 4960*e*.
porous structure from shot of, P 3049*b*.
potential against Ta in electrolytes, 2101*e*.
potential and soly. in Ni-plating solns., 4959*h*.
potential of cathode of, in mixt. of $CdSO_4$ and $ZnSO_4$, 2874*e*.
potential of foreign metals in solns. of ions of, 2875*b*.
powd., coating with $C_2H_4$ polymers and corrosion-preventing compns. from coated particles, P 6838*d*.
densification of compacts from, 2556*e*.
filters from, P 913*h*.
manuf. by electrolysis, 5313*g*.
manuf. of, P 2919*i*.
manuf. of friction materials contg., 80*c*, P 5519*a*.
mixts. with Al and Zn dusts for gold bronzing, 4489*h*.
mixts. with Pb, sintered product from, 9000*f*.
mixts. with Zn, sintering of, 7391*f*.
standards for, 4786*e*.
powder-metallurgy bodies from, recovering surface permeability of, P 8345*e*.
powder metallurgy of, 7879*e*.
powder metallurgy with Au and Ag powders, 7879*a*.
precipitation in $ZnSO_4$ soln. with ZnO, 2493*c*.
precipitation on Al from Cu salt solns., 4996*d*.
as promoter in hydrogenation of CO, 8117*b*.
protactinium deposition on, 7791*g*.
protection of, by powd. Zn and undecylenic acid, P 1710*g*.
protein contg., from blood serum, 4309*h*.
proton-bombarded, mesotrons from, 4112*b*.
reaction products with maleic anhydride polymers with Me methacrylate, 8202*d*.
reaction products with Me methacrylate polymers with α,β-unsatd. carboxylic acids, 8202*g*.
reaction with Sb, As, and Bi compds. in presence of alkali and alkali cyanides, 8951*i*.
with 1-iodo-2-methylanthraquinone, 7472*h*.
with pyrophosphates, 8935*f*.
recovery by ion exchange, 3668*e*.
recovery from waste alloys, P 7358*a*.
recrystn. of, 3757*e*.
recrystn. (secondary) in, 9004*a*.
removal from alloys, P 4626*e*.
from cognac alc., 5901*c*.
from methyl violet, 4175*c*.
from wine, 2734*d*.
from Zn-recovery electrolytes, P 7839*e*.
in respiratory enzymes and pigment, 1816*g*.
reviews on, 5355*h*, 6960*i*.
in rubber aging, 4870*h*, 9517*h*.
in rubbers and rubber-bearing, 2799*d*.
scale removal from, Isco-Virgo process for, 552*d*.
in scintillation counters, 4112*h*.
in sedimentary deposits of Ural-Volga petroleum region, 2138*g*.
sepn. from Co by chromatography, 3549*h*.
sepn. from fission fragments, 487*c*.
silica gel covered with ions of, luminescence of anthraquinone derivs. adsorbed on, 6085*h*.
silicone films on, frictional properties of, 7219*e*.
silver coating on, O diffusion through, 5267*g*.
silver diffusion into, effect of, on, 7393*h*.
slip of crystals of, 3329*f*.
slip of crystals of, and transient plastic deformation, 81*b*.
soil retaining power for, 3955*a*.
in soils, effect of decompn. of alfalfa meal and oat straw on soly. of, 1514*c*.
N metabolism of plants and, 3888*a*, of Sweden, 7615*f*.
solder for, low temp. properties of, 987*e*.
soldering (brazing) of, to metals, 1301*h*.
effect of temp. on, 7890*a*.
to Fernico, alloy for, P 4211*h*.
solid solns. with elements, lattice spacings of, 3084*h*.
with Au-AuCu$_3$, order disorder in, 3260*e*.
with Au, neutron studies of order disorder in, 4130*i*.
with Fe, 1300*h*.
soly. in Al, 2561*a*.
soly. in Hg, 7880*f*.
soln. in $(NH_4)_2S_2O_8$ solns., kinetics of, 1245*c*.
soln. of, catalysis by Cu and halogen ions, 6496*f*.
specifications of A.S.T.M. for various kinds of, and for products thereof, 4202*h*, 4615*d*.
spectral lines of, relative intensities of, 1652*i*.
spectra of, from Durulumin and steel electrodes during heat-treatment, 5694*f*.
spectrum of, 7858*h*.
in speiss formation, 1696*d*.
stearic acid films on, 7769*f*.
in steel, corrosion and, 5722*i*.
*Streptomyces griseus* requirements for, 1456*i*.
sulfur affinity for, temp. effect, 2558*f*.
in sulfur removal from synthesis gas, P 7214*c*.
sulfur resistance of, 3337*f*.
surface area of, 8325*d*.
surface energy and tension of, 5653*a*.
surface tension of, 2558*b*, 8255*e*.

aluminum-Mg-Zn-, 2567*e*.
for casting and forging, 2147*d*.
coating with Al-Zn alloys on, in corrosion protection, P 990*g*.
D.I.N.E. 1724, 7886*f*.
hardness and tensile properties of pressure-cast, 7888*c*.
wrought, 3333*h*.
aluminum-Mn-, 4204*b*.
aluminum-Ni-, and Sn-, elastic martensitic crystals in, 6880*h*.
aluminum Si, 91*a*.
analysis for Cu, Fe, Mg, Mn and Si, 8307*c*.
for bearings, P 6145*h*.
aluminum-Ag-, hardenability of, 1703*c*.
aluminum-Ag-Pd-, for jewelry, P 8349*a*.
aluminum-Zn-, and Zn-, cold-rolled, 1703*f*.
aluminum-Zn-, impact testing of, 7886*h*.
aluminum-Zn-, reaction with Fe, 2148*e*.
amalgams, cathodes of, 6052*b*.
analysis of, for Pb and Ni, 968*f*.
analysis of, lab.-cast pin for spectrographic, 8952*a*.
antimony-, 7394*a*.
antimony detn. in, 2543*a*.
antimony-Pb-Sn-, Cu removal from, P 3341*d*.
antimony-Pb-Sn-, sepn. by fractional crystn., P 6145*e*.
antimony-Mn-, magnetic interactions and magnetic susceptibility of, 4911*g*.
arsenic detn. in, 1681*f*.
beryllium-, analysis of, 8965*e*.
cladding, with precious metals, P 6966*b*.
damping capacity of, in transverse vibrations, 533*a*.
heat-treatment of, 3334*a*.
metallography of, 9011*h*.
pickling and electroplating on, 3727*h*.
rate of pptn. hardening of, 7390*b*.
re-formation in, 6136*f*.
beta-phase regions in ternary, 2915*f*.
bismuth embrittlement in, elimination by Li, 5718*f*.
blackening, P 2567*f*, P 3341*g*.
cadmium-In-Ag-Zn-, for brazing, P 2156*b*.
cadmium-Ag-Zn-, for brazing, P 2156*c*.
cadmium-Sn-, as catalyst in pyrolysis of fatty acids to olefins, P 7035*a*.
calcium detn. in, 8949*i*.
calcium-Pb-, as storage-battery anode, 7836*h*.
as chem. engineering construction material, 1*c*, 8745*c*.
chromium-Co-Fe-Mn-Ni-, age-hardenable, P 9020*g*.
chromium-Co-Mo-Ni-, heat- and stress-resistant, P 2922*c*.
chromium-Fe-Mo-Sn-, magnet from, P 5000*i*.
chromium-Ni-Ag-, oxidation-resistant, P 6147*b*.
coating of, with black oxide glaze, P 8346*b*.
cobalt-, effect of magnetic field on crystn. of, 5718*g*.
coloring of, P 3341*f*, 5352*h*, P 7404*f*.
condenser tubes of, corrosion resistance of, 7398*i*.
copper recovery from, 5712*f*, P 7358*a*.
corrosion of, 5723*i*.
corrosion resistance of, 2150*a*.
corrosion (stress-) cracking of, 2562*b*.
corrosion underground, 6141*a*.
crystal formation in binary, 4619*d*.
deformation and stress of, 82*e*.
elec. resistance of, effect of pressure and temp. on, 5679*b*.
etching (electrolytic) of, P 2880*d*.
forgings from, 3329*f*.
gallium-Mn-, 3765*g*.
gallium-Mn-, and In-Mn-, 9012*d*.
gold-, and Au-Ag-, order in, lattice parameter and, 4205*c*.
gold-, and Ag-, elec. resistance of, 3684*a*.
gold-, crack formation in stress corrosion of, 7879*e*.
effect of neutron bombardment on order in, 6915*a*.
elasticity of, temp. and, 5715*d*.
expansion by heat, 542*i*.
order of, 7770*i*.
superlattice formation in, 542*f*.
superlattices of, 8788*a*.
superstructure formation in, 9001*i*.
gold-Mn-Ni-Zn-, for dental use, P 6563*i*.
gold-Ni-Pd-Pt-Ag-Zn-, for dental work, P 2922*d*.
gold Pd-Pt-Ag-, chromatography of, 3743*c*.
gold-Ag-, structure of, 2562*c*.
gold-Ag-, transformations in, 4618*d*.
indium Mn-, 4205*f*.
interface energies in, 9011*a*
iron, P 2922*a*.
corrosion of, control of, 2564*e*
elec. resistance and magnetic properties of, 6961*d*.
hardening and softening of, 4618*h*.
manuf. in cupola, P 8347*f*.
iron-Ni-, diffusion in, 3761*i*.
iron-Ni-, electrolytic polishing of, 2101*c*.
iron-Ni-P-, abrasion- and corrosion-resistant, P 3342*i*.
iron or Fe-alloy cladding with, P 2154*b*.
lead-, bearings, testing of corrosion by lubricants, 7839*h*.
electrodeposition from fluoborate solns., 6520*f*.
improving working conditions in smelting and pouring of, 6559*b*.
pulverization of, 2561*g*.
lead-, Cu detn. in, and prepn. of Cu-Pb-Sn and Cu-Pb-Sn-Sb standard alloys, 1282*g*.
lead-P-, P 5000*cd*.
lithium-, 1300*f*.
lithium treatment of, 3764*d*.
magnesium-, and Mg-Zn-, in nodular graphite cast Fe manuf., 7395*f*.
magnesium-, reaction with EtI, 1717*g*.
magnesium-Zr-, 4619*e*.
manganese-, and Ni-, thermocouples from, P 5001*c*.
manganese-, and Sn-, gas removal from, with N, 5715*d*.
manganese-, prepn. from blast-furnace Fe-Mn, 9013*f*.
for standard elec. resistors, 3334*a*.
twinning in, 984*i*.
manganese-Zn-, for elec. resistors, P 1710*b*.
mirror supports from, P 4441*f*.
molybdenum-Ni-W-, for uniting W to backing member, P 5001*f*.
in Neoprene aging, 894*g*.
nickel-, annealing in protective gas, 3757*d*.
castings of, 5718*h*.
*nickel-*, coins of, 3335*i*.
compn. and mech. properties of bars, rods and sections of, 5718*i*.
in condenser tubes of petroleum stills, 5178*i*.
corrosion by salts, 6962*f*.
diffusion during sintering, 982*h*.
effect of elastic deformation on magnetization of, 4529*d*.
elasticity at low temps., 7398*a*
electron distribution and magnetism of, 4941*e*.
erosion-corrosion of, 5723*e*.
Mn detn. in, 3314*c*.
standards for wire of, 5719*a*.
weldable, P 2153*i*.
nickel-Si-Sn-Zn-, welding rod of, P 7405*c*.
nickel-Ag-, etching by cathodic sputtering, 5679*h*.
oxygen detn. in, 8963*g*.
painting pretreatment for, P 3300*i*.
phosphorus-, as solder, 4623*e*.
phosphorus detn. in, 5336*g*.
phosphorus-Ag-, as brazing alloy, P 4211*b*.
platinum-, para H conversion on, 4088*c*.
platinum-Ag-, and Ag-, electrodeposition of, 4148*c*.
with precious metals, P 4626*c*.
refining, P 1307*g*.
reviews on, 5355*h*, 6960*i*.
scale removal from, Efco-Virgo for, 552*d*.
silicon-, as catalyst, chlorophenylsilan 1027*n*.
silicon-, reaction v hydroca ides, P 4685*ac*.
silver-, automatic gravimetric anal 5693*b*.
coating with, on ceramic w 5918*c*.
crystal structure and thermal sion of, 6960*a*.
electrochem. restoration of 5679*e*.
eutectics in, 4935*e*
oxidation of, 4206*i*
silver-Sn Zn-, as solder, P 2570*a*
silver-Sn Zn-, for welding Al alloys, P 4628*b*.
soldering dissimilar metals to solid solns in, lattice spacin
specifications of A. S. T. M. for kinds of, and fo products ther 4202*h*, 4615*b*.
tin-, and Zn-, elasticity of, 3312
tin detn in, 2889*h*, 3312
tin-, detn. of intracryst impu 489*h*.
tin-, Zn, electrodeposition of, P
tin-Zn-, electroplating with,
tin-Zn, for brazing, P 6566
titanium-, coatings of, on mild 8334*c*.
tubing from, 983*e*
for vaporization deposition, for, P 102*c*
Weidmann Franz Lorenz rati
welding electrodes of, 8342*c*
welding of, electrode for, P 1309*a*
for welding (resistance) of Al alloys, P 9020*f*.
zinc-, P 6147*d*.
Cu and Zu recovery from, P 1210*b*
elastic and structural properties of, 9001*g*.
elasticity and internal friction of, 2561*g*
electrodeposition of, 4117*i*
electroplating with, 8901*c*
pptn. in, 7887*e*.
recrystn. of, 3757*e*.
zinc-, and Al-Zn-, effect of temp impact strength of, 7886*e*.
zinc distn. from, 9011*f*.
**Copper-ammonia cellulose.** (See *Rayon.*)
flow of solns. of, in cylindrical tubes, 7681*g*.
fluidity of, measurement of, 7692*i*.
prepn. of, and its use in cellulose-viscosity detn., 9435*i*, 9436*d*.
viscosity of, detn. of, 4851*g*, 6824*d*.
**Copper ammonium arsenate,** $5CuO \cdot 2As_2O_5 \cdot (NH_4)_2O$, 2885*d*.
**Copper ammonium sulfate,** plastic materials from silicates and, P 6865*e*
**Copper arsenates,** antifouling properties of, 3963*i*.
basic, P 3159*a*.
effect of heat and reduction on, 3302*i*.
prepn. and properties of, 2885*b*.
in tobacco-flea-beetle control, 9316*b*
toxicity to larvae of Colorado potato beetle, 9340*a*.

**Copper barium cesium thiocyanate**, $Cs_2BaCu_3(CNS)_7$, 5324*g*.
**Copper benzoate**, $Cu(OBz)_2$, decompn. by heat, 125*a*.
**Copper borate**, $Cu(BO_2)_2$, prepn. of, 2443*i*.
**Copper bromides**,
$Cu_2Br_2$, as catalyst in 1,4-dicyano-2-butene manuf., P 4286*d*.
$CuBr_2$, as catalyst in isomerization of methoxychloropentenes, 131*a*.
exchange between Cu and, 6890*i*.
humidity indicator from, P 2714*b*.
lattice energy of, 2829*e*.
in termite control in birch, 9341*d*.
$Cu_2Br(OH)_3$, structure of, 7772*c*.
**Copper cadmium chloride**, $3Cu(OH)_2 \cdot CdCl_2$, 8929*g*.
**Copper carbonates**, basic, P 3159*b*.
basic, dispersed in asphaltic bitumens, 5178*f*.
basic, Werner complexes with $NH_3$ or cyclohexylamine, reaction with org. acids, P 5978*d*.
$CuCO_3$, catalysts of, and its mixt. with $ZnCO_3$ in decarboxylation of 2 furanacrylic acid, 2615*d*.
plant protectants contg., P 3140*g*
in wheat-bunt control, 3553*e*.
$CuCO_3 \cdot Cu(OH)_2$, catalyst from $[(NiOH)_2CO_3]_3$ and, 7607*g*.
magnesium-oxychloride cement contg., P 3166*f*.
**Copper chlorides**, basic, P 3159*c*, P 5161*d*, 8930*a*.
basic, in anthracnose control, 7180*f*.
in control of haloblight of beans, 8595*i*.
in downy-mildew on Lima beans, 3959*h*.
as fungicide for botrytis blight, P 3962*a*.
as fungicides, 8597*b*.
for grease-spot control on passion vine, 7180*a*.
manuf. by electrolysis, P 6096*h*.
for mildew control on magnolias, 7179*g*.
mixt with basic $CuSO_4$ in potato-fungus control, 9328*c*.
mixt. with $Cu_2O$ in pest control on grapes, P 5528*f*.
plant-protective spray contg. colloidal, P 5528*d*.
prepn of $CuCl_2 \cdot 3Cu(OH)_2$, 2443*i*.
for *Sclerotinia* control in cabbage, 7179*i*.
in smut control, 8595*h*.
systems of $Cu(OH)Cl$ and $Cu_2(OH)_4Cl$ with basic Ni chlorides, 8929*i*.
fungicidal, P 9355*e*.
methane chlorination with melts contg., distribution of products of, 1714*f*.
methane chlorination with melts contg., kinetics of, 1714*d*.
phosgene manuf. from, P 3160*b*.
in termite control in birch, 9341*d*.
CuCl, butadiene sepn. from olefins by aq. solns. of amino alcs. contg., P 6218*b*.
as catalyst in amination of aryl halides, P 3154*gh*.
in 1,4-dicyano-2-butene manuf., P 4286*d*.
in unsatd nitrile manuf. from HCN and diolefins, P 4286*c*.
catalysts of $Al_2(SO_4)_3$, $NH_4Cl$ and, in dimerization of $C_2H_2$, P 7951*a*.
catalysts of $NH_4Cl$, HCl and, in vinylacetylene prepn., 1598*e*, 3225*c*.
catalysts of As, Bi or Sb chlorides and, in acrylonitrile manuf. from $C_2H_2$ and HCN, P 3439*a*.
catalysts of HCl and, in partial hydration of myrcene, P 6219*g*.
complexes with fumaric and maleic acids, 1677*i*.
complex with $Ph_3P$, as catalyst for trimerization of $C_2H_2$ and its derivs., 6202*e*.
compds. with phosphine oxides and phosphinous acid esters, 3802*a*.
compd. with NOCl, 3305*h*.
effect on Li detn. in soils, 2544*k*.
electrode potential in fused, 8898*i*.
formation on Cu anodes and periodic soln. of, 7792*g*.
manuf. of, 3326*fh*, P 6375*h*.
as polymerization inhibitor for 2-furaldehyde and butadiene, P 7970*a*.
reaction of $C_2H_2$ with HCN in the presence of $ZnCl_2$ and, P 1794*h*.
reaction of $C_2H_2$ with ethylene oxide in presence of $AlCl_3$ and, 2182*e*.
reaction with $BrF_3$, 3739*f*.
soly. in $NH_4Cl$, HCl, KCl or NaCl solns., 3307*d*.
soly. in aq. allyl alc., 6889*d*.
soly. in maleic acid solns. and complexes with unsatd. acids, 8940*fh*.
solns. of $PhNMe_2 \cdot HCl$, HCl and, in extn. of $C_2H_4$ from hydrocarbon mixts., P 1432*h*.
spectrum of, 492*e*.
$CuCl_2$, absorption by clays and soils, 7618*g*.
as accelerators for rubber curing, P 8732*a*.
activity and osmotic coeffs. of, 22*d*.
aluminum corrosion by solns. of, 4996*b*.
binding energy of, 6895*f*.
as catalyst in $C_2H_2$ reaction with HCl, 6969*h*.
in chlorination of $C_2H_4$, P 1433*e*.
in condensation of 2-furaldehyde with phenol, 5224*h*.
in decarboxylation of 2 furanacrylic acid, 2615*d*.
catalyst of active C and, in chlorination of pyrazine, P 5809*f*.
compd. with sulfadiazine, 3804*a*.
constitution in aq. soln., 3278*a*.
cornea tolerance to, 3111*a*.
decompn. potential in molten $AlCl_3$-NaCl, 8915*e*.
dehydration of dihydrate of, with $COCl_2$ or $SOCl_2$, 2533*c*.
effect of vitamin C and, on intestine and uterus, 3903*cd*.
effect on acetylcholine action, 3903*b*.
on bread dough, 4781*g*.
on metamorphosis of Bugula species, 8563*n*.
elec. conductivity of solns. contg. $NH_3$ and, 19*b*.
equil. with KOH and K salts, 7789*c*.
exchange between Cu and, 6890*i*.
in halogenation of unsatd. hydrocarbons, P 3436*h*.
humidity indicator from, P 2714*f*.
hydrolysis of, 4086*g*.
lattice energy of, 2829*e*.
reaction with Hg or Ag, 2875*c*.
reaction with Zn dispersed in nonaq. solvents, 6886*a*.
refractive indexes of solns. contg. $NH_4Cl$, HCl, KCl, NaCl and, 6049*f*.
soil cement mixts. contg., P 5568*g*.
structure of, 7772*c*.
system: HCl $H_2O$-, 5324*d*.
in wheat-smut control, 5523*e*.
**Copper chlorocuprate(III)**, $Cu[CuCl_4]$, 7362*g*.
**Copper chromates**, as fungicide for potatoes, 801*e*.
**Copper chromites**, in 2,3-butanedione manuf, P 1797*c*
as catalyst in dehydrogenation of 2,3-butanediol, P 3841*h*.
in hydrogenation of citronellal, 2160*i*.
in hydrogenation of 2-furaldehyde, P 7049*c*.
in hydrogenation of 2-naphthol, 2197*c*.
crystal structures of $CuCr_2O_4$ and $Cu_2Cr_2O_5$, 5653*h*.
$Cu_2Cr_2O_5$, catalysts of, 6336*a*.
**Copper cobalt chloride**, $3Cu(OH)_2 \cdot CoCl_2$, 8929*g*.
**Copper compounds**, with acetoacetic acid derivs., 7909*c*
alkali tartrates and Schweitzer reagent, 5324*f*.
with aluminum and Mg, $CuAl_2$, $Al_2CuMg$ and $Al_6CuMg_4$, 4204*e*.
with aluminum and Zn, $Cu_9Al_4$ and $CuZn_8$, 6880*e*.
with aluminum, $CuAl_2$, 5718*c*.
with aluminum, structure of $Al_2Cu$, 7887*a*.
with amides, 6249*i*.
of amines and petroleum mahogany sulfonic acids, as fungicides and insecticides, P 2424*i*.
with amines, color in turquoise from, 8986*f*.
with amino acids, 6250*c*.
ammines, P 1928*h*, P 3158*a*.
analysis for $NH_3$, Cu, etc., 2117*h*.
complexes with glycosides and with related compds., 3368*d*.
formation of, 8295*i*.
for grape spraying, P 5152*d*.
reaction products with maleic anhydride polymers with Me methacrylate, 8202*d*.
reaction products with Me methacrylate polymers with $\alpha,\beta$-unsatd. carboxylic acids, 8202*g*.
stability of solns. of, 1533*i*.
ammoniacal solns. of, regeneration of, P 1928*f*.
with 5-amyl-6-methyl-2-thiouracil, 3013*e*.
as antioxidant promoters in hydrocarbons, P 386*f*.
antiseptic and fungicidal, P 363*i*.
with (2-benzimidazolyl)guanidine derivs., 1405*f*.
with biguanide derivs., 7365*c*.
book, in Agriculture and Industrial Microbiology, 1146*b*.
in bottle protection against alkali extn., 3578*i*.
as catalysts in oxidation of cyclic ethers, P 2224*e*.
as catalysts in reforming of hydrocarbons, P 9430*a*.
in *Cercospora beticola* control, 3134*b*.
chelate complexes with $\beta,\beta',\beta''$-triaminotriethylamine, stability of, 8812*e*.
with 1-(*o*-chlorophenyl)-3-phenyl-1,3-propanedione, 6183*b*.
with citrates and tartrates, 4182*b*.
complexes, 3307*d*.
bond type and stereochemistry of four-coördinated, 8222*a*.
$CuCl_3^-$ and $CuCl_4^{--}$, 6049*f*.
with dehydroactidione, 2999*a*.
with ethylenediamine, 6536*e*.
with heteropoly acids and amines, 1671*h*.
polarography of, 6933*a*.
with Schiff bases, crystal structures of, 4073*d*.
stability of, 4969*c*, 4970*i*.
with 1,1-diethylbiguanide, 8941*b*.
with $\beta$-diketones, 4253*g*.
with dyes, 6418*i*, 6419*c*; (*Patents*), 415*g*, 857*g*, 1574*h*, 1988*g*, 2440*i*, 2441*bf*, 4486*acfgh*, 4865*d*, 4866*c*, 5198*cde*, 5597*h*, 5598*dfg*, 5926*h*, 5964*g*, 6832*h*, 7235*h*, 7696*e*, 7697*ce*, 7698*e*, 7699*bi*, 7700*abcdegi*, 7701*abc*, 7702*i*, 7703*ceg*, 8143*i*, 8144*abcdefghi*, 8146*d*, 8151*b*, 8156*i*, 8158*ci*, 8161*h*, 8690*a*, 8691*b*, 9460*g*, 9461*e*, 9462*hi*.
with ethylenediamine, light absorption and stability of, 7857*d*.
of formazyl compds., 6589*a*.
with formazyl dyes, P 5198*h*.
as fungicides, 7177*b*.
as fungicides for cotton fabric, 8085*f*.
with germanium, electrodeposition of $Cu_3Ge$, 2876*b*.
with gold, effect of neutron bombardment on order in $Cu_3Au$, 6915*a*.
with gold, solid solns. of Au-Cu-$AuCu_3$, order-disorder in, 3260*e*.
hair coloration by, 6255*i*.
histidine complexes, 7856*d*.
with hydroxynaphthaldehyde and [ethylenebis(nitrilomethylidyne)]dinaphthol, 1678*g*.
with 3-hydroxy-2-naphthoic acid and pyridine, 2538*g*.
intermetallic, 7771*c*.
intermetallic, compressions of, 4917*a*.
with kojic acid, as fungicides, P 4419*c*.
with lecithin and phytic acid, P 5156*d*.
with magnesium ($MgCu_2$), 2148*b*.
manuf. of, electrolytic cell for, P 7359*d*.
with 2-mercapto-5,5-dimethyl-4(5 *H*)-imidazolethione, 6171*e*.
in mildew control on grapes, 8596*i*.
in Neoprene aging, 894*e*.
of nicotine salts, P 8605*b*.
*N*-nitroso-*N*-phenylhydroxylamine deriv., soly. of, 2488*b*.
oil sprays contg., 9353*i*.
org., as polymerization activators, 8727*g*.
in pest control on grapes, P 5528*g*.
phthalocyanine, P 3214*g*, P 3215*b*, P 7705*d*, P 8169*b*, P 8172*g*, P 8173*c*, P 8692*h*.
improving color properties of, P 7712*g*.
toner mixts. with Sn phthalocyanine, P 8705*b*.
transformations in, 2483*e*.
with phthalocyanine thio ethers, P 7710*d*.
with proteins, phenoloxidase action of, 3855*i*.
with pyridine and salicylic acid, 2536*i*.
pyridine perchlorate complexes, 2114*a*, 3699*f*.
removal of insol., from rubber dispersions, P 432*b*.
rotproofing value of chelate, in cotton duck, 5957*i*.
sodium cupricellulose, methylation of, 2771*a*.
with sodium 2-formyl-1-phenol-4-sulfonate, 1678*d*.

## Copper cyanides

with sulfanilamide derivs., 6996g.
sulfosalicylic complexes, 5326a.
with sulfur for use in rectifiers, prepn. and analysis of, 7863i.
with tetrachlorophthalic anhydride and urea, green pigment, P 5607g.
with tetrakisazo dyes, P 8161g.
for wood preservation, 9341c.
with zinc, 6067b.
with zinc, elasticity of CuZn, 8864e.

**Copper cyanides.**
$Cu_2(CN)_2$, as catalyst in 1,4-dicyano-2-butene manuf., P 4286e.
as catalyst in HCN reaction with acetone, P 7955c.
$Cu(CN)_2$, antifouling properties of, 3963i.
heat of formation and lattice energy of, 2829i.

**Copper ferrates(III)**, solid solns. with Zn ferrate, P 4625f.
$CuFe_2O_4$, magnetic properties and solns. of, 6017a.

**Copper ferricyanide** ($Cu_3[Fe(CN)_6]_2$, detection of, 8966e.
reduction to brown ferrocyanide by $H_2O_2$, 8307i.

**Copper ferrocyanides**, membranes from cellophane and, solute diffusion through, 2486h.
$Cu_2Fe(CN)_6$, detection of, 8966e.
formation of, and of 5 $Cu_2Fe(CN)_6 \cdot K_4Fe(CN)_6$ satd. solid soln., 8966f.
membranes of, activation energy of diffusion and potential of KCl through, 5257b.

**Copper fluoborate**, $Cu(BF_4)_2$, concn. cells from Cu and, 8913i.

**Copper fluoride** ($CuF_2$) catalysis by, in esterification of fatty acids with glycerol, 4031a.
crystallochem. electronegativity of Cu ion in, 8231c.
in fluorination of $\alpha,\alpha,\alpha$-trichlorotoluene, 8364h.
heat of formation and lattice energy of, 2829i.
manuf. from Cu-Hg ore and reduction with H, P 6964g.
prepn. of, 6793d.

**Copper fluosilicate**, as catalyst in $C_2H_2$ reaction with HCl, P 4284e.

**Copper formates**, ammoniacal soln. of, regeneration of, P 1928f.
decompn. of $(HCO_2)_2Cu$ to $HCO_2Cu$, 1279a.
$Cu(HCO_3)_2$, lattice energy of, 2829e.

**"34" Copper fungicide.** See "basic" under *Copper sulfates*.

**Copper glance.** See *Chalcocite*.

**Copper halides**, Curie point, pressure and 8784a.
films absorbing infrared and ultraviolet waves from, P 9537b.

**Copper Hydro 40.** See *Copper hydroxides*.

**Copper hydroxides**, colloidal, 5654c.
manuf. of, P 5161d.
mixt. with kieselguhr, in S removal from water gas, 2401f.
mixt. with Pb arsenate and hormones, effect on tomatoes, 9337e.
for *Sclerotinia* control in cabbage, 7179i

**CuOH**, manuf. of, P 7202f.

**$Cu(OH)_2$**, as catalyst in $CO_2$ reaction with H, P 7030d.
as catalyst in furan manuf. from 2-furaldehyde, P 5047h.
complexes with ethylenediamine and sulfanilamide derivs., 6996g.
copptn. with $Ni(OH)_2$ and formation of $CuNi(OH)_4$, 8029e.
decompn. by heat, 6063e.
detection of synthetic, in Cu ore analysis, 5697g.
hydrogen-ion concn. for pptn. of, 2493d.
lattice energy of, 2829e.
precipitation of, 8295g.
prepn. and soly. in $NH_4OH$, 2489a.
prepn. of, 7361h.

**$Cu(OH)_2$**, 7362g.

**Copper hypochlorite**, $Cu(OCl)_2$, as fungicide for vegetables, 4411i.

**Copper iodides.**
**CuI**, as catalyst in 1,4-dicyano-2-butene manuf., P 4286d.
decompn. potential in fused $AlI_3$ or $NaAlI_4$, 6519g.
decompn. potential in fused NaI, 4582g.
decompn. potential of molten, 4582f.
thermal stability for analytical ppts. of, 8977f.

**$CuI_2$**, lattice energy of, 2829e.

**Copper isothiocyanate**, CuNCS, in acetic [illegible] behavior of, 2110g.

**Copper lactate**, effect on flavor and keeping quality of butter, 6750ac.

**Copper magnesium chloride**, $3Cu(OH)_2 \cdot MgCl_2$, 8929g.

**Copper nickel chloride**, basic, 8929gi.

**Copper nickel hydroxide**, 8929f.

**Copper nitrates**, as catalyst for condensation of 2-furaldehyde with phenol, 5226b.
in termite control in birch, 9341d.

**$Cu(NO_3)_2$**, activity and osmotic coeffs. of, 22d.
aluminum corrosion by solns. of, 4996c.
as catalyst in oxidation and hydrolysis of cellulose by nitric acid, 1979a.
concn. cells from Cu and, 8913i.
effect on autodisplacement of Pb, 2846f.
elec. conductivity of solns. contg. $NH_3$ and, 19b.
equil. with KOH and K salts, 7789c.
exchange between Cu and, 6890h.
films absorbing infrared and ultraviolet waves from, P 9537b.
hydrolysis of, 4086g.
lattice energy of, 2829e.
magneto-optic rotation of, 5244a.
Raman spectrum of, 8887f.

**Copper number**, autoxidation rate and, of cellulose, 9434h.

**Copper ores.** (See also *Chalcocite; Chalcopyrite; Malachite; Tetrahedrite.*)
of Alaska, 74b, 2130e, 2131a, 6949g, 7384d, 8314i.
analysis of Ni-, for Pt group metals and Sn, 5339a.
analysis (qual. phase) of, 5607f.
of Arizona (Pinal Co.), 2131b.

of China (Tungchuan dist., Yunnan), 8315f.
cobalt-Ni-, of Vest prospect, Va., 6545i.
of Colombia, 525ghi
concn. of, 77h.
at Balkash plant, Russia, 2140f.
by gravity and by flotation, 465e.
at Superior, Ariz., 981h.
testing of, 1294d.
concn. of Ag-Sn-, of Pershing Co., Nev., 1693i.
of Cyprus, 1294g.
dressing of Pb-Ag-Zn-, of Harz Mts., 527h.
fires in mines of sulfidic, 1569a.
flotation of, P 2151h, P 5725c.
coarser grinding in, 7387g.
effect of O adsorption and oxide films on Cu in, 7875f.
oxidation in, 1293f.
with N-phenyldithioimidocarbonate, 4998i.
from silica, 2139g.
flotation of Co-Au-Ag-S-, 1693d.
flotation of Pb-Zn-, 529c, 1693h.
of France, 2549i, 8989d.
of Georgia (Chestatee deposit), 3321b.
of Germany (Thuringia), 3750g.
gold-Pb-Ag-Zn-, from Cascade Co., Mont., 5711f.
gold-Ag-Zn-, of Sherritt Gordon Mines, Manitoba, 4188a.
of Idaho (Borah Peak quadrangle), 6954b.
iron-Ni-, of Stillwater Complex, Mont., 4981i.
of Italy, 3322a, 6949b.
lead-Zn-, of Mt. Rielson, Alaska, 7383b.
of Ophir Hill Consolidated Mine, Utah, 6950c.
of Steeple Rock, N. Mex., 6950f.
mining of, Mn steel in, 3753h.
native and sulfide, of Colombia, 525f.
native Cu near ophiolites of Leghorn, 6954c.
nickel-, of Canyon Creek, Alaska, 2131g.
nickel-, of Siberian Plateau basalts, genesis of sulfide, 3750b.
of North Carolina (Scarlet Mine), 6545c.
of Oregon (Kerby Quadrangle), 4984i.
of Peru, 73h, 6545ab.
of Philippine Islands (Jetafe, Bohol), 7872g.
prospecting for, analyses of plant parts in, 3321ei.
barite as indicator in, 2130i.
paleogeography in, 3320i.
in pyrite ores of Pyriton, Ala., 6949h.
schists of Pnom Sarakam, Siam, 2900h.
of Tanganyika Terr. (Njombe district), 534f.
of Trinity River Tributary area in Okla. and Tex., 4607i.
of Turkey, 1291g.
of U.S.S.R. (Greater Dzheskazgan), 2550a.

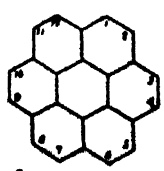
of Virgilina Copper dist., Va. and N. Car., 2131c.
of Virginia (Floyd Co.), 74a.
of world, 5708e.
zinc-, of Blue Ledge Mine, Calif., 7382g.
zinc-, of Keystone and St. George, Ariz., 6949h.

**Copper oxalates**, antifouling properties of, 3964b.
catalyst in pyrolysis of resin acids, 9443g.

**Copper oxides.** (See also *Cuprite; Tenorite.*)
analysis of mixts. of $Cu_2O$, CuO and Cu, 8969d.
as catalyst in S removal from fuel gas, P 380c, 3173a.
catalyst of Cu and, in dehydrogenation of 2,3-butanediol, P 3841h.
catalysts of $Al_2O_3$ and, in dehydrogenation of 1,1-diaryl paraffins, P 2233f.
as DDT diluent, 2728e.
detn. of $Cu_2O$ and CuO in presence of each other and Cu, 2543h.
effect on cellulose degradation by light, 8133e.
films on glass for increasing reflectance, 3161h.
formation of, on Cu anode, 47b.
from Cu film, 6880g.
on Cu in air at high temps., 8630h.
as fungicides for vegetables, 4411i.
gas adsorption by, effect on elec. resistance, 474i.
in glass, effect on gas release from, 2068d.
manuf. of, P 5161d.
prepn. of $Cu_2O \cdot 3H_2O$ and $Cu_2O$, 7[illegible]
rectifiers—see *Rectifiers*.
reduction of films of, 6531i
in tobacco-blue-mold control, 4[illegible]

**$Cu_2O$**, analysis of, 4786e.
as catalyst in oxidation of ketones, 6654i.
in oxidation of olefins, P 4[illegible]
in reaction of $p$-$O_2NC_6H_4Cl$ [illegible] or MeOH, P 687g
coating with, on Ni-Cr resistors, P 4153e.
in copper films on galena, 648[illegible]
Cuprocide, in ergot control, 3[illegible]
cuprous ion diffusion in, during tion, 2851c.
in downy mildew control, 3[illegible]
effect on grain growth in Cu, formation of, on Cu at h 2851a.
on Cu single crystals, 2[illegible]
from cupric tartrate in [illegible] powers of sugars, 7[illegible]
on polished Cu, 4060f
thermodynamics of, 2907c
as fungicide, 3950h.
manuf. of, P 7202df.
mixt. with Cu oxychloride in pest on grapes, P 5528g
neutron-irradiated semiconductor 8858e.
in paints (antifouling), 3[illegible]
crit. toxic vol. of, 1577e
effect of surface-available, on rates, 6837b.
leaching rates and particle [illegible] 8096d.
pigment extenders for, 7715.
toxic and corrosive action of, periodic formation and soln. of, in HCl, 7792g.
as photocurrent carrier, sign of, 8896a.
photoelec. current and dark current in alternating elec. field, 7[illegible]
photoelec. effect in, 8846b.
in *Sclerotinia* control on cabbage, as seed disinfectant, 7179b
solubilization by soil fungi, 7345
in tomato-blight control, 4413i
voltaic cells contg., 7351e
Yellow Cuprocide in date pest [illegible] 4417a.



**CuO**, absorbent for gases from [illegible] and, P 8578c.
adsorption of $H_2O$ vapor by, [illegible]
as catalyst in decarboxylation of acrylic acid, 2615d
in oxidation of 2-methyl-[illegible] 1084d.
in oxidation of paraffin oil, [illegible]
catalyst of $Cr_2O_3$ and, in hydro[illegible] 1719ad.

talyst of $CrO_3$ and, in reduction of tartaric acid esters, 8355*d*.
talyst of $Fe_2O_3$, MgO, $K_2O$ and, in dehydrogenation of butene, P 663*a*.
talyst of $Fe_2O_3$, MgO, $K_2O$ and, in dehydrogenation of cumene, P 680*f*.
talyst of PbO and, in ethylene oxide formation from $(CH_2Cl)_2$, 4638*h*.
talyst of MgO, MnO and, in prepn. of BuOH from EtOH, 5363*c*.
talyst of $MnO_2$ and, in oxidation of $H{\cdot}CH_4$ mixt., 2403*f*.
talyst of $H_3PO_4$ and, in dehydration and isomerization of BuOH, P 3833*h*.
talysts of BaO, $Cr_2O_3$ and, in alkylation of *p*-phenylenediamine with ketones, P 4005*a*.
l with Na amalgam and NaOH, 5315*b*, 8907*e*.
emical character of hydrated, hydration and, 8295*h*.
ystallochem. electronegativity of Cu ion in, 8231*c*.
compn. by heat and formation from Cu, 6063*e*.
tection in Cu ores, 5697*f*.
ect on $Fe_2O_3$ catalysts for reduction of esters, 5363*d*.
x with PbO, prepn. of $PbO(CuO)Pb$, 1285*d*.
mation in Bremen green on storage, color changes from, 5605*b*.
mation in copptn. of Cu-Ni hydroxide, 8929*f*.
ophiolitic rocks of Leghorn and serpentines of Tuscany, 6954*c*.
ygen exchange with, 8821*i*.
action with $CH_4$ in fluidized bed, 7199*h*
ractory elec. conductors from, P 5919*e*.
ber compounded with, $H_2S$ evolution by, 5620*h*.
y. of, 7789*d*.
ectrum of, 3712*f*
stem: $CuSO_4$–$H_2O$–, pH in, 2492*i*.
ermal stability limits for analytical ppts. of, 8071*i*
**er oxychloride**. See "basic" under *Copper chlorides*.
**er oxychloride sulfate**. See "basic, basic sulfate" under *Copper chlorides*.
**er pentathionates**, stabilization of solns. of, P 7651*g*.
**er perchlorates**, soly. of, 7789*c*.
$ClO_4)_2$, complexes with pyridine, 2114*a*.
ncn cells from Cu and, 8913*i*.
**hosphate** ($Cu_3(PO_4)_2$), catalyst of ), $H_3PO_4$ and, in dehydration of )H, P 7035*b*.
ysis of, in distd. $H_2O$, 8905*d*
**iosphides**.
ystems: $Cr_2P$–, $Fe_2P$–, $Mn_2P$–, $Ni_2P$–, 5719*b*.
anuf. of, P 825*d*.
**otassium arsenate**, 2885*c*.
**otassium sulfate**, magnetic reso ce absorption in, 4568*e*.
with $MgK_2(SO_4)_2$, magnetic re tion time of proton in $H_2O$ of tn. of, 8878*g*.
heat of, at low temp., 7336*h*
**yrophosphates**, catalysts from vated C and, in polymerization of ins, P 1559*h*.
lysts in polymerization of butenes $C_4H_8$ to gasoline, 4839*d*.
alysts in polymerization of $C_2H_4$ monohaloalkanes, P 5640*f*
**lts**. (See also *Fungicides*.)
tion and electrolytic polarization olns. of, 503*h*.
P 5161*c*.
equilibria in aq. solns. of cupric alkali salts, 7789*b*.
ne sepn. from olefins by aq. solns mino alcs. contg., P 6218*b*.
alysts in isomerization of dichloro-butenes, P 663*f*.
xidation of furoin, P 690*g*.
xidation of $PH_3$, 6898*a*.
alfur removal from pseudoureas in heir reaction with guanidines, P 1059*f*.
of $PbEt_4$ or $PbMe_4$ and, for nerization, 5732*e*.
s with $Na_4P_2O_7$, 6104*a*.
by heat of, of carboxylic acids,
1(4 *H*)-pyridineacetic acid, 5780*f*.
from acetylenes by, 6218*a*.
bacteria, 5824*e*.
r and keeping quality of butter,
*effect* on foam formation in beer, 9359*g*.
on protoplasm, 8015*b*.
fungicides and insecticides from thiourea and, P 5529*e*.
fungicides from humates and, P 6778*g*.
of grapeseed-oil acid, effect on drying of linseed oil, 8699*f*.
by hydrometallurgy, 3326*f*.
magnetic resonance in, 4568*d*.
manuf. from waste Cu alloys, P 7358*b*.
microwave spectral lines in, width of, 4095*e*.
phosphorescent pigments contg., P 7832*d*.
plastic materials from asbestos, HCHO and, P 8208*h*.
reaction with reduced wool, 5955*f*.
textile rotproofing with, P 4185*b*.
**Copper Sandoz**, in *Cercospora beticola* control, 3134*b*.
**Copper selenates**, in greenhouse-pest control, 1141*d*.
as insecticides, 2357*f*.
in termite control in birch, 9341*d*.
**Copper selenide**, synthesis of CuSe, 8982*d*.
**Copper selenite**, in termite control in birch, 9341*d*.
**Copper silicates**, nicotine salt, as fungicide and insecticide, P 5899*g*, P 5900*a*, P 7634*b*.
$Cu_3SiO_4$, 1670*h*.
**Copper sodium arsenate**, 2885*c*.
**Copper sprays**. See *Bordeaux mixture; Fungicides; Paris green; Sprays*.
**Copper sulfamate**, $(H_2NSO_3)_2Cu$, concn. cells from Cu and, 8913*i*.
**Copper sulfate**. (See also *Bordeaux mixture; Chalcanthite*.)
absorption of heat and light by solns. of, 7821*i*.
air bubbles in soln. of, potential from, 4587*a*.
in alga control in reservoirs, 1885*d*.
aluminum corrosion by solns. of, 4996*i*.
antifouling properties of, 3964*c*.
in asphaltic bitumens, 5178*f*.
basic, P 2154*a*.
$CuSO_4.3Cu(OH)_2$, 7361*i*.
in downy-mildew control on cucumbers, 9329*h*.
in downy-mildew control on Lima beans, 3959*i*.
in ergot control, 3959*g*.
and its mixt. with basic Cu chloride, in potato-fungus control, 9328*i*
and its mixt. with Cu oxychloride, as fungicides, 7177*df*.
in tomato blight control, 4413*ac*.
in tomato-fungus control, 9328*d*.
as catalyst in decarboxylation of 2-furanacrylic acid, 2615*d*.
catalysts of Te and, in Kjeldahl digestion, 8961*g*.
chromatography on soil minerals, 3519*h*.
compd. with nicotine sulfate, 8297*a*
concn. cells with Cu, 8913*i*.
cornea tolerance to, 3110*h*.
corrosion of Cu-Au and Au-Ag alloys in solns. of, 7879*e*.
in *Corticium salmonicolor* control, 5891*i*
effect on adenosinetriphosphatase in heart muscle, 8058*b*.
on blood sugar, 3523*i*.
on crude-protein detn. in feeding stuffs, 7158*g*.
on discoloration of canned fish, 8069*b*.
on gas formation in ruminal ingesta of sheep, 2604*a*.
on metals with adsorbed org. films, 28*g*.
on stomach lining, 3106*c*.
elec. cond. of solns. contg. tartrate and, 19*c*.
elec. spark in solns. of, velocity of, 1244*h*.
electrolysis of aq., ultramicroscopy of, 950*g*.
equil. with KOH and K salts, 7789*c*.
exchange between Cu and, 6890*i*.
fire-retardant compns. from, P 1126*i*.
in fish-net preservation, 8688*e*.
as fungicide for vegetables, 4411*i*.
fungicide from molasses or sugar and, P 5899*e*.
fungus growth in concd. solns. of, 720*g*.
hydrolysis of, 4086*g*.
interaction of nuclear spins in, 8273*d*.
interaction with silicic acid sols, 8237*d*.
luminous spark in solns. of, from application of high potential, 4091*f*.
magnesium oxychloride cement contg., P 3106*f*.
magnetic resonance absorption by, 3252*e*, 3293*h*, 4066*i*, 4568*e*, 5244*c*.
magneto-optic rotation of, 5244*a*.
manuf. of, P 3159*d*.
from chalcopyrite, P 8624*a*.
by electrolysis, P 7840*c*.
in mildew control on grapes, use with Na isopropylxanthate, P 4807*b*.
mixt. with $As_2O_3$ and $Na_2Cr_2O_7$, for preservation of green bamboo, 3553*i*.
with $H_2O_2$, effect on detn. of N in meat products, 7155*a*.
with $H_2SO_4$, limiting c.d. in, 4585*a*.
in oat-smut control, 1137*g*.
in phosphorus-injury treatment, 6743*c*.
for photographic use, Am. standard specifications for, 6930*b*.
polarization of dropping-Hg electrode in, 2875*d*.
polarography of, 2873*b*.
in potato-late-blight control, 9336*g*.
reaction with $CaCO_3$, 1138*gh*.
reaction with NaOH, 8295*h*.
sepn. from $CoSO_4$ and $Fe_2(SO_4)_3$ by chromatography, 2070*i*.
soil-cement mixts. contg., P 5568*g*.
in soil (peat) improvement, 7621*g*.
soil treatment with, 4410*g*.
soly. in aq. alc., effect of $C_6H_6$ or $CHCl_3$ on, 6889*h*.
spectrum of, 3293*c*.
in stabilization of solns. of polythionates and polythionic acids, P 7651*h*.
system: CuO–$H_2O$–, pH in, 2492*i*.
in termite control in bamboo, 3553*i*.
in termite control in birch, 9341*d*.
as termite repellent, 9341*e*.
in *Tilletia*-spore control on wheat, 8085*e*.
toxicity to bees, 344*e*.
transmittancy of solns. of, and of its mixts. with Co sulfate, 8275*g*.
in tree control on southern upland, 6352*i*.
vineyard-stake preservation with, 6352*e*.
in water purification—see *Water, purification of*.
in wheat-bunt control, 3553*e*.
wood impregnants from, P 4808*f*.
in wood preservation, 5892*i*.
in zinc-ore concn., 1293*h*.
**Copper sulfides**, catalyst contg., in S removal from coal and synthesis gas, 3169*i*.
as catalyst in S removal from fuel gas, P 380*c*.
detection in Cu ores, 5697*f*.
formation in crème de menthe and on wool, 924*d*.
minerals, analyses and geochemistry of, 6543*d*.
plant protectants contg. CuS and (or) Cu polysulfide, P 3140*g*.
$Cu_2S$, in Cu films on galena, 6483*f*.
melting point of, and soly. limit of liquid Cu in, 3319*b*.
reaction with H, equil. in, 2558*g*.
**CuS**, adsorption on, of element 43, 2507*d*.
elec. supercond. of, 4532*h*.
oxidizability of pptd., 5700*i*.
roasting of, 4988*g*.
$Cu_2S$, prepn. and crystal structure of, 6102*c*.
**Copper tartrates**, optical rotation of, effect of alkali on, 8242*i*.
prepn. and properties of $CuC_4H_4O_6.3H_2O$, 7287*h*.
stability of, 4971*a*.
**Copper tellurate**, $CuH_4TeO_6$, 518*e*.
**Copper tellurite**, in termite control in birch, 9341*d*.
**Copper thiocyanate** ($Cu(SCN)_2$), antifouling properties of, 3963*i*.
heat of formation and lattice energy of, 2829*i*.
**Copper tower**, 6063*g*.
**Copper vanadate(V)**, prepn. and soly. of 8247*f*.
**Copper zinc chloride**, $3Cu(OH)_2.ZnCl_2$, 8929*g*.
**Copper zinc chromates**, as fungicide for turf, fruit and potatoes, 6775*f*.
in tomato-blight control, 4413*c*.
**Copra**, carbohydrates and protein of, 8811*c*.
meal—see *Coconut meal*.
**Copra oil**. See *Coconut oil*.
**Copratoporphyrin**. See *Deuteroporphyrin*.
**Coprecipitation**. See *Precipitation*.
**Coprinus**, *fimetarius*, mutation in, from N mustard, 6702*f*.
identification of, 9177*h*.
*lagopus*, nutritional requirements of, 8065*f*.
*similis*, antibiotic substance from, 2274*i*.
**7(8),22(23)-Coprosergostadiene**, 7493*f*.
**3(α)-Coprosergostanol**, 7493*g*.
**7(8)-Coprosergostene**, 7493*f*.
**Coprophagy**, effect on biotin and folic acid requirements, 5833*b*.

**Coproporphyrin**, affinity of neoplastic, embryonic and traumatized tissue for, 749*c*.
detn. and extn. in urine, 7992*h*.
distribution coeff. between ether and phosphoric acid, 6696*g*.
in urine in porphyrinuria, 7533*d*.
**Coproporphyrin I**, absorption ratios in ultraviolet for coproporphyrin III and, 2094*e*.
**Coproporphyrin III**, absorption ratios in ultraviolet for coproporphyrin I and, 2094*e*.
and its tetramethyl ester, isolation from *Corynebacterium diphtheriae* culture filtrates, 2671*b*.
**Coprosma**, chemistry of, 210*b*.
**Coprostane**, from cholesterol by pyrolysis, 7574*a*.
——, **3(α)(and 3(β))-acetoxy-4,5-oxido-***, reaction with $AlLiH_4$, 1786*f*.
——, **3(β)-acetoxy-4(β),5-oxido-***, 6641*a*.
——, **3(α),5-dihydroxy-***, and 3(α)-acetate, 1786*i*.
and derivs., 1785*b*.
——, **3(α),5(and 3(β),5)-dihydroxy-***, and their 3-acetates, 3830*e*.
——, **3(β),5-dihydroxy-***, 5408*i*.
and 3(β)-acetate, 1786*f*.
carbonate, 1787*b*.
——, **3(α)(and 3(β))-hydroxy-4(β),5-oxido-***, and acetates, 1785*d*, 3830*g*.
——, **3-keto-5-hydroxy-***, 1786*c*, 1787*a*.
——, **3-keto-4(β),5-oxido-***, 1785*d*.
——, **4,5-oxido-***, derivs., 1785*d*.
——, **3(α),4,5-trihydroxy-***, and diacetate, 1786*d*.
*epi*-**Coprostanol**. See *Epicoprostanol*.
**Coprostanone**, bromination of, 7495*b*.
in oxidation-reduction reactions in the presence of Raney Ni, 191*e*.
reaction product with $SbCl_3$, spectrum of, 5307*g*.
——, **dibromo-**, 7495*a*.
——, **4,4-dibromo-***, bromination of, 4681*a*.
——, **2,4,4-tribromo-***, 2,4,6-tribromocholestenone and, 4681*a*.
**3-Coprostanone**, spectrum of, 3018*i*.
——, **7-methoxy-***, β-, and 2,4-dinitrophenylhydrazone, 3022*c*.
**Coptis chinensis**, antibacterial action of exts. of roots of, 716*h*.
bactericidal substances in, 7643*i*.
**Copying process**. (No entries this year. See *Printing; Transfers;* and "electrolytic facimile" under *Recording*.)
**Corals**, iodine in scleroproteins of gorgonin of Gorgonidae, 1871*a*.
iodotyrosine in gorgonin of *Gorgonia verrucosa*, 1871*d*.
provitamin D prepn. from, P 7648*d*.
reef of Leduc oil field, Alberta, 8319*g*.
strontium content and prepn. from, 5350*b*.
strontium sulfate manuf. from, P 6796*h*.
**Coramine** (*N,N - diethylnicotinamide*). (For derivs. see under *Nicotinamide*.) P 689*b*.
effect on work output of heart, 8421*e*.
haloferrates(III), P 3471*b*.
hematoporphyrin effect on action of, 7137*a*.
locus of action of, 7137*d*.
metabolism of, 6718*d*.
quaternary ions from, effect on nerves, 8502*i*.
reduction to 3-(diethylaminomethyl)pyridine, 121*h*.
in respiration stimulation, 5122*d*.
**Corasole**. See *Metrasole*.
**Corbasil**. See *Norephedrine, 3,4-dihydroxy-*.
**Corbefrin**. See *Norephedrine, 3,4-dihydroxy-*.
**Corchorus**. See *Jute*.
**Corcyra cephalonica**, toxicity to, of S compds., 4415*c*.
**Cord**. (See also *Ropes; Threads; Twine*.)
dynamic elastic modulus and hysteresis of, measurement of, 2439*e*.
dynamic properties of, at sonic frequencies, 4016*d*.
improving elasticity, heat resistance and strength of vegetable-fiber, P 5602*g*.
increasing flex-fatigue resistance and tensile strength of cotton, P 418*b*.
rayon, adhesion and dip-pickup of, flex life of tires and, 2012*g*.
rubber adhesion to, compression test for, 9514*g*.
rubber bond with cotton and rayon, fatigue tests on, 7253*b*.
rubberized, Fortisan rayon in manuf. of, 6408*g*.
rubber reinforcement with polyisocyanate-treated rubberized, P 2024*i*, P 2025*a*.
tire, adhesives and measuring adhesion of rayon, to rubber, 4044*i*, 4045*b*.
energy losses exhibited by, 6422*h*.
rayon as, 7692*f*.
**Cord grass**. See *Grasses*.
**Cordiamine***, effect on circulatory system in typhus, 8535*h*.
**Cordierite**, in Black Forest rock development, 8993*e*.
ceramic ware of, 3579*g*, 5164*g*.
coating with, on electrodes, P 4151*d*.
crystn. of, in industrial glasses, 1540*h*.
expansion and firing properties of, 3320*a*.
of France (Lyons), 8992*d*.
iron and synthetic Mg, in blast-furnace linings and hearths and fireclay casting-pit refractories, 5705*c*.
iron, in refractory materials, 3583*h*.
norites of Kok-Arche Mts., Altai, U.S.S.R., 2904*d*.
optically positive, from khondalites of Pachipenta, India, 976*h*.
thermal properties of, 9403*i*.
of Wyoming and its use in ceramic bodies, 828*f*.
**Cordierite gneiss**. See *Gneisses*.
**Cordite**, ignition by hot gases, 5188*g*.
*N*-nitroso-*N*-ethylaniline and its nitro derivs. in aged diethyldiphenylurea-stabilized, formation, identification and detn. of, 3617*e*.
smoke from, light scattering by, 4076*f*.
**Core oil**. See *Oils*.
**Cores**. See *Magnetic cores; Molds (I); Wells*.
**Coriandrol**. See *Linaloöl*.
**Cori ester**. See *Glucose phosphates*.
**Coriolus**. See *Polystictus*.
**Cork**, binder for, zein compns. for, P 2039*f*.
bleaching of, 5585*i*.
compns., P 4518*g*.
and cork products, 1841*f*
dust of, molded articles from waste sulfite liquor and, P 4517*e*.
dust of, sludge separator for, P 6871*a*.
gaskets from, fungicides for, 4803*i*.
plastic insulation from granules of, P 3235*c*.
removal from guayule rubber, 2799*i*
-rubber compns., P 5990*g*.
thermal insulator from, P 1126*c*
**Cork substitutes**, for gaskets, P 6466*i*
from peat, P 6004*d*.
**Corn**. (See also *Cereals; Grains; Silage*.)
amino acids in, 3534*p*, 7602*c*.
amino acids in pollen of sweet, 9177*i*.
amylases in, 9102*c*
amyloses from, effect of acid hydrolysis on retrogradation of, 2455*c*.
amyloses from, streaming birefrigence of, 3221*g*.
antibacterial and antifungal substances from, 3885*c*.
blanching of, with radiofrequency, 783*h*.
bread from, effect of sunflower meal on, 9183*a*.
bromine and Cl in, 3537*f*, 8572*d*.
canned, vitamins in, effect of storage temp. on, 1493*h*.
carbohydrates and nicotinic acid in, 277*g*.
carotene and vitamin C in yellow, 3536*b*.
carotenoids in, effect on growth of chicks and storage in their tissues, 4353*h*
chlorosis of, biochem. changes in, 8012*a*.
chromosome alteration and gene mutations in, by at. bomb radiations, 277*e*.
cobs, adhesive extender from, 8738*a*.
compn. and uses, 788*g*.
2-furaldehyde and pentoses from, 2171*c*.
holocellulose from, 4009*g*.
lignin from saccharification of, in phenolics, 7747*a*.
saccharification of, analysis in control of, 6412*a*.
compn. of, and its action in poultry rations, 2339*b*.
compn. of endosperm, germ, bran and tip-cap of, 2333*h*.
control of budworm and corn earworm in, with DDT, 7183*f*.
control of corn earworm and fall armyworm in, 3136*cf*.
cooling and disinfecting of, prior to nonrefrigerated storage, 9288*g*.
DDT injury to, 8088*b*, 1520*i*.
2,4-D effect on, 2727*d*.
diet of, effect of penicillin on dent caries during, 6709*c*.
diet of, nicotinic acid in tissue during, 3075*f*.
disinfection of seed, 7179*a*.
diuretic from, P 6791*c*.
effect on growth of young rat, 1091*d*.
effect on N and org. matter in soil, 9319*c*.
European-corn-borer control in—see *Pyrausta nubilalis*.
European-corn-borer mortality on, 7183*h*
exudations by roots of, effect of *Azotobacter* on yield in relation to, 9149*p*
fall-armyworm control on, 3136*e*.
feeds from, compn. of, 3538*i*.
fermentation of, moldy bran in, 5901*b*
fertilizer expts. with, 1129*e*, 1134*e*, 9313*c*, 9328*f*.
fertilizer expts. with, with phosphate, 1135*a*, 1891*c*, 1892*c*.
fillers for phenolic plastics from cob and stover of, 6862*e*.
flakes of, carbohydrates and vitamin I in, effect of steam on, 5875*i*
freezing injury of seed of, tests for, 2290.
frozen, effect of blanching and storage on, 1495*e*.
germination capacity of, detn. of, 3494*d*
germination of, effect of chloropicrin on, 1900*h*.
germination of, effect of photosensitivity of coumarin on, in light and darkness, 8010*d*.
germ removal from, 5876*b*, P 8718*d*
glucose manuf. from, P 427*d*.
gluten—see *Gluten*.
glycogen of Golden Bantam, 6849*b*
grits, mixt. for fortifying, P 8071*e*
growth retarding effect of, in nicotinic acid-low rations and its counteraction by tryptophan, 2680*c*.
heredity of oil in, 2675*b*.
husks of, nutritive value of, 6330*d*
hygroscopic equil. of whole-kernel, 478.
inheritance of protein and its components in, 7088*d*.
insect control on, chlorinated camphene in, 1143*c*.
insecticides for, DDT mixt. with hexachlorocyclohexane as, 2729*e*
isopropyl carbanilate persistence in under, 3961*a*.
magnesium deficiency of, 9313*c*
maleic hydrazide Cu or Zn deriv. effect, 6776*b*.
manuf. of products from, plant, 8716*d*.
mash—see *Mashes*.
neutral-red effect on growth of, 1081
nicotinic acid, pantothenic acid, vitamin $B_2$ and vitamin C in, during growth, 6289*h*.
*m*-nitrobenzamide-*N*-deriv., toxicity, 7182*b*.
in nutrition, 5837*c*, 9179*d*.
pellagragenic action of, 7556*f*
peroxidase in, 1905*d*.
*o*-phenylenediamine oxidase in, 1904*b*
phosphorus downward translocation in roots of, 5093*h*.
phosphorus movement in, 8021*a*
phytic acid in, 3116*d*.
processing of, biochem. factors in, 5875*g*.
insect problem in plants for, 150
statistical control in, 4901*g*.
products from, P 6332*a*.
proteins of, biol. value of, 1090*i*, 5101, 7559*a*.
hydrotropic action of urea on, 7505
in manuf. of Na glutamate, 5507*i*
oxidation-stable, oil- and starch free, P 8711*i*.
quality of, 9288*h*.
supplementary value of protein of marine animals for, 3892*i*.
proteins of germ and endosperm of, biol value of, 3077*i*.
protoanemonin effect on root tip of, 5830*i*.
radicle development in seedlings of, effect of Ca, Mg, Na or K on, 283*i*.
radioactive P introduction into, 329*i*
rations of alfalfa and, digestibility and metabolizability by lambs, 7158*e*.
repellent or toxic to European corn borer, soil treatment for producing, 9336*d*.
respiration during germination, effect of surface microflora on, 802*f*.
roots of, effect of 2,4-D on, 6352*i*.
seasoning of, monosodium glutamate and, 8572*h*.
selenium in, 3800*e*.

sodium detn. in, 8956*g*.
soil-$H_2O$ loss under, 6771*h*.
solvent extn. in dry milling of, P 2710*e*.
starch—see *Starch*.
steeping of, effect on structure of kernel, 324*f*.
steep water detn. of dry substance in, 5217*i*.
steepwater, for use in manuf. of penicillin, P 8106*e*.
stored-grain-insect control on, 1898*f*.
substitutes for, in fattening beef calves, 6712*b*.
tryptophan-niacin relation in, 6287*h*.
in turkey rations, 9328*g*.
urea as supplement for, 6712*a*.
vitamin A and carotenoid storage by chicks fed, 2291*g*.
vitamin $B_1$ in Punjab, and effect of cooking thereon, 8565*f*.
vitamin C in, 1454*i*.
vitamins in, effect of large scale methods of prepn. on, 9288*d*.
water detn in, 8708*c*.
waxes from yellow and waxy, 2450*h*.
weed control in, 1893*i*, 1894*d*.
weed control in, with 2,4-D, 1894*hi*, 7180*i*.
weevil control in bags of, 1900*c*.
yield factors of, 4309*a*.
zinc deficiency of, acid-extractable Zn in soils and, 1133*h*.

**Corn beetles**, 2-hydroxyethyl thiocyanate effect on, 2945*g*.
**Cornea**. See *Eyes*.
**Corn earworm**. See *Heliothis armigera*.
**Corn flea beetle**. See *Chaetocnema pulicaria*.
**Corn flour**, agenized, effect on animals and humans, 3532*i*.
detn of cold-water-absorptive capacity of pregelatinized, 325*b*.
diastatic activity of, 7596*d*.
by dry milling corn, P 6332*c*.
mixt. with farina and wheat germ, 5-pentadecylresorcinol antioxidant in, P 884*e*.
tryptophan in, 5837*d*.
**Cornin** See *Verbenalin*.
**Corn meal**, amino acids in yellow, 3534*g*.
by dry milling corn, P 6332*c*.
in laying rations for hens, 9290*b*.
**Corn oil**, 2150*i*.
absorption from digestive tract, 9211*i*
analysis of, for double bonds, OH groups and branchings in C chains, 1173*f*.
by products of manuf. of, 5218*g*.
cake, nutritive value of, 6330*f*.
cultivation in Gt. Brit. for drying oil, 8699*a*.
effect on microörganisms in cecal contents of rats, 2277*a*.
fatty acids in, 5875*h*.
heredity of, in corn kernel, 2675*b*.
in kernels, 2333*i*.
linoleic acid detn. in, 7721*i*.
manuf. of, by wet-milling process, P 6332*c*.
manuf. of, plant for, 8716*d*.
recovery of, 1581*h*, P 2710*f*, 5876*c*, P 8711*i*.
recovery of, measurement of rate of, 7721*b*.
solvent fractionation of, at low temps. and calcn. of its glyceride structure, 1581*e*
surface tension of, 6878*i*.
**Corn sirup**. See *Glucose (the sirup and its dried products)*.
**Cornstarch**. See *Starch; Corn flour*.
**Corn sugar**. See *Glucose (the sirup and its dried products)*.
**Cornus**. See *Dogwood*.
**Cornwallite**, prepn. of, 2885*d*.
**Coroglaucigenin**, and derivs., 4679*i*.
**Corona** (*electrical discharge*), analysis of pos. and neg., 1255*c*.
effect on $SF_6$, 7354*i*.
point-to-plane, onset potentials of, 7323*b*.
**Corona** (*of sun*). See *Sun*.
**Coronenamine**, 5020*c*.
**Coronene**,

effect on fluorescent spectrum, transition temps. and x-ray patterns of gibbsite, 3819*f*.
manuf. by hydrogenation of coal, 5171*c*.
structure of, 3672*i*, 5020*a*.
viscosity of solns. of, 1629*i*.
——, **acetamido-**. See *Acetamide, N-coronenyl-*.
——, **benzoyl-**. See *Ketone, coronenyl phenyl*.
——, **dibromo-**, 5020*d*.

in paper-pulp manuf., 4010*h*.
in petroleum disposal wells by salt-water injection, 3599*e*.
in petroleum-distg. and fluid-catalytic cracking unit, 6401*f*.
in petroleum-distg. unit and condensers, 7220*i*.
of petroleum pipe lines by sour oil, 5581*g*.
in petroleum refineries, 385*e*, 1954*f*, 8127*g*.
of petroleum tanks, 4621*i*, 5929*h*.
of pipe lines, 1706*b*.
of pipe lines and its prevention, 986*h*.
of pipes covered by brass or Cu screen, 1705*g*.
of pipes underground, 6962*c*.
-preventing properties of turbine oil, test for, 4399*f*.
and its prevention, 5721*a*.
prevention of—see also *Bonderization; Coating(s); Galvanisation; Lining(s); Paint*.
prevention of, 421*b*, 2151*e*, 4995*fi*, 6962*gh*, 9295*g*.
by acids, 9014*f*, P 5730*d*.
adsorption of agents for, 6559*g*.
adsorption of inhibitors and, 6559*i*.
agents for, P 102*f*, 547*i*, 548*d*, 1305*e*, P 1308*f*, 1706*gi*, 1707*b*, 1953*f*, 2564*e*, 3336*f*, 4207*i*, P 4627*b*.
in air-conditioning system, 8342*b*.
of airplane engines, 5516*c*.
by alc. antifreeze, 8076*h*.
of Al alloys, 549*c*, 2143*h*.
by Al halide-hydrocarbon complex catalysts in hydrocarbon conversion with alk. earth metals, P 5582*i*.
with amine salts of diesters of SP(OH)$_3$, P 665*g*.
Sb-Pb-Sn alloys for, P 6095*a*.
by aromatic hydrocarbons alkylated with aromatic sulfonic acid catalysts, P 4458*c*.
by aromatic hydrocarbons alkylated with P acid catalysts, P 9430*g*.
of automobile fenders by NaCl with polyphosphate, 7401*a*.
with basic Zn chromate pigment, 6836*d*, 8697*e*.
with BzOH esters and BzONa, 6962*i*.
in boiler-feed pumps, materials for, 2345*h*.
of boilers, 3546*b*, 6138*h*.
of boilers with amine treatment of steam, 9307*b*.
of brake or clutch surfaces, agents for, P 7896*a*.
of brass and steel by 2-furaldehyde with mercaptobenzothiazole, P 9430*i*.
by $H_2CO_3$, P 5730*e*.
in catalysis with phosphorus acids, P 8349*f*.
cathodic, 99*g*, 506*a*, 1305*c*, 4620*f*, 5356*f*.
cathodic, and with bituminous coatings, for water tanks, 6343*g*.
cathodic, anode for, P 3734*b*.
cathodic, anode materials for, 6560*h*.
cathodic, of Al and Al alloys, 2914*f*.
cathodic, of bronze wires in paper-pulp manuf., 4012*i*.
cathodic, of gas lines, 4445*e*, 7400*h*.
cathodic, of hot-water tanks, P 2923*b*.
cathodic, of Pb-cable sheaths, 1305*a*.
cathodic, of pipe lines, 1705*i*, 1706*ab*, 2151*a*, 3336*e*, 7400*g*.
cathodic, of water tanks, 6141*g*, 6342*i*.
cathodic, symposium on, 6092*cdefghi*, 6093*abcdghi*, 6094*a*.
cathodic, with light-metal anodes, 6962*i*.
cathodic, with Mg, Zn and Zn-Li anodes, 6525*b*.
in chem. industry, 548.
by chlorides, P 992*b*, 5359*d*.
with chromates, 3337*e*, 8340*e*.
with chromic acid and $K_2CrO_4$, 9015*b*.
cleaning compn. for, P 3772*f*.
*prevention of*, coatings and, 2151*d*.
of Cu by S, 4207*bf*.
of Cu by S in petroleum oils with *tert*-butyl hydroperoxide, P 5582*f*.
of Cu or Fe, with powd. Zn and undecylenic acid, P 1710*g*.
by DDT-pyrethrum aerosols, 9330*d*.
2,4-diamino-*s*-triazine derivs. for agents for, P 7053*h*.
dicarboxylic acid combinations with alkyl acid esters of P acids for, P 1180*b*.
dicyclohexylamine nitrite for, P 1058*c*.
by electrodeposition and selective oxidation, 4149*b*.
in engine-cooling systems and radiators, app. for, P 6149*b*.
of engines by $H_2O$, 7888*h*.
of ferrous metals by acid cleaning compns. with glyoxal, P 6439*b*.
by flue gases, 100*a*.
by fuel oils, insulating oils, etc., agents for, P 4008*b*.
in gas and oil wells, $H_2S$ in, P 3185*i*.
in gas-condensate wells, 551*f*, 6813*a*, 7217*a*, 8651*d*.
of gas lines, 98*i*, 2150*h*.
hydrocarbon resins for, P 5630*h*.
by HCl, 986*c*.
in HF-catalyzed alkylation with Sb, As or Bi or their halides, P 3190*a*.
H overpotential and, 952*a*.
hydroxyarylalkyl amine condensation products for, P 1176*a*.
hydroxyaryl amines in, P 1062*a*.
of idle boilers by $NH_3$, 4623*d*.
with imidazoline derivs., P 5001*i*.
of insulator caps of temper castings, 6139*b*.
of interiors of inactive ships, 96*c*.
with Fe oxide pigment, 5201*c*, 8697*d*.
of light metals, agents for, 4622*c*, 9003*b*.
by lubricants—see *Lubricants*.
of Mg alloys by salt water with chlorododecylbis(octyloxy)silane, P 6430*e*.
by mercaptide compn. with polymer of cracked gasoline, P 8349*d*.
with metal coatings, 550*e*.
by moisture, wrapping material for, P 5640*f*.
of multiple-metal systems, agents for, P 8349*b*.
of Ni by As, 8903*a*.
in Ni plating, naphthalene sulfonic acids for, 883*a*.
in oil tankers, 8127*e*.
in oil wells, refineries, etc., P 6406*g*.
oily sulfonate-contg. compns. for, P 1564*b*.
org. sulfides for, P 6646*d*.
with Orlon, 9015*f*.
of oxide-coated Al and Al alloys, P 8350*b*.
by paraldehyde-contg. fuels with org. bases, antioxidants, etc., P 8130*b*.
by passivation, 28*i*.
by petroleum contg. $CaCl_2$ or $MgCl_2$ with alkali metal sulfates, P 9431*a*.
petroleum derivs. for, 884*i*.
by petroleum distillates in pipe lines with sodamide inhibitor and $Na_2SO_3$, P 6402*i*.
petroleum mahogany purified sulfonates for compns. for, P 3194*g*.
petroleum-product discoloration by phenol reaction products with alk. agents for, 1553*f*.

**Coumarone.** See *Benzofuran*.

**Counters.** (See also "measurement of, app for" under *Radioactivity*.)
alpha-particle spark, 5292*c*.
for alpha-rays, operation of, 3706*h*.
for angular correlation of α- and γ rays, 7810*i*.
bromine-filled, P 8284*b*.
cadmium sulfide crystal, 4110*gh*, 8875*g*.
cathode of, delayed emission of electrons from, operating above plateau, 4945*h*
circuits, differential counting with reversible decade, 7327*k*.
coincidence corrections for, detn. of, 4091*f*.
for cosmic-ray showers, wire and-plate type, 7327*g*.
counting rate meters *vs.* scalers, 4055*g*.
crystal, 5663*f*.
crystal, for neutrons, 6909*b*.
crystal, Geiger-Müller and continuous gas flow proportional, 5288*a*
diamond crystal, removal of space charge in, 8264*a*.
efficiency of, 3706*f*.
electron multiplier as, for 10-e kv protons, 3282*b*.
frequency, in heat-capacity measurement, 7280*e*
gamma-ray, efficiency of, 935*a*
gas, filled with $CO_2$ and $CS_2$, efficiency of 8263*e*.
Geiger, 2861*a*, 7885*a*.
for assay of low specific activity samples of $C^{14}$, 6688*c*.
contg. $PbMe_4$, 4095*a*.
crystal use in, 7286*i*.
discharge at voltages above plateau, 4110*b*.
discharge in, 1259*b*.
expts. with, 8261*b*.
improved-quenching circuit for, 4945*i*
multicellular, for γ rays, 5663*i*
prospecting with, 6505*c*
spurious counts in, analysis of, 4945*i*
spurious counts in, pretreatment of electrodes and, 8853*d*.
for Th detn. in thoriated W wire, 4945*g*.
Geiger-Müller, 1259*c*, 8215*e*.
adjustable, 3706*i*.
after-effect of discharge in, 5290*b*
background rate in γ-ray, 7811*g*
circuit for study of operation of, 8756*d*
construction of metal, 8852*b*.
contg. alc. and A, 5288*f*.
contg. different gases, 5291*g*
contg. ether-A mixts., 3281*g*.
dead time in, 5291*e*.
dead time in, measurement of, 4960*k*.
dead time in, reduction of, 4110*a*
demountable, with filling gases at atm. pressure, 8853*c*
deterioration of $CH_4$-filled, 4844*a*.
detn. of deadtime and recovery time of, 4946*a*.
development of discharge in, 5291*b*.
$CH_2Br_2$ as quenching agent in, 5292*b*.
discharge characteristics of, 4092*i*, 5289*c*.
with external cathode, 8263*e*.
extinction of discharge in, 5291*d*.
for γ-rays, 4110*d*.
He-contg., 8851*i*.
life of self-quenching, 4831*i*.
for making γ-ray surveys of diamond drill holes, 6073*i*.
pressure - regulated thin - window, 5663*h*.
production of, discharge mechanism and, 7327*i*.

*Geiger-Müller*, pulse size and threshold voltage of, 5290*f*.
and quenching unit therefor, 3281*h*.
spherical, 4945*f*.
starting potential of discharge of, 1646*a*.
temp. dependence of self-quenching, 8863*c*.
time interval of after-discharge in, 5290*g*.
velocity of formation of ion sheath along central wire of, 5291*h*.
x-ray spectrometer with, 6469*h*.
halogen-contg., 8853*a*.
for health protection, 7326*f*.
for low-energy ionizing particles, 935*b*.
with low operating potentials, 4091*e*.
luminescent, 4110*f*.
measurement with, 1648*g*.
in metallography of surfaces, 7391*g*.
microwave gas-discharge, 3282*c*.
nonlinearity of, detn. of, 5288*b*.
parallel-plate, 6076*g*.
photoelec.-nucleus, calibration of, 2087*i*.
point, for thin-section analysis, 8747*e*.
proportional, 6076*b*.
fluctuations for, 4091*e*.
$CH_4$-flow B-, 7327*f*.
with rectangular cross section, 5292*a*.
resolving power and anisotropy of, 2861*b*.
for soft x-rays, 4131*c*.
proportional $\alpha$-, for atm. dust filters, 4521*i*.
rate meter for, 2043*i*.
scale units, analysis of, 3667*f*
scintillation, for $\beta$- and $\gamma$-rays, 4095*a*.
931-A type multiplier as, 6076*f*.
for measurement of half-lives of short-lived isomers, 6914*d*.
measurement of particle energies with, 5292*d*.
org. crystals as, 8264*b*.
as proportional device, 5663*f*.
quant. measurements with, 4112*f*.
sensitivities of org. compds. for, 4111*d*.
using org. compds., 7811*i*.
scintillation coincidence, 4111*f*.
self-quenching, pulse shape of, 4094*g*.
silver chloride crystal, rise time of pulses in, 4092*h*.
spark, 4946*d*.
tubes for, lined with Th foil or U oxide, 5298*a*.
ultra-fast, 4092*e*.
in x-ray measurements, 8844*c*.

**Creosol** (*2 - methoxy - p - cresol, 4-methylguaiacol*),

——, *α* - (**5 - arsenoso - 2 - hydroxyphenylimino**)-, 599*a*.
——, *α,α* - **bis**(*p* - **dimethylaminophenyl**)-, for lubricant improvement, P 9132*g*.
——, *α,α* - **bis**(*p* - **hydroxyphenyl**)-, and triacetate, 5772*c*.
——, *α,α*-**diphenyl**-, and acetate, 8684*i*.
——, *α,α'*-**dithiodi**-, 9438*c*.
——, *α* - (*p* - **hydroxyphenyl**) - *α*-**phenyl**-†, and diacetate, 8683*d*.
——, *α*-**mercapto**-, 9438*c*.
**Creosote**. (See also *Absorption oils*.)
in bark-beetle control in elm logs, 4417*d*.
in bluestain control on pine, 8597*c*.
in citrus-snout-beetle control in soil, 5149*g*.
cleaning and drying of, app. for, P 7632*c*.
coatings from, on wood, resistance to corrosive chemicals, 3632*e*.
formation from $C_2H_2$, 5376*e*.
mixts. with Cu naphthenates, in fungus control on fibers, 6831*f*, 7693*b*.
mixts. with petroleum oil, detn. of sludging properties of, 2731*e*.
petroleum, toxicity to fungi, 3902*b*.
from pine-root tar, P 3176*i*.
in tree control on southern upland, 6352*i*.
vineyard-stake preservation with, 6352*d*.
for wood preservation, 6351*h*.
wood preservation with—see *Wood*.
wood preservatives contg., sludge control in, 2731*h*.
wood-preservatives contg., testing of, 2731*b*.
**Creosote bush**. (See also *Larrea*.)
use of, 6337*g*.
**Creosote oil**, tanning agent from hard-wood, P 2008*d*.
wood preservation with—see "preservation of" under *Wood*.
**Crepis capillaris**, polyploidy of, from colchicine, 3889*d*.
**Cresantol-15***, synergistc effect of aerosol OT on, 3065*c*.
**Cresidine***, naphthoquinoneimide dye from, P 8167*b*.
*p*-**Cresidine***, disazo dye from, P 1574*d*.
**Cresol**(s) (*methylphenol; OH* = 1). (See also *Phenols; Tar acids*.)
alkylation of, P 687*e*.
antihistamine action of, 1112*i*.
benzoate—see "tolyl ester" under *Benzoic acid*.
*tert*-butyl derivs., cleavage of *tert*-butyl group from, 3804*h*.
*tert*-**butyl substituted**, toxicity of, 8554*a*.
chloro derivs. and mixts. with xylenol in citrus-snout-beetle control in soil, 5149*g*.
condensation products of—see *Phenol condensation products*.
detn. of, British standards for, 1527*e*.
formation from lignin by hydrogenation, 8675*b*.
*α*-halo derivs., reaction with phenols, 5019*a*.
hydrogenation of, cleaning metal catalysts from, P 6763*e*.
manuf. of, P 2638*f*.
manuf. of, by hydrogenation of coal, 5171*c*, 8646*g*.
nitro derivs., 4216*g*.
phenol detn. in, 9422*i*.
phosphate—see *Tolyl phosphate*.
reaction with butyl vinyl ether, 3783*d*.
with $SiS_2$, 4631*d*.
with terpenes, P 6237*bc*.
recovery of, from petroleum-refinery waste waters, 3601*e*.
removal from natural waters, 7169*g*.
soap-oil dispersion peptization by, 4455*h*.
sodium deriv., oxidation of thiols in solns. of, P 6235*b*.
sulfonation of, 6994*g*.
synergism with aerosol OT, 3065*c*.
utilization in industry, 5927*d*.
in wood preservation, 4418*a*.
in zinc electrolytic production, P 5680*f*.
**Cresol**, *α* - (**amylmercapto**) - *ar* - **octyl**-, and barium deriv., P 845*b*.
——, **benzhydryl**-. See *Xylenol, α,α-diphenyl*-.
——, **benzyl**-*, synergistic effect of aerosol OT on, 3065*c*.
——, *α*-**benzylidene**-. See *Stilbenol*.
——, *α,α*-**bis**(**aminophenylmercapto**)-†, 6179*f*.
——, *α,α*-**bis**(**aminophenylmercapto**)-**methoxy**-†, 6179*f*.
——, *α,α*-**bis**(**nitrophenylmercapto**)-†, reduction of, 6179*f*.
——, **chloro**-, derivs., P 7014*g*, P 7045*a*.
——, **dinitro**-, effect on alc. absorption, excretion and oxidation, 7127*b*.
insecticide from, P 9356*e*.
insecticides from benzenesulfonamide derivs. and, P 4419*h*.
——, **methoxy** - *α,α* - **bis**(**nitrophenylmercapto**)-†, reduction of, 6179*f*.
——, *α*-**phenyl**-, *ar'*-polyalkyl derivs., for hydrocarbon oil stabilization, P 4457*f*.
——, *α,α'* - (**propylenedinitrilo**)**di**-, copper deriv., 8222*d*.
——, *ar,ar'*-**sulfonyldi**-, tanning prepns. from, P 4883*b*.
*m*-**Cresol**, acetylation of, 9049*g*.
aluminum chloride deriv., reaction with BzH, 5398*e*.
condensation with HCHO, 1603*f*.
detn. of, and Brit. standards for, 1527*d*.
detn. of, in air, 4798*i*.
in complex biochem. mixts., 1453*e*.
in mixts. with *p*-cresol, 5343*e*.
in waters, 4185*b*.
effect on d., moisture absorption and swelling properties of nylon, 5191*e*.
on polarography of metals, 5316*a*.
on protein fibers, 468*e*.
on syneresis of Na oleate gels, 4080*b*.
on Sn electrodeposition, 1269*f*.
hydracrylate, 3393*c*.
identification of, 7447*c*, 7448*d*.
mixt. with $Ph_3CCl$ as catalyst for polymerization of 2-ethylhexyl vinyl ether, 6896*c*.
nitramide decompn. in, catalyzed by amines, 8828*f*.
oscillating magnetic field effect on, 6087*e*.
partition between cyclohexane and phosphate buffer or $H_2O$, ionization const. and, 7788*i*.
reaction with biacetyl, 8370*f*.
reaction with cyclohexene and with epichlorohydrin, 6173*i*.
sepn. from *p*-cresol by countercurrent distribution, 7789*b*.
sepn. of, by means of its compd. with 2,4-xylenol, P 3459*c*.
soly. in Na xylenesulfonate solns., 1242*e*.
spectrum of, 2512*g*, 5665*i*.
spectrum of, and effect of NaOH thereon, 8881*c*.
systems (binary) of, 4063*e*.
system: Na palmitate–, x-ray diffraction by, 2793*b*.
toxicity of, 1867*f*.
toxicology of, 5514*d*.
*m*-**Cresol**, **4-amino**-, azo stilbene dye from, P 5198*c*.
prepn. from *o*-nitrotoluene, 3729*g*.
——, **4-amino-2-chloro**-, and diacetyl deriv., 182*g*.
——, **5-amino-4-ethyl**-, 3385*g*.
——, **6 - amino - 4 - propyl**-, 3385*g*.
——, **amyl**-, antifouling properties of, 3964*a*.
——, **4-(benzyloxy)**-, 3387*b*.
——, **4-bromo**-, 3,5-dibromo-2,4-cresotate, 2603*i*.
——, **6-*tert*-butyl**-, spectrum of, and effect of NaOH thereon, 8881*c*.
——, **4-chloro**-, benzoate, 5387*d*.
*d*- and *dl*-camphorates, as fungicides, P 1901*i*.
——, **6-chloro**-, identification of, 7447*d*, 7448*e*.
——, **4 - chloro - α,α - bis**(*p* - **dimethylaminophenyl**)-, derivs., 5387*d*.
——, **2**(and **6**) - (*p* - **chlorophenylazo**)-**4-ethyl**-, 3385*i*.
——, **2**(and **6**) - (*p* - **chlorophenylazo**)-**4-propyl**-, 3385*i*.
——, **cyclohexyl**-, isomers, 6173*i*.
——, **4,6 - dichloro - 5 - methoxy**-, 3,5 - dichloro - 4,6 - dimethoxy - *o*-toluate, 609*a*.
——, *α,α'* - **dithiobis**[**5 - methoxy**-, 7014*h*.
——, **4-ethyl**-, substitution in, 3385*h*
——, **5-ethyl**-, 2969*a*.
partition between cyclohexane and phosphate buffer or $H_2O$, ionization const. and, 7788*i*.
——, **2-ethyl-5-isopropyl**-, and carbanilate, 2969*c*.
——, **4 - ethyl - 2**(and **6**) - **phenylazo**-, 3385*i*.
——, **5-hexyl**-, 2969*a*.
——, **5 - [***m*(*o* and *p*) - **hydroxyphenoxy**]-, P 2232*d*.
——, **5-isopropyl**-, 2969*a*.
——, **6-isopropyl**-. See *Thymol*.
——, *α* - **mercapto** - **5** - **methoxy**-7014*h*.
——, **4-methoxy**-, 3387*a*.
——, (**1 - methylcyclopentyl**)-, 2171*c*
——, **6,6'** - **methylenebis**[**4** - **chloro**-, P 9389*i*.
tuberculocidal activity and toxicity of, 8614*i*.
——, **nitroso**-, antifouling properties of, 3964*a*.
——, **4-nitroso**-, spectrum and isomerism of, 5378*h*.
——, **5-phenoxy**-, P 2232*d*.
——, **4-propyl**-, and substitution in, 3385*g*.
——, **5-propyl**-, and carbanilate, 2969*a*.
——, **2',4,6,6' - tetrachloro - 5-methoxy-2,5'-oxydi**-, 608*h*.
——, **thiodi**-, as stabilizer for vinyl compds., P 2469*a*.
——, **4-*o*-tolylazo**-, 3801*b*.
——, *α,α,4*-**trichloro**-, benzoate, 5387*d*
——, *α,α,α*-**trifluoro**-, carbanilate, 593*f*
——, **trinitro**-, 6585*h*.
reaction with tribenzylamine in $C_6H_6$, equil. in, 7793*a*.
——, **2,4,6-trinitro**-, 5013*c*.
*o*-**Cresol**, chelation, intermol. energy and mol. assocn. of, 7300*i*.
chlorination of, P 7045*b*.
condensation with HCHO, 1603*f*.
detn. of, 7867*i*.
in air, 4798*i*.
in waters, 4185*b*.
detn of, and Brit. standards for, 1527*d*.
deuterium exchange with, 5011*g*.
effect on syneresis of Na oleate gels, 4080*a*.
formation from NaHS degradation of lignin, 6824*a*.
hydracrylate, 3393*c*.
identification of, 7447*c*, 7448*d*.
oscillating magnetic field effect on, 6087*e*.
partition between cyclohexane and phosphate buffer or $H_2O$, ionization const. and, 7788*i*.
phosphate, cholinesterase inhibition by, 9103*b*.
reaction with biacetyl, 8370*e*.
reaction with cyclohexene and with epichlorohydrin, 6173*i*.
soly. in Na xylenesulfonate solns., 1242*e*.
spectrum of, 2512*g*, 5665*i*.
spectrum of, and effect of NaOH thereon, 8881*c*.
system: Na palmitate–, x-ray diffraction by, 2793*b*.
testing disinfectant action of, subculture media in, 274*d*.
toxicity of, 1867*f*.
toxicology of, 5514*d*.
*o*-**Cresol**, **4** - (**6 - acetamido - 4-quinolyl**-

amino) - α - 1 - piperidyl-, dihydrochloride, P 7514*g*.

**o-Crotonanisidide, *N*-ethyl-**, P 5414a.
——, ***N*-ethyl-α,β-dimethyl-**, P 5414b.
***p*-Crotonanisidide, *N*-methyl-**, P 5414a.
——, ***N*,α,β-trimethyl-**, P 5414b.
**Croton bug**. See *Cockroaches*.
**Crotonic acid** (*2-butenoic acid*). (*Unsubstituted 2-butenoic acids which have been assigned the cis configuration are entered as* Isocrotonic acid; *undesignated and trans-acids are entered here. All derivatives of these acids are entered as inverted entries under* Crotonic acid *with "cis-" in the modification when they have been so designated.*)
2-chloroallyl ester, polymers with butadiene, P 432i.
copper(I) chloride complexes with, 8940h.
decyldinitrophenyl ester, in brown-rot control, 3553h.
derivs., lactones of, 4639i.
dinitro-*sec*-octylphenyl ester, as fungicide, 7177a.
effect of, on bacteriostatic action of dodecyldimethyl(phenoxyethyl)ammonium bromide, 9377b.
on diffusion of strong electrolytes, 8773g.
in nitrocellulose lacquers, 7718h.
esters, in cellulose ester stabilization, P 7685e.
detn. of, 8976e.
dimers of, P 5792g.
phys. consts. of, 2591f.
with ricinoleic acid, reaction product with thiophosphoric acid, P 4877h.
ethyl ester, copolymer with vinyl acetate, P 2031a.
reaction with formanilide, 576c.
reaction with $CH_3NO_2$, 5775h.
hydrogenation of, effect of amt. of catalysts on rate of, 8819b.
hydrogenation of, mass of catalyst and rate of, 4551c.
identification of, as its 2-(1-naphthylmethyl)-2-thiopseudourea salt, 565h.
manuf. of, P 671e, P 3442i, P 3838d.
methyl ester, ammonolysis rate of, 6495g.
methyl ester, condensation (attempted) with $PrNO_2$, 1319h.
mol. assocn., dipole moment and elec. polarization in $C_6H_6$, 6493i.
polymerization of, with styrene or α-methylstyrene and dehydrated castor oil and drying oil fatty acids and then polybasic acid and polyhydric alc., P 6433c.
polymerization of, with vinyl aromatic compds. and drying oils and esterification of polymer, P 5972b.
*p*-quinone dioxime deriv., as vulcanizing agent, 5623c.
reaction with guanidine and urea, 5996a.
**Crotonic acid, α-acetamido-**, spectrum of, 3857a.
——, **β-(p-acetamidoanilino)-**, ethyl ester, 1778a.
——, **β-[α-(p-acetamidophenyl)-p-toluidino]-**, methyl ester, 646a.
——, **α-acetyl-**. See *Acetoacetic acid, α-ethylidene-*.
——, **β-anilino-**, ethyl ester, 228i.
——, **γ-anthryl-**. See *Anthracenecrotonic acid*.
——, **α-benzamido-**, 9033h.
——, **β-6-benzothiazolylamino-**, ethyl ester, 7478f.

——, α - **benzoyl** - β - **hydroxy-**, ethyl ester acetate, P 6655*d*.
——, **α-bromo-**, *cis-*, and ethyl ester, 4224*g*.
——, **γ-bromo-**, methyl ester, reaction with 6-cyclohexyl-2-hexanol in the presence of Zn, 8361*c*.
——, γ - **bromo** - γ - **hydroxy** - β-**methoxy**-γ-**phenyl-**, γ lactone, 7459*d*.
——, β - [α - (*p* - **bromophenyl**) - *p*-**toluidino**]-, methyl ester, 646*a*.

of Cu, $Cu_2O$ formation on, 2063*h*.
Cu film of, oxidation of, 6880*f*.
of Cu, plastic deformation of, 83*c*.
of $CuSO_4$, magnetic absorption by, 5244*c*.
of corundum, bend creep and bend strength of, 9402*h*.
electron interference patterns of, at high potentials, 7324*d*.
of Ga, 8781*b*.
growing of, P 6013*a*.
of ice, 8220*b*.
of Fe, acid brittleness of, 7395*f*.
of Fe and Ni, magnetostriction in, 5243*c*.
of Fe, homogeneous yielding of carburized and nitrided, 2558*h*.
of Fe, magnetic resonance absorption in, 4066*h*.
of Fe, strain-aging and yielding of carburized and nitrided, 7881*e*.
of $MnF_2$, magnetic anisotropy of, 8222*i*.
single, of metals, effect of size of, on stress-strain diagram and strength-lowering effect of adsorption, 7768*a*.
of metals, prepn. of, 8787*g*.
of metals, small isolated crystals in, 4072*b*.
of Ni, elastic consts. and internal loss in, 7768*d*.
of paraffin wax, formation in elec. field and dielec. strength of, 2480*d*.
particle size and slip in plastically deformed, 2144*f*.
patterns of, in electron diffraction, 7319*b*.
plastic flow of, 4614*e*.
of quartz, manuf. of, 6026*h*.
of rutile, 1622*h*, 6482*h*.
of salts of Fe group of elements, magnetism at low temps., 2479*h*.
of scheelite, growth of, 4111*i*.
of Ag, effect of surface-active substances on rate of growth of electrolytic, 4584*c*.
of NaCl, kinetics of soln. of, 6054*e*.
of $NaClO_3$, extra reflections from, 6484*c*.
of stearic acid, polymorphic transition of, 6482*d*.
thermomagnetic Nernst effect for, 8221*h*.
of Sn, deformation in solns. of oleic acid, 6028*h*.
of Sn, effect of surface-active substances on deformation of, 8230*c*.
of Sn, supereonductive transition in, 457*h*.
of $WO_3$, 8783*h*.
ultrasonic-wave absorption by, 4535*b*.
of Zn, damping capacity and elasticity of, 83*i*.
of Zn, elasticity and orientation of, 6482*b*.
of Zn, internal friction of, 2482*h*
of Zn, kink bands in, 7882*f*.
of Zn, magnetic susceptibility of, 4066*h*.
size of, of camphor eutectic with naphthalene, effect of stearic acid on, 8832*e*.
catalytic activity and, 6897*c*.
of ceresin in toluene and of paraffin in solar oil at low temps., 2410*h*
in dikes, 6127*f*, 7873*g*
of MgO, during calcination, 3156*e*
of psilomelane and pyrolusite, properties and, 1663*i*.
of ZnS, luminescence with α ray excitation and, 5668*i*.
slip and other properties of metal, 8325*b*
slip of metal, 84*bd*, 3329*c*.
slip planes in, unevenness of, 7767*i*
soundness of, detn. of, 6482*f*
spectra of, 4571*b*, 4575*f*.
in steel at upper yield point, strength and, 9008*i*.
stresses in, relief by solute atoms, 3259*b*
surface area of, measurement by adsorption of gas, 2066*b*.
surface energy of heteropolar, 5653*b*.
surface free energy of, 3260*a*.
surface layers of, 3259*h*.
surface of, anisotropy of, 7871*h*
surfaces of, selection rules for ions in, 7769*b*.
surface structural deviations in ionic, 4072*c*.
symmetry of, effect on limiting vibrations of mol. lattices, 8783*c*.
symmetry of, phys. properties and, 6481*i*
systems of, dispersed structure of, 8828*f*.
thickness of thin, measurement of, 14*b*
topological (dynod) analysis of mol., 920*e*.
twinned, of brass and Cu from annealing, 7887*f*.
of brass from annealing, 7887*g*
of bredigite, 5705*i*.
of chrysoberyl, 8983*d*.
crystn. conditions and, 6032*a*.

effect of refraction on, 2863e.
by electron diffraction, 4556g.
electrophotoluminescence in, 6086f.
extension of Banerjee's method for detg. signs of Fourier coeffs. in, 6509h.
extra spots in Laue photographs in, 8875e.
Fourier and new point-diagram synthesis in x-ray, 8858c.
Fourier method of, 7815f, 8874cdfg, 8875ab.
gnomonic projector for x-ray Laue-grams in, 8851g.
implication theory in, ambiguity factor in, 3289b.
implication theory in, Fourier aspects of, 8847a.
inequality method of detg. signs of Fourier coeffs. in, 6509h.
of lamellae, app. for, 1256h.
lattice const. by electron microscopy, 3279g.
by Laue method, 7816b.
measurement and correction of intensities from single-crystal x-ray photographs in, 6509i.
mechanization of calcns. in x-ray, by Fourier analysis, 3288i, 4952g.
of metallic phases, 4055b.
of metals, effect of cold deformation and recrystn. on, 6956c.
method of steepest descents and, 3289c.
multiple Guinier cameras for, 911i.
of noncubic substance, 3709f.
photoelec. app. for evaluation of structure factors, 6470e.
by powder and rotating-crystal methods, 8859a.
powder diagrams with single crystal in, 4566g.
punched cards in, 6509d.
Raman effect in, 2513c.
relation between distributions and corresponding Patterson distributions in, 4566c.
setting of crystals by x-rays in, 6509g.
simplifying calcns. in Fourier method of, with previously established structural information, 4093d.
of single crystals, x-ray counterspectrometer for, 4566f.
subtraction of atom images from a Fourier synthesis in, 4566c.
summation of Fourier series in, 6078d.
table of interplanar spacings for back-reflection region for, 4567c.
with x-rays, 2091a, 4073k.
detn. of, and data for Fe, 4535f.
of dibiphenyleneethylene, 3263c.
of diborides of Cb, Ta, Ti, V and Zr, 8933a.
of diethyl terephthalate, 6485i.
of 2,2'-diiododiethyl trisulfide, 15i.
of 4,6-dimethyl-2-hydroxypyrimidine, 920a.
of 2,6-dinitronaphthalene, 4074i.
of dinitronaphthalenes, 1236k.
of dinitrososulfites, 5241i.
of 3,4-diphenyl-1,5-hexadiene and related compds., 611i.
of dithionates of Ca, Pb and Sr, 2483i.
in electrodeposition, 502b.
of electrodeposits, origin of block, 8906a.
electron emission from metals and, 6492e.
of elements of group VIB, 1622d.
of elements of 5f-series, 6484dfg.
in engineering, 2752g.
factors, projection on reciprocal lattice, 8858g.
of ferroferricyanides, 1677e.
of ferromagnetic foils, 8858k.
of fibers, 4857f.
of films of Al, Cu and Ag, 5653c.
of fluotungstic acids, 1671e.
Fourier-transform evaluation by Fourier synthesis, 9188.
of gadolinium nitride, 5252i.
of gallium compd. with Pr, $PrGa_2$, 8339f.
for glancing angles with Fe x-radiation, 8859d.
of glutaric and pimelic acids, 2838e.
of glycerides, 134d, 7425f.
of β-glycylglycine, 7773g.
of graphite compds. with HF, 2534b.
of gutta-percha, rubber and rubber-HCl and -HBr, 7739b.
of heavy-element compds., 3709h.
of Heusler alloys c ntg. In, 4618g.
of 1,2,3,4,5,6-hexachlorocyclohexane γ-isomer, 3686a,

of hexamethylenediamine-2HBr, 6486c.
of hexamethylenediamine-2HBr and -2HCl, 7773c.
of N, N'-hexamethylene-α, δ-dihydroxy adipamide polymer, 8232g.
of hydrocarbon systems at low temps., 2410g.
of ice, 8229c.
of ice (heavy and light), 5252e.
of ice, structure of water and, 1621a.
indexing powder photographs of, 1261gh, 3709g, 6510a.
of indium hydroxide and Sc(OH)3, 2533a, 4072i.
of inert gases, 3671e.
of insulin, 16d.
of intermetallic compds., 7771b.
of iodides of palmityl- and stearylcholine, 7288a.
ionic refraction increments in, 3683f.
of iron compd., K2FeCl5.H2O, 3301g.
of iron compd., (NH4)2FeCl5.H2O, 3301f.
of iron, compds. with Cr or Mo (FeCr or FeMo), 7882a.
of iron silicide (FeSi), 918i.
of iron(III) chloride, 8782i.
of iron(II) titanate, 2108g.
of iron Zn spinel, 4171f.
of β-lactoglobulin, 1623c.
of lead and of Ag alloys, 6960a.
of lead azide, 6031c.
of lead chromate pigments and PbSO4, 4023i.
of lead fluorides and oxyfluorides, 459i.
of lead oxide (pseudo cubic) of variable compn., 459h.
of lead sulfide deposits on rock salt, 3685f.
of lead thioantimonites, 8936i.
of leather substitutes, 1204g.
of limonin and its solvates, 7773e.
of lubricating greases contg. Ca soap, effect of water and additives on, 4455f.
of magnesia, 6032d.
of magnesium and Zn-V spinels, 4171b.
of magnesium carbides, 1671b.
of magnesium pyrophosphate, 8822g.
of magnetic substances, 1234c.
of manganese dioxide in dry cells, potential and, 1663f.
of manganese oxides (supported), 5654c.
of 2-mercaptobenzothiazole, 6033f.
of mercury chloride addn. compds. with pyridine and pyridine bases, 7868i.
of metallic films deposited on crystals, 7285i.
of metals, 1622c.
in arc-welding seam, 4623f.
on crystal surfaces, 6483d.
in films, 2482d.
of 2-methylnaphthalene, 1237c.
of minerals—see *Minerals;* and the specific minerals.
of mixts. of long-chain compds., 5253d.
models of, blowing bubbles for (Bragg's dynamic), 6029i.
energy levels in simple, 4092g.
polar mols. in, 8770f.
of γ-molybdenum oxide, 4072h.
of molybdenum oxides, 3260i.
of molybdenum oxide system with WO3, 8248f.
of montmorillonite, catalytic cracking activity and, 1554d.
of myoglobins from horse and whale, 3686b.
of naphthols, 2065d.
of naphthylamines, 2064i
of neptunium oxide and U3O8, 7855b.
of nickel arsenide and NiAsS, 4167h.
of nickel compd. with W, Ni4W, 3764g.
of nickel oxide, temp. and, 919a.
of nitric acid and hydrates, 7286e.
of nitrides (ternary), 4170hi.
of p-nitroaniline, 3262d.
of nitryl perchlorate, 460d.
of noble-metal systems, 15a.
normal, imperfections and, 6482g.
number of theoretical connections between lattice structures and quadratic forms of Debye-Scherrer-(Hull) diagrams of cubic symmetry, 3260b.
of nylon, 5311d.
of org. compds., 929a.
of oxide film on metals, 7309e.
of oxides of metals, 1236a.
of palladium catalysts on SiO2 gel, 6062a.
of paraffin wax, control and correlation with dewaxing aids and filter rate, 4455i.
of penicillin and derivs., 4919f.
of penicillins and related compds., 4920h.
periodic system of elements forming ionic, with O, OH and F, 8231d.
phase detn. and values for oxalic acid dihydrate, 919f.
of phenanthrene, 919g.
of α-phloroglucitol, 6881f.
of phloroglucitol diammoniate, 6486h.
of phosphomolybdates and phosphotungstates, 7366a.
piezoelectricity and, 8782f.
of pigments, reinforcing effects in rubbers and, 1593d.
of pimelic acid, 2064g.
of platinum compd., [Pt(NH3)4Cl2]Cl2, 4535i.
of platinum compd., [Pt(NH3)5Cl]Cl3, 7287a.
of platinum on C, effect of heat-treatment on, 1249f.
of polymers, effect on interaction with liquids and on mech. properties and swelling, 8728h.
mech. properties and, 2801b.
mol. structure and, 2071h.
of potassium dinitrososulfite, 8781h.
of potassium fluocobaltate (K3CoF7), K3CuF5 and K2NiF5, 8940d.
of α-potassium hydroxide, 7771d.
of potassium ozonides, 4170b.
of potassium Na tartrate, 4916d, 7771h.
of L-proline, 6488e.
of proteins (globular), 7990c.
of pyridindene derivs., 6488a.
of pyrrhotite, 8934f.
randomness in, 4527a.
of rare earth hydroxides, 2108e.
of rare earth phosphates, 15d.
of rayon, phys. properties and, 6829h.
reactions between solid and gas in relation to, 2065g.
reactions in solids and, 5250g.
of real crystals, 6030b.
review on, 3260b.
of rubber, effect of vulcanization on, 1600a.
of rubidium iodide, 8788g.
of rubidium selenochromate(III), RbCrSi2, KCrSe2.CrSe2 and NaCrSe2, 919c.
of rutile, 6483a.
of samples ground in air and in vacuum, 4056c.
of scandium chloride, TiCl3 and VCl3, 6031h
of selenious acid, 8788e.
of selenium (black), 4197i.
of silicates, optical properties and, 8784b.
of silicon and its oxides, 2837a.
of silicon carbide, impurities and, 2063i.
of α-silicon carbide type 51 R, 8785c.
of silicon films, 6028g.
of silicon monoxide, 6101d.
of silver-As alloy and Ag2S grown on Ag crystals, 4071d.
of silver iodide vapors, 4062g.
of silver nitrate, Ag7NO11, 2484a.
of silver nitride and VN, 5690i, 5691c.
of silver on mirrors, 2387f, 2388b.
of silver sulfide films on Ag, 32e.
of soap and its control, 9492d.
of soap hemihydrates, 5253i.
of soaps (com. and pure), 6434h.
of sodium bromide-NaCl solid solns., 6031i, 8782h.
of α sodium hydroxide, 8232c.
of sodium metaphosphates, 4088f.
of sodium sesquicarbonates, 7771f.
of sodium tetraborate hydrates, 8933d.
of solid solns., 7285h, 8782a.
of soybean proteins and fibers therefrom, 4860h.
of spinels, 1623b, 6032f.
of spinel solid solns. of system MgAl2O4-ZnAl2O4, 8296g.
of strontium aluminate, 1278d.
of strontium laurate, 4536b.
of strychnine selenate and sulfate, 4918c, 5254c.
of sulfanilamide, 7287i.
of sulfonamides and their derivs., 3262f.
superlattices, general theory of quasi-chem. method in statistical theory of, 8787i.
superstructures, 9001g.
of sympathomimetic amines, 8611e.
of d-tartaric acid, 4074h.
of technetium, 918d.
of tellurium dioxide, 8781f.
of tetraaryl compds. of Pb, Si and Sn, 8764d.
of tetracarbon monofluoride, 2107i.
of tetrachlorocyclohexane, 6487d.
of 1,2,3,4-tetraphenylcyclobutane centro-symmetric isomer, 6486a.
of thallium aluminosilicates, 8932d.
of thallium iodate, 3685f.
of thiuram sulfide vulcanization accelerators, 3225h.
of thorium(IV) chloride and UCl4, 7773a.
of tin alloys with transition metals, 6136h.
of α-titanium, and effects of O and N thereon, 7882c.
of titanium chloride, 3261f.
of titanium (ductile), 2565g.
of titanium tungsten carbide, P 3576b.
topological analysis of mol. crystals, 920e.
transformation of axes, 8762e.
of 1,3,5-tris(p-chlorophenyl)benzene and vitamin C, 450i.
of tungsten carbide surface, 6483c.
of tungsten selenides and W sulfides, 5321i.
of tungsten(VI) oxide, 8783i.
of tungsten sulfides, 5273d.
of uranium, 6485b.
of uranium carbides, 3685e.
of uranium compds. with metals, 7770d
of uranium hexachloride, 3710d.
of uranium trioxide and U3O8, P 8109f.
of uranyl fluoride, 3710a.
of uranyl nitrate hexahydrate, 8788i.
of vanadates of heavy metals, 6032i.
of vanadium oxide compds. with bivalent basic oxides, 4172a.
of vanadium spinels, 6519c.
vectorial properties of crystal lattice relation to crystal morphology, 4071a
of vinyl alc. polymer, 16b.
of virus of tomato bushy stunt, 919h
of yttrium hydroxide, 2064d.
of zirconium boride, ZrB2, 6898e.
of zirconium oxysulfide, 3261b.

**Crystal triodes.** See *Transistors.*

**Crystal violet,** amino acid reduction by, 7136b.
anhyd. cryst., and its double salt with Zn chloride and nitro hydrocarbon, I 3206b
cornea tolerance to, 3110g
in disinfection of skin, 3525d
effect on benzidine-peroxidase color, 7521e.
effect on respiration of yeast, effect of spermine, agmatine, arcaine, cadaverine and streptomycin on, 7134b
nitration of, 2982a.
pyridine analogs of, 4096d
spectrum of, in Na silicate soln., 2093g
as stabilizer for neoprene, P 3519f.

**Crystox,** effect on mosquitoes, 3965h.

**CTAB.** See "hexadecyltrimethyl — bromide" under *Ammonium compounds, substituted.*

**Ctenicera aereipennis destructor** and/or **Prairie grain wireworm,** control in potatoes, 2726h.

**Ctenocephalides felis** and(or) **Cat flea,** biol. requirements of, 1871h

**Cubanite,** from Karabash, U S S R., 6116e.

**Cubé.** (See also *Lonchocarpus.*)

pharmacology of, 5497*h*.
potassium-ion reaction with, at motor end-plate, 766*a*.
prepns., P 3153*b*.
prostigmine antagonism to, 4373*d*.
purification of tubo-, P 3153*b*.
reviews on, 361*g*, 3976*f*, 5871*c*, 5906*g*, 9261*g*, 9363*b*, 9378*c*.
toxicity of intramuscular and oral, 8527*h*.
**Curarelike substances,** P 5155*g*, 5406*f*.
ammonium compds. of benzhydryl ether derivs., P 5046*b*.
ammonium compds. (quaternary), 1486*h*, 6366*b*, 6590*d*, 8058*i*, 8099*g*.
atropine derivs., 3929*c*.
bis[trimethylammonium compds.], 6737*c*.
bis(trimethylammonium)decane and pentane diiodide as, 3525*d*.
chem. constitution and activity of, 3407*g*, 3408*c*, 4267*e*.
effect on denervated and normal effectors, 5872*c*.
effect on muscle and sympathetic ganglia, 5504*e*.
from *Erythrina africana*, 3148*h*.
from *Geissospermum laeve*, 9380*h*.
*N*-methyloxyacanthine iodide as, 3103*i*
pharmacology of, 5497*h*.
polyesters of trialkyl(2-hydroxyethyl)-ammonium compounds, 2190*d*.
polymethylene bis-quaternary ammonium salts, 2703*c*.
reviews on, 5871*c*, 9261*g*, 9378*c*.
synthesis of, 9363*c*.
tri(diethylaminoethoxy)benzene triethyliodide as, 5501*g*.
**Curcas oil.** See *Oils*.
**Curculio caryae** and(or) **Pecan weevil,** control of, 9330*a*.
**Curd.** (See also *Casein; Cheese; Milk*.)
in butter, and effect of washing thereon, 8568*h*.
elasticity of rennet, effect of pasteurization and cooling on, 4394*c*
elastic properties of rennet, 4393*h*.
storage of, acidity of ghee and, 9283*e*.
**Curd, Francis Henry Swinden,** obituary, 5239*a*.
**Curie point,** of barium titanate, 4917*i*, 6485*c*.
of barium titanate mixts. with $SrTiO_3$, 2054*c*.
of copper-In-Mn alloys, 4618*f*
dielec. const. of ferromagnetic ferrite at magnetic, 5244*e*.
of iron alloys and Ni, 6961*d*.
of iron carbide modifications, 3699*h*.
of iron(III) oxide, 8933*i*, 8934*f*.
order-disorder reactions and, 6959*d*.
of palladium hydride, 8768*i*.
pressure and, 8783*i*.
reaction speeds near, 6018*e*.
**Curium,** 2083*g*.
metabolism of, 3098*b*.
**Curling factor,** produced by *Penicillium janczewskii*, identity with griseofulvin, 7543*i*, 9164*c*.
**Currant aphid.** See *Capitophorus ribis*.
**Currants** and(or) **Ribes,** *Dasyneura tetens* control on black, 807*c*.
gooseberry-fruit-worm control on, 9328*i*.
jam from red, effect of pectins on, 3536*g*.
juice of black, 5510*d*.
juice of black, Al and Al-alloy containers for, 1877*g*.
juice of black, vitamin C in, 3944*i*.
vitamin B changes in, during growth, 8461*f*.
vitamin C in preserved black, 2709*d*.
wines from, in Pacific Northwest, 8606*f*.
**Current.** See *Electric current*.
**Curtius reaction,** in polymerization of triglycine, 5743*c*.
**Curtius rearrangement.** See *Rearrangements*.
**Curves,** graphical study of metallurgical equil., 4931*h*.
in inorg.-compd. systematization, 6898*c*.
probability paper for, in estg. deviation of distributed textile test data, 5191*c*.
surface-fitting in three variables, 6015*f*.
titration, construction of, 5265*g*.
**Cuscohygrine** (*1,3-bis(1-methyl-2-pyrrolidyl)-2-propanone*), synthesis of, 4256*h* 9064*i*
**Cushing's disease,** in diabetes mellitus, 17-hydroxycorticosterone in urine in, 302*a*.
glucose tolerance in, 8424*g*.
**Cusparine,** spasmolytic effect of, 3527*i*.
**Cuspidine,** from dolomite contact skarns, Broadford, Skye, and its synthesis, 5706*a*.
**Custard apple.** See *Annona; Papaw*.
**Custerite,** identity with cuspidine, 5706*b*.
**Cutch.** See *Catechu*.
**Cuticle.** (See also *Epithelium; Skin*.)
arthropod, 6746*h*.
insect, 9273*b*.
water-protecting properties of, 6043*b*.

**Cutin**, in rhubarb varieties, 9383*h*.
**Cutlery**, electroplating on forks and spoons with Ag and Cr, 2098*f*.
**Cutting fluids**. See *Lubricants*.
**Cuttle-fish oil**. See *Oils*.
**Cutworms**, control on apricots and peaches, 1522*h*.
control on celery, 346*d*.
**Cyamopsis psoraloides**, in Hawaii, 9292*f*.
**Cyanamide** ($CNNH_2$). (See also *Calcium cyanamide*.)
anion-exchange resin from acrylonitrile, polyamine and, P 7162*h*.
carbamide structure of, 1074*d*.
condensation products of, or its derivs. with HCHO for improving nylon dye affinity, P 2442*i*.
condensation products of, with HCHO, complex with $Na_2WO_4$, for fireproofing, P 3210*a*.
condensation products of, with phenols, P 2469*g*.
condensation with HCHO, textile raising by, P 9476*h*.
derivs., reaction with guanidine derivs., 9035*i*.
effect on pecan leaves, 2287*f*.
equil. with cyanide, 8930*d*.
hydrolysis of, catalysis by $HgSO_4$, 1248*i*.
hydroxyalkyl derivs., condensation products with aldehydes, for dye fastness improvement, P 3206*d*.
labeled with $C^{14}$, 5007*b*.
labeled with $C^{14}$, synthesis of, 7814*g*.
manuf. of, P 825*b*, P 868*e*, P 2380*c*, P 5556*c*.
melamine from, P 699*e*.
metal derivs., review on, 3739*h*.
reaction with streptamine, 6579*i*.
reaction with thiourea derivs. in presence of a dethionating agent, P 1799*d*.
in weed control in vegetables, 9352*a*.
**Cyanamide**, (*p*-**acetamidophenyl**)-†, 5014*b*.
**benzyltriphenylmethyl**-, 4645*b*.
**bis**(**2-chloroethyl**)-, 2927*b*.
**butylmethyl**-, 9036*b*.
(**2-chloroethyl**)-, 2946*a*.
(**3,4-dihydro-3,4-dioxo-1-naphthyl**)-†, 1383*e*.
**isopropylmethyl**-, 9036*a*.
**phenyl**-. See *Carbanilonitrile*.
**sulfanilyl**-. See *Sulfanilamide, N*¹-*cyano*-.
**Cyanase**, 2246*e*.
**Cyanates**, ions (neg.) of, 8848*a*.
**Cyanhemoglobin**. See *Cyanohemoglobin*.
**Cyanic acid**. (See also *Isocyanic acid*.)
distillation of, from animal tissue, 3864*h*.
distillation of, from aq. solns. of NaCNO, 2583*a*.
free energy of ionization of, 2075*b*.
reaction with $NH_3$, mechanism of, 6896*i*
salts, effect on protein stability, 5062*i*.
**Cyanide process**. (See also *Gold, metallurgy of; Silver, metallurgy of*.)
char use in, P 8344*d*.
hydrogen-ion concn. control in, 78*c*.
**Cyanides**. (*Organic cyanides are indexed either as nitriles* [*or as in the case of acids and aldehydes*] *as cyano derivatives. See also* Alkali metal cyanides; Cyano compounds; Nitriles; Sodium cyanide; *etc.*)
anoxia from, effect on adrenal gland, 3931*c*.
bonds in, 8764*a*.
carbon detn. in, 8306*h*.
competition with histidine in complex formation with Co, 7856*d*.
complex—see also *Ferricyanides; Ferrocyanides; Thiocyanates*.
complex, with Hg compds., P 3837*e*.
detection of, in alk. solns., 8956*a*
in KCNS and $NH_4CNS$, 5539*b*.
in wines, 2733*d*.
detn. of, 2546*i*, 4603*f*.
in Cd plating solns., 4072*h*.
in electroplating baths, 961*g*.
in plant materials, 6110*d*.
in Ag electroplating baths, 8903*i*
diazo, 595*d*.
dust contg., in gas mains, 8119*f*.
effect on glycine concn. by diaphragm, 9120*c*.
on glycogenolysis by phosphorolysis and by hydrolysis with amylase, 5864*i*.
on oxidation rate of ferrous ions, 1246*c*.
on photochem. aftereffect in decompn of $H_2O_2$ by $K_4Fe(CN)_6$, 6088*a*.
electroplating solns. contg., analysis and control of, 7851*f*.
electroplating with, carbonate removal from solns. for, 6520*g*.
equil. with cyanamide, 8930*d*.
in food and water as causative agent for poliomyelitis and paralysis, 1101*c*.
formation in animal organism, effect of cysteine on, 3498*f*.
heart respiration inhibition by, 9210*i*.
ions (neg.) of, 8848*a*.
manuf. from HCN from coke oven gas, 7666*g*.
oxidation by I, potentials of systems and equil. consts. of ions reacting during, 2121*a*.
poisoning by, 7142*g*.
polymerization activation in butadiene by, P 7258*a*.
reaction with chlorohydrins, P 3446*f*
reaction with S compds. in viscose, 9439*i*.
reducing properties and oxidation by permanganates, 2076*b*.
sodium dithionite effect on, rhodanese action on, 4709*b*.
sodium thiosulfate antagonism to, 8412*c*.
wastes contg., decompn. by electrolysis, 2099*b*, 6924*c*.
effect on sewage treatment, 336*b*, 3125*d*, 8586*e*.
electrolytic oxidation of, 6924*b*.
treatment of, P 3126*f*, 6344*g*, 6924*e*, 8903*g*.
**Cyanidin** (*cyanidin chloride, 3,3′,4′,5,7-pentahydroxyflavylium chloride*), in cacao, 8011*a*.
in flowers in relation to mutation and climate, 3068*f*.
3-gentiobioside—see *Mecocyanin*.
**Cyanin chloride**, adrenaline potentiation by, 3104*g*, 5116*h*.
**Cyanine***, antibacterial properties of, 8444*d*.
**Cyanine dyes**. See *Dyes*; and "sensitizers for" under *Photography*.
**2,2′-Cyanine iodide**, **1,1′-ethylene-***, P 7845*b*.
**2,4′-Cyanine iodide**, **1′,1′-trimethylene-bis**(**1-ethyl-***, P 3737*a*.
**Cyanines**. (See also *Dyes; Hemocyanins; Phthalocyanines*; etc.), 851*h*.
in *Australorbis glabratus* control, 9352*c*.
synthesis of dequaternized, 8291*f*.
**Cyanite**. See *Kyanite*.
**Cyano** (*free radical*), heat of formation of, 6479*d*.
**Cyanochromates(III)**, chromium thermal exchange in solns. contg., 4967*c*.
**Cyano compounds** (*cyanogen compounds*). (See also *Cyanides; Nitriles*.)
effect on oxidation rate of ferrous ions, 1246*c*.
formation from amino acid in chloramine -T poisoning, 5114*h*.
nitrosyl complexes, 3303*h*.
for paper manuf., 4459*i*.
**Cyanoethylation**, 7411*d*.
of α-acylsuccinic acid esters, P 2634*i*.
of amines and arsines, 8351*e*.
of diamines, P 5414*e*.
of β-keto esters and ketones, 2582*d*.
of malonic acid derivs. and of β-oxo esters, P 4689*g*.
of mesityl oxide, 6578*e*.
of methylene (reactive) compds., P 3446*g*.
of *s*-trithiane 1,3,5-tris(dioxide), P 5427*e*, P 6674*b*.
**Cyanoferrates(II)**. See *Ferrocyanides*.
**Cyanoferrates(III)**. See *Ferricyanides*.
**Cyanogen**, combustion of, 7663*d*.
combustion of, effect of $H_2S$ on, 6053*i*.
combustion of, inhibition of C formation in, by $SO_2$, 4145*a*.
detection in foods, 9273*g*.
in producer gas and its detn., 4833*c*.
reaction with ClF, $ClF_3$ or F, 6793*e*.
reaction with phenols, 1035*d*.
sewage treatment with activated sludge in presence of, 336*b*.
**Cyanogen** (*free radical*), from combustion of cyanogen, 4145*a*, 7663*e*.
in comets, 490*i*, 938*e*, 2509*a*, 3711*e*, 5662*g*.
spectra bands of, in spectra of rare earth oxides, suppression of, 5337*g*.
spectrum of, 939*i*, 7338*h*.
in stars in Cygnus, 939*d*, 7334*g*.
in stars of classes B and O, 7335*b*.
in stars of classes R and N, 3711*f*.
**Cyanogen bromide**, hydrolysis of, kinetics of, 6496*i*.
microwave spectroscopy of, 4141*a*.
microwave spectrum of, 1658*a*.
potential function of, calcn. of interaction terms in, 8765*c*.
**Cyanogen chloride**, hydrolysis of, kinetics of, 6496*i*.
microwave absorption by, 8888*h*.
microwave spectrum of, 1658*a*.
polymerization of, P 2381*a*.
potential function of, calcn. of interaction terms in, 8765*c*.
reaction with *N*-derivs. of 2-aminoethanol, P 252*e*.
reaction with sodium alcoholates, 9034*h*.
spectrum of $CNCl^{35}$, 8870*b*.
**Cyanogen compounds**. See *Cyano compounds*.
**Cyanogen fluoride**, prepn. of FCN and trimer, 6793*d*.
**Cyanogen group**. See *Cyano group*.
**Cyanogen halides**, hydrolysis of, kinetics of, 6496*h*.
**Cyanogen iodide**, equil. consts. during oxidation of cyanide by I, 2121*b*.
microwave spectroscopy of, 4141*a*.
microwave spectrum of, 1658*a*.
potential function of, calcn. of interaction terms in, 8765*c*.
reaction with $HgI_2$, 6793*d*.
**Cyano group**, bonds in, 8764*a*.
detn. of, 3304*a*.
effect on polymer-liquid reaction, 2461*f*
effect on reaction rate of $OsO_4$ with aromatic compds., 8375*b*.
labilization of trans-group in complex by, 2854*g*.
parachor of, 2057*g*.
**Cyanohemoglobin**, isomorphous transformation from oxyhemoglobin, 7538*g*.
**Cyanohydrins**, acetylation of, 564*a*
of cycloalkanones, dissocn. of, 7936*g*
esters, P 2631*g*.
manuf. of, P 1434*i*, P 3446*e*, P 6647*g*
as polymerization inhibitors for unsatd nitriles, P 2220*e*.
pyrolysis of, P 666*h*.
reaction with liquid $NH_3$, 3409*e*.
stabilization of, during distn. with I, P 2223*i*.
**Cyanol**, binding by nerve cells, duration of stimulation and, 742*b*.
**Cyanomanganates(II)**, polarography of, 4595*b*.
**Cyanophyceae**. See *Algae*.
**Cyanosis**, from nitrates in water supplies 7165*b*, 8077*f*.
**Cyanuric acid**, azo stilbene dyes from, P 4473*d*.
formation of, during prepn. of urea, 2946*d*.
infrared Christiansen filter effect in 1657*f*.
melamine from, P 698*h*.
——, **trithio**-, anion-exchange resin from tetraethylenepentamine and, P 5517*e*
**Cyanuric chlorides**, anthraquinone dyes from, P 1575*h*.
azo dyes from, P 2440*b*, P 2780*b*, P 4472*afh*, P 4479*abcdefghi*, P 4480*b*, P 4866*h*, P 5195*gi*, P 5196*ab*, P 5590*i*, P 5963*efgh*, P 7234*i*, P 7235*dl*, P 7703*b*
azo stilbene dyes from, P 4864, P 4865*dfg*, P 5950*d*.
manuf. of, P 2381*a*.
reaction products with aryl sulfonic acids as mothproofing agents, P 4422*f*
reaction with Na alcoholates, 9034*h*.
stilbenedisulfonic acid dyes from, 5965*efghi*, P 5966*ab*.
stilbene dye from, P 5198*a*.
**Cyanuric halides**, anthraquinone dyes from P 1575*g*.
azo dye from, P 5194*e*.
disazo stilbene dyes from, P 4862*b*, 4863*b*.
**Cyanurotriamide**. See *Melamine*.
**Cybium**, oils of—see *Oils*.
**Cycad**, lactic acid manuf. by fermentation of seeds of, P 9362*b*.
**Cyclamen**, adsorption of org. substances by leaves of, plant respiration and, 1084*c*.
**Cyclamen mite**. See *Tarsonemus pallidus*
**Cyclanes**. See *Cycloalkanes; Naphthenes*.
**Cyclanols**. See *Cycloalkanols*.
**Cyclanones**. See *Cycloalkanones*.
**Cyclenes**. See *Cycloalkenes*.
**Cyclic acetals**. See *Acetals*.

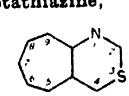
## Cyclobutene

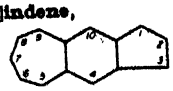
——, 3,3,4,4 - tetrafluoro - 1,2 - dipropoxy-, 7418g.
——, 3,3,4,4 - tetrafluoro - 1 - (2,2,3,3-tetrafluorocyclobutyl)-, 3371e, P 4293i.
——, 3,3,4,4 - tetrafluoro - 1 - vinyl-, 3371d, P 4293i.
and polymers, P 4295a.
2 - Cyclobutene - 1 - carboxylic acid, 2-hydroxy-1,3-dimethyl-4-oxo-, ethyl ester, electrolytic dissocn. const. of, 1320e.
3-Cyclobutene-1,2-diol, diacetate, 6200e.
Cyclodecane, 1,1,6,6 - tetrakis(hydroperoxy)-, and tetraacetate, 6189g.
Cyclodecanedione, peroxide*, and its tetraacetate, 6189g.
1,6-Cyclodecanedione, 6189i.
Cyclodecanol, and esters, 6988f.
Cyclodecanone, oxime, 5400d.
——, 6-hydroxy-, 6189b.
and derivs., 6190b.
——, 6-methoxy-, and semicarbazone, 6190e.
Cyclodehydration. See *Ring closure;* and "cyclo" under *Dehydration (chemical).*
Cyclodehydrogenation. See *Aromatization; Dehydrogenation; Ring Closure.*
Cyclododecanecarbonitrile, 1-hydroxy-, dissocn. of, 7907a.
Cyclododecanol, and esters, 6988f.
Cyclododecanone, oxime, 5400d.
reaction with HCN, 7907a.
Cycloeicosanecarbonitrile, 1-hydroxy-, dissocn. of, 7907a.
Cycloeicosanol, and esters, 6988h.
Cycloeicosanone, oxime, 5400f.
reaction with HCN, 7907a.
Cycloestrol. See *Phenol, p,p'-(1,2 diethylethylene)di-.*
Cyclogeraniolene, bromomethyl-*, 6601a.
——, methyl-*, bromination of, 6601a.
Cyclohendecanecarbonitrile, 1-hydroxy-, dissocn. of, 7907a.
Cyclohendecanol, and esters, 6988f.
Cyclohendecanone, oxime, 5400d.
reaction with HCN, 7907a.
Cycloheptaamylose*, and compd. with *p*-xylene, 2584e.
Cycloheptabenzene,



2H-

5-

5 *H* - Cycloheptabenzene, 5 - *tert* - butyl-6,7,8,9 - tetrahydro - 5 - methyl-5736g.
——, 6,7,8,9-tetrahydro-, 2965d
——, 6,7,8,9 - tetrahydro - 5,5 - dimethyl-, 5736f.
——, 6,7,8,9 - tetrahydro - 1,2,3,8 - tetramethoxy-, 3403d.
——, 6,7,8,9 - tetrahydro - 5,5,9,9 - tetramethyl-, 5736g.
5 *H* - Cycloheptabenzene-3-butyric acid, 6,7,8,9-tetrahydro-, and picrate, 2965f
——, 6,7,8,9 - tetrahydro - γ - oxo-, and methyl ester, 2965c.
5 *H* - Cycloheptabenzene - 5,6 - diol, 6,7,8,9-tetrahydro-, 5753d.
5 *H* - Cycloheptabenzene - 5,6(7 *H*)-dione, 8,9-dihydro-, and derivs., 5753c.
5 *H* - Cycloheptabenzene - 3 - valeric acid, 6,7,8,9-tetrahydro-δ-oxo-, and derivs., 2965f.
5 *H* - Cycloheptabenzen - 1 - ol, 6,7,8,9-tetrahydro - 2,3,8 - trimethoxy-, 3403c.
5 *H* - Cycloheptabenzen - 5 - ol, 6,7,8,9-tetrahydro - 2,3,4,6 - tetramethoxy-, and 3,5-dinitrobenzoate, 3403f.
2 *H* - Cycloheptabenzen - 2 - one, 3,4,4a,-5,6,7,8,9-octahydro-, and semicarbazone, 7908e.
5 *H* - Cycloheptabenzen - 5 - one, 6 - hydroxy-, 5753a.
——, 6,7,8,9 - tetrahydro - 4 - hydroxy-2,3,6-trimethoxy-, and derivs., 3403d.
——, 6,7,8,9 - tetrahydro - 2,3,4,6 - tetramethoxy-, and 2,4-dinitrophenylhydrazone, 3403d.
——, 6,7,8,9 - tetrahydro - 1,2,3 - trimethoxy-, and 2,4-dinitrophenylhydrazone, 3404a.
——, 6,7,8,9 - tetrahydro - 2,3,4 - trimethoxy-, and 2,4-dinitrophenylhydrazone, 3403i.
——, 2,3,4,6-tetrahydroxy-, purpurogallin and, 3403a.
Cycloheptadecamethylenimine. See *Azacyclooctadecane.*
Cycloheptadecanecarbonitrile, 1-hydroxy-, dissocn. of, 7907a.
Cycloheptadecanol, and esters, 6988g.
Cycloheptadecanone, oxime, 5400e.
reaction with HCN, 7907a.
9 - Cycloheptadecen - 1 - one. See *Civetone.*
Cycloheptanaphthalene,



*4—[b]*

1 *H* - Cyclohepta[*b*]naphthalen - 1 - one, 2,3,4,6,7,8,9,10 - octahydro-, and semicarbazone, 2965g.
Cycloheptane, isomerization of, 157g.
phys. constants of, 2956a.
——, 1,2-epoxy-. See *8-Oxabicyclo[5.1 - 0]octane.*
——, ethyl-, isomerization of, 157g.
——, 1 - methoxy - 1 - (methoxymethyl)-, 6197c.
——, methyl-, isomerization of, 157g.
——, tetradecafluoro-(?), P 3834h.
Cycloheptanecarbonitrile, 1 - hydroxy-, dissocn. of, 7906a.
Cycloheptanecarboxaldehyde, and derivs., 6197d.
Cycloheptanecarboxamide, 6197e
Cycloheptanecarboxylic acid, 6197e
——, 1 - (3 - chloro - 2 - butenyl) - 2-oxo-, ethyl ester, 7908c.
Cycloheptanepropionic acid (*β-cycloheptyl propionic acid*).
——, 1-acetyl-2-oxo-, methyl ester, P 5417c
Cycloheptanevaleric acid (*δ-cycloheptyl valeric acid*).
——, 1-carboxy-2-oxo-, diethyl ester, 5375c
——, 2-hydroxy-, and methyl ester, 5375c.
——, 2-oxo-, and methyl ester, 5375d
Cycloheptanol, acetate, 6988e.
——, 2-amino-5-methyl-, and hydrochloride, 2966c.
——, 2-chloro-, *cis*-, 2966c.
——, 2-chloro-1(and 5)-methyl-, *cis*-, 2966c
——, 3-methyl-, *trans*-, 2966a.
Cycloheptanone, 2 acyl derivs., reaction with acrylic acid esters, P 5417c.
oxidation of, 2176a.
oxime, 5400c.
reaction with $Bz_2O_2H$, kinetics of, 8358g
——, 2-(3-chloro-2-butenyl)-, phenyl semicarbazone, 7908d
——, 2-(chloromethyl)-, 4278d
——, 2-chloro-5-methyl-, 2966b
——, 3-methyl-, and semicarbazone, 2965i
——, 2,6,6-trimethyl-, and semicarbazone, 4637g.
3,1-Cycloheptathiazine,

3,1-

——, 2 - amino - 4,5,6,7,8,9 - hexahydro-, and picrate, 4278e.
1,3,5-Cycloheptatriene, electronic structure of, 6918g
——, 7-methylene-, elec. moment and electronic structure of, 6918g.
1,4,6 - Cycloheptatriene - 1 - acetic acid, 2 - carboxy - 4 - hydroxy - 3 - oxo-, 3404c.
——, 2 - carboxy - 4 - methoxy - 3 - oxo-, dimethyl ester, 3404c.
2,4,6 - Cycloheptatrien - 1 - one, 2 - hydroxy - 3(4 and 5) - isopropyl-, 5016a.
——, 2-hydroxy-6-methyl-, 3404c.
Cycloheptene, phys. constants of, 2956a.
1 - Cycloheptene - 1 - valeric acid, and derivs., 5375e.
2 - Cyclohepten - 1 - one, 2,6,6 - trimethyl-, and semicarbazone, 4637g.
Cycloheptʃ*f*]indene,

*f*

——, 1,2,3,5,6,7,8,9-octahydro-, 2965h
Cycloheptʃ*f*]inden - 5(1 *H*) - one, 2,3,6,-7,8,9-hexahydro-, and semicarbazone, 2965h.
Cycloheptaamylose, action of maceran's amylase on, and maltose, 584b.
Cycloheptadecamethylenimine. See *Azacycloheptadecane.*
Cycloheptadecanecarbonitrile, 1 - hydroxy-, dissocn. of, 7907a.
Cycloheptadecanol, and esters, 6988g.
Cycloheptadecanone, oxime, 5400e.
reaction with HCN, 7907a.
Cyclohexadiene, chloro derivs., pyrolysis of, P 1437d.
derivs., mesomerism in, 4650d.
reaction with $C_2F_4$, 3371c.
——, acetyl-. See *Ketone, cyclohexadienyl methyl.*
——, dimethyl-, from rubber decompn. by heat and pressure, 5169f.
in rubber distillate, 5984a.
1,3-Cyclohexadiene, condensation with *p*-quinone, 2181g.
in gasoline from Puertollano shale, 5578f
hydrogenation of, 5752e.
——, 1(and 2)-(3-biphenylyl)-3(and 1)-(4-biphenylyl)-, 6186a.
——, 1(and 2)-(3-biphenylyl)-3(and 1)-phenyl-†, 6185i.

## Cyclohexanecarbonitrile

—, 1-diethylamino-, as insecticide, 4415g.
——, 1-hydroxy-, acetate, P 3027g.
dissocn. of, 7906i.
——, 2-hydroxy-, 588e.
——, 4 - hydroxy - 2,6 - diphenyl-, and esters, 2963e.
——, 1 - (2 - hydroxyethylamino)-, as insecticide, 4415g.
——, 2 - hydroxy - 2 - methyl-, hydrolysis of, 6172b.
——, 1-hydroxy-2-phenyl-, *cis-trans-*, 1357e.
——, 1 - hydroxy - 2 - (3,4 - xylyl)-, 1358g.
——, 4-methoxy-2,6-diphenyl-, 2963i.
——, 1-methylamino-, reaction with $CS_2$, 1766c.
——, 2-oxo-, 588e.
**Cyclohexanecarbonyl chloride**, P 3033d.
——, 2,2,6-trimethyl-, 4813e.
**Cyclohexanecarboxaldehyde**, P 4287c, P 4685f.
and 2,4-dinitrophenyl hydrazone, 8359h.
formation of, from 3-nitroso-1-ox-3-azaspiro[4.5]decan - 2 - one and KOH, 2993c.
——, 1-bromo-, 8359h.
——, 1-bromo-2-methyl-, 8360c.
——, 2,2-dimethyl-, 8362c.
——, 3,5-dimethyl-, and semicarbazone, 8362a.
——, 4,4-dimethyl-2,6-dioxo-, now identified as bis(4,4-dimethyl-2,6-dioxocyclohexyl)acetic acid, 2965a.
——, 4-isopropyl-, isomers, and semicarbazones, 7434g.
——, 3-methyl-, and semicarbazone, 2966a.
**Cyclohexanecarboxamide**, 4233a.
——, *N* - (2 - diethylaminoethyl) - *N*-ethyl-1-phenyl-, and hydrochloride, P 7958i.
——, *N* - (2 - diethylaminoethyl) - *N*-ethyl-1-(3,4-xylyl)-, P 5797h.
——, *N* - (2 - dimethylaminoethyl) - *N*-ethyl-1-phenyl-, and hydrochloride, P 7959a.
——, *N* - (1 - dimethylcarbamylethyl)-*N*-ethyl-4-methyl-, P 249c.
——, 3,3 - dimethyl - *N* - 1 - naphthyl-, 9044f.
——, *N*-(2,4-dioxo-3-pyrrolidyl)-, 2988f.
——, *N*-2-hydroxyethyl-, 573a.
——, 2-phenyl-, *cis-* and *trans-*, 2174c.
**Cyclohexanecarboxamidine**, picrate, P 2231a, P 5038g, 7445b.
——, *N*-phenyl-, and picrate, 7444c.
**Cyclohexanecarboxanilide**, *p*-sulfamyl-, 1028c.
**Cyclohexanecarboxylic acid**, combination with serum albumins, 4708c.
2-diethylaminoethyl ester, 1023c.
esters with keto steroids, 2,4-dinitrophenylhydrazones, 4282c.
formation of, from hydrogenation of 2,4-cyclohexadiene - 1 - carboxylic acid, 6203b.
hydrazides, 4232i.
1-hydroxycyclopentyl ester, 5150e.
——, 1-amino-, ethyl ester, and its -HCl, 572g.
ethyl ester, hydrogenation velocity of, 574a.
——, 5 - (1,3 - benzodioxan - 6 - ylazo)-2,2-dimethyl-4,6-dioxo-, ethyl ester, P 8149c.
——, 3-bromo-1-methyl-2-oxo-, ethyl ester, 2605d.
——, butoxy-, isomers, Bu esters, 6203c.
——, 1 - (3 - chloro - 2 - butenyl) - 2-oxo-, ethyl ester and its phenylsemicarbazone, 7907g.
——, 1-(2-cyanoethyl)-2-oxo-, ethyl ester, 1012i.
——, 1 - cyano - 4 - hydroxy - 2,6 - diphenyl-, and its δ-lactone, 2963g.
——, 2-cyano-2-methyl-4-oxo-, ethyl ester and its semicarbazone, 2200a.
——, 1-cyano-4-oxo-2,6-diphenyl-, and ethyl ester, 2963f.
——, cyclohexyl-. See [*Bicyclohexyl*]*carboxylic acid*.
——, 4 - (1,4 - dihydro - 3 - hydroxy-1,4 - dioxo - 2 - naphthyl)-, 1387d.
——, 1,5 - dihydroxy - 2,3 - diphenyl-, diacetate and γ-lactone acetate, 157d.
——, 2,3(2,4 and 2,5)-dimethyl-, 2964b.
——, 2,6-dimethyl-4-oxo-, and ethyl ester, 1391a.
——, 1 - (3 - ethoxypropyl) - 2 - oxo-, ethyl ester and its 2,4-dinitrophenylhydrazone, 1414g.
——, 1 - [5 - (ethylmethylamino) - 3-oxoamyl]-2-oxo-, ethyl ester and acid oxalate, 7432i, 7433a.
——, formyl-, methyl ester, P 4685f.
——, 2 - (hexahydro - 2,4,6 - trioxo - 5-pyrimidyl)-, ethyl ester, P 1800d.
——, 2-hydroxy-, 588g.
——, 4-hydroxy-, *cis-* and *trans-*, and derivs., 7436di, 7437a.
——, 1 - (1 - hydroxycyclohexyloxy)-, 4253f.
——, 4-hydroxy-2,6-diphenyl-, and its δ-lactone, 2963h.
——, 2-hydroxy-2-methyl-, stereoisomers, 6172c.
——, 1 - hydroxy - 5 - oxo - 2,3 - diphenyl-, and derivs., 157c.
——, 2 - [2 - (3 - indolyl)ethylcarbamyl-methyl]-, 7492c
lactam—see *Benz*[*g*]*indolo*[2,3-*a*]*quinolizin-5*(1*H*)*-one*, 2,3,4,4a,7,8,13,14a-octahydro-.
——, 4-methoxy-, ethyl ester, 7437b.
——, 4-methoxy-2,6-diphenyl-, 2963i.
——, 4 - (*p* - methoxyphenyl) - 1-methyl-2-oxo-, ethyl ester, 3373c.
——, 1-methyl-, reaction of, $H_2SO_4$ and $HN_3$, 9027f
——, 1 - (2 - methyl - 2 - cyclopenten-1-yl)-2-oxo-, ethyl ester, 2586f.
——, 1-methyl-2-oxo-, ethyl ester, 1381b.
——, 2-methyl-4-oxo-, ethyl ester, 3807e.
——, 4-methyl-2-oxo-, ethyl ester, color reaction with FeCl₃, 1008b.
——, 4 - (5 - methyl - 2 - oxo - 4 - imidazolidylmethyl)-, 1769g.
——, 2-oxo-, ethyl ester, color reaction with FeCl₃, 1008a.
ethyl ester, enol-keto tautomerism in gas phase, 6979g.
ethyl ester, reaction with 1,1 dialkyl 4-oxopiperidinium salts, 7432i
——, 4-oxo-, 2958d.
——, 2-oxo-4,4,6-trimethyl-, ethyl ester, 1013g.
——, 2,3,4,5,6-pentamethyl-, 2964b.
——, 2-phenyl-, 8364g.
*cis-* and *trans-*, and benzylamine salt, 8363i.
*cis-* and *trans-*, and salts with 2-benzyl-2-thiopseudourea, 8363e
*cis-* and *trans-*, and their derivs., 2174b.
——, 4-phenyl-, 4-phenylcyclohexyl ester, 1376h.
——, 2,3,4,6(and 2,3,5,6)-tetramethyl-, 2964b.
——, 1-*p*-tolyl-, 2-dimethylaminoethyl ester, P 7959c.
——, 2,3,4(2,3,6 and 2,4,5)-trimethyl-, 2964b.
——, 1,3,3-trimethyl-4-oxo-, and derivs., 7462c.
**1,3-Cyclohexanediacetic acid**, 1-carboxy-2-oxo-, triethyl ester, 2613i.
——, 2-hydroxy-2-phenyl-, diethyl ester, 2613i.
——, 2-oxo-, and diethyl ester, 2613i.
**1,2 - Cyclohexanedicarboxaldehyde**, and derivs., 6196i.
**Cyclohexane - 1,2 - dicarboximide, 3,6-endomethylene-** See *2,3-Norcamphanedicarboximide*
**1,2 - Cyclohexanedicarboximide**, *N*-butyl-, P 4421e
**1,2-Cyclohexanedicarboxylic acid**, alkyl derivs., as corrosion inhibitors, P 1180c.
*cis-*, 6196i.
——, 2,6-dioxo-, diethyl ester, color reaction with FeCl₃, 1008f.
——, 1-methyl-, *trans-*, and diethyl ester, 2200b.
——, 1-methyl-5-oxo-, diethyl ester and its semicarbazone, 2200b.
**1,3 - Cyclohexanedicarboxylic acid, 1-isopropyl - 4 - methyl - 6 - oxo-**, diethyl ester, 3807f.
——, 5 - isopropyl - 2 - methyl - 4 - oxo-, diethyl ester, 3807f.
——, 5 - isopropyl - 2 - methyl - 6 - oxo-1-(3-oxobutyl)-, diethyl ester, 3807f.
——, 4-methyl-6-oxo-, diethyl ester, 3807e.
——, 1,5,5-trimethyl-4-oxo-, diethyl ester, 7462c.
**1,1 - Cyclohexanedimethanol**, α - cyclohexyl-, ethers of, P 902f.
**1,2-Cyclohexanediol**, 7421b.
*cis* and *trans-*, P 6230a.
*cis-* and *trans-*, and derivs., 7434h.
effect on oiliness of lubricants, 1555h.
prepn. of, 7915f.
*trans-*, prepn. of, 1730c.
——, 3-isopropyl-6-methyl-, 7915g.
——, 1-methyl-, diacetate, 2173e.
——, 3-methyl-, and diesters, 2173d.
**1,4-Cyclohexanediol**, *cis-* and *trans-*, and derivs., 7435f.
effect on oiliness of lubricants, 1555h.
*trans-*, polyesters of, P 7755a.
——, 1-ethynyl-, and 4-benzoate, 7416hi.
——, 2-heptyl-5-isoamyl-3-methyl-, 7913c.
**1,2-Cyclohexanedione**, from cyclohexanone, 2196f.
dioxime, 2176c.
as analytical reagent, 3313g.
nickel deriv., 8938g.
reaction with Fe(II), 6032a.
monoxime, as stabilizer for Cl-contg. resins, P 8739f.
1-phenylhydrazone, 7938g.
——, 3,5-dimethyl-, 2-phenylhydrazone, 7938f.
——, 3,4,5,6-tetrahydroxy-, and bis(phenylhydrazone), 153b.
——, 3,4,5-trihydroxy-, and bis(phenylhydrazone), 4726h.
**1,3-Cyclohexanedione**, and derivs., 7478f and derivs., reaction with mercaptans, P 6230h.
and derivs. with aldehydes, 1336c.
——, 2,2'-anisylidenedi-, 1336e.
——, 2,2'-benzylidenedi-, 1336d.
——, 2,2'-butylidenedi-, 1336d
——, 2,2'-cinnamylidenedi-, 1336e.
——, 2,2'-cuminylidenedi-, 1336e
——, 5,5-dimethyl-, disemicarbazone, reaction with NaOEt and with KOH, 123g.
effect on melanoidin formation from amino acids and sugars, 450h.
effect on pepsin, 4709i
formaldehyde detn. with, in carbohydrate oxidation, 1330f.
hydrogenation of, 475c.
reaction product with chloral, alk. splitting of, 2964i.
spectrum of, 4575c.
——, 2,2' - (*p* - dimethylaminobenzylidene)di-, 1336e.
——, 5,5-dimethyl-4-phenyl-, dioxime, 7479b
——, 5,5 - dimethyl - 2 - (2,2,2 - trichloro - 1 - hydroxyethyl)-, 2965i
——, 2,2' - (2,4 - dinitrobenzylidene)di-, 1336e
——, 4,5-diphenyl-, and dioxime, 7479d
——, 2,2'-ethylidenedi-, 1336d.
——, 2,2'-furfurylidenedi-, 1336e
——, 2,2' - (*m* - hydroxybenzylidene)di-, 1336e.
——, 2 - hydroxy - 4,5,5 - trimethyl-2-methacrylate, P 2634g
——, 2,2' - (*p* - methylbenzylidene)di-, 1336e.
——, 2,2' - methylenebis[5,5 - dimethyl-, 1330f.
——, 2,2'-methylenedi-, 1336a
——, 2-methyl-5-phenyl-, dioxime, 7479c.
——, 2,2' - [*m*(*o* and *p*) - nitrobenzylidene]di-, 1336e.
——, 2,2'-piperonylidenedi-, 1336e
——, 2,2'-propylidenedi-, 1336d
——, 2,2'-vanillylidenedi-, 1336e
——, 2,2'-veratrylidenedi-, 1336e
**1,2 - Cyclohexanediphosphonic acid**, mixt. with 1,3 and 1,4 isomers, 8366b.
**1,3 - Cyclohexanediphosphonic acid**, mixt. with 1,2- and 1,4 isomers, 8366b.
**1,4 - Cyclohexanediphosphonic acid**, mixt. with 1,2- and 1,3-isomers, 8366b.
**1,2-Cyclohexanedithiol**, 7419b, 7420b
**Cyclohexaneëthanol** (*2-cyclohexylethanol*)
prepn. of, 573d.
——, β - (2 - dimethylaminopropyl)-α-ethyl-β-phenyl-, 3391d
——, 1-methyl-, and derivs., 3372a
**Cyclohexaneëthylamine** (*2-cyclohexylethylamine*), 1026e.
——, α-dimethyl-, *d-* and *l-*, and salts, P 1802e.
effect on heart, 9250g.
and hydrochloride, 1026f.
——, *N*,1-dimethyl-, hydrochlorides of *d-* and *l-*, pharmacology of, 9249f
——, α-ethyl-*N*-methyl-, P 1802f.
——, α-methyl-, effect on heart, 9250g.
and hydrochloride, 1026f.
——, *N*,α,β-trimethyl-, P 1802e
——, *N*,α,4-trimethyl-, (*cyclohexylpropylic acid*).
**Cyclohexaneglyoxylic acid**
——, 2-oxo-, ethyl ester, color reaction FeCl₃, 1009b.

—, α-thio-, 3820e.
**Cyclohexanehendecanoic acid** (*11-cyclohexylhendecanoic acid*).
—, 4-methyl-, 5666.
**Cyclohexanehexol.** See *Inositol.*
**Cyclohexanemalonic acid, 4-carboxy-α,4-dimethyl-2-oxo-,** triethyl ester, 2605e.
—, 4-carboxy-4-methyl-3-oxo-, triethyl ester, and its semicarbazone, 2605d.
—, 4-cyclohexyl-, diethyl ester, 1377e.
**Cyclohexanemethanediol,** diacetate, reaction with $H_2S$, P 5418e.
**Cyclohexanemethanesulfonic acid** (*cyclohexylmethanesulfonic acid*).
—, 3,3-dimethyl-, and derivs., 9044e.
—, 5-hydroxy-3,3-dimethyl-, and benzidine salt, 9044e.
**Cyclohexanemethanethiol,** and acetate, P 5418f.
**Cyclohexanemethanol,** H 3-nitrophthalate, isomers, 5767e.
—, 1-amino-, and hydrochloride, 572h.
—, 2-amino-, 589b.
—, 2-chloro-, 589a.
—, 1,2-dibromo-, acetate, 159d.
—, α-(2-diethylaminoethyl)-α-phenyl-, hydrochloride, 9071d.
—, 3-(and 2,6)-dimethyl-, 164g
—, 3,3-dimethyl-, and esters, 9044g.
—, α-(2-dimethylaminoethyl)-α-phenyl-, hydrochloride, 9071d.
—, 1,3-dimethylcyclohexyl)-2-hydroxy-4,4,6-trimethyl-†, P 5687
2-hydroxy-, bis(cyclohexanecarbamate), 4233a
—, and derivs., 588k.
4-hydroxy-, *cis-* and *trans-*, and [illegible], 7436e.
2-hydroxy-4-methyl-, 589b.
4-hydroxy-α,α,1,3,4-pentamethyl-, 3777i.
4-methoxy-, and 1-naphthalenecarbamate, 7437c.
α-methyl-α-pyridyl-. See *Pyridylcyclohexanol, α-cyclohexyl-α-methyl-.*
α-phenyl-, esters, P 5797f
3,4-xylyl-, esters, P 5797g.
**Cyclohexanemethylamine, 2-chloro-,** [illegible]
2-cyclohexyl-, and hydrobromide, [illegible]
2-cyclohexyl-N,N-diethyl-, [illegible]
2-cyclohexyl-N,N-dipropyl-, and hydrochloride, 1359d.
2-cyclohexyl-N-propyl-, hydrobromide, 1359d
N,N-diethyl-, and acetate, P [illegible]
N,N-diethyl-2-phenyl-, 1357h.
N,N-dimethyl-2-phenyl-, 1357h
N-ethyl-, and acetate, P 2630h.
2-ethyl-, *cis-* and *trans-*, and picrate, [illegible]
2-methoxyphenyl)-, and hydrochloride, 1357i, 1358f
α-methyl-2-phenyl-, and hydrochloride, 1357i, 1358c.
2-phenyl-, stereoisomers and their hydrochlorides, 1357f.
2-phenyl-N,N-dipropyl-, 1357h.
2-3,4-xylyl)-, and hydrochloride, 1357i, 1358e
**Cyclohexanepentanol** (*5-cyclohexyl-1-pentanol*)
α-cyclohexyl-†, 5015f.
α-isobutyl-, 4651i
α-methyl-, and derivs., 8361a.
**3,4,5-Cyclohexanepentol.** See *Quercitol.*
**Cyclohexanephosphonic acid,** 1315e.
**Cyclohexanephosphonyl chloride†,** 1315e.
**Cyclohexanepropanol** (*3-cyclohexyl-1-propanol*), and esters, 1375f.
—, β-amino-, and salts, 572i.
—, β-amino-4-hydroxy-, and oxalate, [illegible]
—, 4-hydroxy-α,2,6,6-tetramethyl-, 4813g.
—, 4-hydroxy-α,2,2,6-tetramethyl-, isomers, 3798g, 8499b.
—, α-methyl-, and esters and ethers of, P 670d.
and 1-naphthalenecarbamate, 8360k.
—, α-methyl-α-propyl-, 1337c.
—, α-propyl-, and 1-naphthalenecarbamate, 8360h.
**Cyclohexanepropionamide** (*β-cyclohexylpropionamide*).
4-cyclohexyl-, *cis-* and *trans-*, 1375k.
α-methyl-, 1375b
—, 2-phenyl-, *cis-* and *trans-*, 2174e.
**Cyclohexanepropionanilide, 1-ethyl-,** 3371i.
**Cyclohexanepropionic acid** (*β-cyclohexylpropionic acid*).
—, 1-acetyl-2-oxo-, methyl ester, P 5417b.
—, 1-butyryl-2-oxo-, ethyl ester, P 5417c.
—, 1-(1-cyclohexen-1-yl)-2-oxo-, P 6230e.
—, 4-cyclohexyl-, *cis-* and *trans-*, 1375h.
—, β-(*p*-methoxyphenyl)-2-oxo-, and derivs., 3418k.
—, α-methyl-, 1375b.
—, 2-oxo-, 1-acyl derivs., γ-acylazelaic acid esters from, P 6225i.
—, 2-oxo-β-phenyl-, ethyl ester, oxime, 3418f.
—, 2-oxo-1-propionyl-, butyl ester, P 5417c.
—, 2-phenyl-, *cis-* and *trans-*, and their derivs., 2174b.
—, 3-(trifluoromethyl)-, 1382b.
**Cyclohexanepropionitrile** (*β-cyclohexylpropionitrile*).
—, 1-acetyl-2-oxo-, P 7040g.
—, 1-butyryl-2-oxo-, P 7040h.
—, 1-dimethylamino-α,α-diphenyl-, 4243d.
—, 2-oxo-, 1-acyl derivs., γ-acylazelaic acid esters from, P 6225i.
—, 2-oxo-1-propionyl-, P 7040g.
**Cyclohexanepropionyl chloride, 4-cyclohexyl-,** *cis-* and *trans-*, 1375h.
—, 3-(trifluoromethyl)-, 1382b.
**Cyclohexanepropylamine** (*3-cyclohexylpropylamine*).
—, *N,N*-diethyl-, acetate and oxalate, 131d.
—, *N,N*-dimethyl-, and picrate, 1026g.
**Cyclohexane ring.** See *Cyclohexane.*
**Cyclohexanesuccinic acid** (*cyclohexylsuccinic acid*).
—, 4-cyclohexyl-, and monoethyl ester, 1377f.
—, 1-hydroxy-, γ-lactone, and its Me ester, 590f.
**Δ¹ α-Cyclohexanesuccinic acid** (*cyclohexylidenesuccinic acid*), 590e.
**Cyclohexanesuccinic anhydride, 4-cyclohexyl-,** 1377e.
**Cyclohexanesulfamic acid,** as hardening agent for resins, P 9526d.
**Cyclohexanesulfonic acid, 1-hydroxy-,** sodium salt, as antioxidant for photographic developer, P 2106d.
—, 2-hydroxy-, sodium salt, 7421b.
**Cyclohexanesulfonyl chloride,** reaction with hide powder, 4039f.
**1,1,3,3-Cyclohexanetetramethanol, 2-hydroxy-,** esterification with linseed fatty acids, 4871c.
and esters, P 9527i.
**1,1,3,3-Cyclohexanetetrapropionamide, 5,5′-isopropylidenebis[2-oxo-,** P 2228i.
—, 5,5′-oxybis[2-oxo-, P 2228c.
—, 5,5′-thiobis[2-oxo-, P 2228c.
**1,1,3,3-Cyclohexanetetrapropionitrile, 5,5′-methylenebis[2-oxo-,** P 2228c.
**Cyclohexanetetrol, diacetamido-,** isomers, 6582a.
—, diamino-, isomers, and derivs., 6581e.
—, dibromo-, isomers, and derivs., 6581b.
**Cyclohexanethiol,** and lead deriv., 998c.
manuf. of, P 2630a.
and mercury deriv., 1000a.
—, 2-(*tert*-butylmercapto)-, 7420b.
—, 2-[2-(*tert*-butylmercapto)cyclohexylmercapto]-, 7420b.
—, 2-chloro-, and acetate, 7419i.
—, 2-(ethylmercapto)-, 7420b.
—, 2-[2-(ethylmercapto)cyclohexylmercapto]-, 7420b.
—, 2-methyl-, 999e.
—, 2-*N*-methylanilino-, 7420c.
**1,2,3-Cyclohexanetricarboxylic acid, 1,3-dimethyl-,** and its esters, 1042h.
**1,3,5-Cyclohexanetricarboxylic acid,** and trimethyl ester, 3797g.
**1,3,5-Cyclohexanetriol,** α-, crystal structure and configuration of, 6881f.
compd. with $NH_3$, crystal structure of, 6486g.
**1,3,5-Cyclohexanetrione,** trioxime, as vulcanizing agent, 5623f.
—, hexamethyl-, spectrum of, 2598f.
**1,2,3-Cyclohexanetrisulfonic acid, 1,3-dihydroxy-,** trisodium salt, 2595g.
**Cyclohexanevaleric acid** (*δ-cyclohexylvaleric acid*), in penicillin production, 2273i.
—, δ-oxo-, 587e.
**Cyclohexanol,** acetate, 6988e.
acetate and 2-naphthalenecarbamate, 2588i.
acetate, solubilization with Na secondary alkyl sulfates, 466a.
acetate, spectrum of, 1656c.
acetoacetate, 5150e.
acrylate, P 6651b, P 7754h.
adsorption by C and graphite, 7288i.
benzoate, 5150e.
in chloride argentometric detn., 8947f.
α-chloroacrylate, polymer with 1,3-butadiene, P 2471a.
*l*-citronellate, 4633g.
crystn. and nuclei in melt of, 3278a.
dehydration of, 5010e.
dichloroacetate and trichloroacetate, 4220d.
effect on oiliness of lubricants, 1555h.
effect on soly. of petr. ether in water, 465h.
ester(di-) with γ-acetylazelaic acid, P 6226c.
ester (di-) with thiobis[thionoformic acid], 144d.
esters with 3-carboxy-1-methylpyridinium bromide and nicotinic acid, 2622i.
ester with diglycolic acid, 9032e.
ester with maleate of glycerol, polymer with diallyl tetrachlorophthalate, P 3233b.
ethylene chlorohydrin recovery from aq. solns. with, and its esters, P 2633c.
formation in reaction of cyclohexane with $N_2O_4$, P 4694c.
fumarate, P 903h.
heat of wetting of activated charcoal by, 8835f.
insecticide from, P 6778d.
isocyanate—see "cyclohexyl ester" under *Isocyanic acid.*
levulinate, toxicity of, 1867f.
manuf. of, and its alkyl derivs., and lubricant additives by reaction with $P_2S_5$ and salts, P 1959e.
methacrylate, fractionation of polymers of, 6861b.
*p*-nitrobenzoate, in chigger control, 8600b.
phys. consts. of, and its esters, 2955h.
propionate, as flavoring component, 2370h.
reaction with $SOCl_2$, 3780e.
soly. in Na xylenesulfonate solns., 1242e.
in starch fractionation, 6446f.
sucrose soln. interfacial tension against, 2845b.
sucrose soln. work of adhesion in, 2845d.
system: glycerol-$H_2O$-, P 9081d.
*p*- and α-toluenesulfonates, as plasticizers for polysulfone resins, P 7751d.
**Cyclohexanol, 2-amino-,** *dl-*, *cis-* and *trans-*, and derivs., 3372g.
—, 2-(aminomethyl)-, *cis-trans-* and *trans-*, and salts, 588g.
—, 2-(aminomethyl)-1-methyl-, 588k.
—, 1-amyl-, oxidation of, 3366f.
—, 4-*tert*-amyl-, acrylate, P 7754i.
—, 1-benzyl-, oxidation of, 3366d.
—, 2-[(benzylmethylamino)methyl]-1-phenyl-, P 5417f.
—, 1-(3-buten-1-ynyl)-3(and 4)-methyl-, 1166, 1176.
—, 2-chloro-, effect on seeds, 4733i.
thiocyanate, 998g.
*trans-*, 588f, 7435d.
—, 4-chloro-, *cis* and *trans-*, 7435i.
—, 4-(chloromethyl)-, *cis-* and *trans-*, and derivs., 7436h.
—, 4-chloro-4-methyl-, benzoate, 7417c.
—, 1-cyclohexyl-, 5011a.
oxidation of, 3366c.
—, 2-cyclohexyl-, as insect repellent, 2363c.
mixt. with 2-phenylcyclohexanol, as insect repellent in cosmetics, 9335g.
—, 4-cyclohexyl-, acrylate, P 7754i.
*cis-* and *trans-*, and derivs., 159i.
*cis-* and *trans-*, H bonding in, 6174c.
optical crystallographic properties of, 7773c.
—, 2-cyclohexylidene-1-(2-pyridyl)-, and hydrochloride, 2205f.
—, 2,4-diamyl-, acrylate, P 7754i.
—, 1,1′-(1,2-dibromoethylene)di-, 4253b.
—, 2-(diethylaminomethyl)-1-phenyl-, 1357i.
—, 1-(3-diethylamino-1-propynyl)-, acetate (ester), hydrogenation of, 131d.

——, **4,4'-(1,2-diethylethylene)di-**, *meso-* and its dibenzoate, 2194*f*.

**Cyclopentane,** chlorination (photochem.) of, P 6644*h*.
compressibility and ultrasonic velocity in, 4532*b*.
dehydrogenation of, 8255*a*.
derivs., 5370*g*, 5751*a*, 7911*e*.
d. and refraction of *n*-alkyl, 6023*f*.
heat capacity of, 1638*c*.
hydrogenation of, 7906*g*.
hydrogenation of, with ring opening, 1332*b*, 5009*i*.
detn. in petroleum-refinery $C_5$ fractions, 8123*f*.
effect on myocardium sensitivity to adrenaline, 1111*e*.
extn. from 2,2-dimethylbutane with liquid $NH_3$ solns., P 3192*e*.
formation from cyclohexane under hydrogenating conditions over Fischer-Tropsch Co catalyst, 7664*b*.
in gasoline (Thermofor cracked), 4453*c*.
hydrogenation of, 589*c*.
hydrogenation of, with ring opening, 155*c*.
manuf. of, P 6818*g*.
mass spectrum of, 3288*g*.
oxidation of, P 2225*i*, P 5422*c*.
phys. consts. of, 2955*h*.
reaction with polychloro ethylenes, 9024*h*.
thermochemistry of, 7215*i*.
Verdet const. ratio to refractive dispersion for, 4911*b*.

of butane with Cr oxide catalysts, P 1175*a*.
of 1-butene, app. for, P 3436*e*.
of butenes, P 662*i*, 3644*b*, P 8603*d*.
to butadiene, 4213*i*.
to butadiene, catalysts for, P 5135*d*.
removal of catalyst poisons from steam in, P 7950*g*.
of *sec*-butyl alc. by Cu and Zn chromite, 1249*c*.
catalysis of, 8251*d*.
catalysis of, by $TiO_2$, 8828*c*.
catalyst chamber for, elec. heater for, P 4151*b*.
catalysts for, P 370*c*, P 5410*a*, P 6762*g*, P 7610*b*, P 8579*f*.
catalysts in, 1635*a*.
alumina as, 1250*d*.
poisoning of Ni, 2499*b*.
regenerating S-contg. oxide, P 3188*i*.
catalyst transfer in, P 1230*d*.
of cholesteryl acetate, 5408*d*.
by *Clostridium welchii*, 5448*f*.
of cumene, P 680*e*.
cyclo-, 4249*h*.
of 1,1′-binaphthyl, 3402*h*.
of Schiff bases, 9065*f*.
synthesis of morphinans by, 6635*e*.
of cyclohexadiene and cyclohexene derivs., 5377*d*.
of cyclohexane, 6567*a*, 7911*hi*.
to $C_6H_6$ by enzymic action, 4343*b*.
blocking of catalysts in, 7802*c*.
on platinized C, 1249*f*.
of cyclohexane and cyclopentane, 8255*a*.
of cyclohexane and decahydronaphthalene on oxide and metallic catalysts, orientation of mols. in, 4551*d*.
of cyclohexane derivs. by Br, 158*e*.
of cyclohexenones to phenols, 2968*h*.
of cyclopentene, kinetics of, 3271*f*.
of 1,2-diacyl derivs. of hydrazine to diimide derivs., 5368*i*.
of 1,1-diarylparaffins, P 2235*d*.
of dienes by nickel-Clarite, 109*a*.
of diethyl bicarbamate, 1725*g*.
of 8,9 - dihydro - 5*H* - cycloheptabenzene-5,6(7*H*)-dione, 5753*c*.
of dimethylcyclohexane and isopropylcyclohexane, equil. in, 8246*h*.
of dimethylcyclopentane and methylcyclohexane to toluene, P 5186*i*.
of 1,3-dimethyl ether of 5-allylpyrogallol, 1029*c*.
of ethane by selective oxidation, 7898*a*.
of ethyl alc., 8252*h*, 9028*a*.
of ethyl alc. and HCOOH vapors on catalysts, 6497*i*.
of ethyl alc., thermodynamics of, 8247*b*.
of ethylbenzene, 473*a*.
of ethyl benzenes, kinetics of, 165*d*.
of fats, 3976*f*.
of fatty acids, 2940*f*, 3357*c*.
of fichtelite, 6601*f*.
of formic acid on Cu-Pt alloys, 4088*c*.
of gasoline with Pt-C catalyst in hydroaromatic-hydrocarbon identification, 4838*i*.
of hydroaromatic compds., adsorption coeffs. in kinetic study of, 1731*e*.
of hydroaromatic compds., kinetics of, 1732*a*.
of hydrocarbon oils in vapor phase with mixed oxide catalysts, P 5181*b*.
of hydrocarbon oil with catalysts evolving const. amt. of heat during continuous regeneration, P 8664*c*.
of hydrocarbons, P 5030*e*, P 5031*c*, P 5039*g*.
by activated C, 5656*h*.
with $Al_2O_3$-BeO catalyst, P 6404*c*.
$Al_2O_3$-$MoO_3$-$TiO_2$ catalysts for, P 1561*d*.
app. for catalytic, P 6873*g*.
catalysts for, P 1538*h*, P 1930*h*, P 3161*e*, P 4791*g*, P 6763*b*, 9209*f*.
Cu-Mg catalyst for, P 9430*d*.
in presence of gaseous diluent, P 4683*e*.
prevention of secondary reactions in, P 3191*d*.
stripping catalyst used in, with $CO_2$, P 9078*e*.
hydrogenation and, of cyclohexane-cyclopentane mixts., 155*c*.
hydrogenation and, of hydrocarbon oils, P 1955*f*.
hydrogen evolution in, app. for measurement of, 8749*i*.
of indan, 6608*h*.
of α- and β-ionone with bromosuccinimide, 2589*a*.
of isoborneol, 5382*e*.
isomerization and, of $C_4H_{10}$ and paraffins, P 1955*i*.
of isopropyl alc. on $Cr_2O_3$ catalysts, 4087*d*.
of isopropylbenzene to α-methylstyrene, 4234*c*.
of lanosterol derivs., 7495*e*.
by *Merulius lacrymans* and *Marasmius chordalis*, 9160*h*.
of *N*-(3,4-methylenedioxyphenethyl)-2-pyridineacetamide (attempted), 1412*i*.
of naphthenes with S, 5376*e*.
of naphthenic hydrocarbons, app. for, P 7678*b*
of nitriles, P 2220*e*.
of nitro compds., P 4683*d*.
of nucleoprotein components from normal and cancerous cell nuclei, 4304*i*.
of olefins, P 3023*c*.
catalysts for, P 2382*ei*.
while maintaining K content of catalyst, P 2764*f*.
of paraffins, P 660*g*.
of 1,4-pentanediol, P 3451*e*.
of petroleum oils, catalyst for, P 1931*g*.
pilot plant for, 4522*c*.
of piperazine, P 1813*d*.
in pyrolysis of alky derivs. of benzene, 7916*h*.
of resinenes, 3597*i*.
with rhodium, effect of S on, 27*i*.
of rosin or rosin oil, nondrying oils by, P 4873*c*.
of rubber distn. oil during cracking with active clay-$V_2O_5$ catalysts, 5620*b*.
temp. control in, P 2763*g*.
of 6,7,8,9-tetrahydrobenzo[*g*]quinoline, 1420*g*.
of 1,2,3,4-tetrahydrocarbazole and derivs., 1391*b*.
of 1,2,3,4-tetrahydronaphthalene 2-derivs., 1382*d*.
of 1,2,3,4 - tetrahydro - 1 - naphthaleneéthanol, 6609*f*
of 2-o-tolyl-2-butene, 5012*d*.
in tumor, interrelationships of biotin, $CO_2$ and heavy metals in, 2694*g*.
with uranium, 7853*h*.
of yohimbine, 5786*b*.

adhesive from borax and, P 8744b.
alginate-contg., P 8212i.
as carbon source for *Bacillus subtilis* and its action in amylase formation, 2278e.
conversion into polysaccharide with serological properties of dextran by bacteria, 7079d.
detection of, 5704a.
detn. in beer and must, 3970g.
in sirup, 4502b.
in sugar mixts., 8979f.
in dye stabilization, 4856f.
effect on dental caries, 8022i.
on growth of plant tissue, 4349a.
on growth rate of electrolytic single crystal of Ag, 4584c.
on histoplasmin formation, 719h.
on intestinal microflora of hens, 736e.
on microörganisms in cecal contents of rats, 2277a.
electrodeposition in presence of, elec. oscillations from, 2874f.
hydrolysis of, phosphatases in, 5061d.
limit or residual, -A in amylolytic degradation of starch, sensitization of, 723f.
limit or residual (β-amylase), mol. assocn. in, 2584a.
β-limit or residual, malt α-amylase adsorption by, 9504k.
limit or residual, phosphorus in, 5218f.
macerans-amylase action on, 584b.
malt-amylase action on, 5219a.
malt, in preservation of aroma of coffee substitutes, P 5884a.
malt, in preservation of aroma of teas, P 5884b.
mixts. with alkali and borax, properties of, 9500b.
mixt. with maltose, milk and rice in baby food, 8566h.
pastes, 8717a.
raw materials for, P 1590a.
reaction products with urea-HCHO resins, P 901e.
recovery from stillage sirup, P 816c.
Schardinger, 6986h, 7906e.
Schardinger, and derivs., 2584c.
tricarbanilates from corn β-amylase limit, corn torrefaction and Schardinger β-, 154b.
utilization by *Drosophila*, 322h.
**Dextropimaric acid.** (See also *Isodextropimaric acid.*)
detn. of, 5550g.
oxidation of, 6185e.
from pine oleoresin, 1390c.
sodium salt, chem. structure and emulsifying activity in GR-S rubber polymerization, 8724i.
**Dextropimarylamine***, from rosin amine, 9379a.
**Dextrose.** See *D-Glucose.*
**DFDT.** See *Ethane, 1,1,1-trichloro-2,2-bis-(p-fluorophenyl)-.*
**DFP.** See "(iso-PrO)$_2$P(:O)F" under *Isopropyl fluophosphates.*
**D.H.S. Activator**, in mosquito control, 2730g.
**Dhupa fat.** See *Fats.*
**Dhurra.** See *Sorghum.*
**Di-.** *See also words beginning with* Bi-.
**Diabases.** (See also *Diorites; Dolerite.*)
of Atlantic (mid-) ridge, 6548c.
of California, 2904h.
Caucasus Jurassic, 2552c.
effect on properties of magnesite refractories, 6384b.
enstenization in Palisade Sill, in Minas Gerais, Brazil, 5709b.
micropegmatitic, of British Guiana, 3751h.
of Minnesota (Duluth area), 6548e.
norms of average analyses of, 2552b.
Siberian basalt diabase porphyrites and, Cu and Ni in, 3750c.
sodium metasomatosis and, 6130d.
of Sweden (Schäre Halsaren) and its hybrids with Jotnian sediments, 4984i.
**Diabetes.** (*Diabetes mellitus is usually meant unless otherwise stated; see also* Glycemia; Glycosuria; Paradiabetes.)
acetate and pyruvate utilization by heart and diaphragm in, 8513d.
acetone bodies and sugar in blood in, effect of nicotinamide on, 4383g.
acetylation in, 9220f.
acidosis in, Ca, Mg and K in blood serum in, 5855a.
aconitases (α- and β-) in relation to, 7058g.
alloxan, 301d, 2304ef, 5483c, 7122f, 8523h.
adrenal cortex in, 8043h.
amino acid excretion in urine during, 8057b.
antibody formation in, 1481a.
BAL in prevention of, 758a.
benzopyrene-induced sarcoma in, 3515c.
bile secretion during, 4364f.
after clamping renal pedicles, 3513c, 5106e.
coagulability of blood in, 1478h.
complement in, 7569c.
diet effect on, 4364h.
diethylstilbestrol effect on, 7138b.
effect of high-fat diet in, 9234c.
effect of insulin on intestinal glucose absorption in, 317d.
effect of thiouracils and cysteine on, 5118c.
effect on cholesterol atherosclerosis, 5859d.
effect on fertility and gestation, 5106c.
glucose metabolism after hemorrhage in, 753d.
hyaluronidase in testis in, 1479a.
incidence, control and regression of, 5111c.
insulin secretion and, 4362d.
ketosis in, 4762d.
kidneys in, 748h, 5484g.
lipase in blood serum in, 9216a.
methylene blue effect on, 5498h.
and its modification by hypophysectomy, 5851d.
oxidation of D-glucose in, 2310a.
pancreas in, 1100f.
pantothenic acid effect on, 294d.
phosphatase in blood serum in, 5486h.
phosphatase in intestine and kidneys in, and effect of insulin thereon, 2318c.
pituitary, adrenal and thyroid glands and pancreatic insular tissue in, 1853i, 1854ab.
sensitivity to insulin in, and effect of methylthiouracil thereon, 4377fg.
in sheep, 8049c.
in sheep under fasting and nonfasting conditions, 753a.
thiamine deficiency in rats in, 293i.
thiamine effect on carbohydrate metabolism in, 2696b.
vitamin $B_1$ requirements in, 2306f.
in young and old, 7578h.
antibody response in, blood sugar and hypoproteinemia in relation to, 4759h.
antidiabetic properties of sumac, 6746a.
antimellitus principle from *Scoparia dulcis*, P 366i.
appetite in, 5485d.
from barbituric acid, uracil, ninhydrin and urethan, 2314g.
blood sugar in relation to diastase content in, 3505b.
books: The Endocrines in, 756a; Manual, 1104d; und Tuberkulose, 3925i; and its Treatment, 4371e.
bronze—see *Hemochromatosis.*
caramelized honey in diet in, 3515e.
coma, blood sugar in, 9234d.
MeOH in tissue in, 9236i.
potassium in blood serum in, 4366b.
coma from treatment of, in relation to biochemistry of sugar metabolism, 8060g.
Cushing's syndrome in, 17-hydroxycorticosterone in urine in, 803a.
development and progression of, 6301i.
fat action in, effect of thiouracil on, 7588i.

fetal hypophysis ability to produce, 1854*b*.
gangrene in, arteries in, 8047*d*.
glandular activities and nutrition in, 8523*h*.
from glucose administration, 7569*d*.
glucose and N in urine in, after hypophysectomy, effect of pituitary growth and adrenocorticotropic hormone on, 2692*b*.
glucose, ketone bodies and N in urine in, effect of pituitary growth and adrenocorticotropic hormones on, 2691*i*.
glucose metabolism in diaphragm and, 8029*c*.
glucose tolerance in, 8424*g*.
glutathione effect on, 6299*c*.
glycogen in kidneys in, 8518*d*.
glycogen in liver in, 751*h*.
hexokinase reaction of tissue in, 4369*i*.
hormones inducing—see "of anterior lobe" under *Pituitary extracts;* and "hormones of anterior lobe of" under *Pituitary gland*.
insipidus, kidney function and blood proteins in, 7568*e*.
insipidus, posterior pituitary powder in treatment of, 8520*h*.
insulin implantation in, 5121*a*.
ketone body excretion in, effect of fatty acids on, 1479*i*.
labile, electroencephalographic status and effect of anticonvulsive therapy in, 1102*f*.
lactic and pyruvic acids in blood after glucose and exercise in, 5111*b*.
after ligation of ovarian pedicles, 3512*g*.
lipemia and hemochromatosis in, 1858*e*.
lipides and P in blood, liver and muscles after exercise in, 9217*e*.
metabolism in, 5487*c*.
metabolism in, effect of adenosinetriphosphoric acid on, 2698*f*.
nutrition and, 749*i*.
